

Jeep Patriot

SPECIFICATIONS

The new Jeep® Patriot. It is an impressive vehicle with capabilities that extend well beyond its frame. This is the Jeep Patriot, and like any Jeep vehicle, it takes its prowess as seriously as its ability to comfortably accommodate in the city. Equipped with brilliant standard features, Patriot delivers a rare blend of everything you would expect from a legendary Jeep vehicle with many things that will surprise you. Welcome to the new Jeep Patriot.

From paved roads to beaten tracks.

When it comes to capability in a compact package, the new Jeep® Patriot is unmatched.

Standard Electronic Stability Program (ESP)⁽¹⁾ includes All-speed Traction Control and Electronic Roll Mitigation (ERM). These life-saving computer-controlled systems work in seamless harmony to allow Patriot's driveline to react instantly to ever-changing conditions and help ensure that control is maintained in the most challenging circumstances.

Go the extra distance thanks to Jeep's Freedom Drive™ active full-time 4WD with LOCK mode. When the system's 4WD LOCK handle is engaged, torque is sent equally to the front and rear axles for improved low-speed traction and control. Outfitted with the standard Freedom Drive 4WD system, there is little doubt that Patriot is born from a long line of Jeep vehicles.

And to help you reach your peak destinations, Patriot's standard Hill Start Assist⁽²⁾ employs automatic braking to help get you safely up each mountain or over rolling city streets. Independent front and rear suspension contributes to every-day comfort and precise handling whether you're on the road or on the track.

The available Continuously Variable Transmission (CVT) with Auto Stick features an infinitely variable number of gear ratios that transmit a constant stream of quiet power for both optimum fuel economy and highway-passing muscle when needed. The Auto Stick manual shift mode allows the driver to maximise engine braking, control upshifts and downshifts, and add to overall driving performance.

⁽¹⁾ No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESP warning light in the speedometer flashes, the driver needs to use less throttle and adapt speed and driving behaviour to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt. ⁽²⁾ Late availability, only available with manual transmission.

Serious off-road Jeep vehicles are designed to perform in a variety of conditions identified by five performance categories:

ARTICULATION

The ability to keep tyres in contact with the ground, providing traction to climb over large obstacles.

TRACTION

The ability to transfer power to the road or trail along with the ability of the suspension to keep the wheels in contact with the terrain.

MANOEUVRABILITY

The ability to navigate around obstacles that are tightly situated.

GROUND CLEARANCE

The ability to drive over obstacles in combination with approach/departure/breakover angles.

WATER FORDING⁽¹⁾

The ability to cross a specific depth of water at a specific speed.

⁽¹⁾ Traversing water can cause damage that may not be covered by the new vehicle warranty. Always off-road responsibly in approved areas.

It's green. Packed with mean.

The new Jeep® Patriot never backs down from a challenge. To prove it's capability to deliver record-making economy, Jeep took a team of professional drivers and a Jeep Patriot on a record-making tour. In 24 hours, Patriot logged a total of 1,124 km, travelling through six countries — from London, England, to just inside Poland's border — achieving a class-leading record of 4.18L/100 km.⁽¹⁾

Add to that the legendary strength and capability that Jeep vehicles are known for, and you've got a green machine that's packed with mean efficiency.

Jeep's standard lightweight aluminium 2.4-litre petrol engine provides superb performance, but also employs a multitude of technologies to ensure that the new Patriot provides great economy and low overall emissions.

This engine combines dual Variable Valve Timing (VVT) and intake manifold flow control valves with dual overhead camshafts (DOHC), four valves per cylinder and high compression to produce more power, better fuel economy and smoother, quieter operation. Computer control helps ensure that the proper amount of power is delivered quickly and seamlessly to meet the demands of changing driving conditions.

When it comes to balancing power and fuel economy, Jeep takes this capability as seriously as the traditional traits one expects from a legendary Jeep vehicle. With 125 kW and 220 N.m on tap, the new Patriot delivers the performance you need without the penalty at the pump. In fact, with fuel economy as low as 6.7L per 100 kilometres,⁽²⁾ Patriot can travel over 700 km between stops during highway touring.

The available Continuously Variable Transmission (CVT) is also a great choice for those that want a more relaxed driving experience. A CVT is free of the constraints of traditional fixed-ratio automatic transmissions. It can choose

the best ratio for any driving condition, thereby operating at optimum efficiency and providing improved fuel economy and performance.

