### Unconventional by design

Its distinctive, stylish good looks make the Yaris immediately recognisable. But its originality is anything but skin deep. With powerful but efficient engines, class-leading safety and exceptional roominess, there's no question it's been designed to be individual – from the inside out.

The four-model range features three- and five-door versions and a choice of three advanced petrol engines,

incorporating Toyota's sophisticated VVT-i technology, and a highly economical D-4D diesel power unit. All deliver excellent all-round performance. The Yaris range also offers a high level of specification and equipment. And, of course, every model comes with the exceptional standards of quality and reliability you've come to expect from Toyota.

The Yaris – truly remarkable whichever way you look at it.

The Yaris immediately catches the eye with its stylish lines. Its carefully sculpted curves not only enhance its appeal but also improve its aerodynamic efficiency for better fuel consumption.

The Yaris T<sub>2</sub> is far from modest in its specification. It has a lively 1.0 litre VVT-i petrol engine and comes with ABS braking with EBD (Electronic Brake force Distribution), a driver's airbag, engine immobiliser, 3 point seatbelts on all seats, radio/cassette player and part colour-keyed front and rear bumpers. The T<sub>2</sub>,

along with all Yaris, features ISOFIX, a universal standard that provides a quick and simple method of fitting child seats into cars.

The Yaris T<sub>2</sub> also features a three-dimensional holographic instrument panel for perfect visual clarity and includes as standard a trip computer. The generous specification also extends to door-ajar and lights-on warnings and an adjustable steering column - not to mention its impact-resistant structure, clever storage features and three-year warranty.

The Yaris T<sub>2</sub> – a compact car with a lot to offer.

## In harmony with the driver

A car needs to be in tune with its driver. It needs to respond positively and assuredly so that the driver feels in total control. And that's exactly what the Yaris does. With its highly responsive power, sophisticated braking, precise handling and steering, all supported by clever ergonomic design, it makes driving a safer, more enjoyable experience.

With the Yaris T3, you have a choice of eight combinations and three engines – an eager 1.0 litre VVT-i petrol engine, a more powerful 1.3 litre version and a direct-injection D-4D diesel unit for maximum economy. The 1.0 litre petrol-driven models are offered either with five-speed manual transmission or

with Toyota's versatile Multi-mode Manual Transmission (MMT). This is a five-speed manual gearbox which combines the convenience of an automatic system with the direct feeling of sportiness as well as the economy of a manual. The driver can choose between sequential manual and automatic modes with an easy-to-use shift lever. All Yaris T<sub>3</sub> models are equipped with power steering, electric front windows, remote central double locking, child locks (five-door only) and driver and passenger front and side airbags. The CD/radio sound system plays through four speakers, while the optional satellite navigation system will help you reach your destination more quickly. The Yaris T<sub>3</sub> – the ideal partner wherever you go.

## Combining flair with quality

Toyota's reputation has been built on quality, reliability and engineering excellence characteristics evident throughout the Yaris range. The Yaris delivers a feeling of complete reassurance.

And it's no better exemplified than in the sophisticated Yaris T Spirit. This well equipped three- and five-door model comes with a choice of 1.0 litre and 1.3 litre VVT-i petrol engines, as well as an efficient 1.4 D-4D diesel power unit. The 1.3 litre petrol models are also

offered with automatic transmission, while the 1.0 litre versions are available with Toyota's sophisticated Multimode Manual Transmission (MMT).

Along with air-conditioning, power front windows and exterior mirrors, plus CD/radio audio system with controls on the leather steering wheel, it features luxury seat trim, a tilt/slide sunroof, front foglamps, remote central double locking and 14-inch alloy wheels with locking wheel nuts.

