# **Škoda**Fabia features and benefits

### Air Conditioning - Safety and Comfort

Air conditioning offers great advantages over standard ventilation and the first is keeping your car cool during the summer months. But surprisingly becomes an effective tool in winter, demisting the windows faster than standard ventilation. Other added benefits include increased residual values and desirability.

### ABS - Safety

ABS requires no conscious thought, training or additional maintenance. Drivers simply have to react as they normally would in an emergency - jam on the brakes, but with ABS they retain steering control.

These will assist you when parking your vehicle by informing you when you are approaching objects or other vehicles through an audible tone. This is

### Height adjustable steering wheel + height adjustable drivers seat

Enables you to get comfortable in your car. This not only helps on a long journey but adds to your safety.

### Remote control central locking safety and assurance

This function enables you to unlock your car whilst you are walking towards your vehicle even with your hands full. Standard on Elegance & vRS only.

### ESP - Safety

This is a completely automatic function, where the driver has the option of switching it on or off. The most remarkable characteristic of ESP is that it ensures the vehicle follows the path desired by you according to the rotation of the steering wheel. This makes some unorthodox driving manoeuvres difficult and near impossible (slides and spins).

### **Cruise Control**

Provides you with comfort on long journeys by assisting you to maintain safe driving speeds by setting your speed as the circumstances dictate.

always a better solution than bodywork repairs.

### **Xenon Headlights**

Increase brightness up to 2.5 times more than halogen lights whilst using 35% less energy giving you the added benefit of increased visibility at night.

### 3 year / 60,000 Mile Warranty

ŠkodaAuto are pleased to provide a two year unlimited mileage warranty. In addition, ŠkodaAuto UK provides a further warranty on new vehicles supplied by them through their appointed retailer network which is valid until the vehicle has completed 60,000 miles or the end of the third year, whichever is the sooner (see page 21 for more details).

### Inclusive AA cover for 3 years

Accessed through a dedicated Freephone number, this free back-up service covers your Fabia for Roadside Assistance, Relay and Relay Plus, Home Start and includes European cover.

<sup>\*</sup> Weight depending on equipment level \*\* Fuel consumption depending on equipment level according to EU Directive 93/116  $\ \square$  Where law permits.

### Power transmission

**Clutch** Hydraulically-activated single-plate dry clutch with diaphragm spring, asbestos-free coating.

**Manual transmission** Five-speed manual transmission, fully synchronised with direct gearshift.

**Automatic transmission** Four-speed with fuzzy logic system (only with 1.4/16V 75bhp).

### Chassis

Front axle/rear axle McPherson strut with lower control arms and transverse torsion stabiliser/crank axle with trailing arms

**Suspension** Coil springs, telescopic shock absorbers, rear springs located outside the shock absorber.

**Braking system** Hydraulic dual-circuits brake in diagonal configuration, with a vacuum booster with rear brake force limiter, dual master cylinder (for 1.4/16V 100bhp standard with ABS + EDL + ASR).

**Front brakes** Ventilated disc brakes in sliding calliper design with piston.

**Rear brakes** Drum brakes with two self-adjusting brake shoes, or disc brakes (depending on engine type).

**Handbrake** Mechanical handbrake operating on rear wheels.

**Steering** Maintenance-free rack-and-pinion steering with power assist.

Turning circle (m) 10.48

### Tank

Fuel tank content 45 litres

Fuel Unleaded petrol RON 95 or unleaded petrol RON 91 $^{\dagger}$ . Unleaded petrol RON 98 or RON 95 $^{\dagger\dagger}$  (1.4/100bhp).Diesel (1.9 SDI/64bhp).

### Bodywork

**Bodytype** Five-door, five-seat, double-space steel bodywork, fully zinc-coated.

### Official fuel consumption for the Fabia range in mpg (litres/100km):

 urban
 25.7 (11.0)
 - 49.6 (5.7);

 extra urban
 47.1 (6.0)
 - 68.9 (4.1);

 combined
 36.2 (7.7)
 - 61.4 (4.6).

