The pulse of a new generation. The A-Class

Nothing can prepare you for the effect the A-Class has on your eyes, on your heart, and on your preconceptions. The A-Class is a car for a new era and a new generation. A car that wants it all and shuns compromise at any cost. The design spells out the future. It's where incredible agility meets high efficiency, and comfort forms a perfect balance with technology. There are so many stylish options to choose from, so you can have the A-Class just the way you like it. It's all here, and it's ready to go. As soon as you take to the wheel your head will follow your heart and the A-Class leads the way.

and you're hooked

Overview 4

It's hard to take your eyes off this A-Class. Truly distinctive on the outside, it waves goodbye to boredom on the road. Inside, you're welcomed by maximum comfort. High tech? Of course. Highest level of safety? It goes without saying. Efficiency? You've guessed it. Here's a Mercedes true to its tradition. And a car like you've never seen it before. Hello, A-Class.

130 bpm

When you're left speechless,
your heart says it all

Feel life pulsating: those taut lines and highly defined edges, concave curves meeting convex shapes – every inch of the A-Class plays with the light in a perfect rhythm. Muscular and athletic like a coupé, it's no wonder you're beaming.

1 of a kind

Endless equipment options, but only one that really matters

Your style, your way, your personality, your A-Class. Five model lines, five very different forms of expression. Dynamic and confident with the SE, or even more athletic with the Sport, AMG Sport, Engineered by AMG or the A45 AMG 4MATIC. The A-Class is a Mercedes-Benz through and through, but there's no doubt it takes after you.

600 miles

Refuelling has become a rarity.
Great for the future and for your wallet

The A-Class is a true endurance athlete. With consumption as low as 85 mpg, you'll get further than you'll think. All made possible by efficient turbocharged engines with direct injection, and the standard ECO start/stop function which helps save fuel when at a standstill. It's what we call BlueEFFICIENCY.

5+11

More awareness and less risk

When your five senses reach their limit, 11 electronic assistants step in. Radar-assisted Collision Prevention Assist, awareness-enhancing Attention Assist and Hill Start Assist are all standard on the A-Class. For even greater levels of safety, Distronic Plus radar-assisted cruise control and the Pre-Safe® anticipatory safety system are available as an option. That's plenty of technology to keep you out of harm's way.

$c_d = 0.27$

Reduce drag and you'll reduce fuel consumption

The A-Class features such a streamlined body, even the air is stopped in its tracks. In fact, the air resistance is similar to a notchback, which makes the A-Class the most aerodynamic in its segment. Less drag means more benefits: greater fuel efficiency and more miles between refuelling. On top of it all, greater aerodynamics keep wind noise to a minimum.

Connected with all the senses

With Mercedes-Benz Intelligent Drive and Mercedes-Benz Connect, we have taught our cars to think. It takes us one step closer to our vision of accident-free driving.

Our engineers live in the future, constantly aiming to turn innovative thinking into everyday solutions. This aspiration has resulted in many developments with a lasting impact on automotive engineering. In other words, our work ensures that a Mercedes-Benz is always ahead of its time.

Innovative technologies such as the Pre-Safe® anticipatory safety system and DISTRONIC Plus radar-assisted cruise control first made it onto the road in a Mercedes-Benz, setting new standards in vehicle safety. It marked the first time active and passive systems were combined – for even better protection and ride comfort. Time and time again we have pioneered solutions to get closer to realising our vision of accident-free driving.

Mercedes-Benz Intelligent Drive takes things a step further by intelligently combining sensors with safety systems and electronic assistants. For us, it's a logical progression as the traffic situation has changed. There are more vehicles on the road, the driver's job is becoming more complex and distractions are increasing.

Radar-assisted Cruise Control with Steering Assist and Stop & Go Pilot marks another important step towards autonomous driving. Steering Assist provides lateral assistance to keep the car in lane. It works with a stereo camera capturing road markings and vehicles driving ahead at low speeds. The system brakes if necessary and accelerates to a preset speed when possible. As a result, your driving comfort is significantly enhanced, especially on long journeys or in slow-moving traffic jams.

Mercedes-Benz Connect. Serving as a smart interface between car and Internet, Mercedes-Benz Connect offers a whole range of services for your comfort, safety and information. It's an effortless, highly efficient way to keep the driver connected with the digital world when on the move. The system can be paired with COMAND Online, live traffic information, the Mercedes-Benz Emergency Call System and with many individual Mercedes-Benz apps. While your car remembers your preferences and adapts accordingly, it can even advise you to take specific actions and interact with your social networks. Mercedes-Benz Connect turns our vision of seamlessly connected mobility into reality. In the future, the way we drive will change dramatically, making it more comfortable, more efficient and safer as a result.

A Mercedes-Benz can monitor the road situation, alert you to possible dangers, and if necessary, act independently. Our cars are becoming increasingly intelligent, too. That is why a Mercedes-Benz takes you beyond a specific destination – it takes you straight to the future.

BlueEFFICIENCY – fast forward to tomorrow

Mercedes-Benz is quicker at getting future technologies to where they matter most: on the road. With ever more efficient vehicles and a production process that wastes fewer and fewer resources. We call this comprehensive approach BlueEFFICIENCY. By way of example, BlueTEC technology for the diesel engine reduces nitrogen oxide

emissions by up to 90%. Our Hybrid models featuring an intelligent combination of internal combustion engine and electric drive can reduce fuel consumption significantly, while the SLS AMG Coupé Electric Drive takes electric mobility to a new level. Technical and aerodynamic optimisation measures right down to the last detail make

the BlueEFFICIENCY Editions available in selected model series true champions of efficiency. But every A-Class model already boasts a raft of BlueEFFICIENCY features – holistic vehicle optimisation measures that are adapted specifically for this model series.

- 1 Energy-saving ancillary systems
- 2 High-efficiency alternator
- 3 Direct injection petrol engines; optimised diesel engines
- 4 Outstanding aerodynamics, resulting in a drag coefficient of 0.27
- 5 ECO start/stop function fitted as standard
- 6 ECO indicator fitted as standard
- 7 7G-DCT dual-clutch transmission (optional)
- 8 Tyres designed for lower rolling resistance
- 9 Intelligent use of weight-saving aluminium (for front wings, bonnet and other body parts)

Diesel engines

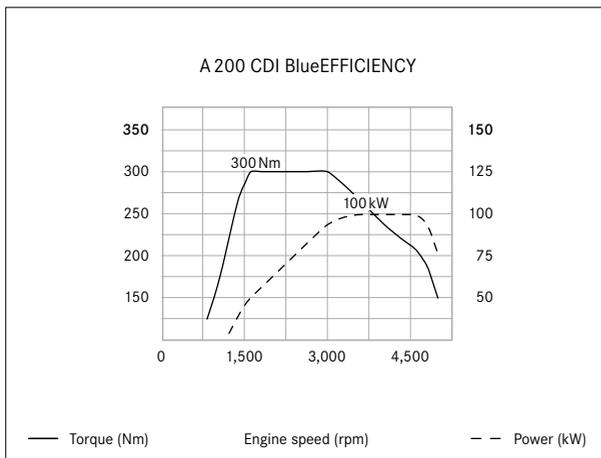

The A-Class offers the very latest in Mercedes-Benz diesel technology. Its diesel engines are cleaner, more powerful and more refined, while also delivering improved CO₂ emissions and fuel consumption.

