A MESSAGE FROM OUR PRESIDENT

**TO OUR LONG-STANDING FLEET VEHICLE
PARTNERS, WE THANK YOU FOR YOUR SUPPORT.**

2023 offers a lot of room for optimism as Toyota continues to evolve our business to meet the needs of our fleet partners.

Globally, we're heavily invested in becoming more electrified, more connected and more inclusive. And, with agility and resilience built into our corporate DNA, Toyota is well-positioned to adapt to the changing Canadian fleet market.

As always, overall cost of ownership is one of the most important factors when considering a fleet vehicle. Toyota has a reputation for providing long-lasting value, and we're proud of the recognition we receive year after year for our quality, dependability and reliability.

Toyota has always been focused on safety, and the suite of advanced safety features we call Toyota Safety Sense™ is standard on virtually all our models.

Our leadership in fuel efficiency, electrification and carbon reduction has led us to the broad lineup of electrified powertrain technologies we offer our customers, including our new bZ4X battery electric vehicle (BEV), our zero-emission Toyota Mirai fuel cell electric vehicle (FCEV), and numerous hybrid electric and plug-in hybrid electric models.

We also understand the importance of connectivity and how it impacts the driver's experience. The all-new Toyota Multimedia connected vehicle technology offers an advanced suite of innovations designed to simplify your everyday life. Our connected technologies come in a wide range of packages which makes it easier for you to choose vehicles that best suit your needs for convenient connectivity and enhanced peace of mind.

Thank you for considering Toyota Canada as your fleet vehicle provider, and for giving us the opportunity to showcase our diverse lineup of Toyota cars, trucks and SUVs.

We look forward to working with you, our fleet partners, and to ensuring that you continue to find the perfect vehicle for your business needs.

Thank you,

Larry Hutchinson
President and CEO, Toyota Canada Inc.

50+ YEARS OF GROWTH IN CANADA

#1

Canada's largest vehicle
manufacturer since 2015.*

9+

Billion in total
investment in Canada.

10+

Million vehicles manufactured
in Canada since 1988.

23,307

Employees in Canada, located
in every province and Yukon.

199,300

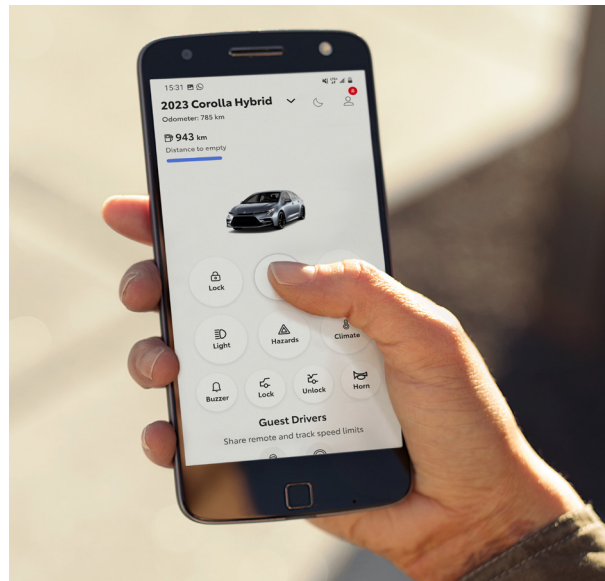

Vehicles sold in
Canada in 2021.

*Cumulative production since 2015. All statistics are based on 2020 calculations.

CONNECTED SERVICES

STAY CONNECTED TO YOUR TOYOTA.

Connected Services is an advanced suite of smart technologies designed to help you stay in touch with your vehicle and simplify your everyday life.

TOYOTA REMOTE CONNECT APP*

Toyota App is a smartphone app that connects you to everything Connected Services by Toyota has to offer. It lets you control a series of vehicle functions from a distance. Start the engine, lock or unlock the doors and more. Plug-in hybrid vehicles equipped with Remote Connect include Remote Climate Start, Charge Management and a Charging Station Map. Stay connected with your Toyota no matter where you are.

