MERCURY
MYSTIQUE

IT'S NOT JUST A
WHOLE NEW CAR.
IT'S A WHOLE
NEW MERCURY.

The goal was extremely ambitious.

Design a new car from the ground up capable of satisfying both driving enthusiasts and safety-minded families. Offer it with the available Duratec V-6 System, the world's first V-6 car engine that does not require a scheduled tune-up for the first 100,000 miles. Equip it with a number of features that are not only unique to its class, but also rarely found except in luxury automobiles. Finally, strive to build it with levels of comfort and quality that not only say Mercury, but also say Mercury taken to new levels.

It's called Mystique. And as you'll see, it's not just a whole new car.

It's a whole new Mercury.

The Mystique LS in Medium Willow Green Clearcoat Metallic.

EVEN FROM BEHIND,
MYSTIQUE DEMONSTRATES
FORWARD THINKING.

Mercury Mystique's engineers would like to point out that beneath all this surface glamour lies a car with a rigidly designed unibody and front sub-frame for handling stability, cab-forward design for greater interior room, and a rounded exterior designed to produce a wind-slicing drag coefficient of only 0.31.

WE MADE ROOM FOR 21 NEW IDEAS.

Mystique's interior is more than simply spacious, comfortable and well appointed. It is also home to a number of ingenious new features never before offered by Mystique's major competitors. You'll find the following features not just inside but throughout this remarkable new automobile.

- ◆ 25L V-6 Duratec System
- ◆ MicronAir® Filtration System
- ◆ All-speed traction control
- ◆ Anti-submarine seats
- ◆ Driver's safety belt grabber
- ◆ Seat-mounted front safety belts
- ◆ Illuminated headlamp switch/heater controls
- ◆ Illuminated power window switches
- ◆ Illuminated power door lock switches
- ◆ Illuminated interior door handles
- ◆ Curb illumination
- ◆ Rear dome light
- ◆ Remote locking w/trunk and panic feature
- ◆ 10-way power driver's seat
- ◆ Front seat valance storage bins
- ◆ Driver-side glove box
- ◆ Glove box utility hook
- ◆ Trunk-mounted rear seat releases
- ◆ Remote trunk release deactivation
- ◆ Diagnostic plug
- ◆ Solar tint glass

PARTICIPATE IN
A MORE DIRECT FORM
OF COMMUNICATION.

You might compare driving a Mercury Mystique to visiting an old friend. Communication between the two of you is instantly familiar. The right things to do are instinctively known. And you feel very comfortable with this arrangement.

This almost instant familiarity is the result of careful design and placement of instrumentation and controls. And it's a key reason why Mystique is such a responsive and enjoyable car to drive.