## Outstanding in performance and design

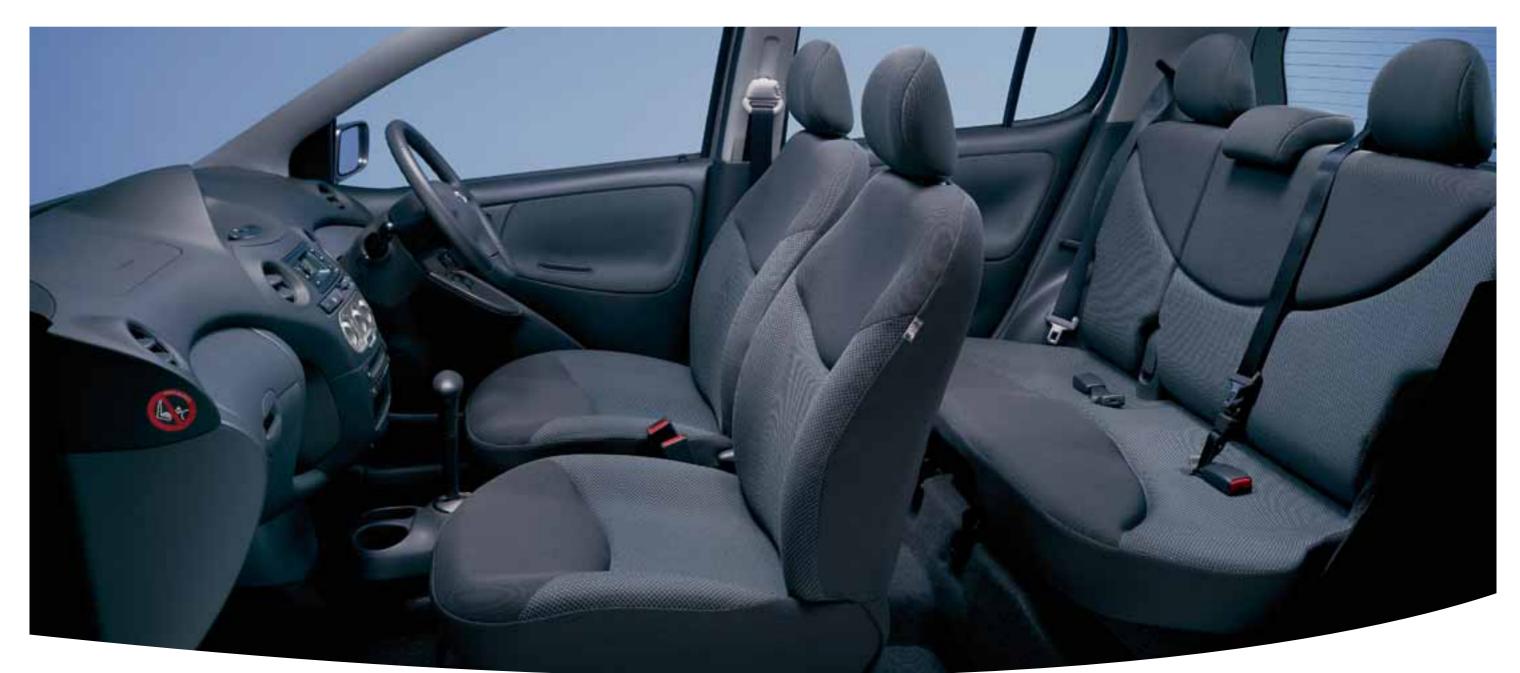

The Yaris is aimed at those who appreciate functional design integrated with character and performance. But, perhaps above all, the Yaris stands for individuality. Look no further than the Yaris T Sport. It has a performance as exciting as its looks.

Its tuned 1.5 litre VVT-i engine is eager to please as it powers you effortlessly to 62 mph in just nine seconds and onwards to a maximum of 118 mph, where permitted. But it's comforting to know that its stopping ability, featuring ABS with EBD, is enhanced by powerful disc brakes at the rear. The T Sport also has front and side airbags for both driver and front-seat passenger.

Inside, the T Sport is enhanced by aluminium scuff plates and by the unique sports black upholstery, which makes the special white analogue sports instruments even more distinctive. Outside, both 3 and 5 door body styles are available, featuring a black mesh sports grille with integrated T Sport badge, sports body kit and body-coloured door mirrors make the Yaris T Sport particularly desirable. So it is reassuring to know it comes with a state-of-the-art alarm system.

The Yaris T Sport – power with control, design with purpose.

### Inner space

A home

When you enter a Yaris, the first thing that strikes you is its spaciousness. Its roominess is achieved by the fundamental 'wheel-at-eachcorner' design, leaving more space in between, and by its neat ergonomic interior which makes the best possible use of all available space.

And the more room you have, of course, the more relaxed you are even more so with the benefit of the 'armchair' comfort and support of the Yaris' seats. These are positioned higher than normal for ease of access and to afford the driver a commanding view of the road. The inner space of the Yaris is also highly flexible. The rear seats slide backwards and forwards, so you can opt for more luggage space while still carrying the same number of passengers. In fact, with the seats 150 mm forwards, carrying capacity increases further. And if you need even more room, you can fold either or both of the rear seats to provide up to a maximum of 33.5 cubic feet of space.

The Yaris – flexible and adaptable, but above all spacious.

### A way of thinking

🕷 home

The inside of every Yaris looks clean and sophisticated. The controls and instruments are ergonomically designed and positioned. And there is a distinct lack of clutter thanks to the innovative storage system.

Every inch of space has been used to provide a range of practical storage compartments that ensure items are neatly and safely stowed. The glove-box, for example, has two sections, while a useful tray under the passenger seat keeps the contents out of sight.

There are two large storage pockets next to the centre console, two front-door storage bins, cup-holders and a passengers side storage tray. Additionally, the T Spirit and T Sport models have pockets in the back of the front seats.

The Yaris - neatly taking care of everything.

## Delivering more power, more efficiency

Toyota's engineers are driven by one central goal – to produce engines that deliver maximum performance, outstanding fuel economy and low emissions.

With petrol power units, the main solution is provided by Toyota's VVT-i technology – Variable Valve Timing with intelligence. This advanced system automatically reacts to the way you're driving and the demands made of the engine. An on-board computer controls the timing and duration of the intake valve opening which means you get the power you want when you need it.

And by maximising engine efficiency, it ensures that fuel consumption and exhaust emissions are as low as possible.