4-cylinder engines. The A-Class diesel engines offer all the familiar qualities of modern Mercedes-Benz diesels, delivering generous torque, excellent low-speed responses, and low CO₂ emissions, as well as enhanced refinement and less vibration.

What's more, they also benefit from further improved fuel efficiency, thanks to a fourth-generation common-rail diesel system that features higher injection pressures (1,800 bar), optimised combustion chambers and precise magnetic valve injectors. Increased combustion pressures

and turbocharging with variable turbine geometry ensure high levels of torque are available at any speed, while intelligent ancillary management helps to further reduce fuel consumption.

Three A-Class diesel engines are available: the A 180 CDI ECO/A 180 CDI offers 109 hp (80 kW) and 260 Nm of torque; the A 200 CDI produces 136 hp (100 kW) and a maximum 300 Nm of torque; and the A 220 CDI boasts 170 hp (125 kW) and 350 Nm. All come fitted with our ECO start/stop function, which cuts the engine temporarily when the car comes to a standstill, and meet European emissions standards.

In the A 200 CDI, the maximum 300 Nm of torque is available from just 1,600 to 3,000 rpm

The A 200 CDI's 4-cylinder diesel engine combines impressive pulling power with low fuel consumption and emissions

Petrol engines

The A-Class petrol engines deliver lower fuel consumption and emissions without compromising on performance or refinement.

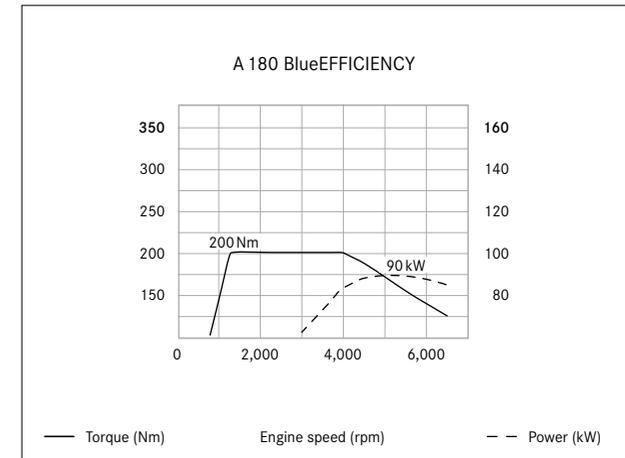

4-cylinder engines. The A-Class petrol engines boast impressive levels of power and torque, exemplary refinement and reassuringly low fuel consumption and emissions. This admirable blend of qualities is achieved courtesy of the combination of direct petrol injection, variable valve timing and turbocharging. In conjunction with high-pressure injection via precise piezo injectors, the optimised combustion process makes for cleaner combustion, enhancing the engine's operating efficiency and thereby improving fuel economy. Variable valve timing, which ensures the cylinders are charged only to the degree required, helps to further reduce fuel use, as do the engines' lower weight, reduced internal friction and on-demand ancillaries. In addition, the A-Class petrol engines come with ECO start/stop as standard, enabling them to save fuel when at a standstill.

There are four A-Class petrol models to choose from: the A180 offers 122hp (90 kW) and a maximum 200 Nm of torque, the A200 has 156hp (115 kW) plus 250 Nm of torque and the A250 boasts 211 hp (155 kW) and 350 Nm of torque. The A45 AMG 4MATIC develops 360 hp (265 kW)

and a maximum torque of 450Nm. All petrol engines comply with European emissions standards.

The A180 delivers its maximum 200 Nm of torque all the way from 1,250 to 4,000 rpm

The A180 4-cylinder petrol engine benefits from direct petrol injection, variable valve timing and turbocharging

Transmissions

The transmissions for the A-Class are perfectly matched to its engines. They offer a choice of manual and dual-clutch systems, enabling you to opt for a sporty or economical driving style.

6-speed manual transmission (standard on A 180 CDI, A 200 CDI, A 180 and A 200). The 6-speed manual transmission offers short throws and hence rapid gear changes. In addition, all models come with the fuel-saving ECO start/stop function, which cuts the engine temporarily at traffic lights or when queuing, as well as a new ECO indicator in the instrument panel that helps to encourage efficient driving.

7G-DCT 7-speed automatic transmission (standard on A 220 CDI and A 250, optional on all other models). This 7-speed dual-clutch transmission is an ideal blend of comfort, performance and efficiency. It consists of two independent gearbox units for the odd and even gears respectively, each with its own separate clutch. Under acceleration or deceleration, the currently inactive unit is able to preselect the next ratio ready for the anticipated up- or downshift. This makes for smoother, more immediate sequential shifts with no loss of power. With a choice of 'Economy', 'Sport' and 'Manual' modes,

engaged via a button on the centre console, 7G-DCT also allows you to choose between the comfort and convenience of automatic shifts or the greater involvement of manual gear changes. 'Economy' and 'Sport' modes offer different shift characteristics and speeds, with upshifts coming at higher revs in 'Sport' mode than in 'Economy' and downshifts performed earlier.

7G-DCT – efficient gear changes without interrupting the flow of power

In 'Manual' mode, you determine the shift points yourself via gear shift paddles on the steering wheel. 7G-DCT also features an ergonomic Direct Select gear shift lever and cruise control with Speedtronic variable speed limiter. ECO start/stop helps to reduce fuel consumption, and the new gear shift recommendation display in 'Manual' mode assists efficient driving. In addition, the current gear is always displayed in the instrument cluster.

Suspension

The A-Class suspension and steering systems offer a fine blend of comfort, stability and precision. For even greater agility, there's the Dynamic Handling Package with sports suspension and Direct Steering.