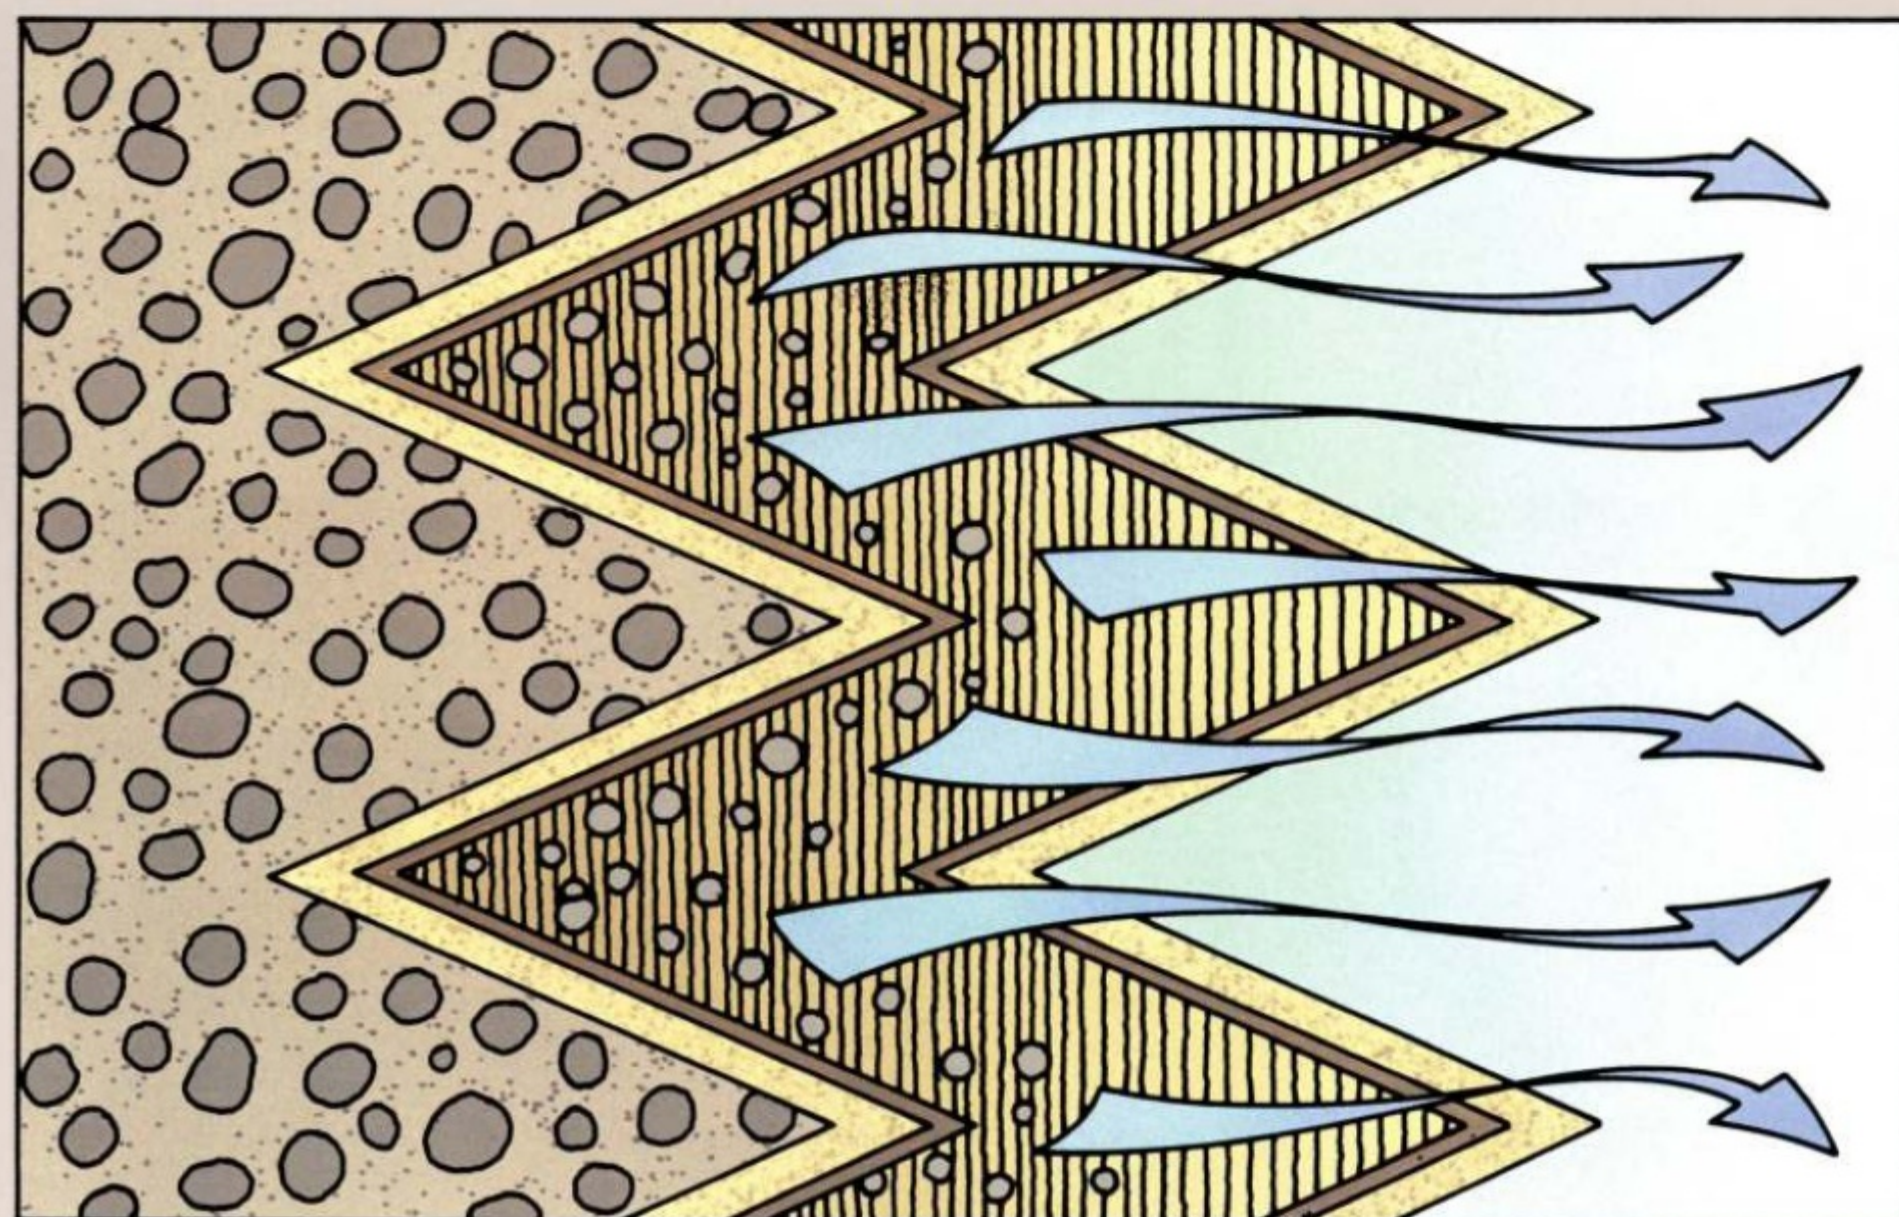

Some features may be optional.

A MULTITUDE OF NEW WAYS TO RELAX AND BREATHE EASY.

Mercury Mystique offers plenty of reasons to feel good inside, including 21 new features not offered by Mystique's major competitors. To make these unique features easier to find, each is highlighted by a "♦" here and on the following pages.

COMFORT & CONVENIENCE FEATURES.

♦ **MicronAir® FILTRATION SYSTEM.** Some of the most sophisticated luxury cars don't offer this system, yet it's standard on Mystique. By utilizing layers of electrostatically

charged synthetic microfibers, MicronAir filters out potentially harmful air pollutants as small as three microns in diameter before reaching Mystique's

interior through heating, air conditioning or fresh air ventilation. Which means allergy sufferers and anyone concerned with air pollution can now breathe easier.

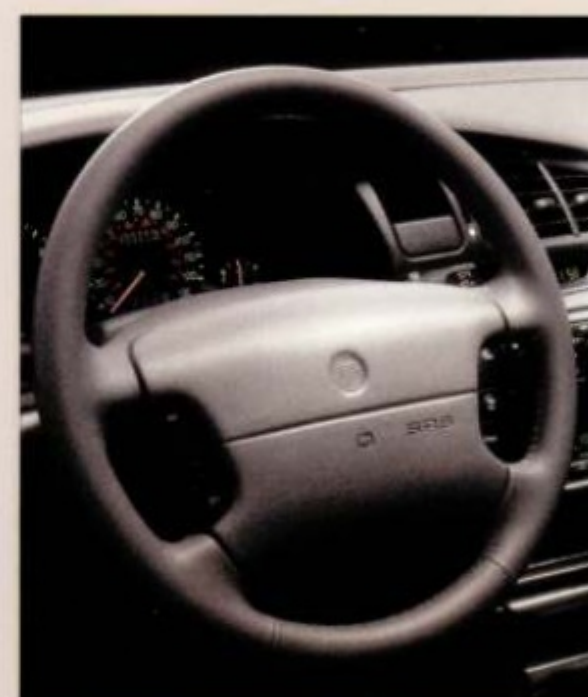

FINGERTIP SPEED CONTROL. An option that lets you set and hold your speed at a touch of controls so perfectly positioned, they're patented.

