All work and all play, the Ford Ranger is ready to take on your work and your life. Powerful, agile and supremely comfortable, the Ford Ranger is ready to work hard for you, as are its styling accessories. Whatever choice you make, you can be sure that they're all as reliable and as robust as the Ford Ranger.

Style X Spare Wheel Cover

Black, smart storage and protection against damage

Low/high gear selection, 4WD
1469 623

Look and feel different with our range of alloys. All have been designed to complement the looks of whatever Ford you drive. Sleek, purposeful or elegant, the choice is yours. And you can be assured that whatever alloy option you choose, you can trust that they've been manufactured to the highest standards, from the finest materials, and endured long-term testing to keep you safe on the road. Every single alloy is X-ray checked for defects, and further checked to ensure no air from the tyres will be lost through the wheel. And with different styles – machined, silver, white, black, anthracite or chromed – you can be assured that our alloys perform as good as they look.

Why choose Ford alloy wheels?

Ford makes alloy wheels for Ford cars, not for anyone else. So there's no need for us to compromise on design or quality to meet a range of manufacturers' requirements. Instead we can concentrate on designing and manufacturing alloy wheels which perfectly complement the specific model they are designed for.

Built that little bit better

Because our alloy wheels are designed and built for specific Ford models, we know exactly the specification that's required. But we build them to perform even better – going beyond the model's specifications, to provide a reassuring margin on their load-bearing characteristics and safety performance.

Tested and approved

Ford alloy wheels are tested for durability and strength at every stage of design and development. That means you can be sure they meet Ford's premium quality standards, and match the manufacturing quality of your Ford vehicle.

Fit and forget

Fitting Ford alloy wheels to your Ford is quick and easy. As the wheels are specifically designed for your Ford there's no modification necessary, whatever the wheel or tyre size. The original Ford centre cap and original wheel fittings are used, and no additional fittings are required. That not only means you save on fitting costs. You also protect your vehicle warranty, which other wheels could invalidate.

Stage 1: Scientific design

For every new Ford alloy wheel, a basic design is created by the Ford design group. The necessary specifications to suit any particular vehicle model are then calculated using advanced and highly accurate scientific and mathematical processes.

Stage 2: Feasibility study

Once the design has been agreed, the engineering department carries out a design and feasibility study for the specific Ford model – even taking into account planned future model developments. All body styles are included in the study to ensure quality standards and road safety requirements are met, whatever the different weight distribution characteristics.

Stage 3: Prototyping

Prototype wheels are produced and thoroughly static tested (including X-raying) for dimensions, material faults, leaks, imbalance and impact resistance.

Stage 4: Road testing

The vehicle durability test on the Ford Proving Ground of each alloy wheel represents 240,000 km of driving in a variety of real driving situations and extreme conditions. From initial development to the end of vehicle durability testing takes up to four months for each wheel design.

Stage 5: Durability and strength testing

In addition, Ford alloy wheels are subjected to a severe biaxial durability laboratory test, on a machine newly developed specially for this purpose. Simulating real driving conditions, the test equates to 300,000 km of driving, with the wheel pre-damaged to represent extreme events such as driving over kerbs. Different speeds, loads and extreme rough road manoeuvres and cornering are all reproduced with the test, and at least three wheels per wheel design must pass the test before the design is approved for manufacture.

Other manufacturers of alloy wheels have to compromise. But you don't have to.

Ford accessories have one common purpose, to fit perfectly onto all our cars. We don't compromise on our materials, our design, or our manufacturing integrity. And by also offering a range of carefully selected quality products from well-known manufacturers we can provide you with everything you need to match your own personal style, with both performance and safety in mind.

Whatever you need to carry, we have a transportation accessory to make it easier and safer. Within our great choice of accessories you will certainly find the right product to suit your needs perfectly. For example, you can choose from a wide range of attachments like bike carriers, robust and spacious roof boxes, roof ski carriers, water sports carriers and many more. We want you and your passengers to travel in complete safety and comfort. So, why don't you let Ford carry the load?

Roof Base Carrier

Specifically designed for each Ford model. Use our roof base carrier to fix whatever attachment you require for your transportation needs. For further details see product overview table.

Locking Function

All Ford roof base carriers are lockable for theft protection.

Thule** Straps 524 Sturdy, adjustable 2 x 275 cm straps for safe transport with a tension strength of 300 kg	1513 392

Thule** Roof Kayak Carrier 874

Smart solution that allows you to transport all the equipment you need to discover the coast side and watercourses. The carrier adapts perfectly to the shape of the kayak. Large pads protect the hull, and four adjustable rubber supports together with powerful straps keep the kayak firmly secured during transport.

