PureTech Petrol Engine Technology

**Peugeot PureTech: Compact engine – huge spirit**

Peugeot PureTech is advanced 3-cylinder petrol engine technology that offers a drive and performance normally associated with much bigger engines but with significantly improved fuel consumption and CO<sub>2</sub> emissions<sup>1</sup>. It's a product of Peugeot's 100 years of intelligent, innovative engineering and combines reduced weight materials with the efficiency of applying direct fuel injection to three cylinders. On some versions we've even added Turbo power, optimising torque at all revs and delivering an engine with a unique personality and one which is ultimately designed to give you maximum driving pleasure and responsiveness, at any speed, for less.

Safety

Here at Peugeot, safety is of paramount importance, with this in mind every part of Peugeot 308 has been designed to protect you and those dearest to you. In recognition of this Peugeot 308 was awarded a five star rating – the highest rating possible – from Euro NCAP, the most widely-recognised independent vehicle safety assessor in Europe, following extensive and rigorous crash testing.

**Airbags:** Peugeot 308 offers optimum protection for you and your family. All models features 6 airbags as standard. Airbag protection comprises:

**Driver & front passenger airbags:** providing frontal protection for front seat occupants. Front passenger airbag can be deactivated to allow for the fitment of a child seat.

**Front side airbags:** located in the seat frame on the outside edge of the front seats; they inflate between front seat occupants and the front doors, providing thorax, abdomen and pelvis protection in a side impact.

**Curtain airbags:** located either side of 308, these deploy in a side impact and provide head protection for both front and rear occupants in a side impact.

In addition, deployment of the airbags causes the fuel supply to be cut off, doors will automatically unlock, hazard warning lamps will activate and Peugeot Connect SOS (if specified) will automatically trigger and contact the emergency services if no response is received from occupants onboard.
