Honda's winning Formula.

Honda is at the forefront of the constantly evolving automotive world. Our involvement in Formula One racing continues to give us insights into automotive performance and efficiency. Insights which we don't just apply to our racing vehicles, but to every car we design for today's roads.

So when you buy a Honda, you're investing in the most sophisticated level of technology for you and your family.

Odyssey Luxury shown.

Let the Odyssey begin.

The Honda Odyssey marks the beginning of a new era. Unlike previous 7 seaters on the market, the Honda Odyssey offers as much style as it does space. We are offering a new standard of driver enjoyment and vehicle sophistication. n

LI

Ā

N

U

The Honda Odyssey is a culmination of this and much much more.

This impressive automotive technology is available in two different models: the Odyssey and the Odyssey Luxury.

Both models have a range of standard features which take comfort and sophistication to new levels. The Odyssey and Odyssey Luxury boast stylish woodgrain look panelling, climate control air conditioning, power windows and even the added convenience of 8 separate cup holders.

The Odyssey Luxury also has additional features which contribute to its reputation as a truly superior sports wagon. These include heated front seats, sumptuous leather interior[†] and a 6 CD stacker. Quite clearly, when it comes to comfort, no detail has been overlooked.

Of course we understand that your safety is paramount, which is why the Odyssey and Odyssey Luxury come equipped with driver and front passenger front and side SRS airbags, ABS and front seatbelt and buckle pretensioners. For added peace-of-mind, the Odyssey Luxury model also features curtain SRS airbags for all three rows of seats.

As you can see, the Honda Odyssey has created a new standard of design, luxury and style.

How can a car that seats seven, drive like a sports wagon?

With its 2.4 litre engine (i-VTEC, 118 kW of power) and 5 speed sequential shift automatic transmission with Grade Logic Control, you'll feel like you're driving a sports wagon.

Driveability was a key factor in the Odyssey's design, which is why the 5 speed sequential shift has proven so important. This feature allows you to drive the Odyssey as a conventional automatic or, with one simple adjustment, you can convert to manual mode for some 'hands-on sporting fun.'

Of course no discussion on driveability would be quite complete without mentioning the Odyssey's advanced suspension system. Put simply, the Odyssey's front and rear double-wishbone suspension achieves excellent vehicle stability, while maximising driver and passenger comfort. The Odyssey's low centre of gravity also minimises disruptive movement and aids in sharper handling, ensuring a smooth ride for all.

The Odyssey doesn't just help the aesthetic environment by looking good, it also boasts an impressive string of environmentally-friendly features. The Odyssey is an LEV (Low Emission Vehicle) which complies with even the toughest emissions standards. Together we can work towards a cleaner world.

П J П Π J 7 L I.

How can it be smaller on the outside but bigger on the inside?

Don't be deceived by the smaller and sleeker Honda Odyssey. It has more internal space than its predecessor, despite being lower and shorter. Yes, it defies conventional logic, thanks to its world class design.

The i-VTEC engine's design has been made more compact, which allows a shorter vehicle nose while creating more leg room for the driver and passengers in the roomy cabin.

The ingenious low-floor construction has sliced 80mm off the height of the Odyssey, giving you extra headroom inside. Lower height and more headroom? Now that's logic defying.

The Odyssey's fuel tank has been redesigned to measure just 150mm in height yet still retains its 65 litre capacity. This significantly lowers the second-row seat height and again creates more space, perfect for whatever cargo you choose to carry.

Overall, the Odyssey's intelligent design gives you more room to sit back, relax and enjoy the journey.

Revolutionary fuel tank design.

and the second second

Leather[†] standard in Odyssey Luxury model only.

Odyssey Luxury model shown.

How can a car be like a big cat?

The sleek appearance and low stance of the Odyssey clearly sets it apart from other vehicles and elevates it to a class of its own. It's no coincidence that the Odyssey derives its look from a black panther, it was the inspiration for the design team. L I.

Forget family cars that look like bricks, instead indulge in the cutting edge urban design of the new Honda Odyssey. It exudes style with its low, smart front expression and its powerful, flared front fenders.

Arriving at your destination will take on a whole new level of enjoyment. Why simply turn up, when you can turn heads?

Sunroof standard in Odyssey Luxury model only.

J

Π

IN

Both models feature climate and cruise control, keyless entry, power windows, front and side SRS airbags, ABS and seatbelt and buckle pretensioners, woodgrain look panelling, and even the convenience of 8 cup holders.

And if you think that's impressive, take a moment to consider what the Odyssey Luxury model has to offer. It comes equipped with an electric sunroof, leather interior with heated front seats, power assisted driver's seat, curtain SRS airbags, power fold away third row seats and a 6 CD stacker.

In fact, the Odyssey and Odyssey Luxury are so appealing that we insisted on installing a security alarm system into every vehicle.

As you can see, both models are advanced when it comes to features. And speaking of 'advanced', wait until you see the futuristic dashboard inside. It may be sleekly designed but the Honda Odyssey's space-age dashboard also has an incredible range of controls, all within easy reach of the driver.

The Odyssey and Odyssey Luxury are also equipped with what we like to call 'Magical Seats'. This remarkable feature allows the Odyssey's 3rd row seats to be folded flat in the event that you may need additional storage space. The Odyssey's Magical Seats are manually operated, while in the Odyssey Luxury they can be quickly activated with a simple flick of a switch.

Curtain airbags available in Odyssey Luxury model. Overseas model shown.

Designed for your safety.

Because your passengers are top priority, safety is unparalleled in the Honda Odyssey. Every angle has been considered to deliver the highest level of safety, from risk prevention to occupant protection. UI

You can drive confidently knowing your passengers are protected by a range of active and passive safety components. Features like Anti-Lock Brakes (ABS) which prevents wheel locking in an emergency braking situation, 3 point ELR seatbelts are fitted in 6 of the seating positions and side impact protection gives you peace of mind. But it doesn't stop there.

Each Honda Odyssey is installed with exclusive Honda G-CON (G-Force Control) technology to ensure maximum safety. In fact, we're so serious about safety, that we have the world's first indoor omnidirectional crash test facility. This facility enables us to run comprehensive crash tests and develop vehicles which are able to withstand great impact in collisions.

Both models feature driver and front passenger front and side SRS airbags, as well as progressive crumple zones for your added protection.

Odyssey Luxury offers even more reassurance with curtain SRS airbags for all three rows of seats.

Π

A quality vehicle deserves quality service.

Your new Odyssey comes with a 3 year/100,000km warranty. This includes a 3 year paint protection warranty and a 6 year rust perforation warranty. We're committed to you as a Honda customer and will provide you with exclusive access to our after-sales website, HondaONE. Here you'll find an up-to-date online vehicle service history, personalised service reminders and vehicle maintenance tips.

We recommend you service your Odyssey regularly at your Honda dealership in order to maximise your driving enjoyment and to retain your Honda's value. Genuine Honda Parts and Accessories optimise its efficiency.