SERVICE CONNECT

When it comes to maintaining your vehicle, you have the ability to be proactive and informed. Keep your Toyota in peak condition with access to warning light notifications and vehicle health reports.

SAFETY CONNECT

Help is just a press of the SOS button away. With emergency SOS assistance and enhanced roadside assistance should you encounter trouble on the road. If airbags deploy or impact sensors are triggered during a collision, it will also send an Automatic Collision Notification to one of our agents. A Stolen Vehicle Locator is also a feature of Safety Connect.

DESTINATION ASSIST

Provides 24/7 access to a live agent to help you locate destinations and the best route to get there. Agents can help you look for an exact location or provide recommendations on places to go. Once a location is selected, they will push the route to your navigation system. Up to five locations can be loaded into your navigation system at a time.

DRIVE CONNECT (TOYOTA MULTIMEDIA ONLY)

Enjoy Cloud Navigation with real-time updates, Intelligent Assistant that responds to natural voice commands, and Destination Assist with 24/7 access to a live response agent.

*Features may vary depending on the vehicle grade.

WHAT'S NEW

TOYOTA INTRODUCES THE NEXT EVOLUTION OF ELECTRIFICATION OPTIONS.

GO FURTHER. GO CLEANER.

In addition to our existing lineup of hybrid electric vehicles, Toyota now offers more electrified options to help Canadians go cleaner. With advancements in safety, fuel efficiency and performance, Toyota is paving the way for a brighter future.

COROLLA CROSS HYBRID

The Corolla family is growing again with the new Corolla Cross Hybrid subcompact SUV. Sporty by nature, spacious and versatile by design, Corolla Cross Hybrid is ideal for those seeking a vehicle equally at home in busy urban centres or taking on rural adventures. Its 5th generation Toyota Hybrid System delivers both increased performance and stellar fuel economy.

SEQUOIA HYBRID

The all-new 2023 Toyota Sequoia lives up to its powerful and legendary namesake, thanks to a head-turning new look, luxurious comfort, impressive technology and the perfect blend of performance and efficiency. The three-row SUV features the powerful twin-turbo V6 hybrid i-FORCE MAX powertrain which produces 437 horsepower and 583 lb-ft of torque. It also offers up to an impressive 9,000-pound maximum towing capacity, a 26 percent increase over the previous generation model.

TUNDRA HYBRID

The first-ever Tundra Hybrid was introduced with an i-FORCE MAX hybrid twin-turbo V6 engine producing a whopping 437 hp at 5,200 rpm, and a staggering 583 lb-ft of torque with amazing fuel economy.

CROWN HYBRID

All-new for 2023, the Toyota Crown returns to Canada. With its bold styling, the choice of two stellar hybrid powertrain options and its electric all-wheel drive, the Crown redefines how you think of sedans. Well-appointed with our newest Toyota Multimedia Systems, Toyota Safety Sense™ 3.0, the Toyota Crown is ready to transport you into a new era of driving.

FUEL EFFICIENCY

OUTSTANDING FUEL EFFICIENCY HELPS DRIVE DOWN YOUR COSTS.

Fuel expenses are a major contributor to the total cost of running your fleet. That's why Toyota is committed to improving the fuel efficiency and reducing the greenhouse gas emissions of all our vehicles. We already lead the way with the most extensive and proven lineup of fuel-efficient

hybrids and the list keeps growing, from our Camry sedan to the RAV4 and Highlander SUVs. And with available plug-in hybrids like the RAV4 Prime, it's easy to see that there's a fuel-efficient Toyota for any job. Whether it's hybrid, plug-in hybrid or conventional gas engine powertrains,

Toyota's commitment to fuel efficiency delivers a cost-conscious driving experience. And for tomorrow, we're investing in new technology and exploring new powertrains like our Mirai fuel cell electric vehicle, which uses no gasoline and emits only water vapour out of the tailpipe.

SAFETY & TECHNOLOGY

AT TOYOTA, WE BELIEVE THAT NO MATTER WHAT THE DESTINATION, EVERYONE DESERVES TO ARRIVE SAFELY.

