ŠkodaYeti

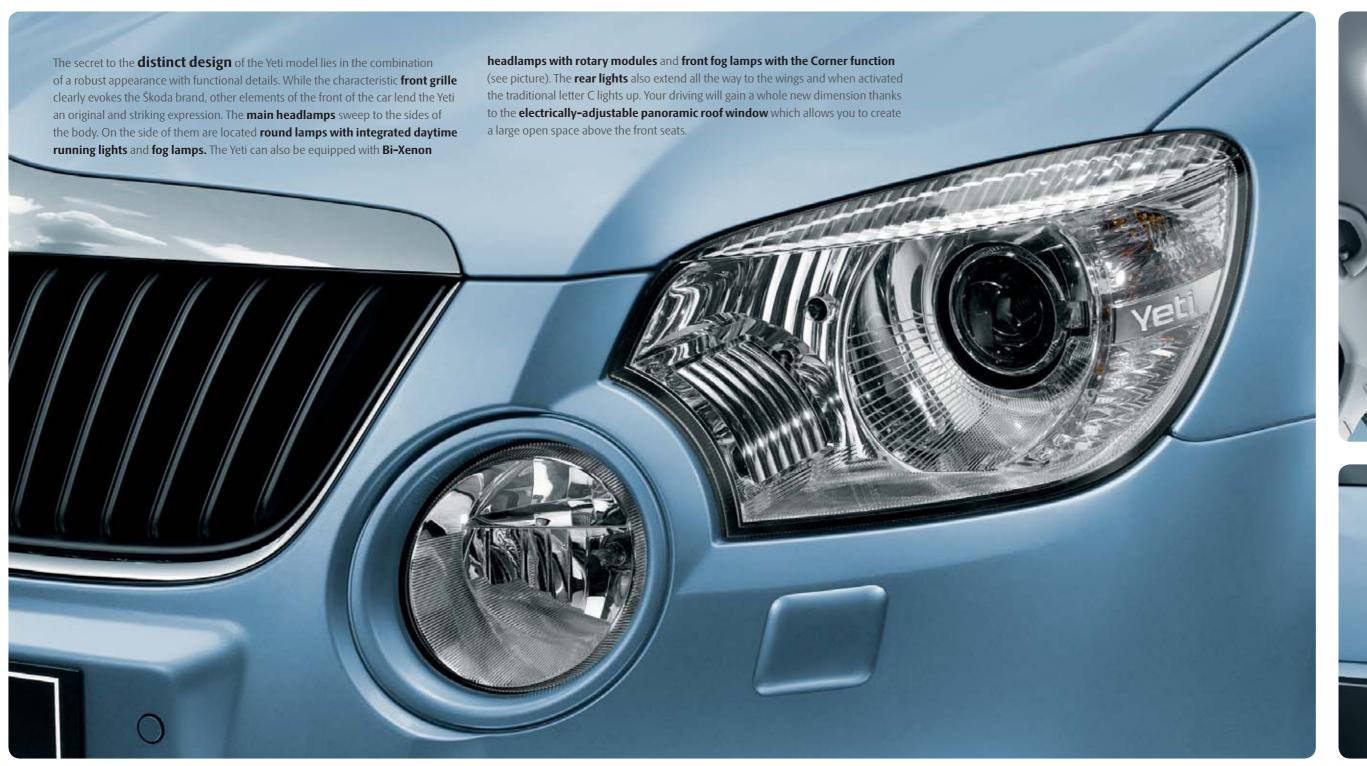

If you want to reveal his **real skills** you'll need to go off the common trails. Do not fear the mud and sand. The **Yeti model with a 4x4 drive**, backed by the 4th generation Haldex clutch as well as an **off-road mode**, can easily negotiate even difficult terrain. The off-road term represents a number of functions such as the hill descent assistant or start-up assistant, the adaptation of the ABS, ASR and EDS electronic systems to the driving conditions and a more sensitive accelerator configuration.

The Yeti represents a perfect mix of comfort and practicality as well as sports style and elegance. This is demonstrated for example by the **noble steel foot pedal covers** or the **integrated telescopic headlamp washers**.

You will discover **state-of-the-art technologies** behind the pleasant drive. The Yeti offers a wide choice of radios, navigation systems, phone preparations as well as multifunctional steering wheels. It can also be equipped with **MDI** (Mobile Device Interface) which is a connector located in front of the gear stick that enables control of an external device through buttons on a radio, navigation system or multifunctional steering wheel. The high technology is further represented by the engines, some of which are available with front-wheel drive. The 1.2 TSI/77kW engine will also be available with an **automatic 7-speed DSG transmission**. A complete overview of engine versions and technical specifications is included in the catalogue.

