Subaru Satellite Navigation System

Liberty 3.0R spec.B shown

## Discover more with the Subaru Satellite Navigation System

New discoveries on familiar routes. Full voice and visual guidance covering 97% of the Australian population. Useful, at-a-glance visual displays with real-time monitoring. These are just some of the benefits of the Subaru Satellite Navigation System, the powerful built-in display designed to enhance your Subaru driving experience.

From city routes to driving holidays, covering major and minor roads as well as local and interstate routes, the Subaru Satellite Navigation System is both powerful and unique. This system is also tested on Australian conditions with the latest mapping software, so you have accurate guidance available at your fingertips. Developed by industry pioneer Kenwood, the luxury and comfort of this advanced navigation system is now available as a cost-effective option on selected premium Liberty and Outback models.

Excellent coverage of major and minor routes covering 97% of the Australian population, including all major cities and metropolitan areas.

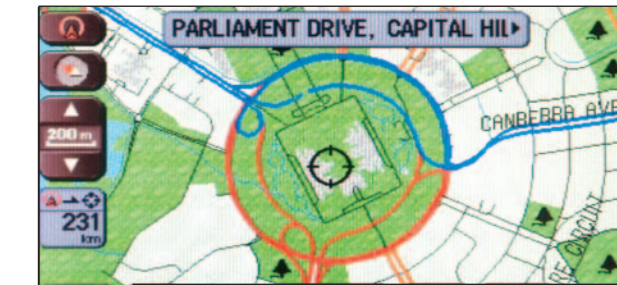

## Pro-actively powerful. Surprisingly simple.

Each user-friendly Subaru Satellite Navigation system also contains key navigational functions such as GPS with turn-by-turn voice guidance. You can choose from full or dual maps display, set your own markers, zoom in and out of displayed maps at any time, and select preset points of interest (POI) such as restaurants, airports and service stations, from the satellite navigation's database.

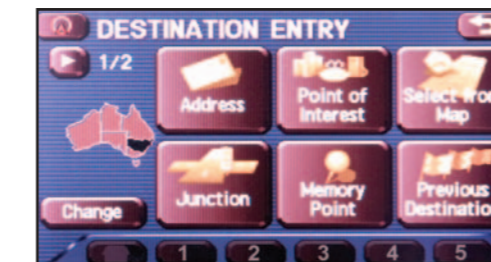

Yet all this power sits behind a very user-friendly interface. At a single touch, you can switch between additional useful functions such as calendar reminders for service intervals, real-time monitoring of fuel consumption and range calculation and much more. Upgrading is easy too. Optional DVD-ROM discs are available to buy from [www.Whereis.com](http://www.Whereis.com) annually.

Hassle-free driving has never been more affordable. The Subaru Satellite Navigation System offers outstanding value at \$2,990 RRP as a factory fitted option<sup>1</sup>. Existing Liberty & Outback customers can also enjoy this exclusive luxury by consulting their authorised Subaru Dealer on retrofit options<sup>2</sup>. For real peace of mind, every factory fitted system is covered under the standard Subaru warranty.

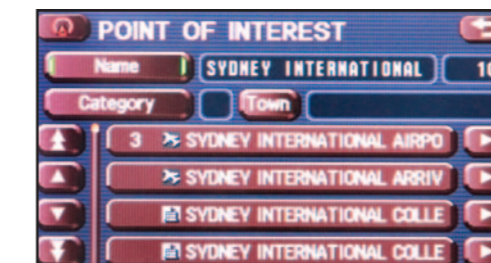

Full map screen display

Dual map display

Destination & route input choices

Pre-set Points of Interest (POI)

Real-time fuel consumption monitoring

Dual trip computers function