♦ **UTILITY HOOK.** Flips out of the glove box handle to provide the perfect place to hang a purse or a litter bag.

♦ **CURB ILLUMINATION.** Leave it to Mystique to help you put your best foot forward—and avoid that unforeseen mud puddle—by illuminating the area where you'll step when exiting.

LEATHER-WRAPPED WHEEL. Soft, supple leather has a distinctive feel you'll really appreciate.

SAFETY BELT HEIGHT ADJUSTERS. Whether you're 5'1" or 6'5" you can position front shoulder belts for the proper fit and comfort.

♦ **SOLAR TINT GLASS.** Special solar shielding characteristics in Mystique's exterior glass help protect interior surfaces against sun fading while substantially reducing the time needed for air conditioning to cool the interior.

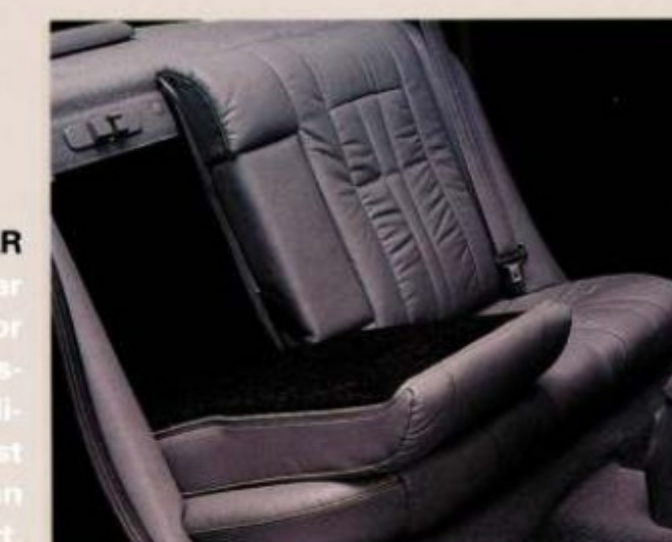

LIGHTS EVERYWHERE. The warm, jewel-green glow of Mystique's interior lighting makes it easier to locate and operate controls at night. And Mystique offers more interior illumination than any other car in its class, including ♦ interior door handles, ♦ heater and headlamp controls, and ♦ switches for power door locks and ♦ power windows. The glove box, ashtray and front footwells are lit, too.

HIDDEN CUP HOLDERS. When you need them, dual cup holders pop out of the full center console to secure your favorite beverage within easy reach.

♦ **REAR DOME LIGHT.** A second reading light is thoughtfully included for the use of rear passengers.

60/40 SPLIT-FOLD REAR SEATBACK. The rear seatback split-folds for added cargo and passenger carrying versatility. A fold-down armrest gives rear passengers an extra touch of comfort.

♦ **TRUNK-MOUNTED REAR SEAT RELEASES.** Controls to release the 60/40 split-fold seatback are located in Mystique's spacious 13.9-cubic-foot trunk—precisely where they're most convenient for you, least convenient for thieves.

1 HEAD RESTRAINT TILT ADJUSTMENT. Height and tilt both adjust four ways for a more comfortable fit.

2 INFINITE SEATBACK ADJUSTMENT. Both fully reclining front seatbacks dial to your optimum position—no more "feeling around" for the seatback to click into one of a few set levels.

3 DRIVER'S SEAT LUMBAR ADJUSTMENT. Provides added comfort and lower back support on long trips.

4 DRIVER'S SEAT TILT ADJUSTMENT. The driver's seat cushion adjusts by tilting to your preferred position.

5 ♦ FRONT SEAT VALANCES. Convenient storage bins are integrated into the outboard side of front seats.

