## Change your perspective in seconds

Highly responsive steering and a small turning circle allows you to effortlessly whip around the sharpest corners and slip into the tightest parking spaces.

## Good clean fun

A dynamic performer, whether in the city or on the open road, that pleases the crowd with effortless pace and efficiency.

**Feel good. Feel connected.**

AYGO's cool and spacious interior captures the spirit of the city with bold styling and clever design. Choose AYGO Go! to enter a multimedia world that includes sat nav, hands-free calling and iPod® connectivity.

Shown with air conditioning, which is optional on AYGO Go!

## Urban space

Despite the AYGO being compact, the interior gives 4 people room to travel in complete comfort... and it's only 3.4m long.

### A space to stretch out

Seats can be folded to carry larger items.

## Streetwise

The city's full of surprises. That's why we love it. But you need to be alert. AYGO's streetwise range of safety features gives you the confidence to fully enjoy your drive.

Six airbags available on AYGO+, AYGO Blue and AYGO Go!

**Enjoy a low maintenance lifestyle**  
Toyota manufactures some of the world's most reliable cars, with a strong focus on quality and durability.

So throughout AYGO's lifespan you can be assured of low maintenance costs and high re-sale value.

Even road tax and insurance are remarkably low.

Model shown with optional Style pack.

## Toyota Optimal Drive

Toyota Optimal Drive means reduced CO<sub>2</sub> emissions, better fuel economy and enhanced performance. It marks the beginning of a new generation of power train technologies, engineered to save you money.

It means you no longer have to give up performance to benefit from lower CO<sub>2</sub> and improved economy.

The fuel consumption and CO<sub>2</sub> values are measured in a controlled environment, in accordance with the requirements of directive 80/1268/EEC incl. its amendments, on a basic production vehicle. The fuel consumption and CO<sub>2</sub> values of your vehicle may vary from those measured. Driving behaviour as well as other factors (such as road conditions, traffic, vehicle conditions, installed equipment, load, number of passengers, etc.) play a role in determining a car's fuel consumption and CO<sub>2</sub> emissions.

# Glossary

Discover more about AYGO technology.

## Toyota Optimal Drive

Enhanced performance  
Lower CO<sub>2</sub>  
Better fuel economy

Until now, drivers have had to choose between environmental efficiency and superior performance. Toyota Optimal Drive marks the beginning of a new era engineered to save you money. Lower emissions and better fuel economy can now be enjoyed alongside levels of power and torque that match and often exceed existing engines.

## Anti-lock Braking System (ABS) with Electronic Brake force Distribution (EBD)

ABS prevents the wheels from locking while braking. EBD complements this by optimising brake force distribution between each wheel. Together the two systems help the driver to maintain steering control under heavy braking.

## Minimum Intrusion Cabin System (MICS)

In the event of frontal collision, energy is dissipated via the front wings, A pillars and reinforced doors towards the rear, absorbing stress through the body shell and preventing it from being concentrated in any single area. For side impacts, energy is diverted through the doors and cross-members in the roof and floor to the other side of the car.

## Euro NCAP

An independent assessment programme that evaluates the safety performance of new cars. Vehicles are awarded a score from one to five stars. Categories assessed are adult occupant protection, child occupant protection, pedestrian protection and safety assist.

The AYGO has been awarded four stars for adult occupant protection, four stars for child protection and two stars for pedestrian protection.

## Vehicle Stability Control (VSC)

VSC automatically activates each individual brake as needed and controls engine output to help maintain stability and prevent skidding when turning sharply or driving on slippery road surfaces.

Optional on some models.

## Variable Valve Timing – with intelligence (VVT-i)

Technology that maximises the engine's performance by optimising timing of the air intake depending on whether you are accelerating, cruising or just idling.

## Supplemental Restraint System (SRS)

The AYGO is fitted with up to 4 airbags. Every AYGO provides the reassurance of SRS driver and front passenger airbags, whilst AYGO+, AYGO Blue and AYGO Go! are also fitted with SRS side airbags.

Optional SRS curtain shield airbags are available together with VSC for additional safety.

## ISOFIX seat fixing

The seating incorporates special anchor points – including a top tether that helps prevent the seat tipping forward – for a safe and convenient way of correctly securing ISOFIX child seats (available from your Toyota Centre).

Standard on AYGO+, AYGO Blue and AYGO Go!

## MultiMode Transmission (MMT)

MultiMode uses the same mechanical components as a traditional manual transmission but with the addition of an electronically controlled clutch and shift mechanism. This does away with the need for a separate clutch pedal. The driver can switch between the convenience of an automated transmission and the directness of a manual gearbox with no reduction in economy.

