

The new Audi S3

The new Audi S3.

– Evolution of power and performance.

Power, performance and exclusiveness are major factors when stimulating the emotions and arousing fascination. The new Audi S3 has been created with a clear focus on these success factors – for people who are looking for a striking symbol of their personality and performance potential. Like all Audi S models, the new Audi S3 combines progressive technology and a sporty driving experience with distinctive features that set an S model apart from the rest. The Audi S3 offers its driver pure driving pleasure in a car with high everyday suitability.

As the sportiest representative of the successful Audi A3 model line, the new Audi S3 not only continues the success story begun by its direct predecessor, which was built from 1999 to 2003,

but does even more – it raises that car's image of sportiness to a new level that can be seen, felt and measured. The appeal of the new Audi S3 lies in its outstanding performance, its supreme road dynamics and the sheer fun it is to drive.

There is a sound basis for these claims: a sporty overall concept made up of high power output from the engine, S sports suspension, design elements typical of the S model range and exclusive equipment and trim. The new Audi S3 completes the range of Audi S model lines. As the fourth Audi S model, it is an important strategic element in a full range of sporty models and a further major step along the path that is taking the Audi brand to leadership in the premium car segment worldwide.
