2000

design

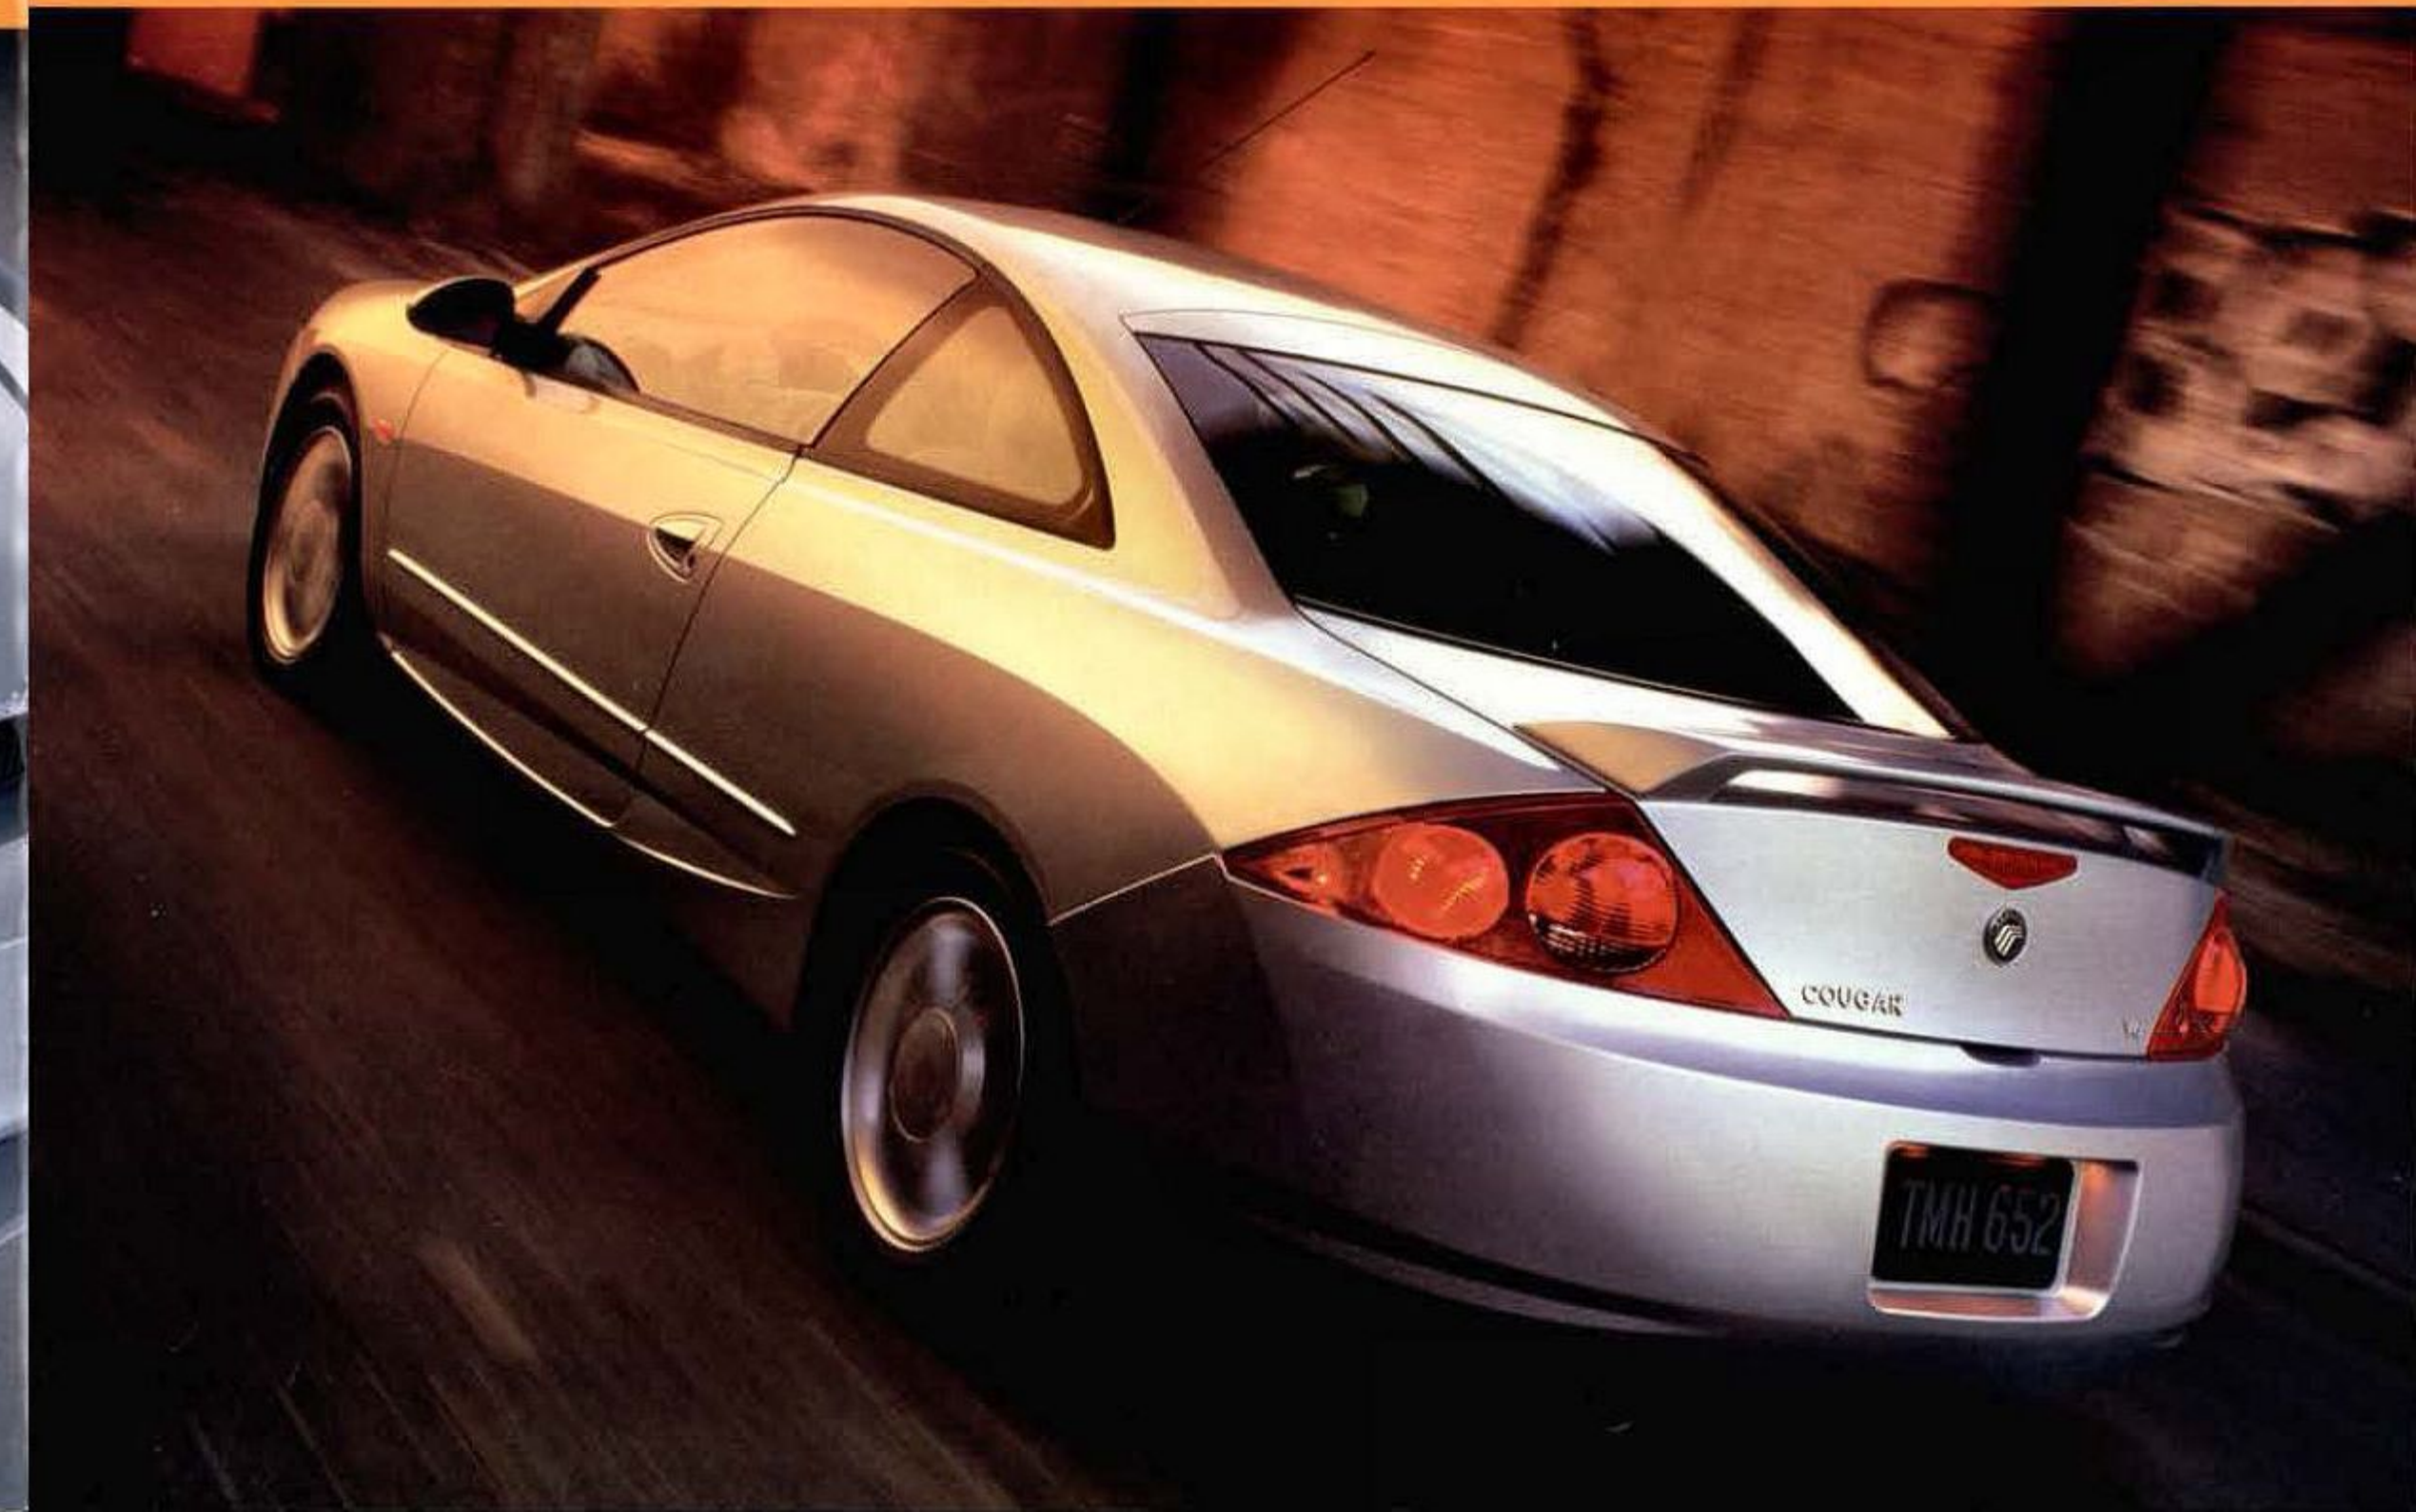

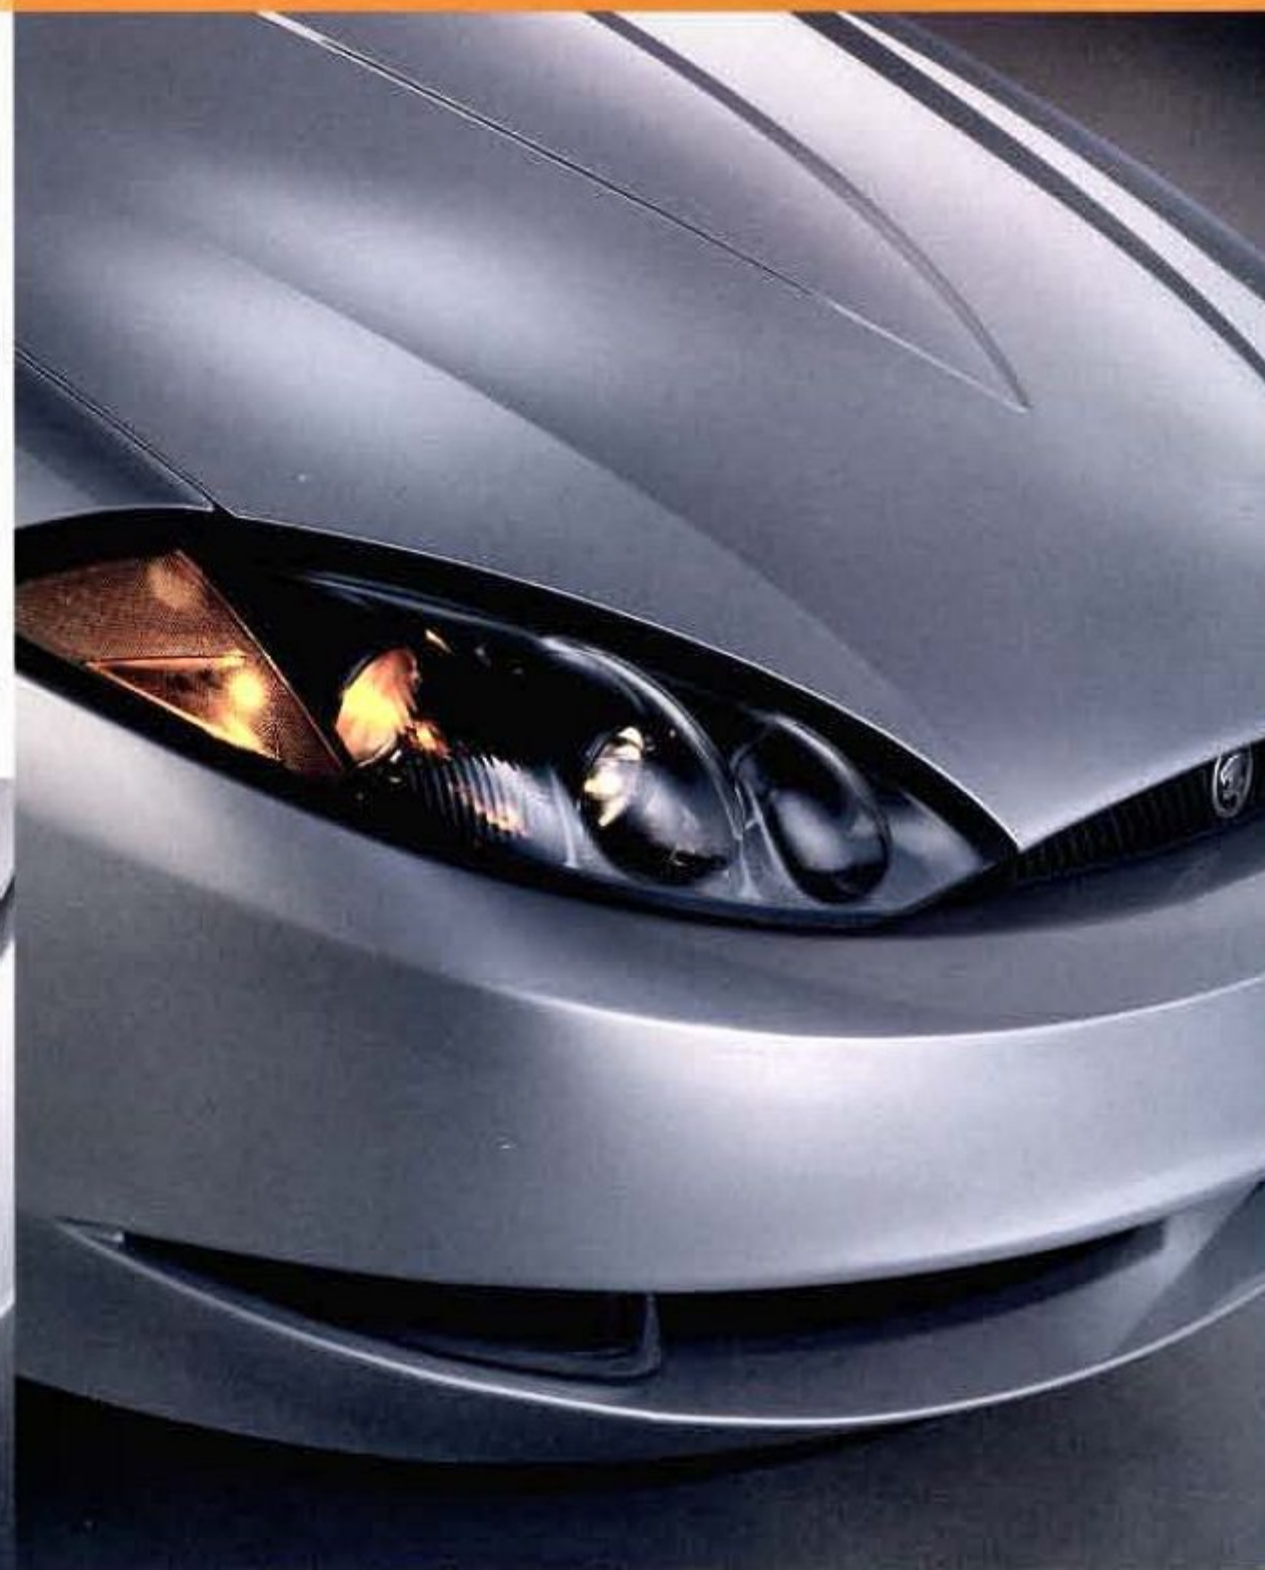

If you don't like **ATTENTION**, drive something else. Because Cougar's "Edge" design for 2000 balances sleek, sculpted surfaces with clean, intersecting lines unlike any other car on the road today. Cougar is visual poetry — whether at rest or in **MOTION**. And speaking of motion, the dual overhead cam I-4, when mated to the 5-speed