

New Ford Capri.
The affordable dream.

New Ford Capri.

For too long most motoring enthusiasts have only been able to dream of driving a new convertible sports car. Now all that has changed, thanks to Ford Capri – the affordable dream.

New Ford Capri is the economical convertible. It's the Australian built sports car with international styling and universal appeal. Its driving performance is impeccable. And it's equipped to take on the world.

With standard features such as body-hugging sports bucket seats and a comfortable rear bench seat, an AM/FM stereo cassette player, power windows and mirrors, power assisted steering, comprehensive sports instrumentation, a tilt adjustable steering column and a boot with luggage space that's large enough to be really useful.

There are two models to choose from: Capri or Capri Turbo.

On the surface they share the same sleek aerodynamic lines – and both share looks that can only be described as sensational. Capri Turbo also has distinctive two-tone styling and an efficient rear spoiler.

Mechanically, new Capri is a real winner. It has a sporty, responsive 1.6 litre OHC electronic fuel injected engine with a slick-shifting 5-speed transmission. Or, for a little extra, you can enjoy the

ease of the optional 3 speed automatic.

Capri Turbo takes power and performance to even greater heights, with a 1.6 litre DOHC, 16 valve, intercooled turbo charged engine designed to produce a distinctly sporting 100kW.

Combined with the close ratio 5-speed manual transmission, it leaves no doubt that this car is built for life in the fast lane. 

New Ford Capri.

Australia has some beautiful stretches of road. Roads capable of stimulating all your driving senses. But those highways and byways will look and feel even better from the driver's seat of your new Capri.

To put yourself in the picture on new Ford Capri there's another road you need to get onto: the road to your Ford dealer.

Have you driven a Ford... lately?
