Subaru Philosophy

At Subaru our philosophy is based on the spirit of innovation. A focus on ingenuity that generates control and exhilaration. Design that appeals to the heart as well as the mind. All delivering an experience behind the wheel that is even more

fulfilling than the destination. At Subaru, we strive to redefine driving through intellect, emotion and action. It's a philosophy that all comes together when you drive a Liberty.

Subaru Symmetrical All-Wheel Drive

Subaru has been a champion of All-Wheel Drive for over 30 years. Such long-standing commitment has given us the advantage in improving the technology even further – the symmetrical All-Wheel Drive system is one of our engineers' crowning achievements. The horizontally opposed Subaru Boxer Engine allows for a lower centre of gravity, while the symmetrical drive train produces a superior balanced vehicle. The All-Wheel Drive system then distributes power to all four wheels. For you, this

means outstanding balance, and more predictable vehicle control in a wide range of driving conditions.

The feeling is one of safety, security, confidence and fun. AWD is an intelligent system that is fine-tuned for different models, from recreational, to road going, to rallying, ensuring it's ideal for your choice of Subaru.

Passionate Performers

Subaru Rally Team

Rallying – it's the most demanding form of motorsport in the world. Brutally tough on cars and crews alike, it's the ideal testing ground for the All-Wheel Drive excellence and engineering integrity of Subaru. We see it as a mobile laboratory that helps hone technology, which filters through to our road cars. From

electronic throttle control to high performance turbocharged engines, the Subaru World Rally Team is an integral part of the testing regime, underscoring our reputation for durable, reliable and dynamic cars.

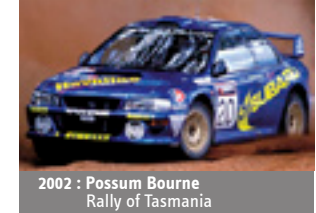

Driven By Success

Subaru Motorsport Australia

A decade of dominance in the Australian Rally Championship is proof of our domestic motorsport credentials. Subaru has now spread its wings to explore other areas of competition that highlight the benefits of using genuine factory-backed products in motorsport. The same components that underpinned our successful reign in capturing ten consecutive Australian Rally Championship Driver's titles are now available to motorsport enthusiasts Australia-wide. It's a winning formula that literally has a proven track record.

Passion For Driving

Liberty is a multiple award-winner, offering the innovative SI-DRIVE system, which gives you the choice of three engine modes to suit your driving mood. Every Liberty is built on the philosophy of combining Advanced Driving Technology with comfort and style. The constant All-Wheel Drive system, which can be found in every Liberty underlines its performance credentials. In addition, all models share an independent five star crash worthiness rating for occupant safety which

is your assurance of maximum protection in the event of an accident. All automatic versions offer the driving flexibility of SPORTSHIFT* transmission, allowing you to control power delivery, while the five and six-speed manual models deliver a smooth gear change, meaning there is a Liberty ideal for your driving style.

*SPORTSHIFT is a registered trademark of Prodrive Ltd

Feel Good On the Inside

Liberty is a luxurious place to be, with an impressive six-stack in-dash CD entertainment system which is MP3 and WMA compatible. The cabin sports an integrated and wholly contemporary look, enabling you to fine tune your drive experience. All this is surrounded by the security of the ring-shaped reinforcements, front, side, and curtain airbags that contribute to a maximum five-star crash worthiness

rating for occupant safety from the Australasian New Car Assessment Program (ANCAP). Ergonomics are an important consideration for Liberty's designers, with all controls in easy reach and great all-round vision for added safety – and a richly rewarding driving experience.

* Optional Satellite Navigation System shown.

Liberty 3.0R Premium & Liberty 3.0R spec.B

Six-cylinder Liberty is frequently compared with the very best that Europe has to offer and for good reason – the 180 Kilowatt 3.0-litre Boxer Engine# linked to the famed All-Wheel Drive system and Subaru Intelligent Drive (SI-DRIVE) makes a formidable package, offering the ideal combination of luxury, handling and performance. A safety standout in its class, Liberty 3.0R Premium includes Vehicle Dynamics Control (VDC) that helps maintain stability in demanding conditions. Liberty 3.0R spec.B adds distinctive 18-inch alloy wheels and

Bilstein sports suspension. All 3.0-litre Liberty variants take audio entertainment to the limit with the premium 14-speaker McIntosh system that includes a six-stack in-dash CD. Liberty 3.0R spec.B also offers the option of an STI^*-derived six-speed manual transmission.