Toyota's Canadian lineup earned six 2022 IIHS Top Safety Pick+ Awards.* That's why we created Toyota Safety Sense™ (TSS) – an advanced suite of innovative safety features designed to help protect drivers, passengers, pedestrians and people in other vehicles from harm.

TOYOTA SAFETY SENSE™ P (TSS-P)

- Pre-Collision System (PCS) with Pedestrian Detection⁵
- Lane Departure Alert (LDA) with Steering Assist⁷
- Automatic High Beam (AHB)⁸
- Dynamic Radar Cruise Control (DRCC)⁶

TOYOTA SAFETY SENSE™ 2.0 (TSS-2.0)

INCLUDES ALL THE FEATURES OF TSS-P PLUS:

- Lane Trace Assist (LTA)⁹

ENHANCED FUNCTIONALITY FOR PCS ADDS:

- Daytime/low light vehicle detection
- Daytime/low light pedestrian detection
- Daytime bicycle detection
- LDA adds Road Edge Detection

TOYOTA SAFETY SENSE™ 2.5+ (TSS-2.5+)

- Pre-Collision System with Pedestrian & Bicycle Detection⁵
- Lane Departure Alert (LDA) with Steering Assist & Road Edge Detection⁷
- Automatic High Beam (AHB)⁸
- Full-Speed Range Dynamic Radar Cruise Control (DRCC)⁶
- Lane Tracing Assist

TOYOTA SAFETY SENSE™ 3.0 (TSS-3.0)

This system has been improved by expanding the detection range of the millimetre wave radar and monocular camera. Toyota has enhanced the performance of each function and added new functions to assist in normal driving conditions. For example, the Pre-Collision System has been improved to offer Low-Light Cyclist Detection, Daytime Motorcyclist Detection and Guardrail Detection. Also, lane recognition is enhanced to add improved functionality while in Lane Tracing Assist mode.

SAFETY & TECHNOLOGY

AT TOYOTA, SOPHISTICATED SAFETY FEATURES COME STANDARD.

Toyota's Canadian lineup earned six 2022 IIHS Top Safety Pick+ Awards.* Years of testing and investment in research and development have led to the creation of our Star Safety System™, six advanced accident-avoidance technologies that make attentive drivers better drivers.

VEHICLE STABILITY CONTROL

helps prevent wheel slip and loss of traction by reducing engine power and applying brake force to the wheels that need it.

TRACTION CONTROL

helps maintain grip on wet, icy, loose or uneven surfaces by applying brake force to spinning wheels.

ELECTRONIC BRAKE-FORCE DISTRIBUTION

is advanced ABS technology that keeps the vehicle more stable and balanced when braking.

ANTI-LOCK BRAKE SYSTEM

helps prevent brakes from locking up by “pulsing” brake pressure in emergency braking situations.

SMART STOP TECHNOLOGY (SST)

automatically cuts engine power and allows the brakes to take control when the accelerator and brakes are pressed at the same time.¹³

BRAKE ASSIST

helps detect sudden or “panic” braking and adds the full pressure needed to help prevent collisions.¹⁴

RELIABILITY

YOU CAN RELY ON YOUR TOYOTA VEHICLES TO GET THE JOB DONE.

QUALITY. DEPENDABILITY. RELIABILITY.

Three words that say everything. At Toyota, quality is an obsession. From the selection of raw materials to final vehicle inspection, quality is built into every step of production. And because of our philosophy of kaizen – continuous improvement – our vehicle build quality gets better every day.

It should come as no surprise then that Toyota vehicles consistently rank among the longest-lasting vehicles in Canada with the highest retention value. That kind of durability means your Toyota fleet vehicles will contribute to your company’s bottom line with lower maintenance and repair costs and higher resale value. Quality and durability together create reliability.