# Toyota and the environment

## Designing your car

To achieve lower emissions and greener vehicles on the way toward the ultimate eco-car, it is essential to measure progress. Toyota has therefore developed its Ecological Vehicle Assessment System, or Eco-VAS. This is a comprehensive approach to assessing a vehicle's whole life cycle in terms of its impact on the environment, starting at the early stage of development, before the vehicle is actually built.

## Making your car

During the production of your vehicle every effort is made to reduce the effect of the manufacturing process on the environment.

Since 2006 production of the AYGO at Toyota Peugeot Citroën Automobile Czech has resulted in, per vehicle, a 10.8% reduction in CO<sub>2</sub> (electricity + other fuels), 6.4% reduction in energy consumption, 28.5% reduction in water consumption and 43.4% reduction in volatile organic compounds.

The plant does not send any waste directly to landfill and has reduced the amount of waste created in the production of an AYGO by 39.3%.

## Getting vehicles and parts to you

We are always looking to employ the most efficient and environmentally friendly logistical and delivery methods. For instance, modes of transport with the least environmental impact are selected wherever possible.

## Selling and servicing your car

We take great pride in demonstrating the benefits of driving eco-cars to each of our new customers. Every opportunity is then taken to raise awareness of their ongoing responsibility towards the environment when servicing and driving their car.

In the design phase Toyota aims for cleaner engines. Thanks to Toyota Optimal Drive we are achieving even more. Every component is optimised to save weight and space, reduce friction or simply work more efficiently.

## The end of the road for your vehicle?

95% of the AYGO is recoverable, 100% of materials are coded and the four heavy metals have been eliminated completely (in accordance with 2000/53/EC).

In addition, according to our environmental policy we offer Toyota drivers new and innovative ways of returning their old car. For more information visit: [www.toyota.eu](http://www.toyota.eu) or contact your local Toyota Centre.

Toyota Optimal Drive delivers lighter, more compact engines and advanced transmissions. You enjoy lower emissions and greater fuel economy without compromising driving pleasure. This is a new era of engine design.

## Drive thoughtfully

Drive your car in the right way and you could reduce your fuel bill and your CO<sub>2</sub> emissions by around 20–30%.

01. Remove any extra weight and roof load.
02. Plan your route and avoid detours.
03. Avoid using your car for short journeys.
04. Check your tyre pressure regularly.
05. Service your car according to the owner's manual.
06. Shift up gear earlier.
07. Only use air conditioning when necessary.
08. Follow and anticipate traffic flow.
09. Keep your windows closed.
10. Switch off your engine if you have to wait longer than 60 seconds.

# Owning an AYGO means you enjoy the peace of mind afforded by Toyota's global reputation for quality and integrity

On the day you purchase your AYGO, your centre will present you with the 'AYGO Passport'. It's a guide to getting the best out of your AYGO and its comprehensive range of features. Of course, your centre will explain the AYGO to you in detail – and always be available should you require any assistance.

## Intelligent design

The AYGO is designed and engineered to minimise the maintenance overhead. There are fewer parts that require servicing and those that do are inherently durable to extend service intervals. Equally important is that AYGO technology is made easily accessible so that maintenance labour time can be minimised. These features combine with the highly competitive pricing of Toyota parts to ensure the lowest cost of maintaining your AYGO in an ideal working condition.

## Toyota quality service

Your Toyota centre will talk you through the AYGO 'Health and Safety' maintenance programme. The programme is very straightforward and designed for your convenience. In effect, your AYGO needs a full Health and Safety check, dependent on driving style and conditions, up to once every two years or 20,000 miles (whichever comes sooner). An intermediate Health and Safety check is necessary every year or 10,000 miles (whichever comes sooner).

## 5-Year Toyota Warranty

Every new Toyota comes with a 5-year/100,000-mile manufacturer's warranty (covering your car against the unlikely event of a manufacturing defect causing a mechanical fault). For full details, please ask your official Toyota Centre or visit [www.toyota.co.uk/5yearwarranty](http://www.toyota.co.uk/5yearwarranty)

After the initial warranty period has ended, you can extend your warranty until the vehicle is 7 years old – choosing from a range of packages to suit your vehicle and your needs. Our Extended Warranty covers the main component parts of the vehicle\*, meaning that you pay for nothing beyond routine servicing and maintenance, so there are no unexpected bills to pay.

**Rust and paint defects** The warranty also covers surface rust and paint defects appearing on any of the painted body panels as a result of a fault in materials for a period of 3 years, regardless of mileage.