*SPORTSHIFT is a registered trademark of Prodrive Ltd

#This engine requires 95 RON unleaded fuel. This fuel is not available in all areas of Australia.

^Subaru Technica International, the Subaru performance arm.

Liberty GT & Liberty GT spec.B

All Liberty GT models feature an award-winning turbocharged 2.5-litre horizontally opposed Boxer Engines that achieve low emissions and high power - in one outstanding 184 Kilowatt# high-technology package. Offering an optimum combination of sportiness and luxury, Liberty GT introduces Subaru Intelligent Drive (SI-DRIVE), the high technology package that offers three types of driving experience in the one car, whether you're seeking dynamic performance, frugal fuel figures or cruising on the freeway. Liberty GT spec.B factors

in Bilstein suspension, 18-inch, 10 spoke alloy wheels and the choice of a responsive five-speed SPORTSHIFT* automatic or six-speed STI^*-derived manual gearbox. It's a potent package with an ideal combination of safety, sportiness and Subaru symmetrical All-Wheel Drive.

*SPORTSHIFT is a registered trademark of Prodrive Ltd
#This engine requires 95 RON unleaded fuel. This fuel is not available in all areas of Australia.
^Subaru Technica International, the Subaru performance arm.

Liberty 2.5i Heritage & Liberty 2.5i Premium

The 2.5i Heritage produces 226 Newtonmetres of torque, plus 127 Kilowatts of power. The sophisticated Liberty 2.5i Heritage specification includes an electric sunroof, leather trim, eight-way adjustable power driver's seat with dual memory function, rear privacy glass, height tilt and telescopic adjustable steering and a six-stack in-dash CD entertainment system. Liberty 2.5i Premium adds a 14 speaker McIntosh Premium

audio system, self levelling Bi-Xenon headlights with pop-up washers and optional Satellite Navigation.

And it's all underpinned by our constant All-Wheel Drive and the safety systems that have gained an ANCAP five star rating for occupant safety in independent crashworthiness testing.

Liberty 2.5i

Liberty 2.5i offers lively performance from its 2.5-litre Boxer Engine, produces 127 Kilowatts of power and 226 Newtonmetres of torque, for a gripping drive. It includes dual front, side and curtain airbags, Vehicle Dynamics Control (VDC) in automatic models, plus ring-shaped reinforcements around the cabin for added effectiveness in collisions, which is why it has been awarded the maximum

five star rating from ANCAP for occupant safety. The Liberty 2.5i features Variable Valve Lift (VVL), a six-stack in-dash CD player, climate control air conditioning, power windows, doors and mirrors, distinctive six-spoke alloy wheels, dual exhausts and front fog lights all standard. All these specification and the Liberty's premium styling make it a compelling choice for discerning drivers.

Advanced Driving Technology - Performance Technologies

Subaru Constant All-Wheel Drive

Every Subaru has constant All-Wheel Drive (AWD), producing optimum balance in all conditions, all the time – a major element in Liberty's superb handling. That's why Subaru has a fine reputation for safety, road holding and fun driving. On tarmac and unsealed roads, AWD offers maximum traction from all four wheels. It's a product of award-winning engineering developed over 30 years, including extensive Australian testing – so the Liberty you drive is set up to suit our unique conditions.

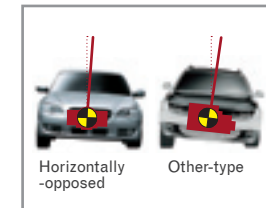

Subaru Symmetrical Drivetrains

The components that drive your Subaru are all perfectly aligned. These include the horizontally opposed "flat" boxer engine (so-called because the sideways cylinder action resembles the punching action of a boxer); the transmission, propeller shaft and rear differential, which transfers power from engine to wheels. The result: ideal weight distribution, low centre of gravity and optimum balance for greater driver control and enjoyment. The system uses fewer parts and produces less movement than other engine and AWD combinations, leading to greater durability and noise reduction.