6 SEATBACK STOWAGE POCKETS. Another easily reached compartment that's perfect for a map or atlas.

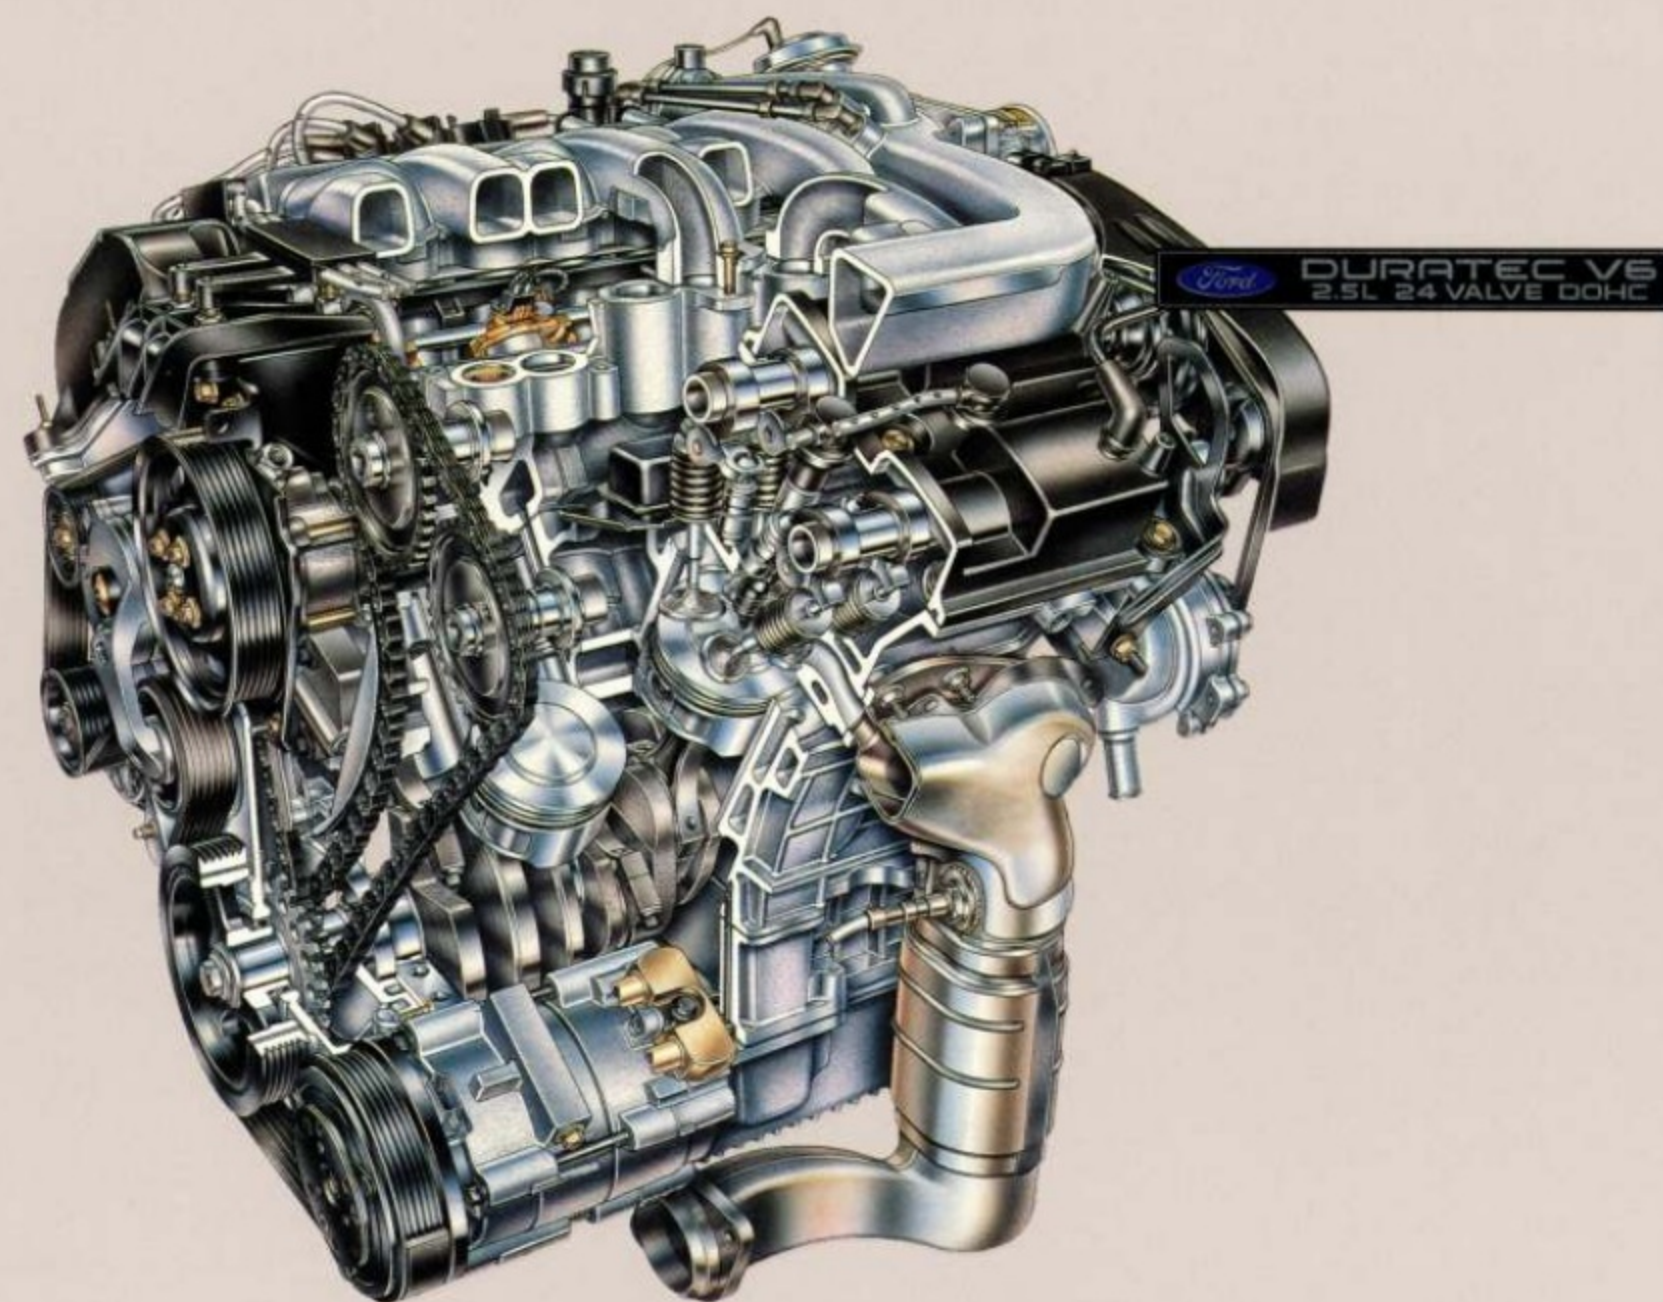

See specification pages for feature availability.

100,000 MILES BETWEEN
TUNE-UPS. APPARENTLY
OUR ENGINEERS
DID SOME FINE TUNING.

One quick trip down a twisty road will convince you that Mystique is engineered to deliver an exhilarating blend of responsiveness, handling and agility. And you can be assured of many such trips with very low maintenance by opting for Mystique's available Duratec System. It includes the world's first car V-6 engine that does not require a scheduled tune-up for the first 100,000 miles.