Thule** Roof Carrier Basket Xpedition 821

This alloy transportation basket allows you to transport nearly everything. With its unusual wide load-bearing bars it is even possible to transport a big tent or the most extensive collection of camping equipment. This accessory is not only a smart solution, but even an alternative to transport cargo that normally would require a trailer.

Thule** Roof Box Dynamic 800

This aerodynamically gloss black roof box is designed to have a forward position on the roof to enable full access to the luggage compartment. The pre-installed power-click quick mounting system with integrated torque indicator provides an easy and secure fixation. Dual-side openings ensure convenient mounting, loading and unloading.

Thule** Roof Surfboard Carrier 833

This carrier allows you to transport 1 board and 2 masts. It is especially designed for carriers with aluminium track profile.

Thule** Roof Bag Ranger 90

The first soft box which is easy to mount, easy to remove, roll up and stow away in its practical storage bag. It does not require the storage space that traditional boxes do and can be brought along in the luggage compartment of your car to be unpacked, mounted and loaded within a few minutes.

Thule** Roof Ski Carrier Xtender 739

The comfortable carrier for 6 pairs of skis or 4 snowboards slides out for ease and comfortable use. Also available as Xtender 739 without slide-out function.

Thule** Roof Bike Carrier ProRide 591

A universal easy to install carrier for frames up to 80 mm (e. g. mountain bikes).

* Warranty covered by Ford supplier.
For further details please ask your Ford dealer.

Tow Bars

If you're planning to tow a trailer or caravan, you want to be sure it's going to stay safely attached. So Ford tow bars are tested not only to meet all legal requirements, but also Ford's own strict internal requirements. Extensive crash testing gives you the confidence that your tow bar won't compromise your vehicle's safety, and corrosion-resistance testing for 480 hours in salt spray is reassurance that your tow bar will last as long as your Ford. The corresponding electrical kits are also tested beyond the legal requirements, and are designed for complete compatibility and integration with your Ford's electrical and Multiplex systems.

Tow Bar Fixed and Detachable

For extra transport and stowage capability. The towing capacity is vehicle and engine specific. Please refer to your vehicle documentation. Use the detachable tow bar if you don't want to make any compromise to your car styling.

Load Compartment

You can travel in safety when your load is stored securely. Ford load compartment accessories are designed and tested to fit perfectly and stay in place, keeping loads where they should be even under heavy braking. Load retention guards and load retention nets, for example, are crash tested to protect passengers in a crash at up to 50 km/h (31 mph). And to help you keep the load space looking as good as the rest of your Ford’s interior, we have accessories to keep it clean, dry and tidy.

Load Space Liners

Very robust, to protect load compartment floor against dirt and wear

Fiesta from 09/2008, Fusion **1513 926**

Focus 2008 – 2010 **1512 333**

Everyday life can bring you unexpected and unwanted surprises. Like scratches, bumps and knocks to your Ford. So why not give your Ford a little extra protection? Rear bumper protectors for example, can be fitted within seconds and provide excellent protection for years to come. And how about our floor mats, which not only match your vehicle’s interior but are flame proof too?

Car Care Products

Chamois Leather 52 x 35 cm	0 800 532

Duxback™* Windshield Coating

Duxback™* is a revolutionary treatment that keeps glass as it should be – see through. On a windscreen, rain, sleet and snow simple beads, sheds and rolls off, there is no need to use wipers when travelling over 40 mph in pouring rain! Even ice is easy and quick to remove with Duxback™* Windshield coating. Tested and approved by TUV, Duxback™* is proven to provide 35 % better vision when driving in rain conditions and a 25 % improvement in reaction time when driving in foul conditions.

1607 622

Floor Mats

Ford floor mats use materials and colours that are designed to match the interior of the vehicle. They are fixed directly into the vehicle's interior floor so that the mat cannot slip and interfere with the pedals. All Ford floor mats are flammability tested to conform with ISO 3795 and they resist soiling, fading, heat ageing as well as fogging, which can cause a film on the inside of the windscreen.

Mud Flap, in perfect fit and finish

Rear Bumper Protector in 3D stainless steel design (image shows Ford Mondeo)

Rear Bumper Foil Protector

Ford's bumper protectors are specifically designed for each Ford model. They protect the rear bumper as daily wear and tear can soon cause scuffs and scratches on the door and rear bumper sills. The protectors combine protection with a stylish design whilst the foil versions provide protection without compromising the look and style of your vehicle. Fitting is easy with the self-adhesive backing on each strip. For further details see product overview table.

