

## The new A6 allroad quattro

## The new Audi A6 allroad quattro Powerful in expression

The all new Audi A6 allroad quattro offers more versatility and flexibility in its genetic make-up than ever before. Thanks to quattro permanent all-wheel drive and the variable ground clearance made possible by adaptive air suspension, the new A6 allroad quattro is equally at home on the highway as it is on remote gravel tracks.

The Audi A6 allroad quattro moves people literally and figuratively, with its expressive and emotional appearance and all-terrain character, translating the brand's benchmark in design to a new level. The new A6 allroad quattro exudes personality and power even when stationary. Dynamic lines and a coupe-like silhouette convey the vehicle's sporty characteristics, and a prominent new feature is the unique interpretation of the single-frame grille. With vertical chrome trimmed bars the licence plate now appears suspended mid-grille.

The striking aluminium roof rails and off-road styling elements such as a prominent stainless steel undertray for engine protection and wide, flared wheel arches harmoniously integrate a sense of robust character with a nonetheless stylish appearance.

The A6 allroad quattro features a spacious and versatile luggage compartment, designed for functionality and offering up to 1,660 litres of load space with the rear seats folded down. A twin rail securing system and extensive storage

packages provide ample storage space and tie-down facilities.

The new Audi A6 allroad quattro offers the latest generation of diesel engine technology TDI united with a highly effective exhaust emission control, known as a diesel particulate filter DPF. The 3.0 litre V6 TDI engine delivers a healthy 171 kW of power and incredible 450 Nm of torque and, combined with the latest technology common-rail injection system and piezo injectors, the A6 allroad quattro has the power to deliver superior performance upon demand without compromising the efficient fuel consumption of modern diesel engines.

The new Audi A6 allroad quattro defines the future of all-terrain performance with technology that remains revolutionary, emotional design, innovation and versatility. The new Audi A6 allroad quattro  
Power in expression.
