

### Are you game for the new Sport?

The already sporty Accord Euro has just become even sportier. And the result is sure to win many new fans. Meet the new Limited Edition Accord Euro Sport. It's for serious players only.

### Precision engineering just got sportier.

The Accord Euro has earned a formidable reputation as a stylish performer. The more you get to know it, the more you realise that for every design feature there is an equally important engineering feat. From its i-VTEC engine to its sleek aerodynamic exterior, every aspect of the Accord Euro is a showpiece of design innovation.

And now, for a limited time, it's gained even more attitude. The Limited Edition Accord Euro Sport brags an impressive list of extra features. For starters, its contoured body looks sharper than ever, with the addition of fog lamps, dark chrome door handles, black side window mouldings and a sports grille. Then there's the sports body kit, which in combination with the 17" alloy wheels makes the Sport mean business.

But the aggressive looks don't stop at the exterior. Inside, the Sport looks just as muscular, with red dash illumination, alloy gearshift knob and leather\* bolster seats with velour trim. Even safety gets bulked up, with the inclusion of front and rear curtain SRS airbags. If it wasn't so stylish and refined, you'd say the Accord Euro Sport was mean.

### Sleek form, sleeker performance.

The Sport isn't all just about aggressive good looks though. It still claims all the performance credentials that make the Accord Euro feel more like a sports car than a luxury sedan. Beneath the Accord Euro Sport's stylish design and sophisticated features, there's the heart of a pure-bred racing machine. Forty years of Formula One involvement have helped us create its 2.4 litre DOHC i-VTEC engine, which produces a blistering 140 kW of power. Couple this with either a six-speed manual transmission or optional five-speed sequential shift automatic with Grade Logic Control, and you can start to imagine just how awe-inspiring the Accord Euro Sport is to drive.

But what's even more impressive is that its inline 4 cylinder engine can produce such immense power with excellent fuel efficiency and low emissions.

### With power, you must have control.

Control is a major factor in Sport's performance. With Honda's drive-by-wire technology, or Electronic Throttle Control System (ETCS), the Sport has the edge. Adapted from Honda's NSX Supercar, this system replaces the conventional throttle cable with an all-electronic system that's able to monitor pedal position, throttle position, vehicle speed, engine speed, calculated road slope, corner radius and engine vacuum. This information is then used to define the throttle control sensitivity and alter the response accordingly.

### The refined Sport.

It might have an aggressive look, but inside, the Sport is really very inviting. It comes with all the interior comforts you've come to expect from Honda. The first benefit you may notice is the remarkable quietness of the cabin, due in part to the Accord Euro's wind-cheating properties. Its monocoque body shell's excellent dynamic stiffness and enhanced noise insulation make the interior of the Sport a particularly peaceful place to be.

Unless of course, you choose to employ the 6 stacker CD / AM FM tuner (with six speakers throughout the cabin). And while you're adjusting the sound environment, you can also dictate the temperature inside with dual zone climate control.

### The safe Sport.

Advancements in technology have benefits beyond performance and comfort. Accord Euro Sport implements a number of leading edge safety features to ensure the protection of you and your passengers.

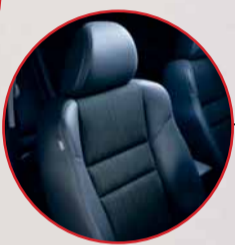

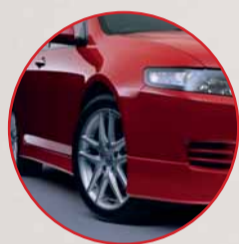

Electronic Brake force Distribution (EBD) works in conjunction with Anti-lock Brakes (ABS) to adjust front-to-rear brake effort, achieving maximum braking performance and stability. And Honda's Vehicle Stability Assist (VSA) has been designed to detect wheel-slip under acceleration and combines the use of braking and interruption of the ignition to regain traction.

Further security is provided by Honda's advanced G-Force Control technology (G-Con). Progressive crumple zones in the front and rear of the car absorb crash forces while a highly protective shell preserves the cabin space in a side impact. To top it all off, the Sport even includes impact absorbing bumpers, and the enhanced safety of front and side SRS airbags for the driver and front passenger, and curtain SRS airbags in the front and rear of the car.

Welcome to the exciting world of Sport. Play on.

\*Leather includes some PVC vinyl.

SPORTS BODY KIT

LEATHER BOLSTER SEATS WITH VELOUR TRIM\*

FOG LAMPS