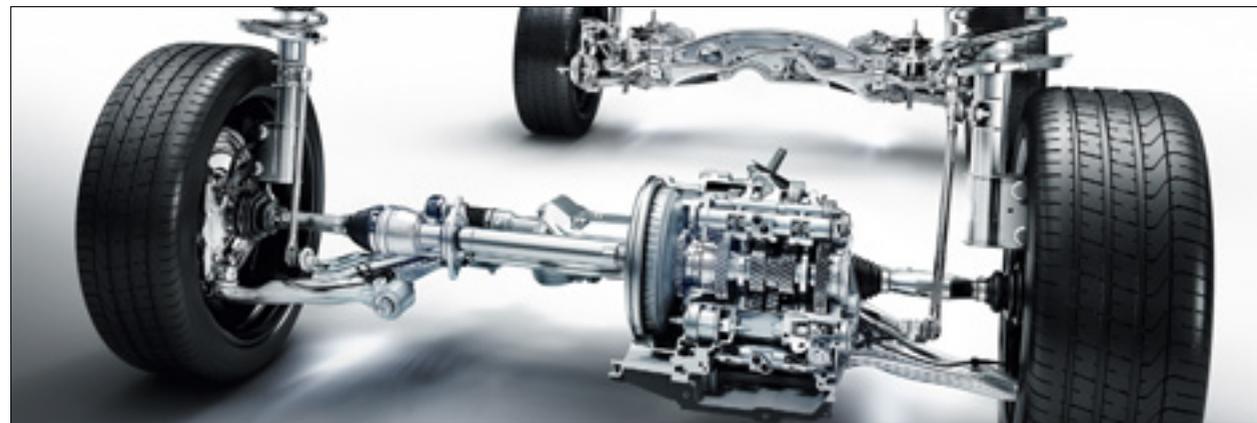

Suspension and steering. The A-Class is fitted with optimised McPherson struts at the front and an all-new multi-link rear suspension with weight-saving aluminium components, a combination that guarantees high levels of stability and comfort. The standard rack-and-pinion steering system, meanwhile, combines safety, precision and feel thanks to electromechanical assistance that decreases with speed and an integral Steer Control system that lends a hand in potentially critical situations.

Sports suspension. There are three sports suspensions available, dependent on the model line. All give the A-Class even more agile and surefooted handling. Firmer springing and damping result in a sportier feel, helping to further increase stability and reduce roll. The sports suspension, available on the Sport and AMG Sport, is lowered by 15 mm and includes the Dynamic Handling Package and Sports Direct Steering. The Engineered by AMG features its own exclusively matched sports suspension with even firmer settings and enhanced responsiveness.

Sports Direct Steering (part of Dynamic Handling Package; optional on Sport and AMG Sport). The Sports Direct Steering system varies the steering ratio according to the steering angle, thus translating steering inputs even more immediately to the road and significantly reducing the steering effort required in tight turns or when parking.

At high speeds, it offers excellent straight-line stability and provides exceptionally accurate feedback.

4MATIC. The permanent all-wheel drive system offers fully variable torque distribution between the front and rear axle. This makes for sporty driving characteristics with optimum traction, whatever the driving conditions.

The A-Class combines agility with high levels of comfort

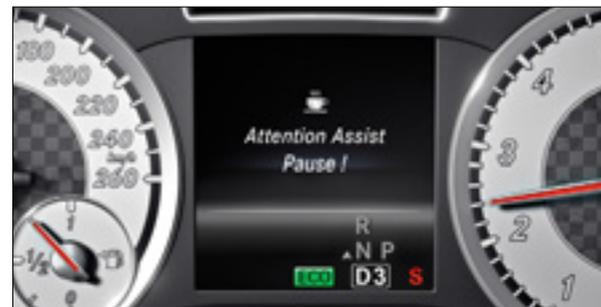

Integrated safety concept

Like all our passenger cars, the A-Class is built according to an integrated safety concept. It ensures the many passive and active protection systems work together to enhance safety in every situation – helping to bring our vision of accident-free driving another step closer.

As the inventor of the motor car, we feel a particular responsibility towards road safety. That's why we were the first manufacturer to develop an integrated safety concept that seamlessly combines a car's active and passive safety features, thus ensuring optimum all-round protection. This concept covers four different areas – safer driving, anticipating danger, protecting occupants and pedestrians and post-crash safety – and incorporates measures designed to maximise safety in every situation, by helping you to stay safe, alerting you to danger, and assisting you wherever possible. In addition, our unique Pre-Safe® anticipatory safety system recognises likely accident scenarios and takes steps that help to further enhance occupant protection. If a collision can't be avoided, intelligent passive safety systems help to provide protection where it's needed, while solutions that can minimise the consequences of an accident and facilitate emergency assistance are also a key part of this safety concept.

Safer driving: Attention Assist (standard). Particularly beneficial on long journeys, Attention Assist is a system for detecting fatigue. Between speeds of approximately 50 and 110 mph, it assesses the driver's behaviour via an array of sensors, compares it to the behaviour patterns already stored for that driver and thus registers unexpected changes that may indicate an increase in tiredness or inattentiveness.

If it detects signs of tiredness or inattentiveness, Attention Assist recommends taking a break

Safer driving: Collision Prevention Assist (standard). At speeds from approximately 24 mph, Collision Prevention Assist recognises if you are too close to the vehicle or object in front of you, whether it's moving or stationary. It can then alert you via visual and acoustic warnings. If you apply the brakes, Adaptive Brake Assist ensures exactly the brake force required to avoid a collision.

Collision Prevention Assist can warn you if it detects you come too close to the vehicle or object in front

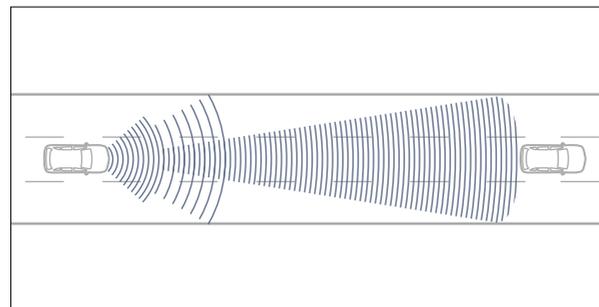

Safer driving: Adaptive Brake Assist (standard). This modular braking system combines the anti-lock braking system (ABS) and the Electronic Stability Programme (ESP®) with additional braking functions that enhance convenience and safety. By drying the brakes in the wet and priming them automatically, i.e. placing the brake pads against the discs as soon as you take your foot off the accelerator, Adaptive Brake Assist gives you even more rapid braking responses and shorter stopping distances, while the Hill Start Assist function prevents you from rolling backwards when switching from brake to accelerator on inclines. With the hold function, you can also keep the brakes engaged by twice pressing and releasing the brake pedal.