**Corrosion cover** The warranty offers 12 years' coverage, regardless of mileage, against perforation of the bodywork (from inside to outside) that develops due to corrosion caused by faults in materials or workmanship.

## Toyota genuine parts

The AYGO is designed to minimise the cost of accident repair. Energy-absorbing elements are built into the bumpers, expensive-to-replace parts are located away from damage zones, and commonly damaged body parts are bolted rather than welded. As a result, the extent of damage is limited and damaged parts are easy to remove, replace or repair. Ultimately, this means very low parts and labour charges.

## Added security

The AYGO security system withstands the insurance industry's rigorous 5-minute attack test and provides excellent protection. Both the alarm system and engine immobiliser are approved by Europe's major insurance companies.

## Toyota accessories

Toyota accessories are designed and manufactured with the same care, quality and attention to detail as Toyota vehicles. Tailor-made for your Toyota, they fit perfectly and add a personal touch of style, comfort or practicality. And because they've been tested under the most severe conditions, you can have complete confidence in their reliability and durability. To add to the reassurance, every genuine Toyota accessory has a 3-year warranty when purchased together with the vehicle<sup>§</sup>.

## Club Toyota

When you buy a Toyota you automatically become a member of Club Toyota, for 12 months free of charge. This entitles you to take advantage of a host of benefits including free AA Roadside Assistance in the UK and Europe, specially negotiated rates for travel insurance, a 5% discount off Toyota Motor Insurance, plus exclusive offers and promotions through our quarterly customer magazine. For further information please call 0844 701 6200 or visit [www.toyota.co.uk/club](http://www.toyota.co.uk/club)

## Toyota Motor Insurance

Toyota Motor Insurance is available for Toyota owners at competitive premiums. To obtain details of the benefits included and to arrange a quotation, please contact your local Toyota Centre or call 0800 350 500.

## Toyota Accident Assistance

At Toyota, we believe that our customers deserve the best possible care. Therefore if you are involved in an accident, one call to Toyota Accident Assistance will get you back on the road again, whilst we take care of liaising with your insurer and arranging for your car to be repaired. By making us your first call, we will ensure your vehicle is repaired by Toyota to factory standards, meaning no compromise to your warranty or residual value.

## Toyota Approved Used Car Scheme

All Toyota Approved Used vehicles come complete with a pre-delivery inspection, a mileage check, 12 months' warranty, AA breakdown cover, Club Toyota membership<sup>°</sup> and a 30-day vehicle exchange plan.

## Recycling Toyota End-Of-Life Vehicles

We offer a free vehicle take back scheme through our appointed service provider, Autogreen. This is a new and innovative way for Toyota drivers to return their vehicle at the end of its life for dismantling and recycling. For more information about End-Of-Life Vehicles please refer to [www.toyota.co.uk/environment](http://www.toyota.co.uk/environment)

## Flexible Finance from Toyota Financial Services

When choosing your new car you will make sure you choose the right model, the right specification and the right colour to suit you. Choosing how you finance your car is just as important.

Our range of finance plans has been designed with simplicity in mind to make funding your car as easy as driving it.

All our plans offer easy budgeting and peace of mind and **AccessToyota** brings these and other benefits together in one flexible package. **AccessToyota** is a finance plan that puts you in control. You don't have to worry about finding a large deposit as you agree the amount of deposit that you want to pay and choose your repayment term from 2 to 3 years. What makes **AccessToyota** different is that Toyota Financial Services (TFS) give your vehicle the security of a guaranteed future value (GFV) which is your optional final payment, deferred to the end of the agreement. Affordable monthly payments are yours to enjoy as your repayments are based on the vehicle selling price less your deposit and the GFV/ optional final payment, plus the cost of borrowing. In addition, you can have reassurance against the risk of a fall in used car prices, knowing the minimum amount your Toyota will be worth at the end of your agreement is guaranteed at TFS. Then when your agreement comes to an end you have three flexible choices:

- Part exchange your vehicle for a brand new Toyota
- Pay your final payment (the GFV) and take full ownership of the car\*\*
- Simply hand the car back with nothing more to pay<sup>§§</sup>

Ask your Toyota Centre to show you how **AccessToyota** could be the best choice for you.

## Flexible Finance for all Toyota customers

Whatever your needs, to complement **AccessToyota**, TFS has a full range of finance options to offer. From traditional Hire Purchase to Contract Hire and Leasing. Whether you're a private motorist with a fixed monthly budget in mind or a business customer looking for VAT-efficient funding options, just discuss your individual requirements with your Toyota Centre. They will be pleased to show you how convenient and competitive Toyota Financial Services can be.