Toyota

Canadian Black Book has been Canada’s most trusted source for information on used vehicle value for over 50 years. In the years since they launched their annual Best Retained Value Awards, no manufacturer has won as many Awards as Toyota. Winners are determined from actual value retained from MSRP measured over a four-year period. See CanadianBlackBook.com for complete details.

2022 Tacoma shown

EXECUTIVE VEHICLES

TOYOTA EXECUTIVE VEHICLES. SOMETHING TO STRIVE FOR.

CAMRY XSE / The 2023 Camry XSE sets the standard for bold styling in a mid-size sedan. Head-turning design and high-tech features abound, including an in-console wireless device charging system.²

VENZA / The 2023 Venza blends smart, stylish design, with a refined interior – thoughtfully appointed with premium materials and brimming with cutting-edge entertainment and connectivity. Powered exclusively by Toyota's latest hybrid-electric powertrain, Venza combines smooth performance with segment-leading fuel efficiency.

HIGHLANDER XSE / The 2023 Highlander XSE delivers a balance of refined styling, go-anywhere all-wheel drive performance and a full suite of convenience features...an 11-speaker JBL Synthesis audio system, voice recognition and much more.

FULL MODEL RANGE OVERVIEW

OUR FULL MODEL RANGE OFFERS SOMETHING FOR EVERY BUSINESS.

From small businesses to large companies, Toyota vehicles put in an honest day’s work, every day. From the compact Corolla Hatchback to the powerful Tundra full-size pickup truck, a Toyota vehicle will prove to be an asset to your drivers and your bottom line.

EMISSION WARRANTY				
DEFECT / PERFORMANCE	60,000 KM			
SPECIFIED MAJOR EMISSION COMPONENTS			130,000 KM	

Warranty time-based and kilometres-driven information chart. See owner’s manual or Toyota.ca for full warranty details.

AWARDS & ACCOLADES

TOYOTA IS CONSISTENTLY ONE OF THE MOST AWARDED CAR BRANDS IN THE WORLD.

- MAIN CAR – **CAMRY**
- SMALL PICKUP – **TACOMA**
- OVERALL BRAND – **(CAR)**

- **RAV4**
- **VENZA**

- **GR86**
- **RAV4 PRIME**
- **CAMRY**
- **HIGHLANDER**
- **SIENNA**
- **TUNDRA**

Canadian Black Book has been Canada's most trusted source for information on used vehicle value for over 50 years. In the years since they launched their annual Best Retained Value Awards, no manufacturer has won as many awards as Toyota. Winners are determined from actual value retained from MSRP measured over a four-year period. See [CanadianBlackBook.com](https://www.CanadianBlackBook.com) for complete details.

LET'S TALK

LIKE EVERY TOYOTA THIS COULD BE THE START OF A LONG RELATIONSHIP.

Toyota's fleet program starts with class-leading vehicle design, innovative technology, safety, reliability and fuel efficiency. Add to that our dedicated customer service team and fleet experts. When you're ready to talk, we can connect you with a fleet specialist, either at our head office or right in your local community. If you click on the link below and fill out the form, a fleet representative will be in touch.

www.toyota.ca/toyota/en/business-fleet/contact-fleet-sales

Thank you for considering Toyota for your fleet needs.

FOOTNOTES / APPENDIX

1 Apps, services and subscription terms vary depending on the vehicle suffix, model and multimedia display. Driving while distracted can result in loss of vehicle control. Some features may be locked out while the vehicle is in gear. To reduce risk of accident while driving, exercise care when using the systems (even with the voice commands) and obey all local laws concerning use of the systems while driving (as some laws prohibit the use of electronic devices while operating a vehicle). Once the Connected Services by Toyota trial subscription expires, paid enrollment is required. Apple CarPlay, iPhone and Siri are trademarks of Apple Inc. Android Auto and Google Assistant are trademarks of Google LLC. A compatible customer phone pairing is required and customers are responsible for all data charges.

2 Qi wireless charging may not be compatible with all mobile phones, MP3/WMA players and like models. When using the wireless charging system avoid placing metal objects between the wireless charger and the mobile device when charging is active. Doing so may cause metal objects to become hot and could cause burns.