Drive Subaru

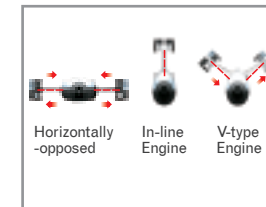

Snow and sudden downpours are our favourite conditions – because that's where you'll fully appreciate the benefits of constant All-Wheel Drive. Challenging road surfaces bring the benefits of our Advanced Driving Technology into focus.

Three Distinct Advantages

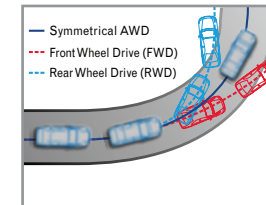

Better Balance

Liberty's low centre of gravity means less body roll, producing flatter cornering and improved response with the benefits of constant All-Wheel Drive grip. It means optimum stability in all conditions.

Less Vibration

Our horizontally opposed engines are flat in shape and sit low in the engine bay, with the sideways pistons resembling the punching action of a boxer – hence the name boxer engine. It means less vibration and noise, and greater cabin comfort.

More Grip and Traction

Constant All-Wheel Drive offers distinct advantages over two-wheel drives when cornering - increased traction and the reduced likelihood of skidding or spinning.

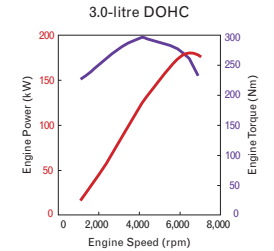

Advanced Driving Technology - Performance Technologies

Subaru 3.0-litre DOHC Boxer Engine

Subaru 3.0-litre DOHC Performance Curve

The 3.0-litre horizontally opposed Boxer Engine produces 180 kW of power at 6600 rpm* and 297 Nm of torque at 4200 rpm. This results in an impressive braked towing capacity of 1800 kg. The engine features Subaru's Active Valve Control System (AVCS) and Variable Valve Lift (VVL), ensuring optimum power and torque output - for sprightly performance across the operating range. Subaru's 3.0-litre engine is compact and lightweight compared to many other six-cylinder engines.

The torque curve (blue line) shows the engine's consistent pulling ability right across the rev range, while power (red line) demonstrates an even delivery from very low to high revs – that is why the six-cylinder engine is such a smooth operator, with the ideal combination of grip and power constantly available.

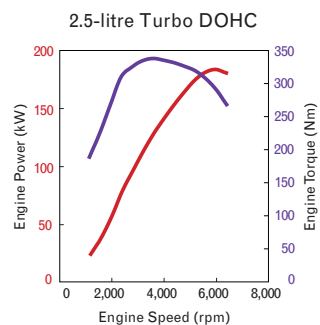

Advanced Driving Technology - Performance Technologies

Subaru 2.5-litre DOHC Turbo Boxer Engine

Liberty GT's award-winning 2.5-litre turbocharged engine now features the Subaru Active Valve Control System (AVCS). This engine produces 184 kW of power at 6000 rpm* in both manual and automatic variants, with 339 Nm of torque, there's instant pulling power available. The engine won the 2.0 to 2.5-litre class of the 2006 International Engine of the Year Awards at the Engine Expo in Stuttgart, Germany – independent recognition from an expert panel of judges. It's turbocharged technology that's built on years of gruelling motorsport experience and testing on all kinds of terrain, including in Australia. It produces an outstanding Grand Tourer driving experience that's set to satisfy.

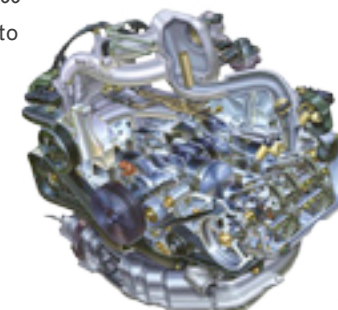

Subaru 2.5-litre DOHC Turbo Performance Curve

Both power (red line) and torque (blue) curves clearly illustrate the strength of our 2.5-litre engine across the operating range, with Active Valve Control (AVCS) System making a vital contribution to the even delivery of both.

*This engine requires 95 RON unleaded fuel. This fuel is not available in all areas of Australia.