manual transaxle, yields impressive specs and stats. The all-aluminum V6 engine, with manual or 4-speed automatic transaxle, may redefine **RESPONSIVE** for you. Equip Cougar to suit your needs — from powertrain to available ABS, from All-Speed Traction Control to power moonroof, from rear spoiler to leather-wrapped steering wheel — and let Cougar help celebrate your individuality.

express

This driver's sport coupe represents a new order of design. The edgy, aerodynamic body appears in motion even when parked. Cougar for 2000 provides ample **EXHILARATION**, excitement and exuberant fun for the driver who wants to stand out from the crowd — along with comfort, convenience and confidence for the passengers. Smart technology, highly intelligent engineering, forward-thinking design and wickedly audacious good looks — these are what make Cougar your passport to the express lane.

edge

Cougar for 2000 is truly a sculptor's masterpiece. Curve meets plane in wonderfully balanced proportions, both pleasing to the senses as well as functionally **SMART**. Good design must work well while it excites the mind. Cougar evokes symmetry in its details as well as its overall visual appeal.

That ride we promised — tight, **SMOOTH** and sure-footed — results from Cougar's MacPherson strut independent front and Quadralink rear suspensions. This configuration not only flattens bumps but also provides the driver with firm sport coupe **HANDLING** attributes.

vroom

Pistons and valvetrain, churning in perfect harmony thousands of times per minute, ensure smooth, confident acceleration and cruising. Even the air intake manifolds are engineered for enhanced **PERFORMANCE**. And the gauges? ... They remind you of how much fun you're having!

