

The NEW HOLDEN

CALAIS

Holden CALAIS
STANDS APART from
the crowd.

The new Holden Calais. In every area in which a luxury motor vehicle can be evaluated, it stands apart from the crowd.

Because whether you consider performance, style, luxury or the host of practical features, there is simply no other vehicle quite like a Calais.

Now with the brilliant new Holden ECOTEC V6 engine, Calais is ready to deliver new power, yet fuel economy and quietness that surpasses the competition.

Calais stands apart from the run-of-the-mill Australian luxury car, with driver and passenger airbags fitted as standard equipment, as well as the latest Bosch Anti-lock Braking System (ABS) and Independent Rear Suspension (IRS).

So it handles the whole

range of Australian road conditions with the kind of safety, control and driving satisfaction that can be gained only by continuous development, testing and manufacturing in this unique country.

And Calais continues to impress with its distinctive styling and high standards

of interior luxury.

New insulation has further reduced road noise, while the new 10 stack CD unit securely located in the boot, complements a whole range of standard appointments that provide a superb driving environment.

All riding comfortably in a spacious interior upholstered

in new Derwent velour and leather.

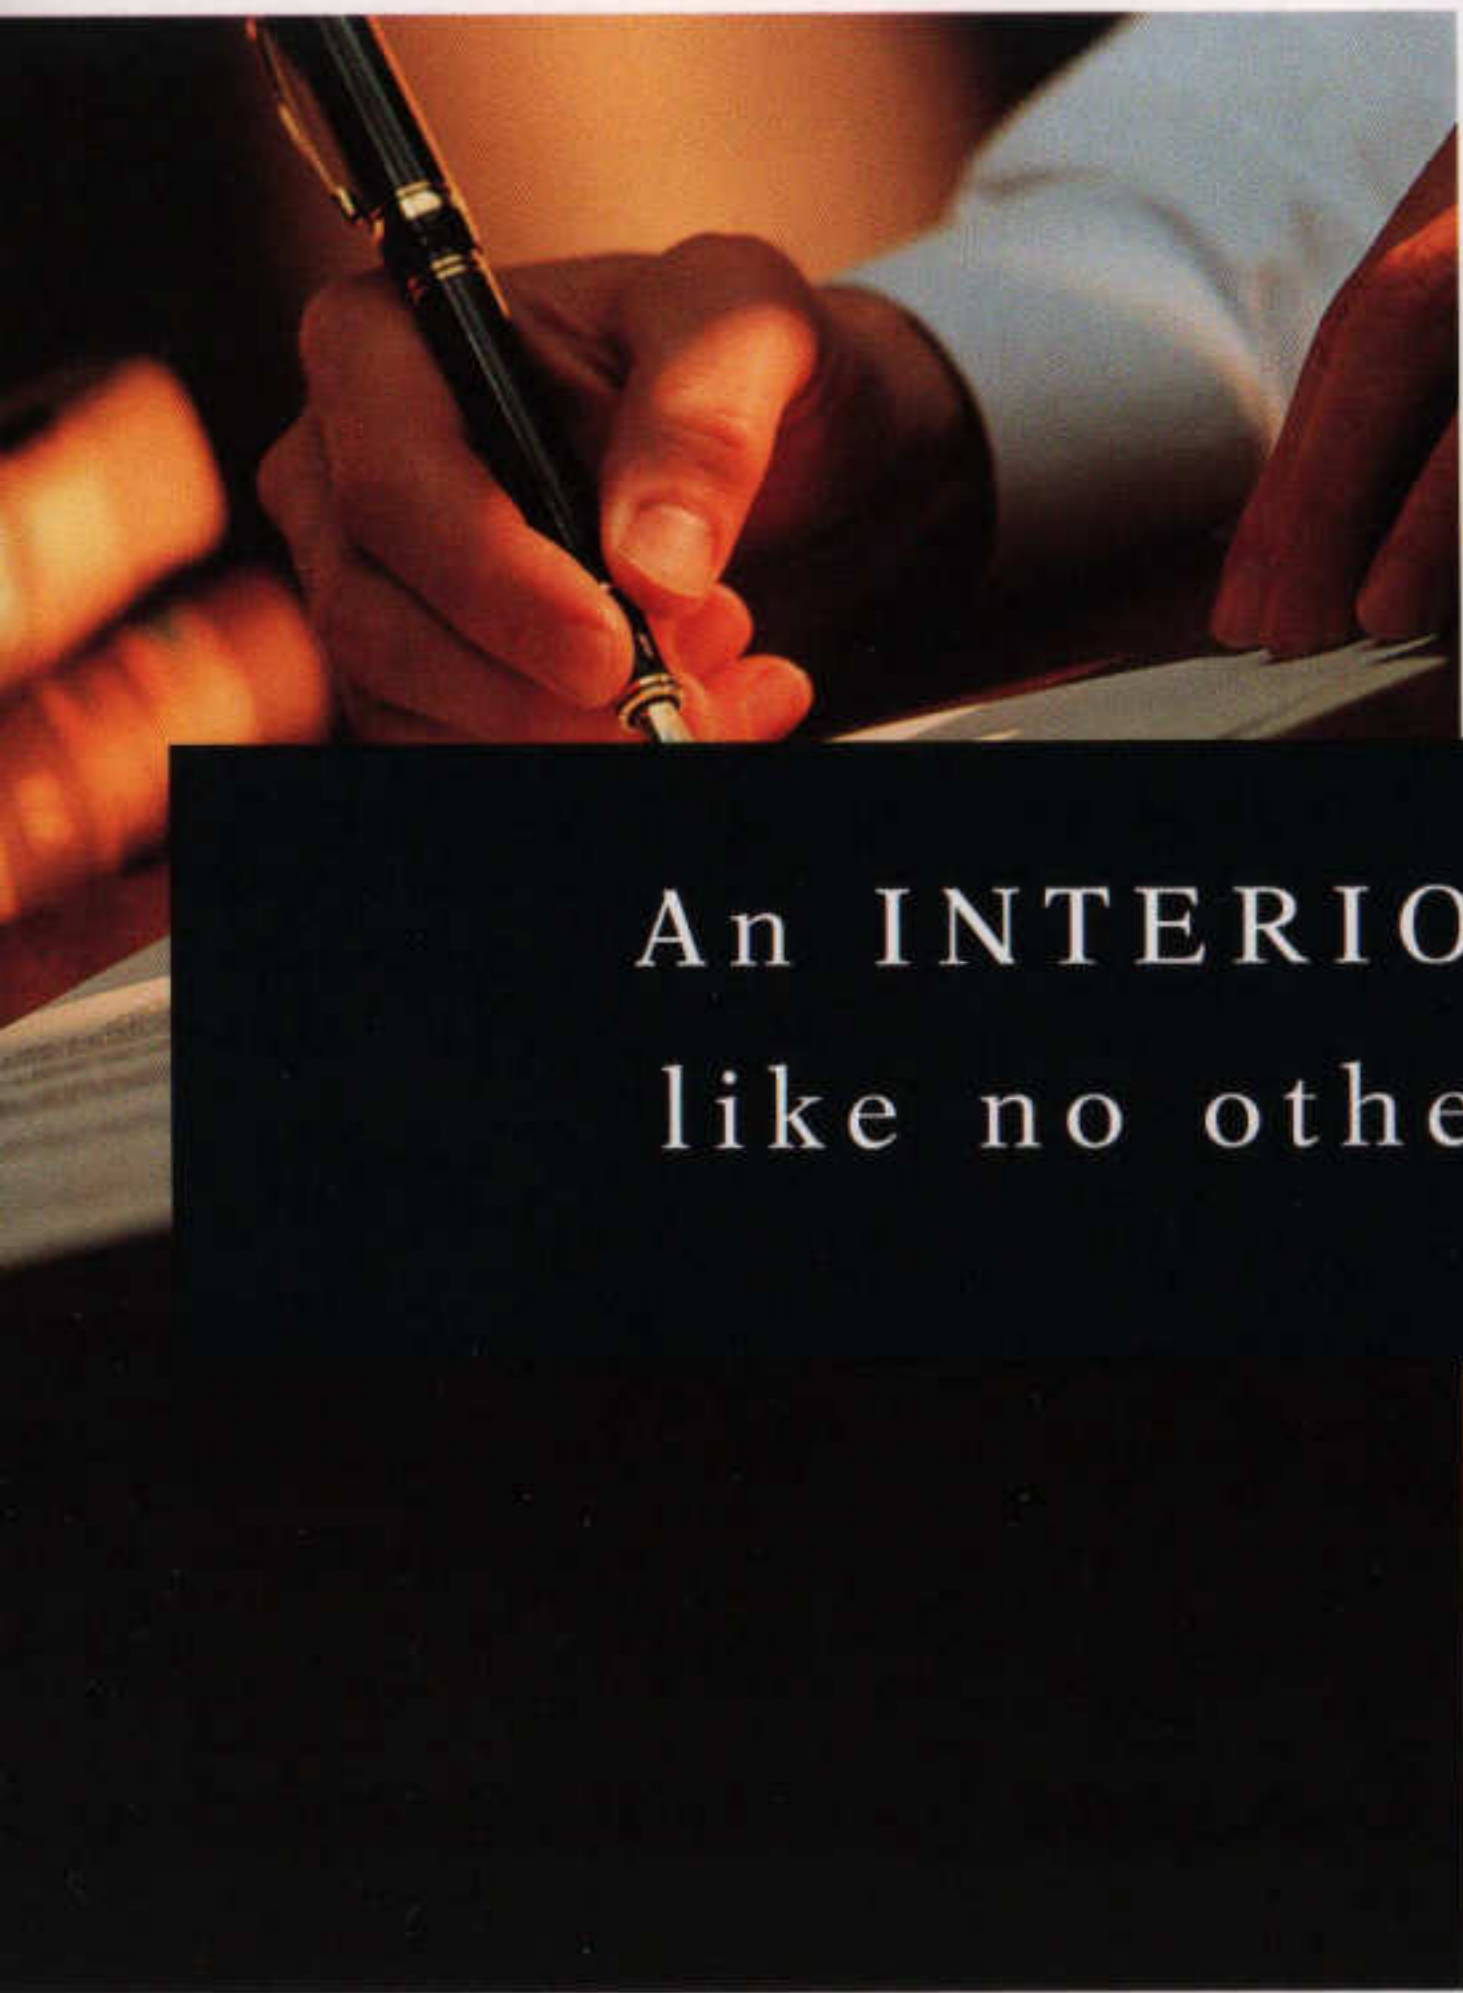

Or optionally in full Howe Leather.

The Calais is also remarkable for its range of intelligent electronic features and the personal security system all of which make your motoring safer and more enjoyable.

If you're ready to stand apart and be judged on your performance

and style, then the car for you has arrived.

The new Holden Calais.

An INTERIOR
like no other.

Whether you are driving, or riding as a passenger, you will soon realise that you are travelling in a vehicle offering unprecedented levels of comfort and convenience.

The realisation begins with the sheer interior spaciousness of Calais.

Then it is enhanced by the deep contoured seats upholstered in velour and leather (or optional full Howe Leather upholstery).

The stereo chooses between two aerials to get the best FM signal, resulting in clear reception even when driving between tall city buildings. In country areas the Calais' AM reception remains clear even over vast distances.

The body computer remembers how high you like to have the aerial to ensure it clears driveway trees or

the entrance to your office car park. The 80 watt, 8 speaker element sound system features controls mounted on the steering wheel, and a new 10 stack CD player to hold hours of listening pleasure, securely stowed in the boot.