Safer driving: DISTRONIC PLUS (optional). This radar-assisted cruise control system maintains a preset distance from the vehicle in front, accelerating and braking automatically and thus making for more relaxing progress in high-speed driving.

What's more, DISTRONIC PLUS is equally effective in stop/start traffic, thanks to a sensor that reads radar signals at distances ranging from just 0.2 to 200 metres. DISTRONIC PLUS is only available in conjunction with the 7G-DCT 7-speed automatic transmission. In the event of an imminent impact, Collision Prevention Assist (included with DISTRONIC PLUS) will facilitate the braking process to avoid a collision altogether or to minimise damage.

DISTRONIC PLUS radar-assisted cruise control automatically maintains a preset distance from the vehicle in front

Safer driving: Lane-Keeping Assist/Blind Spot Assist (offered as Lane-Tracking Package option). Lane-Keeping Assist recognises white road markings and warns you via subtle vibrations of the steering wheel should you unintentionally stray out of lane. Blind Spot Assist, meanwhile, uses twin radar sensors to monitor the hard-to-see areas behind and to the sides and rear of the car. In lane changes at speeds of approximately 20 mph or above, the system can detect the presence of another vehicle in your blind spot and alert you to the danger via visual and acoustic warnings.

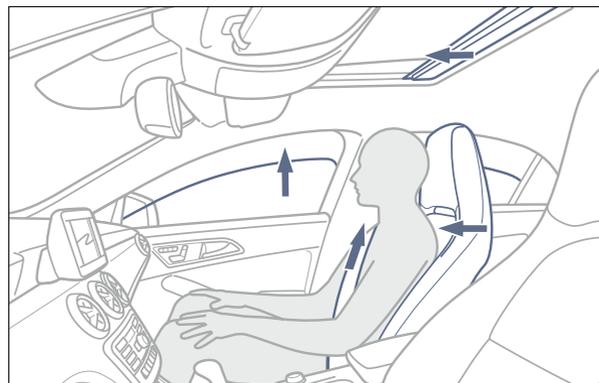

Safer driving: Intelligent Light System (optional).

The Intelligent Light System comprises a variety of modes and functions: country mode, motorway mode, fog mode, cornering light function, the Active Light System and Adaptive High Beam Assist, which automatically maximises the headlamps' range then lowers them again as soon as the lights of an oncoming vehicle are detected. Also included are LED rear tail lights and integrated LED daytime running lights that help enhance visibility on the road.

Anticipating danger: Pre-Safe® anticipatory safety system (optional).

If it detects a probable accident scenario, Pre-Safe® can take a range of anticipatory measures to reduce the risk of injury to the occupants. Pre-Safe® evaluates sensor data from systems such as ESP® and BAS, enabling it to detect heavy over- or understeer and emergency braking. If need be, it can

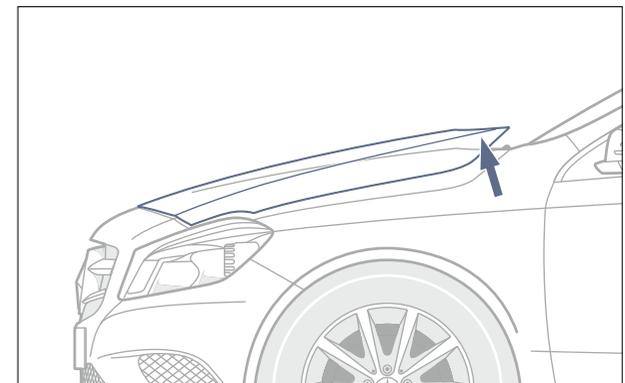

then instantly activate the front seat belt tensioners, close the windows and move the front passenger seat to a safer position for an accident, ensuring maximum protection from airbags and seat belts should an impact then occur.

The Pre-Safe® system can detect critical situations and take anticipatory measures to enhance occupant protection

Protecting occupants: Active Bonnet (standard). The

Active Bonnet helps reduce the risk of injury to more vulnerable road users, such as pedestrians and cyclists. On impact, the bonnet springs up by 5 cm to better absorb the collision.

Active Bonnet helps to reduce the risk of injury to pedestrians and cyclists in the event of a collision

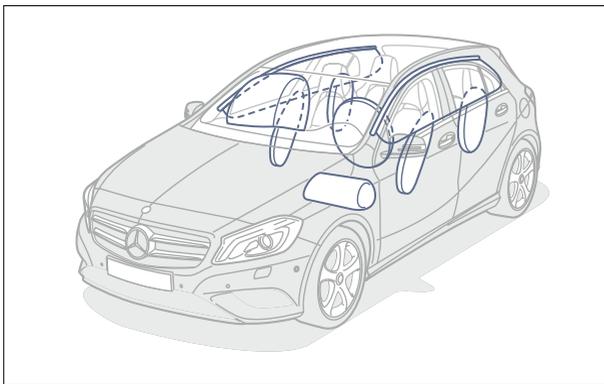

Protecting occupants and pedestrians: restraint systems (standard). Mercedes-Benz ensures that the 3-point seat belts, tensioners, belt force limiters and airbags are all carefully coordinated to keep injuries to a minimum. In addition to the high-strength bodysell structure and the highly stable occupant cell, seven

standard-fit airbags contribute towards optimum protection of the vehicle occupants: front airbags, which can be deployed in two stages, depending on the impact severity and type of accident, windowbags between the A- and C-pillars, and sidebags for the driver and front passenger. The kneebag can further reduce the impact on the driver during an accident. Sidebags are available on the left and right in the rear as an optional extra. If the crash sensors detect an accident, the seat belts are instantly tensioned helping to ensure the occupants remain firmly in their seats, while the belt force limiter relaxes the belt as the situation allows, in order to prevent undue force being applied to the ribcage. The belt force limiters, in turn, reduce the tension where appropriate in order to lessen the load on the thorax.

automatically contact the emergency services (if the phone is switched on and connected to the vehicle). In addition, it simultaneously sends GPS data and other vehicle information to the Mercedes-Benz Emergency Call centre, where an operator will attempt to make contact with you by phone. The emergency call system can also be activated manually.

