

HYBRID

RAV4

# THERE'S DESIGN AND THEN THERE'S STYLE

## **A POWERFUL DESIGN STATEMENT WITH TRUE SUV CHARACTER.**

*The New RAV4 is an SUV that was built to be driven – and designed for those who choose to stand out. Pairing the robust looks of a fully fledged SUV with sharp, dynamic styling, the New RAV4 displays a sleek, urban edge. Powerful with a real road presence, the New RAV4's strong body draws the eye from the elegant front LED headlights, along the bold profile silhouette and through to the unique LED tail lights – producing a look that is individual and refined. The New RAV4's rugged SUV stance proves it looks and acts the part, while being completely at home in the city.*

# THERE'S HYBRID AND THEN THERE'S TOYOTA HYBRID

## THE HYBRID SUV DESIGNED FOR EVERY ROAD AND EVERY CITY.

*The New RAV4's powerful 2.5-litre Petrol Hybrid powertrain delivers outstanding performance without compromise. It gives you confidence in every driving situation, from the motorway to the city and challenging road conditions. And thanks to its self-charging hybrid powertrain, you'll also enjoy exceptional range – giving you the benefits of electric power, such as a quiet drive and greater efficiency, without inconvenience.*

*With the New RAV4, you can glide through the city, embrace the open road and leave compromise behind.*

# THERE'S CONTROL AND THEN THERE'S CONFIDENCE

**THE NEW RAV4 DRIVES LIKE NO OTHER SUV  
BECAUSE IT'S BUILT LIKE NO OTHER SUV.**

*The New RAV4 represents an uncompromising balance of space, ride comfort, power and all-road capability. The innovative TNGA\* platform has enabled Toyota's engineers to reduce the car's weight, lower its centre of gravity and increase both chassis rigidity and driver visibility. Together, these changes make the New RAV4 easier to handle and seriously fun to drive. The platform has also given the designers more freedom to create a stylish car, with more room throughout for both passengers and luggage.*

*The result is a supremely capable SUV in which you can go anywhere in safety and style – and one you will just love to drive.*

# THERE'S POTENTIAL AND THEN THERE'S POWER

**AN UNCOMPROMISING FUSION OF PERFORMANCE, EFFICIENCY AND LOW EMISSIONS.**

The New RAV4 reasserts its position at the forefront of the SUV market with the groundbreaking 2.5-litre Petrol Hybrid powertrain. Available with the intelligent all-wheel drive (AWD-i) system, the New RAV4 delivers an impressive performance both on and off-road. With the ability to adapt to changing driving conditions automatically, you'll have all the traction you need, whenever you need it in adverse road conditions.

**Drive Mode Select**

The AWD-i system will keep you moving and in control in challenging road conditions, whilst the Trail Switch is available when more traction is required.

It's just one of the intelligent features that makes the New RAV4 as easy to handle in the city as it is on the open road.

## TOWING

## Tow bars – detachable and fixed

Toyota tow bars are available with a fixed or detachable hook. Both provide a strong towing capability and will support the Toyota rear-mounted bicycle holder.

**Features**

- Towing capacity: FWD – without brakes 750 kg, with brakes 800 kg. AWD-i – without brakes 750 kg, with brakes 1650 kg. (The tow bars are designed for your car's maximum towing capacity.)
- Supplied with a protective tow-ball cap bearing the Toyota logo.
- With the detachable tow bar, a smart plastic cover is supplied to place over the base when the hook is removed.
- On the detachable tow bar, the hook attaches or removes by means of a turning knob that also incorporates a security lock.

## Tow bar wiring harness

Safety for you and your car is at the heart of the Toyota tow bar wiring harness. Individually designed for each Toyota model, the harness seamlessly integrates your car's lights and signals with those on a towed trailer or rear bicycle holder.

**Features**

- The harness has independent circuitry and a fused module to eliminate the risk of overloading your car's existing electrical system.
- The fused module prevents a fault in the trailer's circuitry affecting your car's systems. For instance, your car's indicators will continue working even if those on the trailer fail.
- Toyota specialists designed the cable route to safely avoid contact with moving parts, heat, irregular surfaces and metal edges.
- There are no loose or hanging cables that could catch on road obstacles or interfere when loading or unloading the boot.
- Strategic reinforced cable protection guards against accidental damage and the consequent risks of lighting failure or fire caused by electrical shorting.
- Available with a 7- or 13-pin socket.

## Socket adapters

If you have an existing trailer or rear bicycle holder, or perhaps you want to hire a trailer when you travel in another country, you may find that the plug socket is different to that on your new car. Such a problem is easily resolved! A Toyota socket adapter enables you to safely and securely connect your car's tow bar wiring harness to that of a trailer or bicycle holder even if the plugs don't match.

Toyota adapters are designed to provide a durable connection between different types of plug sockets. They are available in three versions:

- 7-pin (car) to 13-pin (trailer).
- 13-pin (car) to 7-pin (trailer).
- 13-pin (car) to 12N-12S double socket (trailer).

A white Toyota RAV4 SUV with a black panoramic roof is parked on a rooftop terrace. The car is positioned in the center-right of the frame, facing left. Behind it is a large, multi-story building with a classical architectural style, featuring a prominent sign that reads "STATION" in large, white, serif capital letters. The building has a series of arched windows on the upper level and a row of columns on the lower level. To the right of the car, a metal railing runs along the edge of the terrace, overlooking a city street with traffic, including a bus and several cars. **Quoted mpg and CO<sub>2</sub>:** Figures are provided for comparability purposes; only compare fuel consumption and CO<sub>2</sub> figures with other cars tested to the same technical procedures. These figures may not reflect real-life driving results. Fuel consumption and CO<sub>2</sub> produced varies significantly depending on a number of factors, including the accessories fitted (post-registration), driving style, conditions, speed and vehicle load.

All models and grades are certified according to the World Harmonised Light Vehicle Test Procedure (WLTP), which replaces the New European Driving Cycle test procedure (NEDC).

All CO<sub>2</sub> figures quoted are NEDC equivalent. This means the CO<sub>2</sub> figures are based on the new WLTP test procedure but calculated (using a standard European calculation method) to allow comparison with the NEDC test procedure. The NEDC equivalent figures will be used to calculate vehicle tax on first registration. All mpg figures quoted are full WLTP figures.

More information can be found by visiting: [www.vehicle-certification-agency.gov.uk/fcb/wltp.asp](http://www.vehicle-certification-agency.gov.uk/fcb/wltp.asp).

The official CO<sub>2</sub> figures for vehicles will change as from 6 April 2020, due to a change in the official method of calculation. CO<sub>2</sub> figures are used in the calculation of Vehicle Excise Duty (car tax) for new cars during their first year of registration. As a result, all CO<sub>2</sub> figures, car tax and recommended 'on the road' prices for new vehicles are subject to change for vehicles registered after 6 April 2020.