- $^{\dagger}$  Lower efficiency when using RON 91 petrol.
- †† Lower efficiency when using RON 95 petrol.
- \*\*\* Please note that production of the 1.9 SDI 64bhp and the 1.4 TDI PD 75bhp engines will cease week commencing Monday 17th October. These will be replaced by the new 1.4 TDI PD 70bhp/80bhp engines.
- ††† From week 43, 24th October 2005 the Fabia vRS engine becomes EUIV compliant.
- From build week 42, week beginning 17th October, the 1.9 TDI 100bhp engine becomes EUIV compliant.

# **Škoda** Fabia and the environment

ŠkodaAuto views the development and manufacture of environmentally friendly products as one of its foremost priorities, and this in all phases of the products' life cycles. In order to fulfil this criterion we have taken the following steps in the manufacture of our vehicles:

We have placed the main emphasis on the use of recycled materials. The parts used in the Fabia are marked according to appropriate standards. This allows their fast identification during disassembly and any subsequent separation of various groups of parts. Construction design of these parts is optimised with regard to their easy and fast disassembly when the vehicle is being dismantled at the end of its life cycle.

We manufacture Škoda vehicles using progressive technologies in the most modern production facilities which correspond to the highest and strictest criteria. For anti-corrosion protection of the painted part of the vehicle we always and without exception use leadless cataphoresis (KTL) and waterbased colours.

Cutting the consumption of fuel and emissions is done within the framework of the concern strategy with both petrol and diesel engines. In the area of combustion we achieve lower consumption of fuel by minimising the frictional loss in wheel traction, optimising vehicle aerodynamics, reducing energetic consumption and decreasing the weight of parts and at the same time continuing to meet all of the required parameters. All engines we offer meet the current emission guidelines.

In construction of the vehicle we pay special attention to limiting the possibility of the escape of service fluids, in the framework of manufacturing of the vehicle, its operation and service. All products of ŠkodaAuto meet the requirements of laws and guidelines for the protection of the environment, both earth and water.

In consequence of using the most modern analytical methods and the follow-up measures, we are also able to decrease noise levels and improve sound quality.

The result of all of these activities is that the Škoda Fabia car fulfils not only the requirements in the technical area, in safety and quality, but also in the area of protection of the environment. ŠkodaAuto thereby contributes to the preservation of a clean, healthy environment while at the same time guaranteeing the mobility and satisfaction of their customers.

# Technical glossary

ABS: the anti-lock braking system prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable. When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the system reduces brake pressure to that wheel.

MSR: the engine torque control system recognises when the wheels are subject to too much slippage and regulates the power supply by intervening in the engine management system. This prevents wheelspin when, for example, changing down on a smooth or wet road surface.
MSR is a constituent part of the ASR system.

**EDL:** the electronic differential lock continually compares the rpm of the drive wheels, and if it identifies a difference between them which could lead to an individual wheel spinning, for example if the two wheels are on different types of surface or accelerating on wet leaves, the system brakes the wheel affected until uniform rpm of all drive wheels is restored.

**MBA:** the mechanical brake assist system increases brake effort under emergency braking conditions through a dual rate servo.

ASR: Anti-Slip Regulation traction control ensures the Fabia's stability when pulling away or accelerating. If the engine power or torque being transmitted to the drive wheels is too great, for example on a slippery road surface, engine torque is automatically reduced until optimum road-holding returns, thus preventing wheelspin. A light indicates whether the ASR system is on. It can be manually switched off.

Xenon lamps: the Xenon lamps produce about 2.5 times the light of standard Halogen lamps with 35% less energy consumption.

**ESP:** Electronic Stability Programme is designed to stabilise the dynamic handling response of the vehicle by counteracting any tendency towards oversteer or understeer. The ESP constantly compares the actual movement of the vehicle with predetermined values and according to the situation ESP reacts by braking each wheel individually (according to direction of slip) and automatically adjusting the engine's output.

CAN Bus: the CAN Bus is an electronic data bus which links the various different electronic control systems in the car. It ensures ideal co-ordination between systems and reduces the amount of wiring needed in the car.

**Fuel cut-out:** should one or more of the airbags inflate after an accident, this system automatically cuts out the fuel supply, thus preventing subsequent leakage of the diesel or petrol.

Trip Computer: the trip computer not only features an impressive range of data displays, operating it is simplicity itself.

A multifunction touch key enables you to call up all relevant data on the easy-to-read display. Features include external temperature, time, current fuel consumption, average fuel consumption, miles driven and average speed.