Post-crash safety: rescue assistance. Mercedes-Benz has developed a range of measures that help to minimise the secondary consequences of an accident and facilitate occupant rescue. These include automatic engine cut-off, self-activating hazard lights and emergency cabin lighting. In addition, the central locking system is automatically released in the event of an accident, and there are special crash joints between the front doors and wings that make it easier to open the doors after frontal collisions. In addition, Mercedes-Benz provides a rescue guide for emergency services that can be downloaded from the Internet at www.mercedes-benz.co.uk/rescueguide

Windowbags for front and rear seat occupants, front airbags and sidebags and a driver's kneebag are all fitted as standard

Multimedia systems

For your in-car entertainment and communication, the A-Class offers a choice of high-quality units: from the standard Audio 20 radio/single CD system with pre-wiring for Becker® Map Pilot navigation system to the optional COMAND Online system.

COMAND Online allows you to select from a wide range of information, entertainment and communication functions and view maps on its high-resolution 7-inch colour display

COMAND Online system (optional). The system combines hard disk drive (HDD) navigation with a high-resolution 7-inch tablet-design display for 3D map viewing. Multimedia functions include radio, speed-sensitive volume control, music register with 10 GB of storage for audio files, free European map data updates¹ and live traffic information,¹ which provides precise, up-to-date traffic data for improved route planning and more accurately estimated time of arrival. A USB connection, SD memory card slot, Bluetooth® interface for hands-free access and the Media Interface allow connection to external data storage media. The DVD drive can play video and audio DVDs as well as CDs and MP3 files. The online feature allows access to the Internet and Mercedes-Benz apps via an Internet-enabled mobile phone, including Facebook, Internet radio, parking space search, special destination searches via Google Street View or sending routes from Google™ maps to the vehicle, and hotel finder as well as news and weather reports. You can operate the system via the COMAND controller and the multi-function steering wheel, or simply use Linguatronic voice control.

¹Free of charge for the first three years

Audio 20 radio/single CD (standard). In addition to a tuner and CD drive with MP3/WMA/AAC playback, the Audio 20 system features Becker® Map Pilot navigation system pre-wiring, a Bluetooth® hands-free interface, USB port in the glove compartment and an integrated telephone keypad. It also comes with six speakers that deliver crystal-clear sound and a 5.8-inch tablet-style display. A 6-disc CD changer can be added as an option. The system is operated either via the central controller or the steering wheel's multi-function buttons.

Becker® Map Pilot navigation system (optional). Becker® Map Pilot can be integrated with the Audio 20 radio/single CD system and operated via the central controller, the multi-function steering wheel or Linguatronic voice control. It can also be tailored to your needs by downloading additional functions and map data.

Harman Kardon® Logic 7® surround sound system (optional). With its subwoofer, 9-channel DSP amplifier and Dolby Digital 5.1 and DTS technology, this high-performance 500-watt 11-speaker system delivers a truly first-class audio experience. Its surround sound can be optimised for the front, rear or middle of the cabin or for the entire interior.

The Becker® Map Pilot navigation system works with the Audio 20 radio/single CD's display and the multi-function display in the instrument cluster

Electronic assistants

In addition to a host of safety systems, the A-Class now offers a wide range of electronic assistants that enhance safety and convenience when driving and manoeuvring.

Reversing camera (optional). This wide-angle camera with on-screen guide lines makes for safer and easier parking manoeuvres, capturing the area immediately behind the car and displaying the image on the central display. The camera is activated automatically as soon as the driver engages reverse.

Active Park Assist (optional). With Active Park Assist, the A-Class can find parking spaces for you and even manoeuvre itself into them. At speeds of up to approximately 20 mph, it identifies a suitable space, then asks you to confirm whether you wish to proceed. Once you've come to a standstill and engaged reverse, the system simply steers you in, manoeuvring so precisely that it requires a gap just 1.30 metres longer than the car.

Speed Limit Assist (fitted with the optional COMAND Online system). Speed Limit Assist reads speed limit signs and displays the permitted maximum speed in the instrument panel until the limit changes. The front-mounted camera detects round speed limit warnings both on roadside signs and in overhead gantries and is particularly useful in areas where the speed limit varies or when passing through roadworks. To help identify the limit correctly, it compares speed limit signs with map data from the navigation system.

With the reversing camera, the COMAND Online display shows you what's immediately behind the car when manoeuvring

Active Park Assist displays the status of the parking manoeuvre in the instrument panel

Speed Limit Assist shows the permitted maximum speed in the instrument panel and on the COMAND Online display

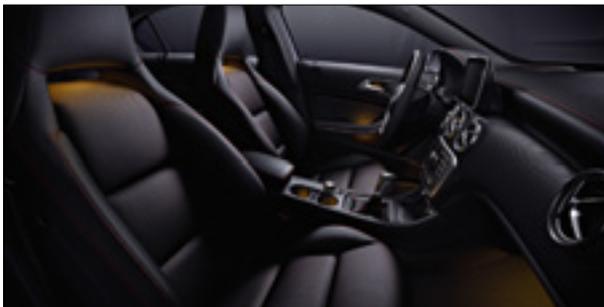

Lighting and climate control

The **Light and Sight Package** enhances safety and comfort, while optional automatic climate control helps occupants to enjoy ideal cabin conditions at all times.

Light and Sight Package (optional on SE, standard on Sport, AMG Sport and Engineered by AMG). The Light and Sight Package helps to enhance visibility and safety in the dark or in poor weather, adding rain-sensing wipers and a larger screenwash reservoir, as well as courtesy and warning lights for the doors and tailgate. It also includes illuminated vanity mirrors, illuminated footwells front and rear, illuminated door sills, illuminated headrests on driver and passenger seats, independently operable rear reading lights and a rear roof console light, while ambient interior lighting for the door panels, grab handles and front seats lend a stylish touch to the cabin at night.

Automatic climate control (optional). This two-zone automatic climate control system allows the driver and front passenger to set separate temperatures for each side of the cabin. In addition, it compensates automatically for external influences such as sunlight, air quality and humidity. An integrated charcoal filter blocks out dust, pollen and odours, ensuring occupants enjoy optimum comfort whatever the weather.

The Light and Sight Package's additional interior lighting adds a practical and stylish touch

The optional automatic climate control system maintains your ideal cabin temperature at all times

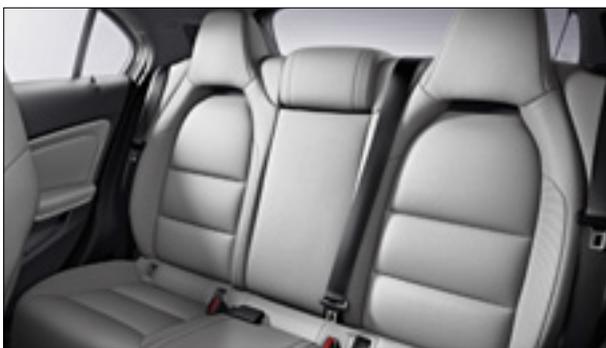

Seats

The A-Class offers attractive and supportive seats front and rear. In addition, it offers options that give those in the front an even greater range of seat adjustment.