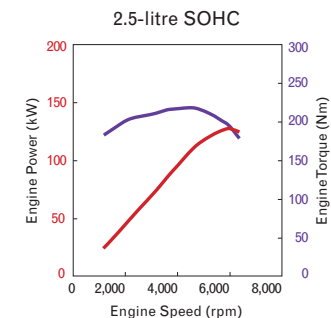

Subaru 2.5-litre SOHC Boxer Engine

The 2.5-litre engine produces 127 kW of power at 6000 rpm and 226 Nm of torque at 4400 rpm. It translates to a well-balanced drive that delivers fuel efficiency and practical power with excellent acceleration off the mark. The exhaust system is designed to improve efficiency still further and deliver high torque in both low and high revolution ranges. The exhaust features equal length header pipes that create a sporty and light revving Boxer Engine sound.

Subaru 2.5-litre SOHC Performance Curve

Both power (red line) and torque (blue) curves clearly illustrate the strength of our 2.5-litre engine across the operating range, with Variable Valve Lift (VVL) making a vital contribution to the even delivery of both.

Advanced Driving Technology - Performance Technologies

Subaru Intelligent Drive (SI-Drive)

Subaru Intelligent Drive (SI-DRIVE) is an innovative system that provides three modes to suit your driving mood. SI-DRIVE regulates the engine control unit (ECU), the electronic throttle and transmission control unit (TCU), ensuring optimal gear selection. This revolutionary technology is available in all Liberty turbo and six cylinder models.

There are three different modes in SI-Drive:
1: Intelligent (I) 2: Sport (S) 3: Sport Sharp (S#)

The mode is selected via a centre console dial, or by using the steering wheel-mounted control. Intelligent (I) is selected by pushing the dial down. Turning it left activates Sport (S); turning it right engages Sport Sharp (S#).

The different modes are complimented by the multi-function display (MFD) and ECO gauge, which indicates whether you are driving economically or in a more fun fashion.

1: Intelligent Mode (I)

Well-balanced economy-orientated performance, with smooth throttle control and optimum fuel efficiency when combined with sensible driving. Ideal for general commuting, freeway cruising and heavy traffic, where power is not essential.

2: Sports Mode (S)

Ideal for all-round driving. Linear acceleration heightens enjoyable normal and sporty driving under a wide range of road conditions. Great for day-to-day driving.

3: Sport Sharp Mode (S#)

A dynamic level of engine performance ideal for the true driving enthusiast. Engine and throttle control become more responsive and gearshift timing is set at higher engine speeds for optimum drivability.

Advanced Driving Technology - Performance Technologies

SPORTSHIFT* Automatic and Manual Transmissions

Gear lever-controlled SPORTSHIFT* is a feature of every automatic transmission Liberty. This gives you the option to instantly change up or down a gear via the stick shifter, using electronic control. It allows greater flexibility to suit your driving style and means pulling power is always easily accessible. The intelligent SPORTSHIFT takes into account cornering, braking and acceleration rate in making optimum gear selection and torque delivery to the constant All-Wheel Drive system. Subaru automatic transmissions provide excellent shift quality and fuel economy.

Every automatic SPORTSHIFT transmission Liberty uses "Direct" electro-hydraulic control, delivering superb response while reducing "shift shock." Combined with our sportshift automatic transmission selector, the result is highly refined performance whether in the 4-speed auto 2.5i or the 5-speed 3.0R spec B. Every Liberty GT, GT spec.B and 3.0-litre features paddle shift on the steering column, enhancing sporty performance when in SPORTSHIFT mode.

The five-speed manual available on Liberty 2.5i has been specifically developed to deliver smooth gear change with reduced noise, vibration and harshness. Liberty GT spec.B and 3.0R spec.B offer the choice of the renowned six-speed Subaru Tecnica International (STI) derived manual gearbox. The constant mesh transmission is a development of that used in the rally-proven Impreza WRX STI.

