*Does not include MP3 player, lead, mobile phone or phone cradle.

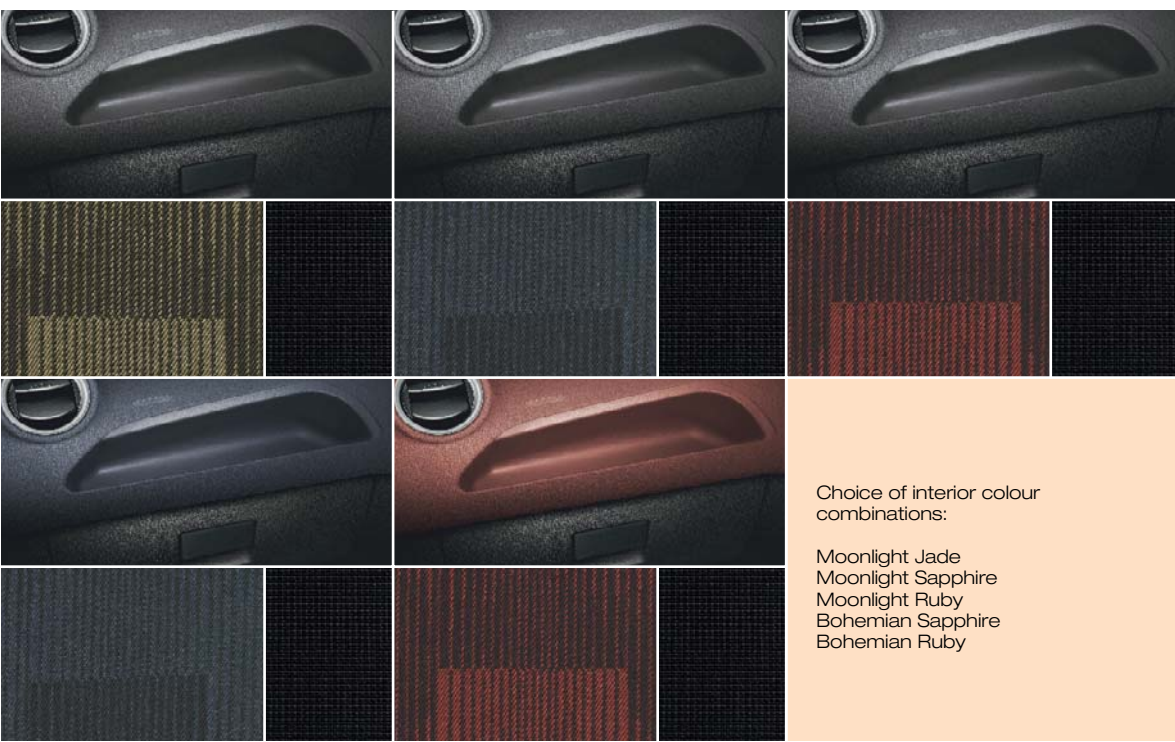

Bluetooth® explained

Bluetooth® wireless technology allows electronic devices to communicate by radio waves instead of cables.

Coupled with voice control, it provides a convenient way to use a Bluetooth®-compatible mobile phone* as well as audio systems with the safety of both hands on the wheel.

When a call is made, the audio system's volume will lower and the caller's voice is relayed through the speakers, so you won't need an earpiece.

Choice of interior colour combinations:

Moonlight Jade
Moonlight Sapphire
Moonlight Ruby
Bohemian Sapphire
Bohemian Ruby

Just talk

Tell your CD player what track to play and at what volume.

Getting there

Voice activate your phone* and call your friends hands-free to find out where you are meeting.

Get in the mood

Using the standard portable music connection socket, just plug in your MP3* to play your own music on the way.

A great voice for music

Remote controls – activate the voice control system and adjust the sound system using your fingertips.

Get home safe

Your headlights stay on for a few seconds after you have parked so you can find your way indoors.