All models have high-quality sports seats with integrated head restraints as standard. The SE comes with Artico leather/cloth upholstery, the Sport offers Black Artico leather/chequered-design cloth and the AMG Sport and Engineered by AMG models both feature Black Artico leather/Dinamica microfibre with red contrast top-stitching. Optional leather upholstery is also available – as part of either the Exclusive Package or AMG Exclusive Package. A Seat Comfort Package comprising seat height adjustment and tilt adjustment for the front seats is fitted as standard on all models.

Four-way lumbar adjustment for front seats (optional). This option enables the driver and front seat passenger to adjust the level of lumbar support according to their individual needs via air chambers within the front seat backrests. These twin chambers can be inflated or deflated in accordance with the occupant's chosen setting and are also height-adjustable.

Memory Package (optional). The Memory Package adds full electrical adjustment to both front seats. It also allows three sets of positions for the driver's seat, steering column and exterior mirrors to be saved and recalled at any time.

Those in the rear benefit from similarly high levels of comfort

¹Man-made leather

Sunroof and storage

The A-Class offers ample luggage and storage space, while the panoramic sliding sunroof makes its interior feel even roomier.

Panoramic sliding sunroof (optional). The large glass area of this electrically operated sliding sunroof allows light to stream into the cabin, making for a particularly airy and welcoming atmosphere. It comes with a motor-driven blind for instant shade and a wind deflector designed to keep wind noise to a minimum when the sunroof is open. If the Light and Sight Package is fitted, the sunroof even closes automatically should it start raining.

Luggage compartment. Folding the 1/3:2/3 split rear seat forward creates up to 1,157 litres of load space and an almost completely flat floor of up to 1.24 metres in length. With both rear seat sections in place, the A-Class has a luggage capacity of 341 litres.

Storage Package (optional). The Storage Package combines a range of extras that help you to keep small items safely and securely stowed. These include a glasses compartment in the overhead control panel, storage boxes beneath the front seats, parcel nets on the front seat backrests, in the front passenger footwell, on the sides of the luggage compartment and on the underside of the rear parcel shelf, plus a useful 12 V socket in the boot.

The panoramic sliding sunroof makes the A-Class interior feel even lighter and more spacious

The A-Class rear can be turned into a spacious load area with minimum effort

The practical Storage Package combines a range of additional compartments and nets

A-Class Sport

The A-Class Sport adds athletic appeal.

True to its name, the Sport line has a dynamic look that features chrome exterior trim, a silver two-louvre grille, twin sports tailpipes and 17" bi-colour 5-twin-spoke alloy wheels. For added comfort and safety, it also comes with cruise control as standard plus a Light and Sight Package that includes illuminated headrests, rain-sensing wipers, additional reading lights and illuminated vanity mirrors.

A-Class AMG Sport

Looks and feels more sporty on the road: the A-Class AMG Sport.

The AMG Sport lends an even bolder, more forceful look to the A-Class exterior, adding 18" AMG multi-spoke alloy wheels, front brake calipers with 'Mercedes-Benz' lettering, and AMG bodystyling comprising front apron, rear apron and side skirts. On the road, choose either lowered comfort suspension or the Dynamic Handling Package with sports suspension and Sports Direct Steering at no additional cost.

A-Class Engineered by AMG

Expressive design meets impressive performance with specially-developed AMG sports suspension.

The Engineered by AMG line is the A-Class at its most dynamic. In addition to AMG bodystyling, 18" AMG 5-twin-spoke alloy wheels and lowered sports suspension 'Engineered by AMG', it boasts a striking diamond grille that's exclusive to this line, plus bi-xenon headlamps, red trim parts on front and rear bumpers, and red brake calipers with 'Mercedes-Benz' lettering.

The Engineered by AMG interior champions many striking highlights including a red colour theme throughout. The sport seats feature Artico leather¹/Dinamica microfibre seats with red contrast top-stitching and matching red *designo* seat belts. The air vents have black surrounds and red inserts, whilst the sporty instrument cluster comes with silver-coloured dials and red needles.

Unmistakably Engineered by AMG. The striking diamond grille adds to the dynamic character of the A-Class

For a truly sporty feel, the multi-function steering wheel is trimmed in nappa leather with red contrast stitching, which is repeated on the door armrests with chrome-look trim. The dynamic look is further enhanced by carbon fibre-look trim, brushed metal sports pedals with rubber studs and stainless steel door sills. And to complete it all in style, the velour floor mats with red stitching carry the Engineered by AMG signature.

A 45 AMG 4MATIC exterior

An exterior that demands attention, with AMG alloy wheels, sports exhaust system and striking AMG front and rear aprons.

There are some faces you never forget. And the A 45 AMG is one of them. Its AMG front apron and AMG radiator grille with twin louvre will impress themselves on your memory instantly. And so will the other details, like the high gloss black trim elements on the front and

rear apron and side sill inserts, which give the design an extra touch of athleticism. Then there are the AMG 5-twin-spoke alloy wheels, painted Titanium Grey with a high sheen finish. It looks just as good from behind too, with an AMG sports exhaust system and exclusive AMG

tailpipe trim design. You see, the A 45 AMG 4MATIC is a thing of beauty, whichever way you look at it.

A 45 AMG 4MATIC interior

Athleticism meets design in the interior of the A 45 AMG 4MATIC. Featuring sports seats with red-top stitching, red seat belts and an AMG-inspired instrument cluster.

The interior of the A 45 AMG 4MATIC is more cockpit than driving compartment. From its AMG door-sill panels to its AMG Performance seats with red top-stitching, every inch is alive with the atmosphere of motorsport. Its AMG instrument cluster has a menu that includes a Racetimer and an AMG start-up indicator, while the AMG Drive Unit gives the driver direct access to three different transmission modes. Its 3-spoke sports steering wheel with flattened bottom section and gear shift paddles will keep your hands happy. While the sports seats in Artico leather¹/Dinamica microfibre will ensure the rest of you remains in maximum comfort, even around sharp bends. To complete the effect there are red seat belts and red trim around the air vents. Need we say more?

Optional AMG Performance seats in Artico leather¹/Dinamica microfibre with red top-stitching and red seat belts, AMG Performance steering wheel and COMAND Online shown on opposite page.