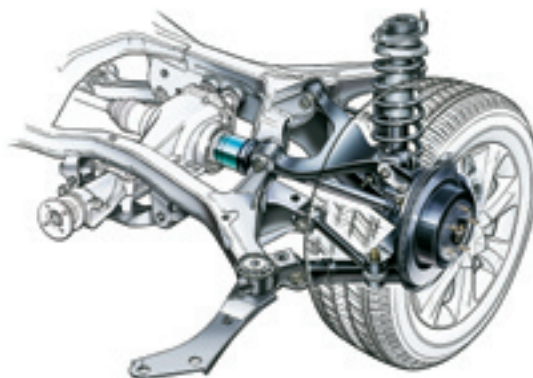

*SPORTSHIFT is a registered trademark of Prodrive Ltd

Advanced Driving Technology - Performance Technologies

Suspension

Subaru has developed a chassis and suspension system that delivers optimum control and stability, particularly when cornering. Light, yet strong and rigid components are used, with finely tuned suspension geometry and dynamics producing outstanding handling. Advanced strut front suspension, multi-link rear suspension and power-assisted rack and pinion steering combine to provide a smooth, controlled ride with excellent road holding..

Electronic Throttle Control (ETC)

The entire Liberty range features Electronic Throttle Control (ETC) or “drive-by-wire” technology. This eliminates any mechanical connection between accelerator and throttle. It ensures optimum throttle opening based on driver input and the engine's operating parameters. The result is smooth, responsive throttle control, making you more “in touch” with power delivery – adding to the sense of safety and control behind the wheel.

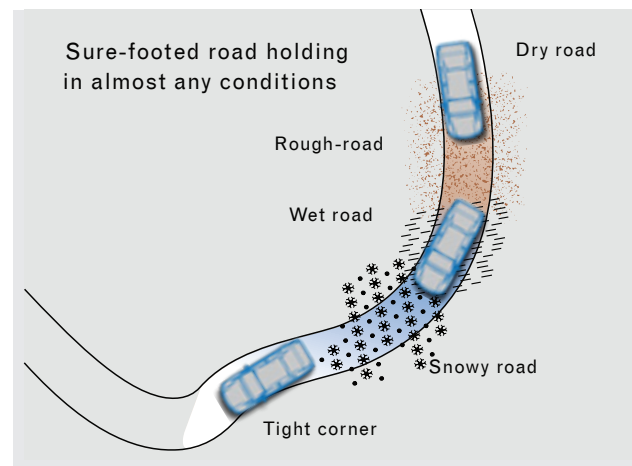

Advanced Driving Technology - Collision Avoidance Technologies

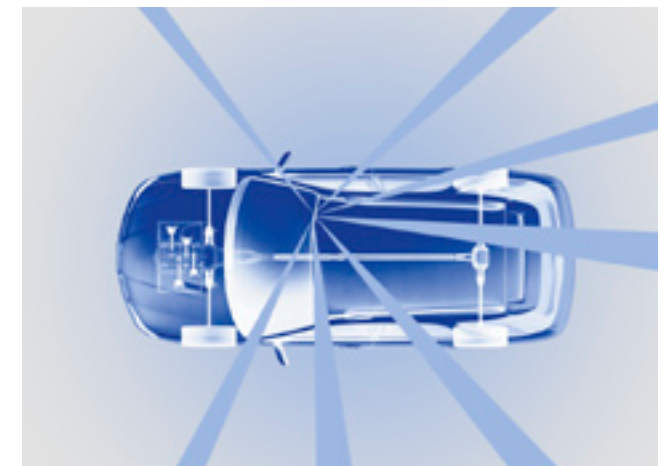

Safety Starts With All-Wheel Drive

Subaru constant All-Wheel Drive offers maximum traction in all conditions, all the time. It is a safety advantage offering almost twice the grip of two-wheel drive and superior to other part-time All-Wheel Drive Systems – which is why Liberty is among the safest in its class for accident avoidance. On tight corners, wet roads, in snow and on muddy tracks, Liberty achieves optimum traction. The ideal balance of the symmetrical drive train provides extra control, while the horizontally opposed boxer engine sits low and flat in the engine bay, underlining the ideal centre of gravity. Constant power delivery to all four wheels is another safety benefit.

Subaru's Views on Field of Vision

Our dedication to safety includes a commitment to an optimum field of vision for drivers when reversing. Vision is an essential component of active safety design and Subaru has adopted several design standards to minimise blind spots, enabling the driver to easily judge exterior dimensions of the vehicle and control it.

