CITROËN ENVIRONMENTAL COMMITMENT

> INTRODUCING A MORE ECOLOGICAL CAR

The Citroën C-Cactus concept, a car designed on ecological principles. It includes a significant proportion of recycled or recyclable materials and, like the plant it is named after, it is low on liquid consumption. At the same time, Citroën C-Cactus is designed to be no more expensive than a mid-range family car. This can be attributed to the use of new materials and to a rational design process using a smaller number of parts. Citroën C-Cactus is an essential vehicle reflecting a new vision of the car, many of its thoughts and themes will appear in modern Citroën vehicles to come.

> AIRDREAM – A BENCHMARK

When it comes to the environment we wanted to show our genuine commitment as well as our profound expertise, so we have devised a benchmarking scheme with the signature 'Airdream' reserved exclusively for the cleanest vehicles in our range. To qualify for the Airdream signature, vehicles must meet three standards:

- 1. a) CO_2 emissions of 120g/km or less b) fitted with DPFS with CO_2 below 158g/km.
- 2. Manufacturing quality of ISO14001.
- 3. 95% of recoverable materials.

GREEN EFFICIENCY. CITROËN HAS BEEN PIONEERING CLEANER, MORE FUEL-EFFICIENT MOTORING, SUCH AS THE COMMON RAIL HDI ENGINES NOW FITTED IN ALL NEW CITROËN DIESELS, LONG BEFORE ALL THE HYPE...

CITROËN HAS ALWAYS BEEN AT THE FOREFRONT OF GREENER TECHNOLOGY AND THE NEW CITROËN DS3 IS NO EXCEPTION. TODAY, WE HAVE ONE OF THE UK'S WIDEST RANGES OF LOW EMISSION VEHICLES – THREE OF WHICH ARE IN THE TOP FOUR FOR LOW $\rm CO_2$ AND FUEL-EFFICIENCY. WE ALSO PRODUCE ONE OF THE UK'S MOST ECONOMICAL LIGHT COMMERCIAL VEHICLES, THE CITROËN NEMO VAN.

On the technology side, we've been equipping more of our vehicles with more environmentally friendly breakthroughs, such as our Electronic Gearbox System (EGS), which boasts impressively greener credentials, with less pollution and up to 5% more economy than a conventional manual gearbox system. In addition,

CITROËN **DS3** GLOSSARY

> HIGH-PRESSURE DIRECT INIECTION DIESEL ENGINE

Citroën's HDi diesel engines operate with the fuel under extremely high pressure, enabling microscopically precise injection control. With this level of management it's possible to inject at different times during the same engine stroke allowing total control over the combustion process. This has allowed our engineers to reduce carbon monoxide emissions by 40%, unburned hydrocarbons by 50% and engine particulates by 60%. Fuel consumption is 20% lower than a prechamber diesel engine, resulting in an equivalent reduction in CO₂ emissions and thanks to the torque available at low engine speed it could be argued that driveability is now better than in petrol engined cars.

> ANTI-LOCK BRAKING SYSTEM (ABS)

Computer-controlled braking assistance designed to prevent the wheels from locking under extreme braking. This enables the car to continue being steered and therefore controlled during this braking incident. The new Citroën DS3's ABS system is further enhanced with FBA and FBD.

> ELECTRONIC BRAKEFORCE DISTRIBUTION (EBD)

A conventional ABS system cannot account for any of the four wheels wanting to lock more quickly than the others (for example, two of the wheels may be on snow and two on tarmac). EBD reads the deceleration rate of each wheel individually and applies the ABS principles accordingly.

> EMERGENCY BRAKING ASSISTANCE (EBA)

As drivers we find it difficult to instinctively brake very hard, but this is often what is needed in those rare emergency situations. The EBA system recognises our 'attempt' to brake hard and in combination with the ABS and EBD systems instantly applies the maximum stopping power possible.

> ELECTRONIC STABILITY PROGRAMME (ESP)

This is computer-controlled traction assistance and is provided primarily through the braking systems. The ESP's control unit constantly compares where the driver intends going (through the position of the steering wheel) with where the vehicle is actually going and, if necessary, makes speed corrections to each wheel individually through braking or engine torque to keep the vehicle 'in line'.

> MYWAY COLOUR SATELLITE NAVIGATION

MyWay is completely integrated into the vehicle which avoids the risk of theft. The design has been created for ease of use and with steering wheel controls, navigating from your phone to the satellite navigation couldn't be any easier.

MyWay allows you to define routes, stops and places of interest with the added benefit of vocal instruction. MyWay also provides live traffic updates of any congestion spots or delays.

A GPS integrated aerial is built into the vehicle, to maximise the reception of satellite information; therefore permitting an accurate location of the car.

> ON-BOARD TRIP COMPUTER

The new Citroën DS3's multi-function on-board trip computer provides you with information at your fingertips. At the touch of a button you can view a range of data like fuel consumption, average speed and mileage possible at your current fuel level.

> RADIO DATA SYSTEM (RDS)

Traffic information on FM radio, allowing the station name and other information to be transmitted alongside audio information.

> VARIABLE POWER ASSISTED STEERING

A system that provides extra power assistance for a vehicle's steering at low speeds (such as turning a sharp corner) and less assistance during high-speed situations.

> FRONT SEAT BELT PRE-TENSIONERS

In the event of a crash, a pre-tensioner will tighten the seat belt almost instantaneously. This reduces the load on the occupant in a violent crash. Like airbags, pre-tensioners are triggered by sensors in the car's body, and use explosively expanding gas to drive a piston that retracts the belt. Seat belt pre-tensioners also lower the risk of "submarining", which is when a passenger slides forward under a loosely worn seat helt

> ISOFIX

A standardised and more simple method for installing child seats, each seat is 'clicked' into place via a three point system. On new Citroën DS3, Isofix is installed on the outer rear seats.
