Introduction

BMW M Cars M6 Coupé

The BMW M6 Redefining Grand Touring. Supercar performance, intelligent technology and pure luxury provide an exhilarating and engaging driving experience second to none. This unprecedented combination of muscular performance and sheer elgance eclipses the competition with the most powerful letter in the world: M

Company car tax

Pricing

Car benefit charges for cars with an approved CO2 emissions figure

£84,475

Model Description	CO2 Taxband	CO2 Emission
M6 Coupé	35%	342.0 (NA)

Company car tax information for automatic cars is shown in brackets.

Price shown as 'on the road'

M6 Coupé

BMW EfficientDynamics delivers impressive emissions reductions and better fuel consumption without sacrificing driving pleasure. This is achieved through a combination of intelligent engine management systems, innovative new technologies and the use of lightweight materials.

Brake Energy Regeneration.

Intelligent Alternator Control monitors battery condition, engaging the alternator only when the battery requires recharging. This reduces the demands on the engine, reducing fuel consumption and emissions. In addition, when the car's brakes are applied or when coasting downhill, this system automatically engages the alternator to charge the battery, recycling energy that would otherwise be wasted.

Lightweight Engineering.

The overall weight of the vehicle is reduced through the use of lightweight materials such as thermoplastic, aluminium and magnesium alloy. The results are enhanced driving dynamics and improvements in both fuel economy and weight distribution.

Equipment

Engine		M6 Coupé
90° V10 engine with four-valve technology		-
Catalytic converter		-
Digital Motor Electronics (DME)		-
Dual-mass flywheel		-
Electric throttle butterfly control		-