There is little doubt that the new Patriot is born from a long line of Jeep vehicles. The standard Freedom Drive™ 4WD system provides 2WD operation for improved fuel economy in every-day driving conditions, yet will instantly direct torque to all four wheels when the going gets tough - whether it's from a heavy storm on the way home or off the beaten track on weekends. The fact that Patriot's fully independent suspension and finely-tuned steering absorbs the road's imperfections with such nonchalance, it may mask the system's true capabilities.

The new Jeep Patriot always delivers when it counts, with superb economy matched with Jeep's legendary sure-footed capability.

⁽¹⁾ Test conducted using a 2.0-litre CRD turbo diesel engine linked with a 6-speed manual transmission. Your results may vary.

⁽²⁾ Tested to Australian Design Rule 81/02

High standards

Sport. The new Jeep® Patriot Sport provides a compelling stepping stone to the land of Jeep brand capability with incredible value and a bevy of standard features that will fulfil any enthusiast's needs. Safety. Capability. Style. Comfort. The new Jeep Patriot has it covered.

Challenging conditions will be much less intimidating thanks to the standard Freedom Drive™ active 4WD system, Electronic Stability Program (ESP)⁽¹⁾, ABS brakes, Electronic Roll Mitigation (ERM) and All-speed Traction Control. In the unlikely event of an accident, Patriot's standard advanced crumple zones, front and side-curtain air bags and other safety systems will help keep you safe and secure.

Jeep takes the challenges of the city as seriously as it does tackling the trail. The new Patriot provides a standard five-speed manual transmission for smooth shifting and ultimate control. Choose the Continuously Variable Transmission (CVT) with Auto Stick manual shift mode and you can control the system's upshift and downshift to expertly cover challenging urban conditions.

Standard 17" alloy wheels and striking colours perfectly complement the new Patriot's unmistakable Jeep styling, with our famous seven-slot grille, trapezoidal wheel arches and round headlamps.

The newly-designed interior offers roomy seating for five that will meet the demands of today's varied lifestyles

thanks to our patented Stain Repel⁽²⁾ seat fabric, the stain- and odour-resistant premium cloth upholstery for the ultimate in durability. The fold-flat front-passenger seat creates more cargo space, allowing for the longest of items to be stowed easily within Patriot's interior. When cargo isn't a priority, the folded-down seatback serves as a very practical tabletop.

Creature comforts aren't ignored either. Standard equipment includes air-conditioning, remote keyless entry, power windows and mirrors and much more. For example, the standard Media Centre 135 CD/DVD/MP3 Radio lets you hook up your MP3 player to an input jack located in the faceplate.

Step in to the new Jeep Patriot Sport and you'll always get more than you bargained for.

⁽¹⁾ No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESP warning light in the speedometer flashes, the driver needs to use less throttle and adapt speed and driving behaviour to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt.

⁽²⁾ Not compatible with aftermarket fabric-protecting coatings. Properly secure all cargo.

Substance meets style.

Limited. The new Jeep® Patriot Limited attracts attention without even trying, thanks to 17-inch alloy wheels, front fog lamps, available sunroof and a stylish touch of silver on its roof rack side rails and bodyside mouldings.

Deep-tint sunscreen glass on the rear door window, cargo area and liftgate not only adds to the prestigious appearance, but also provides privacy, security and welcome shade from the glare of the sun.

With the new Jeep Patriot Limited, creature comforts are raised to a very appealing level. The re-designed interior is significantly enhanced and offers premium leather trim with heated front seats, and a leather-wrapped steering wheel with audio and cruise controls.

Jeep's feature-packed Media Centre 230 6CD/DVD/MP3 radio with Voice Command⁽¹⁾ and Audio Jack is standard. This radio can play MP3-encoded discs or you can plug in your portable device with the included jack. A standard 12-volt socket makes sure you're always powered on the go.

For those with even more demanding tastes, you can opt for the Technology Group that provides full-screen GPS navigation and premium audio features. The Uconnect™ Navigation Media Centre 731N is command central, offering a 16.5cm touchscreen and a 30GB hard disc drive that allows you to store thousands of songs, select playlists and display photos.

Other features include Uconnect Phone⁽²⁾ and iPod® Control. Uconnect Phone is our hands-free communication system that works with your compatible Bluetooth mobile phone and iPod Control allows you to operate your iPod through the Media Centre screen and controls.

