** Axle + orders should specify option 4HN (Increased Towing Capacity - 3.73 Axle Ratio). Adding 4HN increases CO2, VED and Fuel Consumption vs Standard Axle. Please see technical specifications.

3.73 Axle Ratio when ordered as an option changes the CO2 of the vehicle and carries a higher rate of VED. 3.73 Axle Ratio versions are on special order only.

Environmental information

The guide on fuel economy and CO₂ emissions which contains data for all new passenger car models is available at any point of sale free of charge. In addition to the fuel efficiency of a car, driving behaviour as well as other non-technical factors play a role in determining a car's fuel consumption and CO₂ emissions. CO₂ is the main greenhouse gas responsible for global warming.

Fuel consumption figures are strictly generated in accordance with Testing Directive 93/116/EC. They are designed to maintain strict comparability and may not be fully representative of real life driving. For further information, please visit www.vca.gov.uk