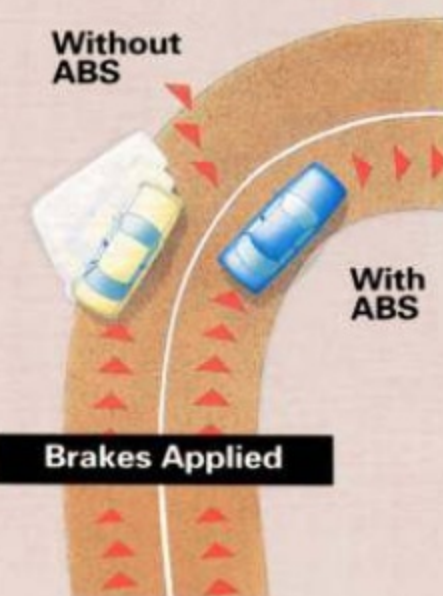

PERFORMANCE & HANDLING FEATURES.

♦ **THE DURATEC V-6 SYSTEM.** This available system combines adrenaline-pumping performance with the durability of 100,000 miles of operation without a single scheduled tune-up. At the heart of the Duratec System is an all-new 24-valve V-6 engine producing 170 horsepower from only 2.5 liters. It includes such advanced engineering as dual overhead camshafts, variable induction with dual tuned runners for responsive low-end torque, and a lightweight all-aluminum design with a casting process developed from racing engine technology. Also contributing to the Duratec System's performance are 4-wheel disc brakes, larger tires and sport-tuned steering and suspension.

ANTI-LOCK BRAKES.

Mystique's exceptional stopping power and handling ability can be augmented by this optional system. It helps maintain steering control during hard braking - even on slippery road surfaces - by keeping the brakes at the threshold of lockup, no matter how hard the brake pedal is pressed.

ELECTRONIC 4-SPEED AUTOMATIC TRANSAXLE. This all-new available automatic includes a patented shift-logic strategy that tailors shifting under varied weather, altitude and driving conditions, and an overdrive lockout switch for improved performance while towing or traversing hilly terrain.

ZETEC ENGINE. Mystique's standard powerplant is another all-new multi-valve offering: a 2.0-liter, 16-valve, dual-overhead-cam 4-cylinder engine producing 125 horsepower. It shares with Duratec such advanced technology as EEC-IV electronic engine controls, platinum-tipped spark plugs and sequential electronic fuel injection for an optimal blend of power, efficiency,* durability and low emissions.

*See the EPA statement in the back of this brochure.

♦ **DIAGNOSTIC PLUG.** This computer link allows a service technician to accurately diagnose virtually any engine or drivetrain problem within seconds.

5-SPEED MANUAL TRANSAXLE. The standard 5-speed is an all-new design that offers synchromesh in all gears, including reverse, as well as two-rail shift linkage for slick, quick gear changing. A shift collar prevents accidentally shifting into reverse.

♦ **ALL-SPEED TRACTION CONTROL.** Before Mystique, this advanced safety system was available only on a very limited number of automobiles. By regulating spin of either or both front driving wheels, it helps maintain traction and driver control on slippery road surfaces. What makes it even more impressive is that, unlike most traction control systems, Mystique's employs both braking and throttle control - providing not only safer, straighter acceleration from a stop but also greater handling stability and steerability at higher speeds.

QUADRALINK SUSPENSION. Mystique's carefully calculated suspension geometry, coupled with its advanced new Quadralink rear suspension, provides ride stability, comfort and handling responsiveness. All of which make Mystique a much more enjoyable - and safe - car to drive.

FRONT SUB-FRAME. Mystique's front sub-frame is formed from a single U-shaped steel tube and joined by a welded cross-member - a radical new manufacturing technique that enhances rigidity to help resist torsional twisting.

MYSTIQUE IS SO ADVANCED, IT ALREADY MEETS SAFETY STANDARDS OF THE FUTURE.

Mystique is engineered with an emphasis on safety that incorporates some innovative new thinking. In fact, Mystique is already able to meet expected federal safety standards that won't become mandatory until 1997. It's all part of a comprehensive approach to occupant protection and accident avoidance we call "Dynamic Safety Engineering." You can simply call it peace of mind.

SAFETY & SECURITY FEATURES.

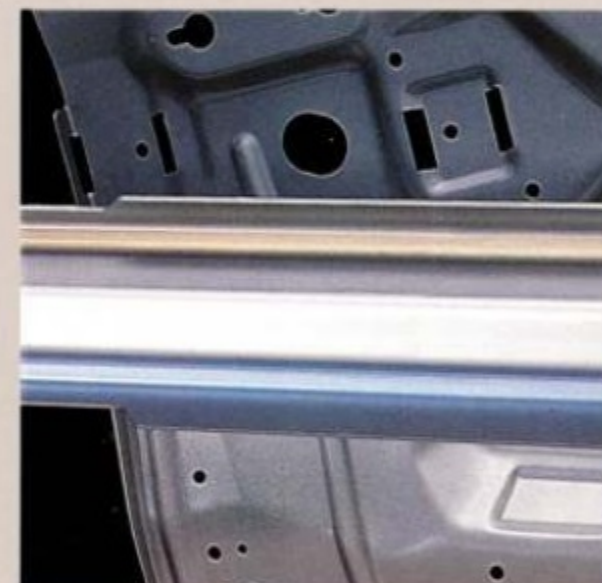

♦ **ANTI-SUBMARINE SEATS.** Extensive crash testing has taught us that occupants who are able to remain in their proper seating positions during a collision stand a greater chance of avoiding serious injury. To better achieve this goal, all five seating positions in Mystique incorporate a special anti-submarine design to help prevent occupants from sliding forward under seat belts in a frontal crash.

DUAL AIR BAG SUPPLEMENTAL RESTRAINT SYSTEM. These standard safeguards are just what you'd expect in a car as thoughtfully engineered as Mystique. In certain moderate to severe frontal collisions both air bags will deploy in less than the blink of an eye, providing added protection to the driver and front passenger. (Always wear your safety belt for air bags to be effective.)

WINDSHIELD WATER MANAGEMENT. Mystique's uniquely designed cowl top grille and A-pillar water channel moldings improve visibility in rain storms by helping keep water displaced by the wipers from spreading over the windshield and side glass.