A system this sophisticated provides some serious capability, so we've matched it to MusicGate - a 458-watt nine-speaker Boston Acoustics premium audio system with flip-down liftgate speakers and subwoofer. Boston Acoustics are renowned the world over for their rich true-to-life sound reproduction, so MusicGate will always impress, whether weekend cruising or rocking your next outdoor gathering.

Take it to the next level in the new Jeep Patriot Limited.

⁽¹⁾ Requires Uconnect Phone. ⁽²⁾ See your dealer for a current list of compatible mobile phones and any limitations your phone may have.

A strong defence.

Nothing provides confidence like knowing you're outfitted with a comprehensive set of safety and security features.

Jeep® Patriot's air bag⁽¹⁾ system includes side-curtain and advanced multi-stage driver and front-passenger air bags. A standard Electronic Stability Program (ESP)⁽²⁾ integrates a host of systems that includes a four-wheel anti-lock brake system (ABS), All-speed Traction Control, a Brake Assist system that automatically helps provide strong braking power in emergency situations, and Electronic Roll Mitigation (ERM) that can apply appropriate braking and reduce engine power when sharp steering actions and/or wheel lift is detected.

Patriot's safety cage structure contains a three-phase front crumple zone that effectively absorbs energy in a controlled manner during a front impact, and a high-strength crossbeam under the rear seat that helps transfer side-impact energy from one

side to the other and is designed to take up to sixty percent of the load during a side-impact event.

In the event of an impact that causes air bag deployment, Patriot immediately institutes safety measures. The Enhanced Accident Response System (EARS) cuts the supply of fuel to the engine, switches on the interior lights and the exterior hazard lights, and unlocks the doors after the vehicle has stopped.

And to help prevent loss, a standard Sentry Key® anti-theft engine immobiliser makes it virtually impossible to drive without a valid key. A standard security alarm system helps keep Patriot loyal to only you.

⁽¹⁾ Always sit properly in the seat with the seat belt fastened. Children 12 and under should always be in a backseat correctly using an infant or child restraint system, or the seat belt positioned correctly for the child's age and weight. Air bags shown deployed for illustrative purposes only.

⁽²⁾ No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. When the ESP warning light in the speedometer flashes, the driver needs to use less throttle and adapt speed and driving behaviour to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt.

Sky-high tech.

Introducing Uconnect™, Jeep's user-friendly approach to today's connected technology. From your family and friends, to music, movies or your travel destinations, Uconnect connects you to the things that matter most.

It's factory installed and at your beck and call to let you enter the sky-high world of on-demand communication and entertainment the moment you take the wheel. The 16.5 cm touch screen Uconnect Navigation Media Centre 731N provides entertainment, information and communication, all through an CD/DVD/HDD/NAV radio. A 30GB

hard drive allows you to store photos, playlists, and songs as well as rip, stash, organise, and shuffle thousands of digital music files from CDs or the integrated USB port. All this as well as full mapping navigation.

The touch screen allows you to easily change radio stations and play digital audio files. Go high-tech with the included Uconnect Phone, an in-vehicle, voice-activated communication system that allows you to talk on your Bluetooth® compatible phone⁽¹⁾ virtually hands-free.

⁽¹⁾ See your dealer for a current list of compatible mobile phones and any limitations your phone may have.

POWERTRAIN

Engine	2.4L DOHC 16V dual VVT I-4

ACCESSORIES BY MOPAR

SIX-PAIR SKI AND SNOWBOARD CARRIER. Holds up to six pairs of skis or four snowboards, or a combination of the two. Features corrosion-resistant lock covers and either-side opening. Mounts to production roof rack with adapters (sold separately) or sport utility bars.

REAR PARK ASSIST SYSTEM.¹⁾ Advanced system uses sound waves and audio-visual indicators to manoeuvre in tight spaces at parking speeds.

SLUSH MATS. Get in the groove with these custom-fit, heavy-vinyl mats that feature deep grooves to help prevent water, snow and mud from damaging your Patriot's carpet.

TOW BAR KIT.²⁾ This towing kit includes tow bar, tongue, tow ball and wiring harness.

¹⁾ Always check entire surroundings before reversing.

²⁾ Check Owner's Manual for load capacity and heavy-duty equipment required. Do not exceed rated tow capacity of the vehicle as equipped. Towing may require some items not supplied by Jeep.