3 Before towing, confirm your vehicle and trailer are compatible, hooked up and loaded properly and that you have any necessary additional equipment. Do not exceed any Weight Ratings and follow all instructions in your Owner's Manual. The maximum you can tow depends on base curb weight plus the total weight of any cargo, occupants, and added vehicle equipment. "Added vehicle equipment" includes additional standard/optional equipment and accessories added by the manufacturer, dealers, and/or vehicle owners. The only way to be certain of your vehicle's exact curb weight is to weigh your vehicle without passengers or cargo. Installation of a tow hitch receiver or other accessories located near the rear bumper may require disabling or removing the kick sensor, and the sensor operation setting in your vehicle should be turned off. See Owner's Manual for limitations.

4 Drivers should always be responsible for their own safe driving. Please always pay attention to your surroundings and drive safely. Depending on the conditions of roads, vehicles, weather, etc., the TSS systems may not work as intended.

5 The TSS Pre-Collision System is designed to help avoid or reduce the impact speed and damage in certain frontal collisions only. The Pedestrian Detection system is designed to detect a pedestrian ahead of the vehicle, determine if impact is imminent and help reduce impact speed. It is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, size and position of pedestrians, driver input and weather, light and road conditions.

6 Dynamic Radar Cruise Control is designed to assist the driver and is not a collision-avoidance system or a substitute for safe and attentive driving practices. System effectiveness depends on many factors such as weather, traffic and road conditions.

7 Lane Departure Alert with Steering Assist is designed to read lane markers under certain conditions and provide visual and audible alerts and slight steering force when lane departure is detected. It is not a collision-avoidance system or a substitute for safe and attentive driving.

8 Automatic High Beam System operates at speeds above approximately 34 km/h. Factors such as a dirty windshield, variable weather, lighting conditions and hilly terrain will limit effectiveness, requiring the driver to manually turn it off.

9 Lane Tracing (Trace) Assist (LTA) is designed to read visible lane markers and detect other vehicles under certain conditions. When potential lane departure is detected, LTA provides a visual warning and either an audible alert or vibration in the steering wheel and can apply a slight steering force. It is not a collision-avoidance system or a substitute for safe and attentive driving. Effectiveness is dependent on many factors including road, weather and vehicle conditions.

10 Not all exterior and interior colour options are available for every model.

11 Fuel efficiency estimates were determined using approved Government of Canada Test Methods. Actual fuel consumption will vary based on driving habits and other factors.

12 Vehicle Stability Control (VSC) is an electronic system designed to help the driver maintain vehicle control under adverse conditions. It is not a substitute for safe driving practices. Factors including speed, road conditions and driver steering input can all affect whether VSC will be effective in preventing a loss of control.

13 Smart Stop Technology operates only in the event of certain simultaneous brake and gas pedal applications. When engaged, the system will reduce engine power to help the brakes bring the vehicle to a stop. Factors including speed, road conditions and driver input can all impact stopping distance. Smart Stop Technology is not a substitute for safe and attentive driving and does not guarantee instant stopping.

14 Brake Assist is designed to help the driver take full advantage of the benefits of ABS. All fuel efficiency and CO₂ estimates were determined using approved Government of Canada Test Methods. Actual fuel consumption and CO₂ estimates will vary based on driving habits and other factors.

15 Toyota tests certain Bluetooth®-capable phones for compatibility with Toyota vehicles. Note that the recommendation of Toyota is not a warranty of the performance for any phone and that some problems may occur with any type of handset-based, on-the-phone software version or the service coverage available in your area. Some vehicles equipped with Bluetooth® technology are available with bilingual compatibility. Please see your Toyota Dealer for details.

16 Fuel efficiency estimates were determined using approved Government of Canada Test Methods. Actual fuel consumption will vary based on driving habits and other factors. Details on the above features can be found in the Owner's Manual or contact your local Toyota Dealer.

*As of April 1, 2021. Toyota nameplate vehicles only.
