8-SPEED AUTOMATIC TRANSMISSION

The launch ratios for all eight gears have been optimized, tuning this 8-speed transmission to the exact structure, size and weight of your Jeep Gladiator. Advanced software adjusts performance on the fly, based on variables such as temperature, cornering, hill grades, 4x4 gears and towing. Smooth and virtually seamless shifts, both up and down, deliver a consistently smooth ride. Available.

6-SPEED MANUAL TRANSMISSION

You'll really get into gear with this manual transmission. It hands you low 1st and Reverse gears, which are great for off-roading. It comes standard, matched to either a Command-Trac® 4x4 system on Sport S and Mojave or paired with the Rock-Trac® 4x4 system on the Rubicon® model.

FORWARD-FACING OFF-ROAD TRAILCAM³ CAMERA Provides a view of the trail directly in front of your vehicle, helping you pick your path. Available on Overland,[®] Mojave and Rubicon[®] models.

STEEL BUMPERS Built with ultra-strong steel to take the punishment of the trails. The front bumper can accept a winch, features integrated LED fog lamps and has removable end caps to help manoeuvre through tight spots. Available.

TOW HOOKS Every Gladiator gets two tow hooks up front and one in back. Rubicon stands out with Red-painted tow hooks, and on Mojave, they're a distinctive Orange colour, with both models getting two hooks in front and two in the rear.

SKID PLATES All models feature up to four standard skid plates/bars, made from lightweight high-strength steel, to protect the underbody. Both Rubicon and Mojave add heavy-gauge steel rock rails for rocker panel protection, while Rubicon also includes rock rails mounted behind the rear wheels to protect the bed. Standard.

SELEC-SPEED[®] CONTROL Manages vehicle speeds of 0.96 km/h to 8 km/h (0.6 mph to 5 mph) in 4-LO while traversing off-road terrain without requiring the driver to control the throttle or the brake. This helps the driver focus on steering the vehicle, letting Gladiator put the right amount of power or braking onto the ground. Standard with 8-speed automatic transmission.

HILL START ASSIST (HSA) Works to prevent Gladiator from rolling when starting on an uphill gradient. Standard.

OFF-ROAD PAGES View real-time data like suspension travel, tilt and pitch, wheel turn and transmission temperature to help provide optimal performance. Available.

DATA AND POWER POINTS MOVE YOU FORWARD

WHEN THE GOING GETS TOUGH, JEEP[®] GLADIATOR OFFERS A LONG LIST OF STANDARD AND AVAILABLE FEATURES THAT HELP YOU MANAGE YOUR PROGRESS, PROTECT YOUR VITAL PARTS AND KEEP YOU INFORMED OF VEHICLE PERFORMANCE.

» LOCKED IN

TRU-LOK® DIFFERENTIALS

Front and rear electronic-locking differentials deliver maximum torque to both wheels, maintaining forward momentum for the ultimate in 4x4 traction. An instrument-panel-mounted rocker switch can lock either the rear (on Mojave models) or both (on Rubicon® models) axles. Paired with the Rock-Trac® 4x4 system on Rubicon models. The rear axle can also be locked in 4-HI.

OFF-ROAD+

When engaged, it automatically deciphers the type of terrain Jeep® Gladiator is operating on and makes adjustments to key systems, including throttle, Selec-Speed® Control, traction control and transmission shift mode, for optimal performance. If enabled in 4-HI, it tailors operation for higher-speed sand performance. If enabled in 4-LO, it adjusts operation for low-speed rock-crawling manoeuvres. Standard on Mojave and Rubicon models.

FRONT SWAY BAR DISCONNECT SYSTEM

Flip a switch and the sway bar can be disconnected in 4-LO and 4-HI, allowing the front suspension to travel up to an additional 30 percent. It reconnects automatically at speeds above 28 km/h (18 mph). Standard only on Rubicon models.