The **Bolero radio** is a modern audio system featuring many functions, including an integrated 6-CD changer. An excellent listening experience will be ensured by the **Sound System** with 12 speakers plus a digital equaliser.

Recommended gear shift function is displayed in the top right corner of Maxi DOT or on the on-board computer display.

The **Columbus navigation system** offers, amongst others, off-road navigation. This feature enables you to record and save a route taken by the vehicle off the digitised road network, for example on unpaved roads.

If there is an area that must be clear from the outset it is **safety.** No room for secrets or surprises. You should know that the Yeti was designed with the highest regard to the driver's and passengers' protection as well as consideration for pedestrians.

The **front side airbags** protect the pelvis and chest of the driver and passenger in the event

of a side collision. The height-adjustable WOKS front headrests are designed to protect the cervical spine in case of a rear impact.

The **double sun shield** protects the driver and front passenger from blinding rays entering from the front as well as the side.

The **head airbags**, which create a wall along the side windows when activated, protect passengers' heads in the front and rear.

The third headrest in the rear is height adjustable and increases the safety of the passenger in the middle seat.

The rear side airbags, which are activated by a side impact, protect the pelvis and chest of passengers on the rear side seats.

The **Boarding Spots**, designed to illuminate the entry area, are integrated in the external mirrors and enable you to avoid puddles and stones and so get in the car safely, even in complete darkness.

While the **driver airbag** is hidden in the steering wheel, the passenger airbag is located in the dashboard. It can be deactivated so that you can fit a child seat in the

The activation/deactivation buttons of some functions are located on the lower part of the centre panel. Depending on the equipment version, you can find here for example: ASR, parking sensors, off-road mode, TPM and parking assistant.

The driver knee airbag prevents contact with the lower part of the dashboard n the event of a collision.

At a closer look at the Yeti, you discover his **exceptional practicality.** In addition to the variable luggage compartment, the vehicle offers a lot of storage spaces and compartments in the passengers' area.

VarioFlex (rear seating system) – 3 separate rear seats which can be folded or removed independently of each other.

Storage compartments on the sides of the luggage compartment and **sliding hooks**.

The **set of nets** offers several arrangement options.

Foldable table in the rear seat backrest.

Centre console with a drinks holder, storage compartment and pen holder.

Storage compartment in the middle of the top of the dashboard.

1l bottle holder in the front door compartments.

Sunglasses compartment located in the roof panel.

Function package for the Jumbo Box armrest (ashtray and 1.5l bottle holder).

Roof railing, silver (the standard equipment version is equipped with a black roof railing).

Unibag removable sack.

Extendable dividing net separating the passenger space from the luggage compartment.

If you have high expectations of **comfort**, it is Yeti, in the SUV category, that will fulfil them. Discover unexpected spaciousness as well as an exceptional variability. Then there is of course the pleasant experience of controlling the vehicle. The dashboard was designed exclusively for the Yeti model and you'll intuitively find all controls exactly where you'd expect them. The driving comfort of all passengers is catered for by a range of comfort products, available as standard or extra equipment.

Electrically-adjustable driver seat with memory.

Cruise control for automatic maintenance of constant speed.

Heated front windscreen will quickly clear frost or

Parking assistant instructions are shown on a Maxi DOT display. The **Yeti GreenLine** is available with the **1.6 TDI CR DPF/77kW** diesel engine, which on its own is already a guarantee of an economical operation yet a dynamic drive. With specific equipment and modifications to the car it achieves a combined consumption of **4.6 l/100 km** at a CO₂ emission level of a mere **119 g/km**. The GreenLine model is offered in the same three equipment levels as the standard model (see equipment versions).

The original **GreenLine badge** can be found on the front grille as well as on the 5th door.

The **S** switc while or wh of can the e

The GreenLine version may be equipped with the 7.0J x 16" **Spectrum alloy wheels.** The Active equipment version comes with the 7.0J x 16" steel wheels with **Rif hub covers** and the Ambition and Experience versions come with the 7.0J x 16" **Moon alloy wheels.** All wheels for Yeti GreenLine come with 205/55 R16 tyres with low rolling resistance.

