

1995 MERCURY MYSTIQUE

MORE THAN JUST A NEW CAR, MYSTIQUE IS A WHOLE NEW MERCURY.

The 1995 Mercury Mystique is a completely new five-passenger, cab-forward sedan designed to look, feel and perform differently than any car you've ever driven before. Mystique has responsive handling, roomy comfort and many leading-edge engineering features. And it meets 1997 federal safety standards now. Mystique is an innovative car with 21 new features never before offered by its major competitors.

Mystique is available in two models: the well-appointed GS and the distinctive LS. Both are available with an impressive list of standard features and options, including value-packed Preferred Equipment Packages. So even though Mystique is an all-new vehicle, you can make it all yours.

THOUGHTFULLY CRAFTED INTERIOR

You'll find Mystique's interior is spacious, comfortable and filled with amenities that will please driver and passengers alike. The seats are sculpted to the contours of the human body for improved support and comfort. And the controls and instrumentation are designed and placed for ease of operation.

TWO NEW ENGINES

The new Zetec 2.0-liter DOHC 16-valve I-4 engine, which produces an impressive 125 horsepower, is standard on Mystique. If you are more performance-minded, consider the optional new Duratec V-6. The powerful 2.5-liter 24-valve engine generates 170 horsepower and can go 100,000 miles under normal driving conditions before its first scheduled tune-up.

EXCLUSIVE AIR FILTRATION SYSTEM

Mystique has the MicronAir® Filtration System which screens out virtually all pollen, road dust and other pollutants before they enter the car. That should please allergy sufferers or anyone concerned with air pollution. MicronAir also helps keep windshields, dashboards and air-conditioning systems cleaner.

MicronAir® is a registered U.S. trademark of Freudenberg Nonwovens.

ALL-SPEED TRACTION CONTROL

Mystique's optional all-speed traction

control helps provide safe, straight acceleration from a stop and greater handling and steering control at higher speeds. This advanced safety feature regulates the spin of either or both front wheels to help maintain driver control and traction on slippery road surfaces.

DUAL AIR BAGS

Mystique's standard driver- and front passenger-side air bag Supplemental Restraint System offers added protection when used in combination with safety belts. Always wear your safety belt.

TRUNK-MOUNTED SEATBACK RELEASES

The controls for Mystique's 60/40 split-fold rear seatback are located in the spacious 13.9-cubic-foot trunk—precisely where they're most convenient for you.

MERCURY WARRANTY

Every 1995 Mystique is covered by a comprehensive, 36-month/36,000-mile bumper-to-bumper warranty.

ROADSIDE ASSISTANCE

Also during the warranty period, every Mystique is covered by a complimentary 24-hour roadside assistance program. It covers such items as changing a flat tire, jump-starts, towing, lock-out service, bringing you gas should you run out, and more.

See your dealer for complete information about Mystique's limited warranty and roadside assistance program.

21 UNIQUE FEATURES

You'll find 21 new features never before offered by Mystique's major competitors. And 14 are standard on every Mystique.
