Junior Seat I-II

The BMW Junior Seat I-II with height and tilt adjustable backrest and restraint cushion is an ideal solution for children between 9 months and 7 years (9 to 25kg body weight). The restraint cushion offers ideal protection to children from 9 months up to approx. 4 years: It reduces the impact of the forces acting on the cervical spine in the event of an accident. For children with a body weight in excess of 18kg or approx. 3.5 years, the restraint cushion is no longer used. Your child is then secured in using the vehicle seat belt.

Baby Seat 0+

The ideal seat for the smallest of children weighing up to 13kg (approx. 18 months). The system consists of a frame installed in the vehicle and a portable baby shell. The BMW baby Seat 0+ is fitted in the opposite direction of travel. This significantly reduces the pressure exerted on the child's cervical spine in the event of a frontal collision. With the optionally available seat size reducer, the BMW Baby Seat 0+ can be ergonomically adapted to fit newborns.

Junior Seat II

The BMW Junior Seat II is offered without restraint cushion for children over 15kg and approx. 3.5 years. The ISOFIX preparation may only legally be used for children up to 18kg. Accordingly, the BMW Junior Seat II and the BMW Junior seat III are not available in the ISOFIX version.