INTEGRATED BORON STEEL DOOR BEAMS. Protective beams inside all four doors are constructed of boron steel for both light weight and optimal shielding in a side impact.

SIDE WINDOW DEMISTERS. Help clear your view in cold or rainy weather by blowing heated or air conditioned air over the side windows.

♦ **ANTI-LOCK BRAKES.** Mystique's available ABS provides added steering control while braking on ice, snow or rain-slick roads. Its four-sensor design monitors each wheel individually.

AUTOMATIC SAFETY. The available electronic automatic transmission includes brake/shift interlock, a warning alarm that sounds if the driver's door is opened while the car is in gear, and a "home safe" mode.

♦ **SEAT-MOUNTED SAFETY BELTS.** Front safety belts move with the seat, providing proper belt placement regardless of seat position.

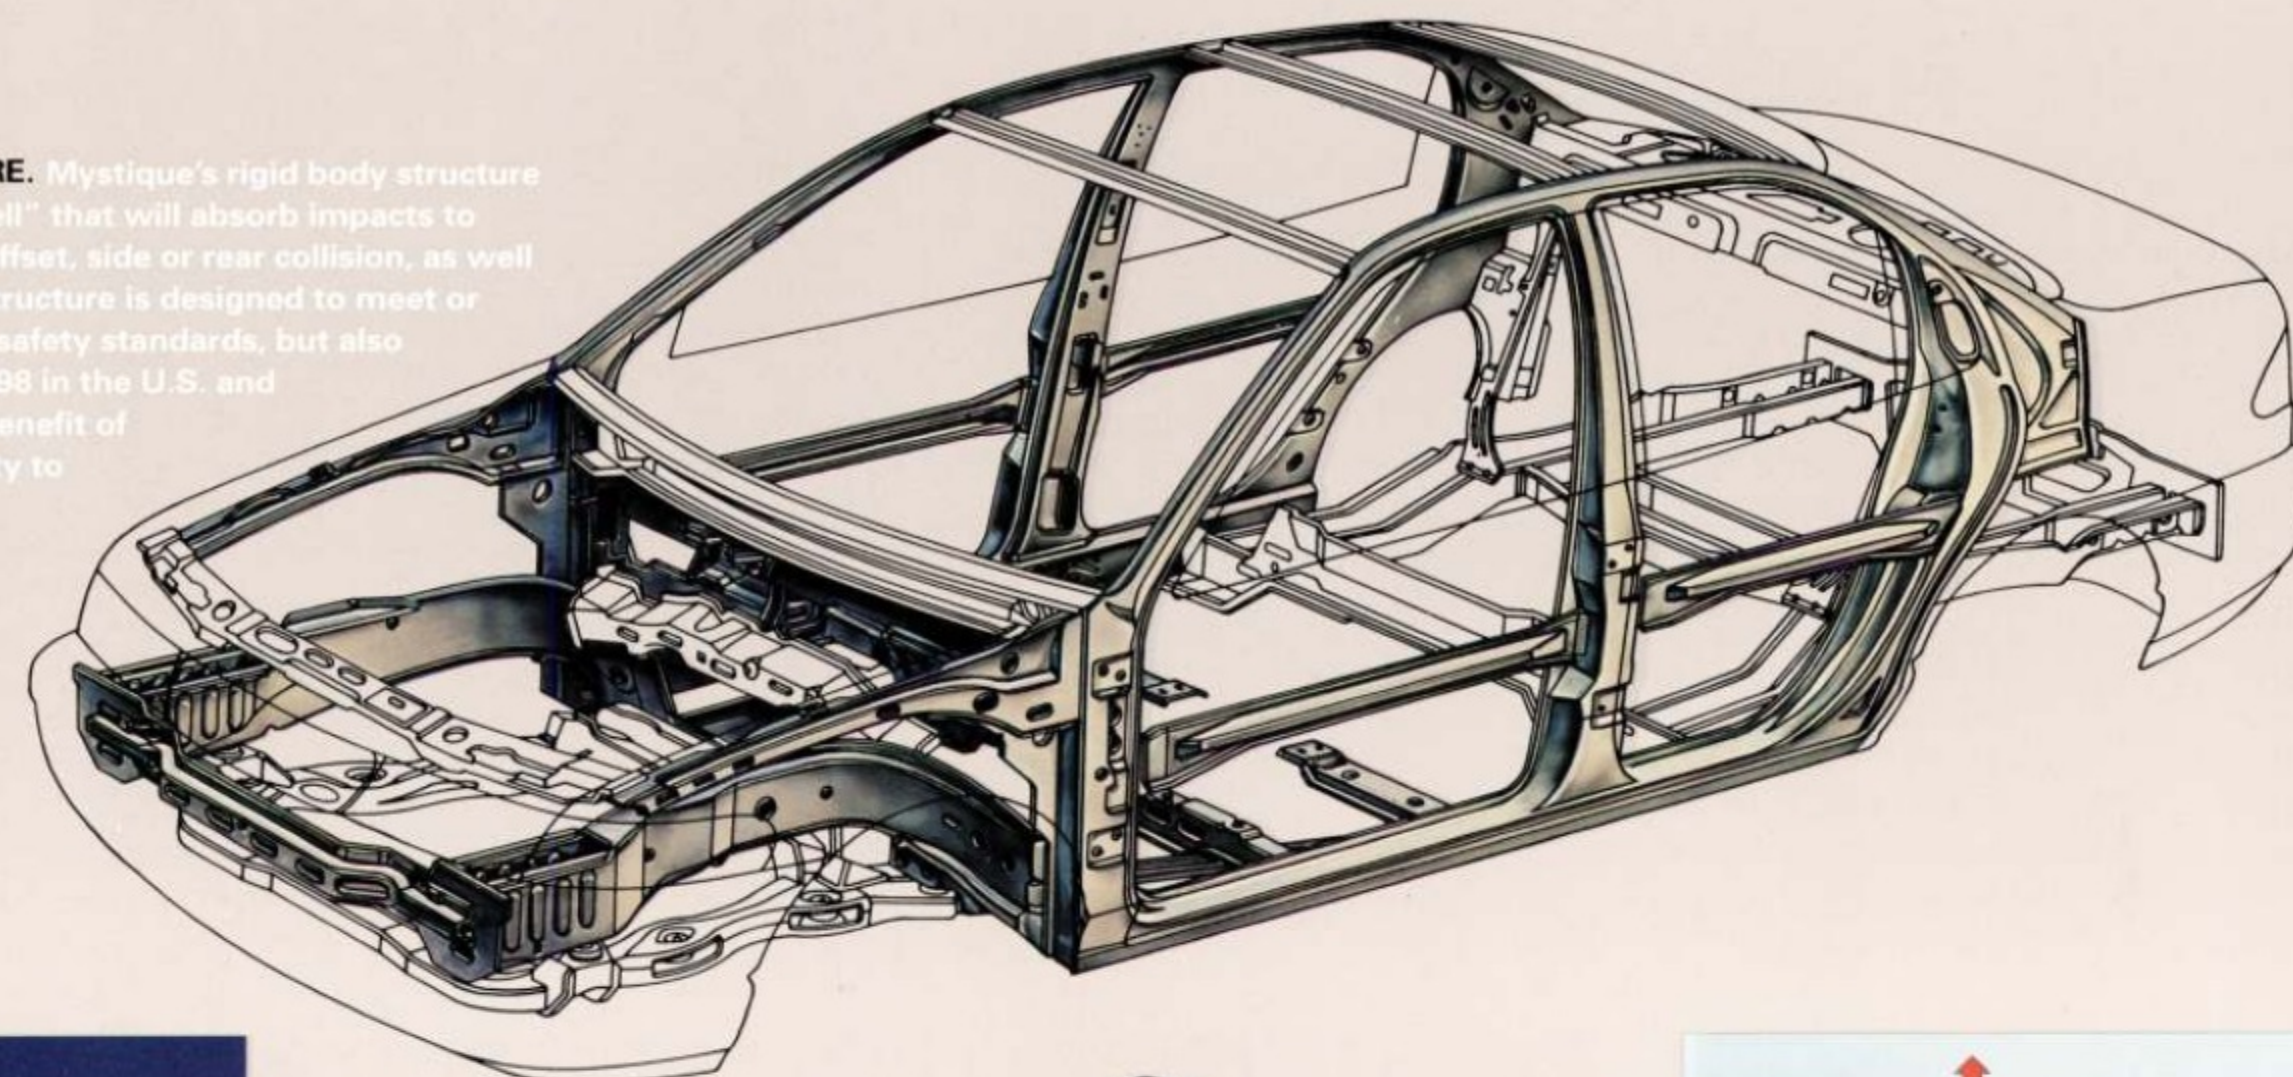

INTERMITTENT WIPERS. Mystique's wipers include high, low and intermittent speeds to adjust for optimal visibility in everything from a light mist to a heavy downpour.

CHILD-PROOF REAR DOOR LOCKS. When activated they keep children in back from opening doors from inside the car, while parents can still open doors from the outside.

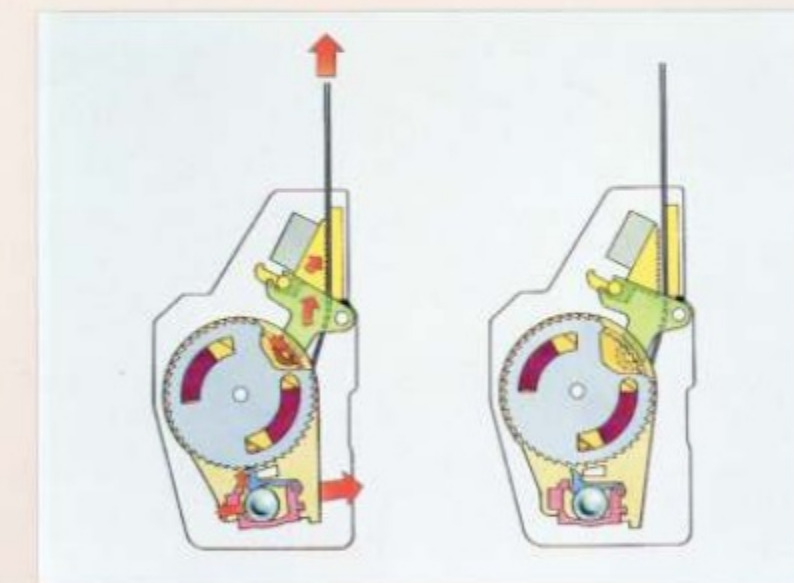

SAFETY CELL BODY STRUCTURE. Mystique's rigid body structure serves as a protective "safety cell" that will absorb impacts to protect occupants in a frontal, offset, side or rear collision, as well as in a roll-over accident. This structure is designed to meet or exceed not only current federal safety standards, but also all requirements targeted for 1998 in the U.S. and throughout Europe. An added benefit of this safety cell design is its ability to absorb low-speed impacts without causing substantial structural damage.

BRAKE SHIFT INTERLOCK. Prevents shifting the transmission out of park unless the brake pedal is depressed.

♦ **REMOTE LOCKING.** This available system lets you lock and unlock all doors or release the trunk from a distance. Pushing the remote panic alarm will sound the horn and flash exterior lamps intermittently.

♦ **SAFETY BELT GRABBER.** An additional measure of protection that will grab and hold the driver's safety belt during an impact or emergency braking situation to limit belt slippage.

MAKE CHOICES NOW AND RECEIVE ASSURANCES DOWN THE ROAD.

Choosing Mercury Mystique is an easy decision. We've made it even easier by grouping favorite options in Preferred Equipment Packages that offer savings over ordering these options individually. We've also included a number of additional reasons to feel good about choosing Mystique. These are described on the facing page.