Roadside Accessories

Ford Roadside assistance accessories are selected to ensure the maximum safety for Ford drivers and passengers in the event of a breakdown or accident. All products meet the latest European legislative requirements. All Ford vehicles contain dedicated fixings for safe, easily accessible storage of roadside assistance accessories when not in use. Ford warning triangles and first aid kits are specially designed to fit securely into these fixings.

Life Hammer

In case of an accident the life hammer can be used to release a seatbelt or to open a window. The hardened points on both sides of the head allow to shatter a window quick and easy. With the safely built-in, razor-sharp blade you can cut a seatbelt with a single stroke.

Premium Safety Pack

Sales Science* Tyre Repair Kit

Sales Science* Tyre Repair Kit

This efficient emergency puncture repair kit will help you in the event of a puncture, but will also deliver fuel and tyre savings. If replacing the spare wheel, which on average weighs around 22 kg, immediate fuel savings will be experienced and car boot storage space increased dramatically.

The user friendly operation and digital accuracy of the compressor enables you to check tyre pressures easily at home regularly when tyres are cold before a journey commences, ensuring maximum tyre pressure accuracy, safety and fuel economy. The compressor is extremely user friendly and cuts off automatically when set tyre pressure is reached. Airline adaptors are also provided to enable the inflation of airbeds, dinghies and other inflatables, as well as bicycle tyres. The kit is supplied in a compact zip up nylon bag making it easy to stow either under seat or in the boot of your vehicle.

PRESS RELEASE

Feeling safe with children in the car

Ever since it became a legal requirement that children in our cars are safely secured, the standards for children's car seats have become more and more stringent.

There are a large number of children's car seats for various age groups which fulfil these requirements. However, even the best child seats offer no protection if they are not fitted correctly or used properly. Although many child seats are secured in similar ways, every seat has its own particular belt fastening system. Therefore, it is vital to listen to the advice of specialist staff when buying a child seat, and equally important to read the operating instructions.

If you have a very young child, you need to be aware that all baby seats from Group 0+ (babies up to 13 kg) utilise rear-facing systems, i. e. the seat must be fitted so the child is facing backwards. Please note: These baby seats may only be fitted to the passenger seat if the passenger airbag has been deactivated, or if the car is not fitted with a passenger airbag.

ISOFIX systems are relatively simple to install. These systems require the child safety seat to be securely fastened to an anchoring system, which is fitted to the bodywork of the car. However, when using an ISOFIX child seat with a support leg, always refer to the child seat manufacturers approved vehicle list before using it in your car.

Many injuries can be avoided if children are correctly secured. Yet a study carried out in Germany showed that only 31 % of child safety seats are used correctly. In contrast, a study carried out by The German Insurance Institute GDV stated that 96 % of the Group I child seats were correctly installed when using the ISOFIX system. It is also important that children are properly secured for all journeys, regardless of their length. The risk of injury for unsecured children in cars is seven times higher than that for children in appropriate safety seats.

(Press release kindly provided by Britax Römer®*)

RECARO* Child Seats

With black/orange seat cover, secured with the vehicle's standard 3-point belt, tested and approved according to ECE R 44/04 norm.

Ford gives you more to enjoy than just driving – like the wide range of entertainment and information options available, to help you get where you're going, and have more fun on the way. For example, you can choose from in-car and portable navigation systems to give you the best route, and loud-speakers to give you the best sound. But whatever you choose, it will be state-of-the-art, user-friendly technology. In addition, our unique Ford communication console provides a stylish, robust and integrated fitting solution for the portable navigation systems.

STC Europe* USB Music Box

Simply plug in your USB device (e. g. MP3-player, USB stick or mobile phone), enjoy music on your Ford audio or navigation system with improved high sound quality and comfortably use your steering wheel remote control for all functions. Placed out of sight in the glove compartment, centre console or armrest, it plays a wide range of file formats. And how long your journey will ever be – with the integrated charging function you'll never run out of battery power.

STC Europe* USB Music Box for all Ford Audio and Navigation Systems with AUX Button

- Improved high sound quality
- Compatible file formats: MP3, MP4, WMA, ASF
- Data storage formats FAT16 (max. 2GB), FAT32 (max. 64GB)
- Charging function with max. 2 amp
- Functions operated via remote steering wheel control

Only for vehicles with steering wheel remote control, not compatible with iPhone®/iPod® Touch, kit consists of electronic module, wiring and USB connector cable, audio information not shown on radio display

Pioneer* Multimedia Navigation

You don't just need a navigation system while you're on the road, you're looking for a multimedia entertainment system and our Pioneer* multimedia navigation range is the right choice.