Cougar's all-aluminum 2.5L dual overhead cam Duratec V6 engine produces 170 **HORSEPOWER** and 165 lb-ft of torque. That provides plenty of power for merging, passing, climbing and arriving on time. The proprietary Cosworth Casting Process — originally developed for use in race engines — is a major reason for the close tolerances engineered into the Duratec's block and four-valve cylinder heads; the process also results in greater durability and reliability. The payoff from this racing heritage is an uncommon set of performance characteristics, a great deal of driving excitement and, perhaps, a little boost to your ego.

Cougar V6 with Medium Graphite interior. Shown with optional V6 Sport Group equipment.

flexibility

Cougar's 50/50 split-fold rear seat-back makes it easier to carry skis, or other oversized items. And the hatch-back provides a wide opening to accommodate luggage, groceries or whatever else you choose to bring on board. A removable package tray is included for extra convenience.

The standard AM/FM stereo/cassette system with soft-touch controls has four premium speakers plus a removable anti-theft radio face with flashing LED for added security. An optional trunk-mounted 6-disc CD changer offers even greater programming variety.

The well designed cup holders located in both the front and rear areas allow all occupants to safely enjoy their favorite refreshments while on the road.*

*Dual cup holders n/a with V6 Sport Group.

Guilt-free comfort. Cougar's CFC-free air conditioning, standard on all Cougar models, relies on an earth-friendly refrigerant to keep driver and passengers cool without compromise to important environmental concerns. Cabin comfort is further enhanced by the standard Particulate Air Filtration System. Over 90 percent of pollen, road dust and other airborne particles larger than three microns are prevented from entering Cougar's interior and causing discomfort to its occupants.

Power window and door lock controls are well placed, easy to use and enhance security. One-touch "express down" for the driver is helpful at ATMs and toll booths. Illuminated switches make for ease of operation during nighttime driving.

The Cougar's well-designed instrument panel includes a trip computer to give you vital **INFORMATION** at a glance: average fuel economy, distance to empty, average speed, trip odometer and outside temperature.

reflections

Cougar's exterior mirrors are power remote-controlled and heated. Ice and snow disappear quickly — and stay away. In addition, mirror housings are designed to break away in order to minimize damage in case of accidental impact. Mirrors can be easily repositioned with a strong push. **SMART.**

Available side-impact head/chest airbags* for driver and front passenger are an excellent supplement to Cougar's Safety Cell construction. Mercury continues to demonstrate, with responsible and sound engineering, a solid commitment to **SAFETY.**

peace of mind

The 2000 Cougar features technology that enhances your comfort as well as your security. Included in its standard active and passive safety systems are dual front airbags,* side-impact anti-intrusion beams and three-point safety belts for all occupants. The SecuriLock™ anti-theft system helps prevent theft with a specially encoded ignition key. Optional safety and **SECURITY** features include side-impact head/chest airbags* for driver and front passenger and the Remote Keyless Entry system. Buttons on the key fob will lock and unlock doors, turn on interior lights and even attract attention in case of trouble. Purposeful design that adds to your comfort, safety and peace of mind — this and more is Cougar for 2000.

*Always wear your safety belt and secure children in the rear seat.

ready

A trip to the mountains or shopping for the weekend, Cougar invites detours. Its front-wheel drive configuration results in a roomy, two-passenger back seat — and the hatchback design, split-fold rear seatback and removable package tray make for **EASY** cargo access. Standard amenities include power windows and door locks, CFC-free air conditioning with Particulate Air Filtration System, power mirrors, a full-length center console with storage bin, cup holder and power point as well as a premium four-speaker sound system designed to enhance the driving experience. Cougar's optional V6 Sport Group configuration — which includes, among other things, 16-inch alloy wheels, rear spoiler, Sport seating and four-wheel disc brakes with optional ABS — raises the standards of form and **FUNCTION**.
