

Sophistication

Sable has been thoughtfully restyled outside and inside and displays a striking blend of sophistication and innovation. Inside you'll find a space that's versatile, adaptable and accommodating. The new interior is available with rich wood trim and luxurious leather seating surfaces.

The new Integrated Control Panel is designed to be both attractive and easy to use. You'll also appreciate the abundance of features like the redesigned center console with an available 6-disc CD changer. So now your music rides up front with you.

Innovation

Sable is the only passenger car to offer power adjustable brake and accelerator pedals. This available feature allows the pedals to be moved up to three inches to help make driving an even more comfortable experience.

For improved night vision, Sable features new, complex reflector clear-lens headlamps which provide improved illumination. And they're longer lasting, too.

Sable's Advanced Restraints System provides true peace of mind. It includes dual-stage driver/passenger front air bags, safety belt pretensioners, safety belt energy management retractors, a driver seat position sensor and new front crash severity sensors.

For an extra margin of protection, side-impact head and chest air bags for the driver and front passenger are now available. Always wear your safety belt and secure children in the rear seat.

Sedan and wagon coming Fall, 1999.