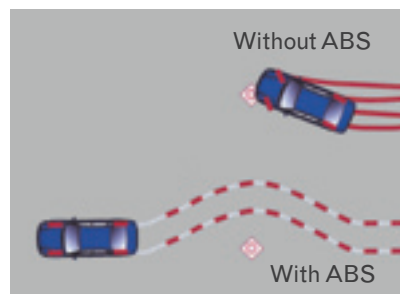

Advanced Driving Technology - Collision Avoidance Technologies

Sophisticated ABS Braking with EBD & Brake Assist

The Anti-lock Braking System (ABS) is a fundamental part of our safety philosophy, offering shorter stopping distances in emergencies. That is why we have ABS braking with Electronic Brakeforce Distribution (EBD) and Brake Assist (BA) standard on the entire Liberty range. ABS braking uses independent sensors to detect and control braking on each wheel, providing the control required to allow the driver to brake and steer away from danger. EBD works with the ABS system to provide greater reassurance by automatically distributing brake force to maximise stopping power. While ABS systems vary considerably, Subaru uses an advanced Bosch 8 four-sensor/four-channel/three-phase ABS. Brake Assist (BA) helps detect emergency braking by adjusting and optimizing braking pressure to ensure safe deceleration in emergencies.

VDC* - Stability Control

Vehicle Dynamics Control (VDC) is a stability control system featured in selected SPORTSHIFT automatic transmission Liberty's. It is designed to give you optimum control in emergencies. VDC's heart is an electronic control unit (ECU) that uses information from sensors tracking wheel speed, steering position, longitudinal and lateral (sideways) G force, and yaw rate, to monitor forces that could destabilise vehicle running. VDC computes and compares driving and running conditions. In extreme situations, such as when swerving, sideslipping or entering a spin, VDC activates to control vehicle stability via torque distribution, power reduction or braking. In normal conditions, it only monitors and applies no control. But near the performance limits it gives you more control – producing a safer and more comfortable drive.

*Available on Liberty 2.5i, Heritage and 2.5i Premium. #Vehicle Dynamics Control (VDC) is available on all automatic Liberty 2.5i, Heritage, Premium, GT, 3.0R Premium and all 3.0R spec.B models.

Advanced Driving Technology - Collision Protection and Security

ANCAP - 5 Star Occupant Safety Rating

Every Liberty has the maximum five star crash worthiness rating for occupant safety from the respected and independent Australasian New Car Assessment Program (ANCAP). To achieve this, Liberty was crash-tested by ANCAP and the car minutely inspected to check the structure and potential occupant effects. The ANCAP 5-Star symbol is your assurance of maximum protection in the event of an accident.

Better Passenger Protection

Every Liberty has active front seat head restraints, which minimise whiplash. In a rear end collision they instantly move forward to support the head. Seatbelt indicator lights mean the driver can make a simple visual check, ensuring all occupants have belted up. All three rear seatbelts have Automatic Emergency Locking Retractors (A/ELR). When fully extended, they ratchet back into position, fully securing child safety seats. Front seatbelts have pretensioners and load limiters for enhanced safety.

Three 3-point A/ELR rear seat belts.

Front, Side & Curtain Airbags

Every Liberty has dual front, side and curtain airbags, offering

greater protection from injury in a heavy collision. Dual front airbags feature two-stage inflators, which control airbag opening according to impact force. In a relatively minor impact at low or medium speeds, the airbags inflate in two stages. In severe impacts at high speed, both inflators deploy simultaneously.

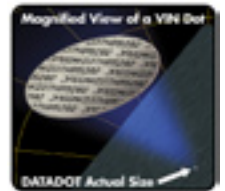

Advanced Thinking in Body Design

Liberty has a ring-shaped reinforcement safety cell, featuring crumple zones and rigid elements that protect occupants by absorbing energy on impact. The flat boxer engine's low position also means it slides below the cabin in a severe frontal collision. The energy absorbing collapsible steering column minimises driver injury too.

DataDot Technology

All Subaru Liberty models are fitted with the latest advanced engine immobilisers and DataDot technology. Approximately 7,000 microscopic dots are laser-etched with your vehicle's unique VIN, then applied to the components of your vehicle via a patented spraying process. Rear window labels warn potential thieves that your vehicle and all its component parts will be easily identifiable for the authorities.

SRS (Supplemental Restraint System) dual front, dual front side and curtain airbags. Most effective when used in conjunction with seat belts.