The **Start-Stop system** automatically switches off the engine, for example while waiting at the traffic lights or when moving slowly in a queue of cars. By pressing the clutch pedal the engine automatically restarts. The driver can deactivate the Start-Stop system with a button located on the central console. Engine load reduction and more economical running are further assisted by the **energy recovery functionality,** which enables an effective use of the car's kinetic energy for battery recharging.

The **Experience equipment version** has been designed for those who are seeking a high level of comfort, exceptional practicality and maximum safety. The **Dune interior** with fabric upholstery is available in 2 colour combinations: black or Gobi Sand. The dashboard, in black-black or black-Gobi Sand, is lined with the **Cosmic décor.** The standard equipment for the Experience version further includes the small leather package (4-spoke steering wheel, gear stick knob and handbrake handle), height-adjustable front seats with lumbar support, the Jumbo Box with an adjustable armrest between the front seats, electrically-adjustable front and rear windows, a Maxi DOT display, Climatronic dual-zone air conditioning, off-road mode (for 4x4 vehicles) and 7.0J x 17" Dolomite alloy wheels. By special request, the Experience version may be ordered with the exclusive Antilope (Alcantara) or Lynx (leather) interiors and Boreal Wood décor (imitation wood).

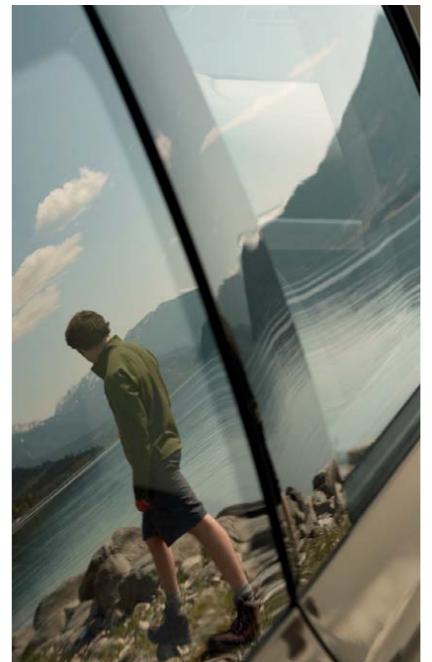

The **Ambition equipment version** is the perfect choice for those who desire a sports style yet a high level of comfort and safety. The **Spirit interior** with fabric upholstery is available in 2 colour combinations, black-blue or black-silver, and the door panelling comes in 4 different colour designs. The dashboard, in black-black or black-grey, is lined with the **Quartz décor**. The standard equipment for the Ambition version further includes chrome interior door handles, a steering wheel with a chrome strip, an instrument panel with a multifunctional indicator, a third headrest in the rear, a foldable table in the rear seat backrest, a fixing system with sliding hooks in the luggage compartment and 7.0J x 16" Moon alloy wheels. By special request, the Ambition version may be ordered with the exclusive Antilope (Alcantara) or Lynx (leather) interiors.

The **Active equipment version** completely reflects the character of the Yeti. It offers a level of comfort which exceeds the standard for the compact SUV class and at the same time will attract you with its simple elegance. The **Reflex interior** with fabric upholstery is available in black. The dashboard, in black-black, is lined with the **Graphit décor.** The standard equipment for the Active version further includes height-adjustable front seats, electrically-adjustable external mirrors and front windows, 1l bottle holders in the front door compartments, a centre console with a drinks holder, a storage compartment and a pen holder, the VarioFlex (rear seating system) and 7.0J x 16" steel wheels with Rif hub covers.

7.0J x 17" **Annapurna** alloy wheels with a polished surface for 225/50 R17 tyres.

7.0J x 17" **Spitzberg** alloy wheels for 225/50 R17 tyres.

for 225/50 R17 tyres.

7.0J x 16" **Spectrum** alloy wheels for 215/60 R16 tyres.

7.0J x 16" **Moon** alloy wheels for 215/60 R16 tyres.

7.0J x 16" steel wheels for 215/60 R16 tyres with **Rif** hub covers.

General information

ŠKODA SERVICE

Put your car in good hands. We give you good reasons to choose an authorised Škoda service partner.

We offer you first-class quality

Your car requires advanced technology. For this reason, all the Skoda authorised service partners have special tools and quality diagnostic systems at their disposal which in combination with the technological procedures prescribed by the manufacturer ensure the perfect functionality and reliability of your car.