Set the electronic climate control system for your ideal temperature and, with its front

and rear outlets it will maintain that constant level, or see what the outside temperature is at the press of a button. And of course, Calais' air conditioning uses ozone friendly R134a refrigerant. There are reading lamps front and rear, footwell lamps light your way when you enter and the list of features to ensure every drive is a

pleasure, includes cut pile carpet, tinted power windows, and more. Another feature of Calais that will be enjoyed by all who travel in it is the extremely quiet ride. This begins with the quieter running of Holden's new ECOTEC V6 engine. Interior noise levels have been reduced even further in new Calais with the introduction of a sound

reducing double thickness acrylic backing under the cut pile carpet. All while riding on the suspension system designed and continually developed by Holden to glide smoothly over Australian roads. *Enjoy superb sound from the 80 watt, 8 speaker sound system now featuring a 10 stack CD player. Create your own climate at the touch of a button with Calais' electronic climate control. Front seats have the comfort of height adjustable seat belts.*

The POWER
to be DIFFERENT.

Working powerfully under Calais' bonnet is Holden's brilliant new ECOTEC V6, 3.8 litre engine.

While the core engine retains a similar design to its predecessor, all the major components are new, including sequential fuel injection, symmetrical combustion chambers and ports, and an engine computer with double the memory and 50% more speed. As a result every measurable key area of engine performance shows significant improvement.

In the area of power and torque the ECOTEC V6 now delivers 147kW at 5,200rpm and 304Nm at 3,600rpm.

At the same time the new Calais with ECOTEC V6 registers 11.5 litres per 100km city cycle and a meagre 7.2 litres per 100km highway cycle.*

That's a 4% improvement over

the previous engine, and better economy than its nearest competitor.

Emission levels from the ECOTEC V6 are approximately 75% below the current Australian Design Rule (ADR) requirement and they already meet the stringent ADR37/01 requirement which will not apply until 1997.

ECOTEC V6 Calais is quieter,

resulting in even less engine noise in the cabin, either while idling or driving. Another way in which Holden Calais separates itself from the masses.

Our new, progressive throttle control improvements and new control routines for the electronic 4-speed automatic transmission – with power/economy control

modes – means you can control the power delivery more precisely and smoothly.

Plus there's the further option of Holden's mighty 5 litre V8 in either the 165kW or, for power simply unrivalled in its class, the high performance

185kW version.

With all this available power and the balance of its rear wheel drive design, Calais is ideal for towing heavy boats or horse floats up to 2100kg (subject to State laws).

Electronic cruise control, power windows and power exterior mirror adjustments, remote power boot release, even a light in the centre console storage compartment.

No convenience has been overlooked to make Calais an outstanding example of prestige motoring.

The Variatronic road-speed sensitive steering gives you more power assistance when parking, then adjusts for more 'road feel' at highway speeds.

CONTROLS for
the THINKING driver.

Steering is made even more comfortable by the leather-bound steering wheel with height and reach adjustment.

Your steering wheel features convenient volume and station selection buttons for the sound system and a mute button so there's no need to look away from the road if you have a phone ringing.