Capacity

Room For Your Active Lifestyle

Liberty allows you to combine stellar driving performance with flexible cargo capacity. Remote keyless unlocking of the boot allows easy opening, while a retractable cargo security blind in the wagon protects your valuable property from prying eyes. The rear mat and rear seat back also combine to form a seamless covering when both seats are lowered. Loop pile carpet is used throughout the rear of the wagon to provide a fully carpeted carriage space. The sedan has the space saving feature of retractable hinges which maximises the ability to carry large luggage. In the front seats, dashboard storage helps create even more space.

Liberty 3.0R spec.B

The Liberty offers impressive interior space, with generous width, headroom and rear legroom. Loading luggage through the rear tailgate is easy, and cargo floor length is equally generous.

60/40 split fold rear seats.

Flat cargo area.

Retractable cargo security blind.

Boot space.

Liberty 3.0R spec.B

Interior / Exterior

Available in sedan and wagon Liberty 3.0R spec.B boasts distinctive 18-inch 10-spoke alloy wheels. The sumptuous leather interior is luxurious and sporty. Driving enthusiasts will appreciate the SPORTSHIFT* paddle controls on the automatic, while steering wheel mounted SI-DRIVE, audio and cruise buttons offer convenient fingertip control – allowing you to concentrate on the road ahead and be fully immersed in a great driving experience.

Optional Satellite Navigation

The destination is at your fingertips, using Subaru Satellite Navigation*. The touch screen-based system is fitted in the dashboard centre console and is designed to be intuitive, making it easy to move between menus. It uses the renowned Whereis™ Map database**, widely regarded as the most accurate for vehicle satellite navigation purposes. Frequently used locations can be stored in the memory, while drivers are offered a huge variety of vertical map views, ranging from as close as 50 metres to the farthest 256 kilometres. It also incorporates dual trip meter functions plus journey duration,

distance and average fuel consumption. The system can also issue maintenance reminders including service, tyre pressure, oil and other essential checks#.

* Available as a factory fitted option on Liberty 2.5i Premium, GT, GT spec.B, 3.0R Premium and 3.0R spec.B. Also available as an optional dealer fit on all other Liberty models.

** Whereis is a registered trademark of Telstra Corporation Limited.

System checks/functions not available on all Satellite Navigation systems.

Accessories

Subaru Genuine Accessories

It's natural that you want to protect and enhance your vehicle. When it comes to parts and accessories, you should demand the same exacting standards that we use in making our cars. All Subaru accessories are fully tested in tough Australian conditions and, if fitted at the time of new vehicle purchase, have the same three-year warranty as your new Subaru.

To see the complete range of Liberty accessories, together with pricing and warranty information, please visit the Subaru website www.subaru.com.au

Preferred Repairer

Subaru Preferred Collision Repairer Network

Motor vehicle accidents can happen to anyone and, when they do, it can be a time of chaos and confusion. So we at Subaru have set up a network of Preferred Collision Repairers. These repairers have been selected because of their stringent quality standards as well as high levels of customer service. You can call our dedicated help line 1800 737 179, 24 hours a day, 7 days a week or, for a listing of our national Preferred Collision Repairer Network, visit us online.

Insurance

Subaru Insurance

We understand that you, as a Subaru owner, want a range of insurance options that offer features and benefits that complement your Subaru vehicle. Subaru insurance options are: Subaru Comprehensive Motor Vehicle Insurance, Subaru Motor Equity Insurance and Subaru Loan Protection Insurance. These Subaru insurance products have been specifically created with the same level of thought and innovation you have come to expect from our vehicles. These Subaru insurance products are available only through participating authorised dealers. To find out more, call 1300 783 464 (8.30am to 5.30pm Mon - Fri) or visit us online.

Roadside Assist

Subaru Service and Roadside Assist

Subaru Service is the surest way to ensure your vehicle is maintained by factory-trained technicians with unequalled knowledge of Subaru products. There's also the advantage of knowing that genuine Subaru parts and accessories are used. In the unlikely event your Subaru breaks down or experiences technical problems, Subaru Roadside Assist is a 24-hour 7-day-a-week program to help customers. For a competitive annual fee starting at \$71.50*, Subaru Roadside Assist is available to Liberty owners. For more information visit us online.