OPTIONAL FEATURES.

Electronic AM/FM stereo radio with cassette. (Also Premium Sound system available.)

Electronic AM/FM stereo CD radio and Premium Sound.

CD player. (Available with electronic AM/FM stereo radio with cassette and Premium Sound.)

10-WAY POWER DRIVER'S SEAT. Convenient power controls located on the side of the seat adjust for fore/aft, recline, tilt/height and also provide lumbar support, making it easy to find your desired level of comfort. Standard on LS models.

HEATED OUTSIDE REARVIEW MIRRORS. These dual power mirrors are heated to improve your rearward visibility while driving in cold or inclement weather. They're standard on LS models.

SOUND SYSTEMS. An electronic AM/FM stereo cassette radio (top) is standard on LS and available on GS models. This system can be upgraded to a Premium Sound system with 80 watts of power and premium speakers. Also available is a CD radio with Premium Sound that includes scan and shuffle play (center). For cassette and CD capability, a dealer-installed CD player (bottom) can be added to the electronic AM/FM stereo cassette radio with Premium Sound.

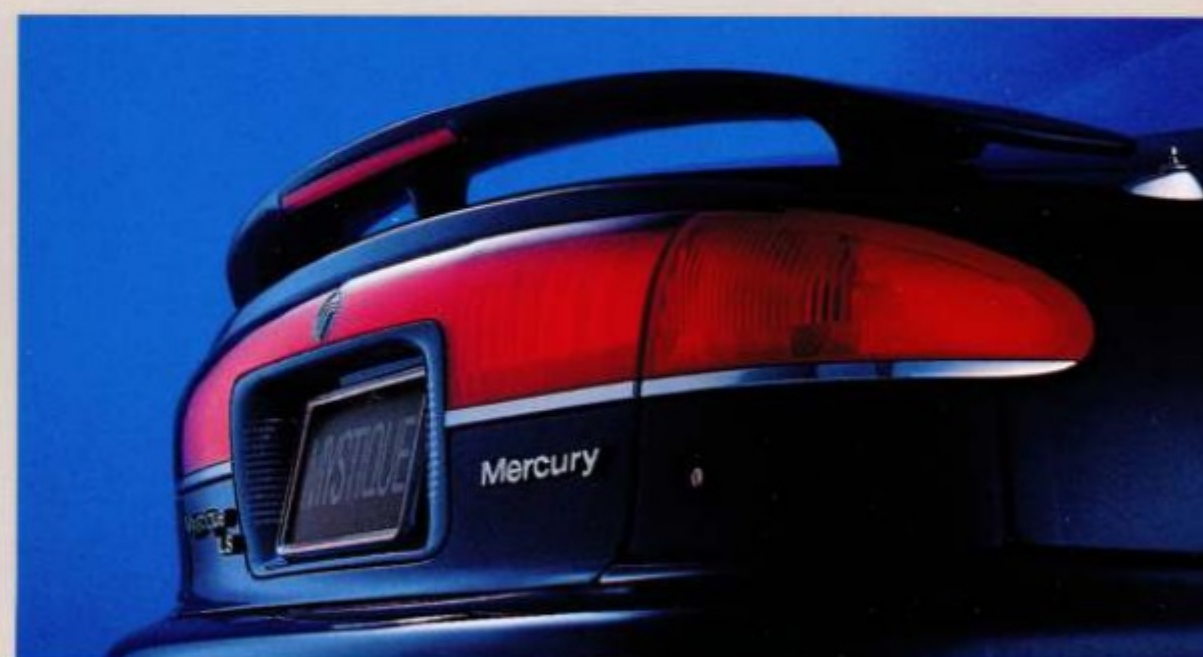

POWER MOONROOF. Invite the sun, the moon and fresh air along for the ride. It opens and closes at the touch of an overhead tactile switch.

AIR CONDITIONER. This optional system operates free of ozone-depleting CFCs and utilizes the standard MicronAir® filtration system for cleaner operation.

POWER ANTENNA. This option, standard on LS models, automatically retracts when the sound system is not in use.

REAR SPOILER. Ask your dealer to install this available rear spoiler, which adds a touch of aggressive style to your Mystique.

COMMITMENTS THAT TRAVEL WITH YOU.

AN ENVIRONMENTALLY RESPONSIBLE CAR.

Mystique represents our greatest effort ever to create an automobile that demonstrates environmental responsibility from the start of the manufacturing process to that time, years down the road, when the car is ready for recycling. Here's how: • Mystique's content is 78% recyclable by weight • Pre- and post-consumer recyclable aluminum is extensively used in Mystique's two powertrains • All plastic parts are identified for recyclability • Recycled products are extensively used for manufacturing, packaging and shipping • Mystique's air conditioning system, as with all Mercurys, operates without ozone-depleting CFCs • All Mystique manufacturing facilities are free of CFCs, cadmium and asbestos • To make recycling easier and more economically feasible, extensive recycling guidelines have been established • Mystique offers outstanding fuel economy* • Wildlife areas have been established near two manufacturing areas as part of our participation in the Wildlife Habitat Enhancement Council.

ROADSIDE ASSISTANCE

Like every Mercury, Mystique includes the security of an emergency Roadside Assistance Program during the 3-year/36,000-mile bumper-to-bumper warranty period. Help is a toll-free call away 24 hours a day, anywhere in the fifty United States should you need any towing assistance, fuel delivery, tire change, a jump-start or even help when you've locked yourself out of your car. Ask your Mercury dealer for complete details on the Roadside Assistance Program and a copy of the limited warranty.

THE LEASING ALTERNATIVE

More and more people are choosing a Red Carpet Lease from Ford Credit as an alternative to buying a new Mercury. That's because a Red Carpet Lease allows a qualified customer to drive a brand-new Mercury more often for a lot less than you'd think. Which means you can afford to drive what you really want to drive. When you fulfill your lease, you can return the car and lease another brand-new vehicle all over again. Ask for the benefits of a Red Carpet Lease at your Mercury dealer.