Professionally trained staff by the manufacturer

The ever-rising standard of the technology used in the car requires corresponding professional qualifications on the part of the staff. To meet this requirement, the manufacturer organises regular training for the staff of the authorised service partners in order to provide them with up-to-date information important for their activities.

Our motto: be fair and open with our customers

Careful, professional and friendly counselling for the customers upon acceptance of orders is of great importance to us in the same manner as diligence and completeness with respect to repairs and maintenance work. All this is continuously monitored by internal quality control of the provided services.

Comprehensive range of services:

Service inspections

For your car to remain in top condition and functional for a long time and, optionally, not to forfeit warranty, it is essential for your Škoda authorised service partner to perform regular service inspections. The service schedule informs you when the service inspection must be done.

· Body and paintwork service

Damage to the body and painted areas following an accident will be fixed by your authorised Skoda service partner in an expert manner, in accordance with information from the manufacturer, using Skoda genuine parts. This is important not only for your safety, but also for functionality and maintaining your car's value.

Courtesy car

The authorised Škoda service partner can provide you with a courtesy car for the period of repair or service inspection.

• Pick-up and delivery service

If you are unable to take your vehicle to a Škoda service, an authorised Škoda service partner will arrange a date with you to pick up the car. The car will be delivered back after the service work has been completed.

The listed services represent only a part of the wide range of Škoda service offers, which may vary from country to country. Please contact your authorised Škoda service partner for further details and information on the range and specific conditions of services they offer.

ŠKODA GENUINE ACCESSORIES

Škoda Genuine Accessories offer you child safety seats, roof rails, alloy wheels, sunblinds and more. For more detailed information on the complete Škoda Genuine Accessories range see the individual Škoda model catalogues.

ŠKODA GENUINE PARTS

afetv

Škoda genuine parts are identical to those used during the assembly of Škoda vehicles. The use of first-class materials and technologies guarantees safe and worry-free driving.

Availability

Škoda Auto offers a comprehensive range of parts and equipment items that are used in the vehicle's batch production and does not merely focus on high-turnover parts. Škoda ensures the provision of genuine parts even after the relevant model is discontinued.

Long service life

The use of first-rate materials and production technologies in the manufacture of Škoda genuine parts ensure their maximum reliability and long life.

Environment protection

The Škoda Genuine Parts range includes exchange parts whose production has a low environmental impact in terms of waste, excess heat and water pollution.

INFORMATION ON THE INTERNET

Information is available at www.skoda-auto.com to assist you in deciding which vehicle suits your needs, thanks to the detailed descriptions and photographs of all our models.

ŠKODA FINANCE

ŠkoFIN offers solutions for both individuals and businesses. You can learn about the current offer through any authorised Škoda partner. The credit or lease contract can also be concluded online directly with the car dealer.

GLOBAL FLEET

The Škoda Auto Global Fleet Services offer B2B fleet solutions to customers with all kinds of requirements. A fleet made up of Škoda cars offers unmatched roominess, long-lasting quality, safety, low total costs of ownership and, as a result, excellent value for money. You can find more information about our products and services at www.skoda-auto.com/fleet.

One of the most important goals of Škoda Auto is the development and production of products that are as environmentally friendly as possible throughout their life cycle phases, placing principal emphasis on the selection of recyclable materials. Our Škoda cars are manufactured using progressive types of technology in modern production facilities that meet the strictest criteria. Anticorrosive protection of the cars' painted parts is based exclusively on lead-free cataphoresis (KTL) and water-soluable paints. Our company strategy includes limiting fuel consumption and emissions. As a result, the engines of Škoda Auto meet the current emission regulations. We also offer diesel engines with Diesel Particulate Filters (DPF). All products made by Škoda Auto adhere to the laws and regulations concerning the protection of soil and water. As a result of these activities, Škoda cars meet technical, safety, quality and environmental requirements. Škoda Auto contributes to the preservation of a clean environment and provides mobility and comfort to its customers. The environmental logo expresses Škoda Auto's awareness of, responsibility for and attempts at the sustainable development of the company and a friendly approach to life and nature.

Some models in this catalogue are shown fitted with extra equipment not necessarily included in the standard equipment. All details of technical specifications, design, equipment, materials, guarantees and appearance were accurate at the time of going to print. However, the manufacturer reserves the right to make any changes (including changes of technical parameters or individual model equipment). Please consult your authorised Skoda partner for further details on standard and extra equipment, current prices and delivery terms and conditions. This catalogue was printed on cellulose paper which was bleached without using chlorine. The paper is 100% recyclable.