AMG 50

A 45 AMG 4MATIC technology

The AMG 2.0-litre turbocharged engine is the most powerful 4-cylinder production engine in the world. Imagine what the other AMG technology is capable of.

AMG 2.0-litre 4-cylinder turbocharged engine.

The AMG 2.0-litre turbocharged engine is a veritable power-plant that produces up to 360 hp (265 kW). Not surprisingly, it's the most powerful series-produced 4-cylinder engine in the world, with an output of 181 hp

Centre of power: the AMG 2.0-litre 4-cylinder turbocharged engine

per litre of displacement. All this is made possible by its highly precise piezo injectors, a Twinscroll turbocharger, forged pistons and crankshaft, and of course, the experience gained from 45 years of AMG motorsport. Power doesn't come at the cost of efficiency, however. In fact, the A 45 AMG 4MATIC has a combined consumption of just 40.9 mpg – an enviably low result in its class. In addition it comes with an ECO start/stop function. The high-performance unit is built entirely by hand following the AMG philosophy of 'one man, one engine'. Just one look at the signature on the AMG engine badge will tell you which AMG technician is responsible.

AMG high-performance braking system. More performance needs more stopping power. Which is why the A 45 AMG 4MATIC boasts internally-ventilated and perforated brake discs, which release more braking energy. The front axle makes use of 350 × 32 mm discs with a 4-piston fixed caliper. While at the back, the 330 × 22 mm discs are fitted with a single-piston floating caliper. Together they bring the vehicle to a standstill faster, ensuring that the AMG's considerable power is always under your control.

AMG Speedshift DCT 7-speed sports transmission.

The sports transmission is there to translate the AMG engine's raw power into formidable propulsion. It allows for rapid gear shifting without interruptions and fast shifting times. And it offers a choice of three different transmission modes (Controlled Efficiency, Sport and Manual). To add to the racing atmosphere, there's a Race Start function, partial cylinder shut-off when upshifting and a double-declutching function for downshifting, which together helps create a thrilling motorsport experience.

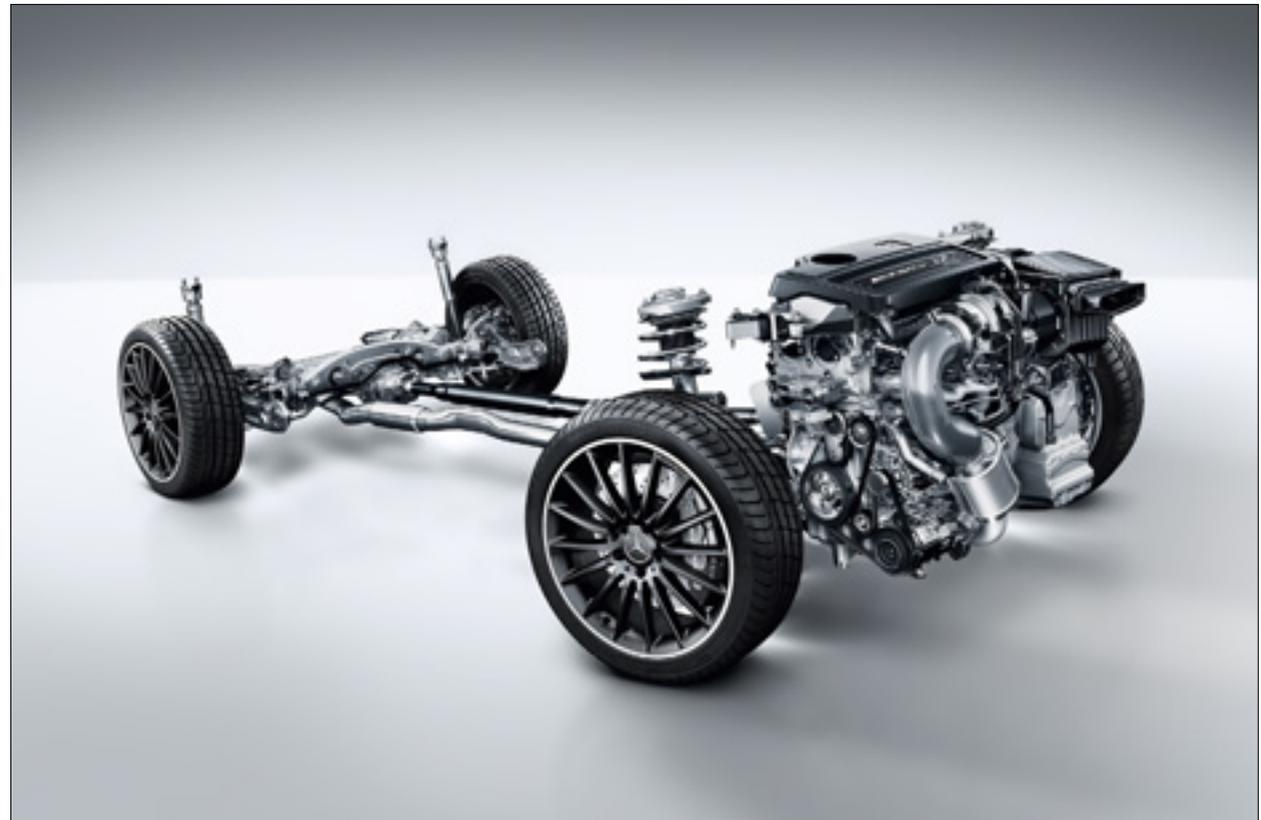

AMG Performance 4MATIC all-wheel drive system.

The A 45 AMG delivers 450 Nm of torque, which means one very important thing to the driver: breathtaking performance. It's the fully-variable, all-wheel drive system that makes this performance possible which – thanks to its AMG-specific electro-hydraulic control – provides optimum traction and maximum control.

AMG speed-sensitive sports steering and AMG sports suspension. The AMG sports suspension, and front and rear axles, are specially developed to give the A 45 AMG a more dynamic ride. Meanwhile the electro-mechanical AMG speed-sensitive sports steering makes steering more precise, and handling more agile than ever.

AMG-specific elasto-kinematics increase dynamism through stiffer axle bearings

AMG Performance Studio

It's hard to improve on an AMG. But the AMG Performance Studio can convert it into something more unique.

The AMG Performance Studio is able to give your A45 AMG a whole range of exclusive sporting modifications. You can opt for high-performance tuning or a performance suspension system. The exterior can be given a more dramatic look with an Exterior Carbon Fibre Trim Package. There's even an AMG Performance exhaust system (which includes specific tailpipe trim) that modifies the exhaust note to a more exhilarating pitch. You can add a touch of racing chic with red-painted brake calipers and two exclusive alloy wheel designs. And with the Driver's Package, racing enthusiasts can increase the top speed to 168 mph. And the motorsport experience can be taken up a notch with an AMG Performance steering wheel, which includes an E-Select lever and a master key with the AMG emblem. The AMG Performance Studio allows you to make your car the only one of its kind on the road.

