If you would like more detailed advice on Company Car Taxation please contact an Independent Financial Advisor.

COMPANY CAR TAX

Company car taxation has changed. Following the government's commitment to reducing global warming, company cars are now taxed on their CO₂ emissions. Using the latest in diesel technology, the Renault range has some of the lowest emissions amongst new cars on sale today. This easy guide will help you to calculate the amount of tax you will pay for any new Renault car by following 4 simple steps:

Step 1

Each model in the Renault Car Price Guide has a Benefit In Kind (BIK) percentage rating for tax purposes. (See Car Benefit Table above)
 Example: Mégane Hatch Dynamique TomTom dCi 110 Stop and Start ECO = **13%**.

Step 2

The price of the vehicle used for taxation (the P11D value) will be the Total Retail Price, plus the delivery charge of £595.00, plus any costed options.
 Example shown without costed options: Mégane Hatch Dynamique TomTom dCi 110 Stop and Start ECO = **£19,150.00 + £595.00 = £19,745.00**

Step 3

Using the BIK figure, calculate the percentage of the vehicle that is liable for taxation.

Example: Mégane Hatch Dynamique TomTom dCi 110 Stop and Start ECO = **13% x £19,745.00 = £2,566.85**

Step 4

Now calculate the amount of tax to be paid annually. This is based on the amount of income tax that you pay, either 20% or 40%.

Example: Mégane Hatch Dynamique TomTom dCi 110 Stop and Start ECO Car Benefit Charge = **£2,566.85 x Income Tax @ 20% = £513.37**

Tax Payable

For an income tax payer of 20% the amount of tax to be paid on the Mégane Hatch Dynamique TomTom dCi 110 Stop and Start ECO is therefore **£513.37** (for tax year 2012 to 2013).

Please note: this calculation is illustrative only and may not reflect current vehicle pricing.

CO₂ BANDING

The amount of Vehicle Excise Duty (Road Fund Licence) payable on new cars varies depending on the level of CO₂ (Carbon Dioxide) emissions produced by the vehicle and the type of fuel used. The table below illustrates the 'CO₂ banding' and, therefore, the amount of Vehicle Excise Duty payable. These bandings are effective from 1st April 2012 and supersede any previous bandings.

Bands	CO ₂ Emission Figure (g/km)	First Year Diesel Car (TC 49) and Petrol Car (TC 48) 12 Months Rate	Subsequent Years Diesel Car (TC 49) and Petrol Car (TC 48) 12 Months Rate
Band A	Up to 100	£0	£0
Band B	101 to 110	£0	£20
Band C	111 to 120	£0	£30
Band D	121 to 130	£0	£100
Band E	131 to 140	£120	£120
Band F	141 to 150	£135	£135
Band G	151 to 165	£170	£170
Band H	166 to 175	£275	£195
Band I	176 to 185	£325	£215
Band J	186 to 200	£460	£250
Band K	201 to 225	£600	£270
Band L	226 to 255	£815	£460
Band M	Over 255	£1,030	£475

These are the rates you will pay in the first year of ownership. In the second year, Vehicle Excise Duty rates will revert to the regular rate for that vehicle, as notified at the time of renewal.

The eco² symbol shows the vehicle emits less than 120g/km of CO₂, is manufactured in a plant that has been certified ISO14001. The vehicle can be 95% recoverable at the end of its life cycle. Find out more at www.renault.co.uk