The 1.0 litre VVT-i engine\* – 64 bhp, maximum torque of 90 Nm, maximum speed 96 mph, acceleration to 62 mph in 13.6 seconds, fuel economy on the combined cycle 50.4 mpg, emissions 134 g/km. **The 1.3 VVT-i engine**<sup>\*†</sup> – 86 bhp, maximum torque of 122 Nm, maximum speed 109 mph, acceleration to 62 mph in 12.1 seconds, fuel economy on the combined cycle 50.4 mpg, emissions 133 g/km.

The 1.5 litre VVTL-i engine\* – 103 bhp, maximum torque of 143 Nm, maximum speed 118 mph, acceleration to 62 mph in 9 seconds, fuel economy on the combined cycle 41.5 mpg, emissions 162 g/km.

### 1.0 litre combined fuel economy

So economical – you can achieve over 50 mpg (combined) thanks to the VVT-i technology of the 1.0 litre petrol power unit.

## 1.5 litre power and torque

The 1.5 litre engine produces 143 Nm/4200 rpm of torque for smooth, controllable power

**1.3 litre acceleration** The manual 1.3 litre petrol-driven VVT-i engine can deliver 0-62 mph in just 12.1 seconds.

## Tomorrow's diesel today

Toyota's advanced diesel-engine technology delivers the best of both worlds – the lively, responsive power you expect from a petrol engine but with the superior fuel economy and low emissions of a diesel.

Toyota's highly efficient 2.0 litre turbocharged D-4D engine employs direct-injection, common-rail technology which means that atomised fuel is injected into the combustion chamber at very high pressure and according to how the car is being driven. The result is efficient, responsive performance,

A home

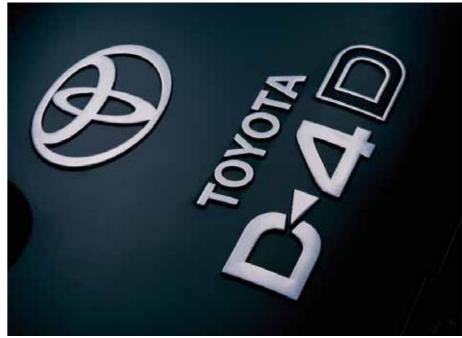

low fuel consumption and minimal emissions.

The D-4D engine also incorporates a variable nozzle turbocharger which helps boost power and torque, while other refinements reduce engine noise and vibration, and a large catalytic converter helps cut emissions even further.

Toyota diesel technology leads the way in designing engines that are clean, highly efficient and, above all, outstanding performers.

The 1.4 litre turbocharged D-4D engine – 74 bhp, maximum torque of 170 Nm, maximum speed 106 mph, acceleration to 62 mph 12.9 seconds, fuel economy on the combined cycle 64.2 mpg, emissions 117 g/km.

## Safety first

For Toyota, safety has always been a prime consideration. This philosophy has been applied to the Yaris as it has been to every other Toyota model. Standards are paramount: they are set to be achieved.

In terms of primary safety, this means designing a car that responds and handles well, a car that can accelerate safely when overtaking, but one that can stop with equal confidence. Throughout the Yaris range, ABS prevents the wheels from locking under severe braking pressure, while the additional safety feature, EBD (Electronic Brake force Distribution), ensures that precise braking force is automatically applied to each wheel, regardless of the circumstances.

Its specially strengthened frame is designed to absorb impact, whether from the front, side or back, thereby reducing potential injury to occupants, while special head-impact protection provides further reassurance.

The Yaris is equipped with advanced three-point seatbelts on all seats, airbags and other safety features such as deformable steering-wheel, de-coupling brake pedal and child-proof locks on five-door models. It scored best in its class in the EuroNCAP side and front crash tests and with 29 points, out of a maximum of 34.

The Yaris – a compact car with big-car qualities.

A home

The front seats are positioned as close to the centre of the car as possible, well clear of the side impact zone. And for extra peace of mind all seats are fitted with 3-point seatbelts. The rigid steel frame has been specifically designed to absorb maximum energy on impact. And every Yaris is fitted with ABS braking with EBD to prevent wheels from locking and to provide maximum braking efficiency.

## Peace of mind

Toyota's global reputation for quality and integrity means the Yaris can add peace of mind to its own highly individual range of attributes.

On the day you purchase your Yaris, your Toyota Centre will present you with a 'Yaris Passport'; a guide to living with your Yaris and making the most of its considerable range of features. Your Toyota Centre will explain the car to you, and always be there, should you require any assistance.

### Health and Safety

« home

Your Toyota Centre will also talk you through Yaris' very own Health and Safety programme. It's very simple. Your Yaris will only need a full 'Health and Safety' check once every two years, or 20,000 miles if you enjoy driving it as much as we think you will. An intermediate oil change with additional 'Health and Safety' checks are also required every year or 10,000 miles.

#### Warranty

We're so confident each and every Yaris is so well built that it comes with a three-year or 60,000 miles warranty against any mechanical failure. In addition, the paintwork, no matter what you select, is guaranteed against imperfections for three years too. Also, the body is guaranteed for 12 years against corrosion perforation.