Retailer-fit accessories

A Mercedes-Benz is not just a car, it's a travel companion that can be tailored to your needs – with our wide range of Retailer-fit accessories.

→ www.mercedes-benz.co.uk/accessories

With Drive Kit Plus, your iPhone® is fully integrated into the A-Class

More practicality? More connectivity? More striking styling? Or perhaps all three? However you want to enhance your A-Class, you'll find there's a Retailer-fit accessory for you.

With the Mercedes-Benz Drive Kit Plus for the iPhone®, you can integrate your iPhone® 4/4S¹ fully with the car's Audio 20 radio/single CD or COMAND Online system. Used in conjunction with the Digital DriveStyle app, which can be downloaded free of charge from the iTunes® App Store, it gives you access to your iPhone's media files, which can be selected via the audio system's easy-to-use controller and viewed on its central display.

The integration with your A-Class and the app's revolutionary user interface design also open up a whole range of digital possibilities. You can find your way with advanced Garmin® navigation software featuring

Internet-based real-time traffic information, online points-of-interest search and 3D maps. You can listen to your own custom radio stream courtesy of AUPEO! Personal Radio, an online music service that plays tracks according to whatever genre or artist you enter. And you can keep up to date with your social networks too, thanks to the sharing and posting functions for Facebook, Twitter and Glance, the playback of music and other content from social networks and a special read-aloud function. What's more, you'll never have to search high and low for your vehicle again. The intuitive Car Finder automatically stores its location, while the navigation system's walking directions guide you back to wherever you parked it.

¹Drive Kit Plus for the iPhone® 5/5C/5S is expected to be available from summer 2014

For an A-Class with added carrying capacity, there's the spacious roof box 400. It swallows up to approximately 400 litres of luggage, can take loads of up to 75 kg and has handles on both sides. There's even a custom luggage set to help you make the most of the available space. It comprises three cases plus a ski bag for up to two pairs of skis.

The accessories range also offers exterior styling accessories such as a sporty roof spoiler and a rear apron with diffuser-look insert. Together, they give your A-Class an even more athletic look.

For more details about these and other A-Class accessories, please see the relevant brochure or talk to your local Mercedes-Benz Retailer.

Elegant, aerodynamic and extremely practical: the roof box for the A-Class offers style and space in equal measure

Services

Test drive. You've seen the pictures, you've read the facts. Now all that's missing is to experience your dream Mercedes in the flesh. Which is why we invite you to take it for a spin. See it with your own eyes. Rev up the engine, and feel how your chosen Mercedes hugs the road. Relax in style or play with a whole host of exciting onboard technology. Contact your Mercedes-Benz Retailer for a test drive, or simply go online and visit www.mercedes-benz.co.uk/testdrive. We can't wait to see you in the driving seat.

Mercedes-Benz Finance. At Mercedes-Benz Finance, our single-minded aim is to provide optimum financial solutions for all those who share the Mercedes-Benz philosophy of absolute commitment to quality. Whether you are a private customer or a business user, our finance and leasing packages can be tailored to meet your individual needs. For further information on Mercedes-Benz Finance, please contact your local Mercedes-Benz Retailer.

Mercedes-Benz Insurance offers a fully comprehensive 5-star-rated¹ Motor Insurance policy specifically designed to provide the cover you would expect from Mercedes-Benz. For a quotation, please call 0845 600 2180²

Interactive Owner's Manual. The website also offers an interactive tour, enabling you to take a closer look at your desired model. This simulation is the ideal way to acquaint yourself with your dream car. You can view key functions in detail, gain an insight into the car's inner workings or look at the benefits of each model. For further details, visit www.mercedes-benz.co.uk/aclassmanual

Roadside Assistance and Accident Management. Rest assured that should you ever need help, Mercedes-Benz Roadside Assistance is there for you. In the unlikely event of a technical breakdown³ you can rely on the Mercedes-Benz Roadside Assistance Team – anywhere in Europe. Mercedes-Benz will also assist you in the unfortunate event of an accident, from recovering your car and delivering it to your preferred Mercedes-Benz Retailer right through to managing your insurance claim in full, you will be looked after by the experts who built your Mercedes-Benz.⁴ Minor mishaps are also covered. Whether you lose your key, run out of fuel, or your vehicle is damaged due to vandalism, Mercedes-Benz ensures that you still reach your destination. Often the problem can be rectified on the spot, but if this is not possible, we will naturally ensure that your vehicle is taken to the nearest Mercedes-Benz Retailer to get you back on the road as quickly as possible.

Take-back of end-of-life vehicles. Coming full circle. At the end of its long life, you can return your A-Class to us for environment friendly disposal in accordance with the EC End-of-Life Vehicle Directive.¹ But that day lies a long way off.

¹Applies in accordance with national regulations to vehicles up to 3.5t permissible gross weight. The A-Class has met the statutory regulations governing the suitability of the vehicles' design for reuse and recycling for a number of years now. A network of vehicle take-back depots and dismantlers has been established which will process your vehicle in an environment-friendly manner. The ways in which both vehicles and parts can be recovered are subject to ongoing development and improvement. Consequently, the A-Class will be able to comply with any future increases in the recycling quota within the stipulated time limits. For further information, please go to www.mercedes-benz.co.uk or call 0808 156 6606.

Please note: this online version of the printed brochure may contain abridged copy or other content changes. The manufacturer reserves the right to make changes to the design, form, colour and specification during the delivery period, provided these changes, while taking into account the interests of the vendor, can be deemed reasonable with respect to the purchaser. Where the vendor or the manufacturer uses symbols or numbers to describe an order or the subject of an order, no rights may be derived solely from these. The illustrations may show accessories and items of optional equipment which are not part of standard specification. Colours may differ slightly from those shown in the brochure, owing to the limitations of the printing process. This brochure has been compiled by Daimler AG of Germany and is distributed internationally. It provides a general indication of the range of models, features, optional extras and/or colours available in various countries. Some of the models, features, optional extras and/or colours shown may not be available in your country or may only be available in a different specification. Additionally some models, features, optional extras and/or colours may only be available in combination with others. For current and more specific information in relation to the range of models, features, optional extras and/or colours available in your country, and their pricing, you should contact your nearest authorised Mercedes-Benz Retailer.
