

MAZDA 626 SPORT COUPE & SPORT SEDAN

mazda

MAZDA 626

A feeling of sport. A sense of class.

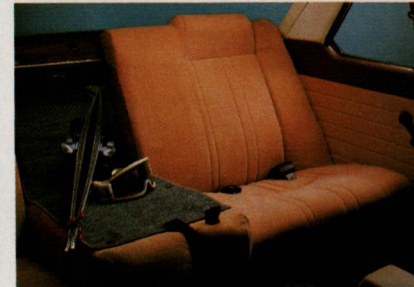

1949

Mazda's 626 looks like what it is: a unique new kind of driving machine.

Unique because it combines precision handling with a luxury ride. Because it comes with a long list of unusual refinements. And because both the Sport Coupe and Sport Sedan are so affordable.

Sporting behavior. Born in a windtunnel, the aerodynamically shaped 626 has remarkably low air resistance. Result: increased high-speed stability and gas mileage* and reduced wind noise. It is low, wide, and surefooted, with ideal weight distribution (49% front, 51% rear). It has a well-tuned suspension system with engineering features patterned after those of Mazda's RX-7 Sports Car. All this helps explain the 626's sophisticated handling and performance.

Versatility. The 626's 60/40 fold-down split rear seat gives you a very extended cargo space, running for 68.9" from rear of trunk to the back of front seats. And there's still room in back for a passenger. Or you can fold down both backrests for wide cargo.
