VOLVO

THE VOLVO V70

The Volvo V70 simply defies categorisation. It drives like a class-leading saloon – with some of the most impressive engines in its class. It feels like a luxury saloon, yet people still insist it's the best large estate on the market. Don't worry if you can't decide either – this price list should help you find the V70 that's exactly right for you.

T5

The T5 2.4 litre, turbocharged, in-line, 5 cylinder engine delivers outstanding performance – producing 260 bhp and 350 Nm torque. This powerful engine features variable valve timing on the exhaust side and a responsive turbocharger designed to deliver maximum torque across most engine speeds. The high charge air pressure in the turbo means extra power at high revs – this is an engine to inspire active driving.

D5

The D5 2.4 litre, turbocharged, in-line, 5 cylinder, common rail diesel engine delivers very low fuel consumption and CO₂ emissions with excellent performance – producing 185 bhp and 400 Nm torque. This extremely advanced diesel engine is made entirely of aluminium giving it a similar weight to a petrol engine. This advanced design combined with third-generation electronic common rail fuel injection, variable blade turbocharger and a diesel particulate filter makes it one of the cleanest and most advanced diesel engines available on the market. A 2.4D version with 163 bhp is also available.

BI-FUEL

As part of Volvo's total commitment to the environment, the V70 Bi-Fuel engine enables you to benefit from the lower cost of CNG and reduce harmful emissions to the atmosphere.

- (i) Compressed Natural Gas.
- (ii) These results do not express or imply any guarantee of the fuel consumption of a particular car as there are inevitable differences between individual cars of the same model. Additionally driving style, traffic conditions, as well as the age and mileage and standard of maintenance will affect a car's fuel consumption.
- (iii) The Urban fuel consumption figure is based on typical city driving, including starting the car from cold. The Extra Urban figure is based on typical motorway driving and cruising. The Combined figure averages the consumption across both cycles.
- (iv) For best performance and lowest fuel consumption 98 RON is recommended. 95 RON can be used for normal driving.
- (v) Unbraked towing weight must not exceed 50% of kerb weight up to a maximum of 750 kg.
- (vi) Figure quoted without sunroof.
- (vii) Measurements taken at height of floor covering.

Notes
The weight of the vehicle will influence the level of CO₂ emitted. As a result, vehicles with higher levels of specification and factory fit options may emit higher levels of CO₂.