The AVIC-F930BT for instance is an advanced navigation system providing navigation via graphic map interface and with voice guidance, full map coverage of 44 European countries and multi-colour illumination so that the interface matches the colour of your vehicle's dash-board. In addition, all units come with an iPod® cable for improved connectivity.

The range is also compatible with our range of Pioneer* loudspeakers to improve the excellent sound quality.

Pioneer* Multimedia Navigation AVIC-F320BT

The essentials of GPS and multimedia in one system fully integrated in your car, the AVIC-F320BT offers a convenient and reliable solution for all your navigation and audio needs on the road. You can easily access any function using the detachable 4,3" (10,9 cm) touch screen with customisable shortcut menu.

- 4,3" detachable WQVGA touch panel
- RGB button illumination to perfectly match the vehicle's illumination
- SD slot for speed camera updating/NavGate feeds
- Built-in Parrot** Bluetooth® for hands-free profile
- Included microphone
- MP3 CD mechanism with iPod®/iPhone® audio/USB control
- RCA preout (Rear/SUB.W)
- RGB key illumination
- Anti-theft (not working when navigation unit is detached)
- Downloadable Apps

Pioneer* Reverse Camera ND-BC5

This high-quality NTSC universal camera projects a mirror-image on your in-car screen, making it ideal for depicting what you would normally not see in a rear-view mirror.

The high-sensitivity lens has a sight line of 135 degrees and an embedded chip which automatically adjusts brightness in light or dark driving conditions.

The ND-BC5 can be hooked up to any of our systems with a rear camera input. Its compact size allows for installation in virtually any location.

To be used in conjunction with the AVIC-F30BT or AVIC-F930BT navigation systems. The AVIC-F320BT is not compatible.

1755 949

*Warranty covered by Ford supplier.

Navigation CD/DVD/SD Card Updates

Why is it essential to have an updated map? Road changes occur all the time and the map in your navigation system is not automatically updated. New roads and motorways are added, ordinary streets become one-way or pedestrian streets and other points of interest are always changing. Use our navigation update programs by TomTom®* (formerly Tele Atlas) to be on the safe side and to enjoy a smooth travelling all the way.

TomTom®* (formerly Tele Atlas) CD/DVD/SD cards for Ford Navigation Systems
(latest version available at your Ford dealer)

Package design may vary depending on your country of origin

TomTom®* Navigation Map Updates

Updates (e. g. for Blaupunkt® TravelPilot FX or NX navigation systems) are available on different data storage mediums depending on the system type you have fitted. They offer full Western European map coverage of detailed roads, often including neighbouring regions and main roads for a range of further countries. Please note that the additional map range may vary with your chosen data storage medium. All map updates also include house numbers for detailed door-to-door navigation, destination selection via postal code, dynamic route guidance with RDS/TMC traffic news and more than 2 million POIs including your nearest Ford dealer. Please ask your Ford dealer for further details and information on available TomTom®* Map updates.

Parrot®** Bluetooth® Hands-Free Kits

If you like to stay in touch in your Ford when you're out on the road, there are easy-to-use and safe solutions available. Ford offers a wide range of Parrot®** Bluetooth® hands-free kits which allow you to make phone calls while you're driving with a high level of comfort and security. They all feature built-in voice recognition, full duplex and echo cancellation, vehicle's speakers used for conversation, compatible with all Bluetooth® phones available. Please ask your Ford dealer for the right cable adapter for your Parrot®** Bluetooth® hands-free kit.

All Ford vehicles are designed to make your life as relaxing as possible. Now with our accessories you can add even more convenience to your journey. From air deflectors that enable you to enjoy a refreshing breeze with less turbulence and noise, to a range of cooling boxes for self-catering, we surround you and your passengers with total Ford comfort – and when you finally reach your destination, our parking distance controls will safely guide you into your parking space.

Parking Distance Control

Parking Distance Sensor

Xvision^{*} Parking Distance Control Systems

Xvision^{*} Parking distance control systems allow you to park with ease to within a distance of 30 cm via a variable intermittent beeping signal. Built to original equipment standard with a 3 year warranty, it can be fitted to any vehicle, whether new or used and colour coded to match the vehicle's body colour. A discrete display module can also be fitted to the front or front and rear of the vehicle, providing LED signals as well as audible beeps for additional guidance whilst parking and manoeuvring.

Xvision^{*} Parking distance systems are available for front and rear and with or without LED display.

Please ask your Ford dealer for further details.

ClimAir[®]* Side-Window Air Deflector

Reduces turbulence and noise for a more enjoyable drive with the window down even when it's raining. Made of 3 mm cast acrylic high quality glass with optimised design for perfect fitting. The table below shows all available kits for front doors (kits for rear doors not listed).

Please ask your Ford dealer for further details.