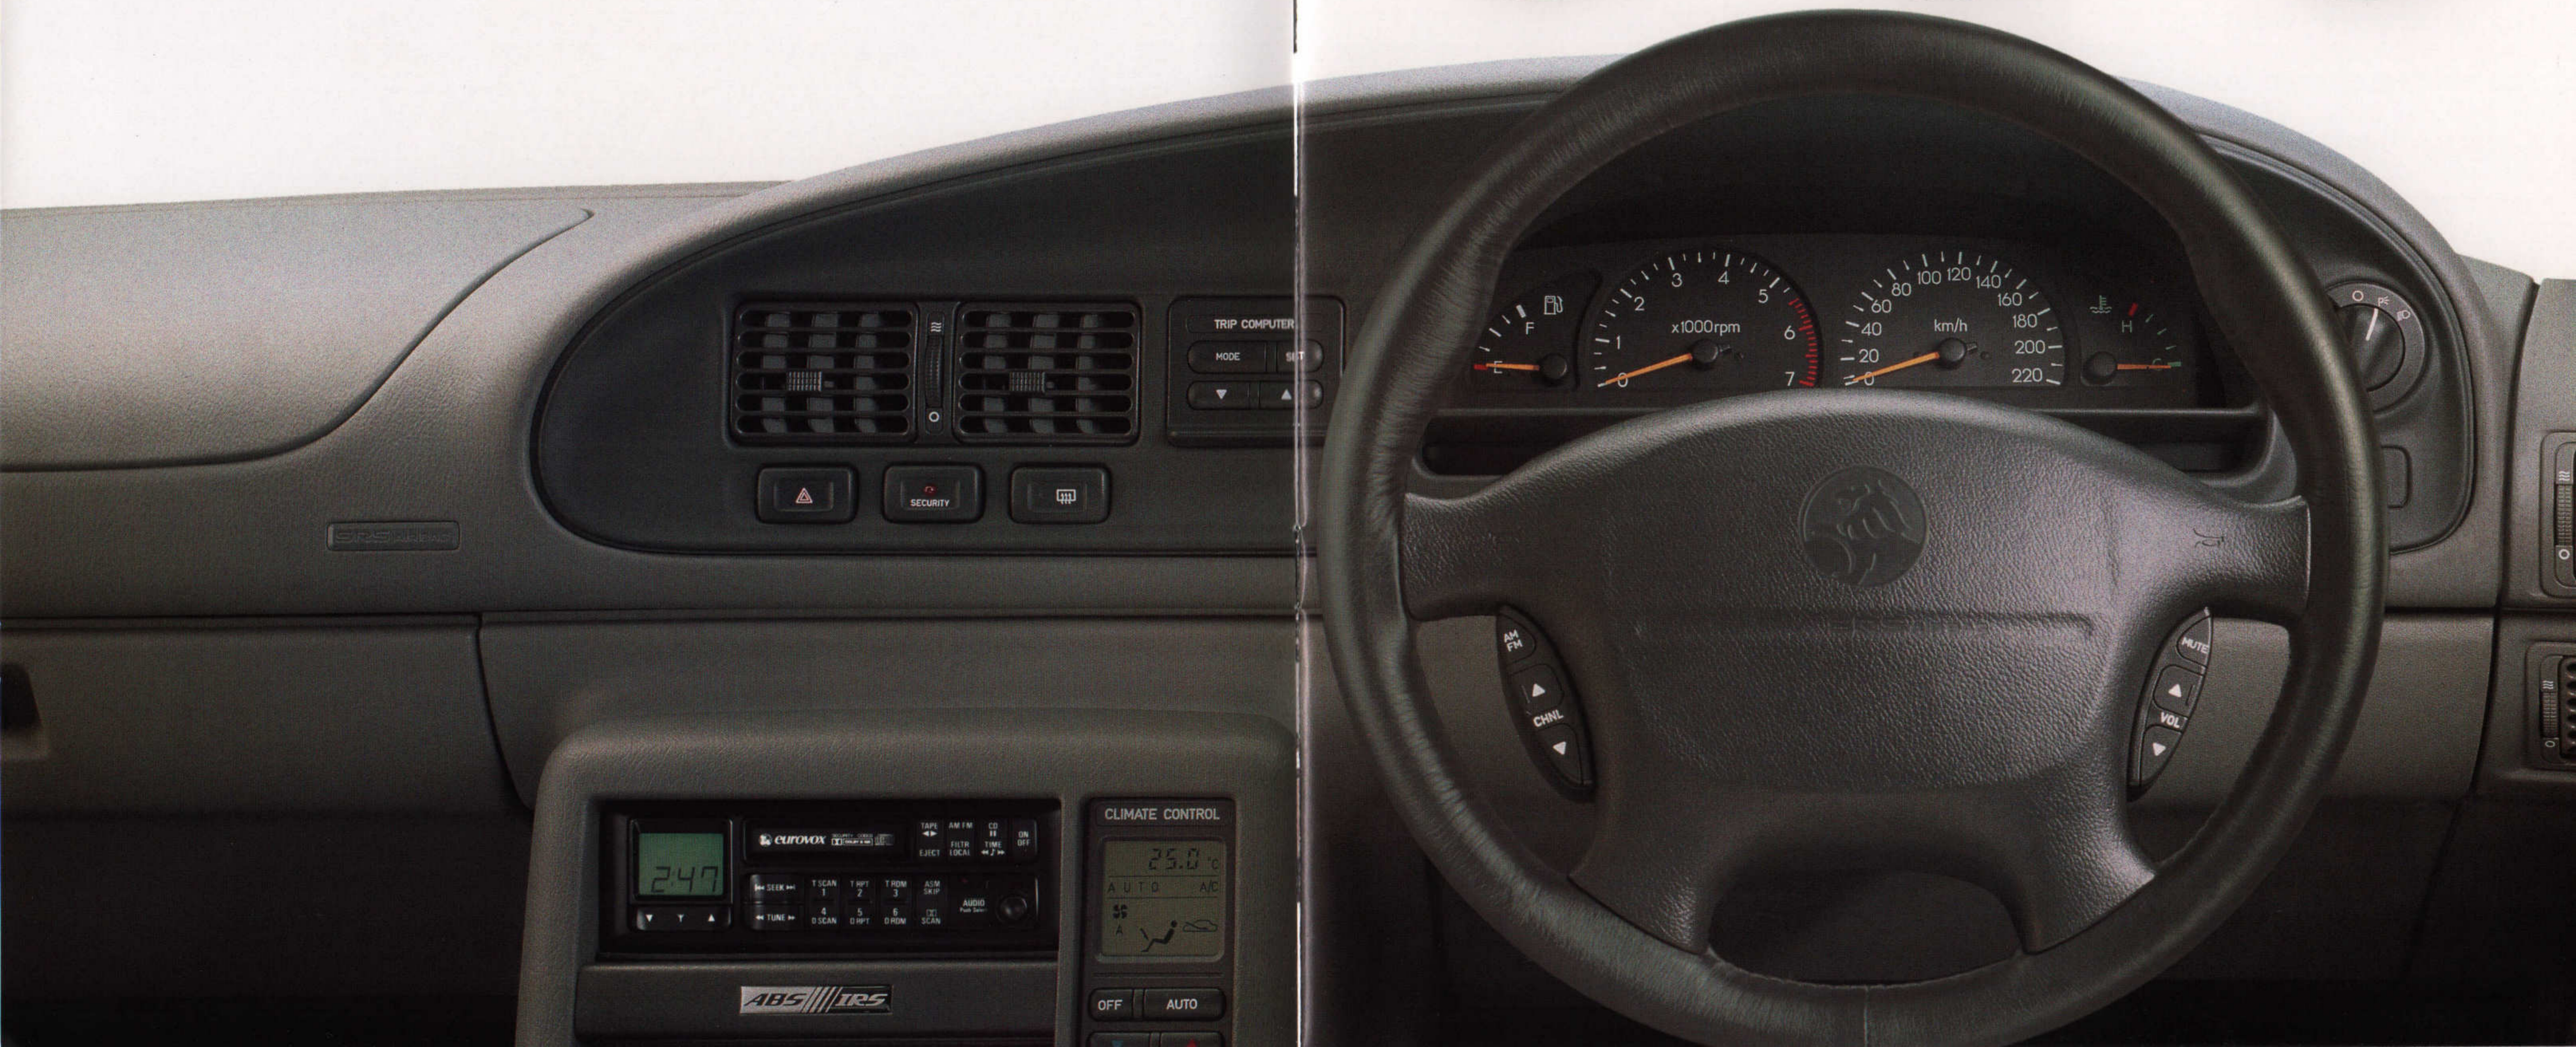

To simplify having your

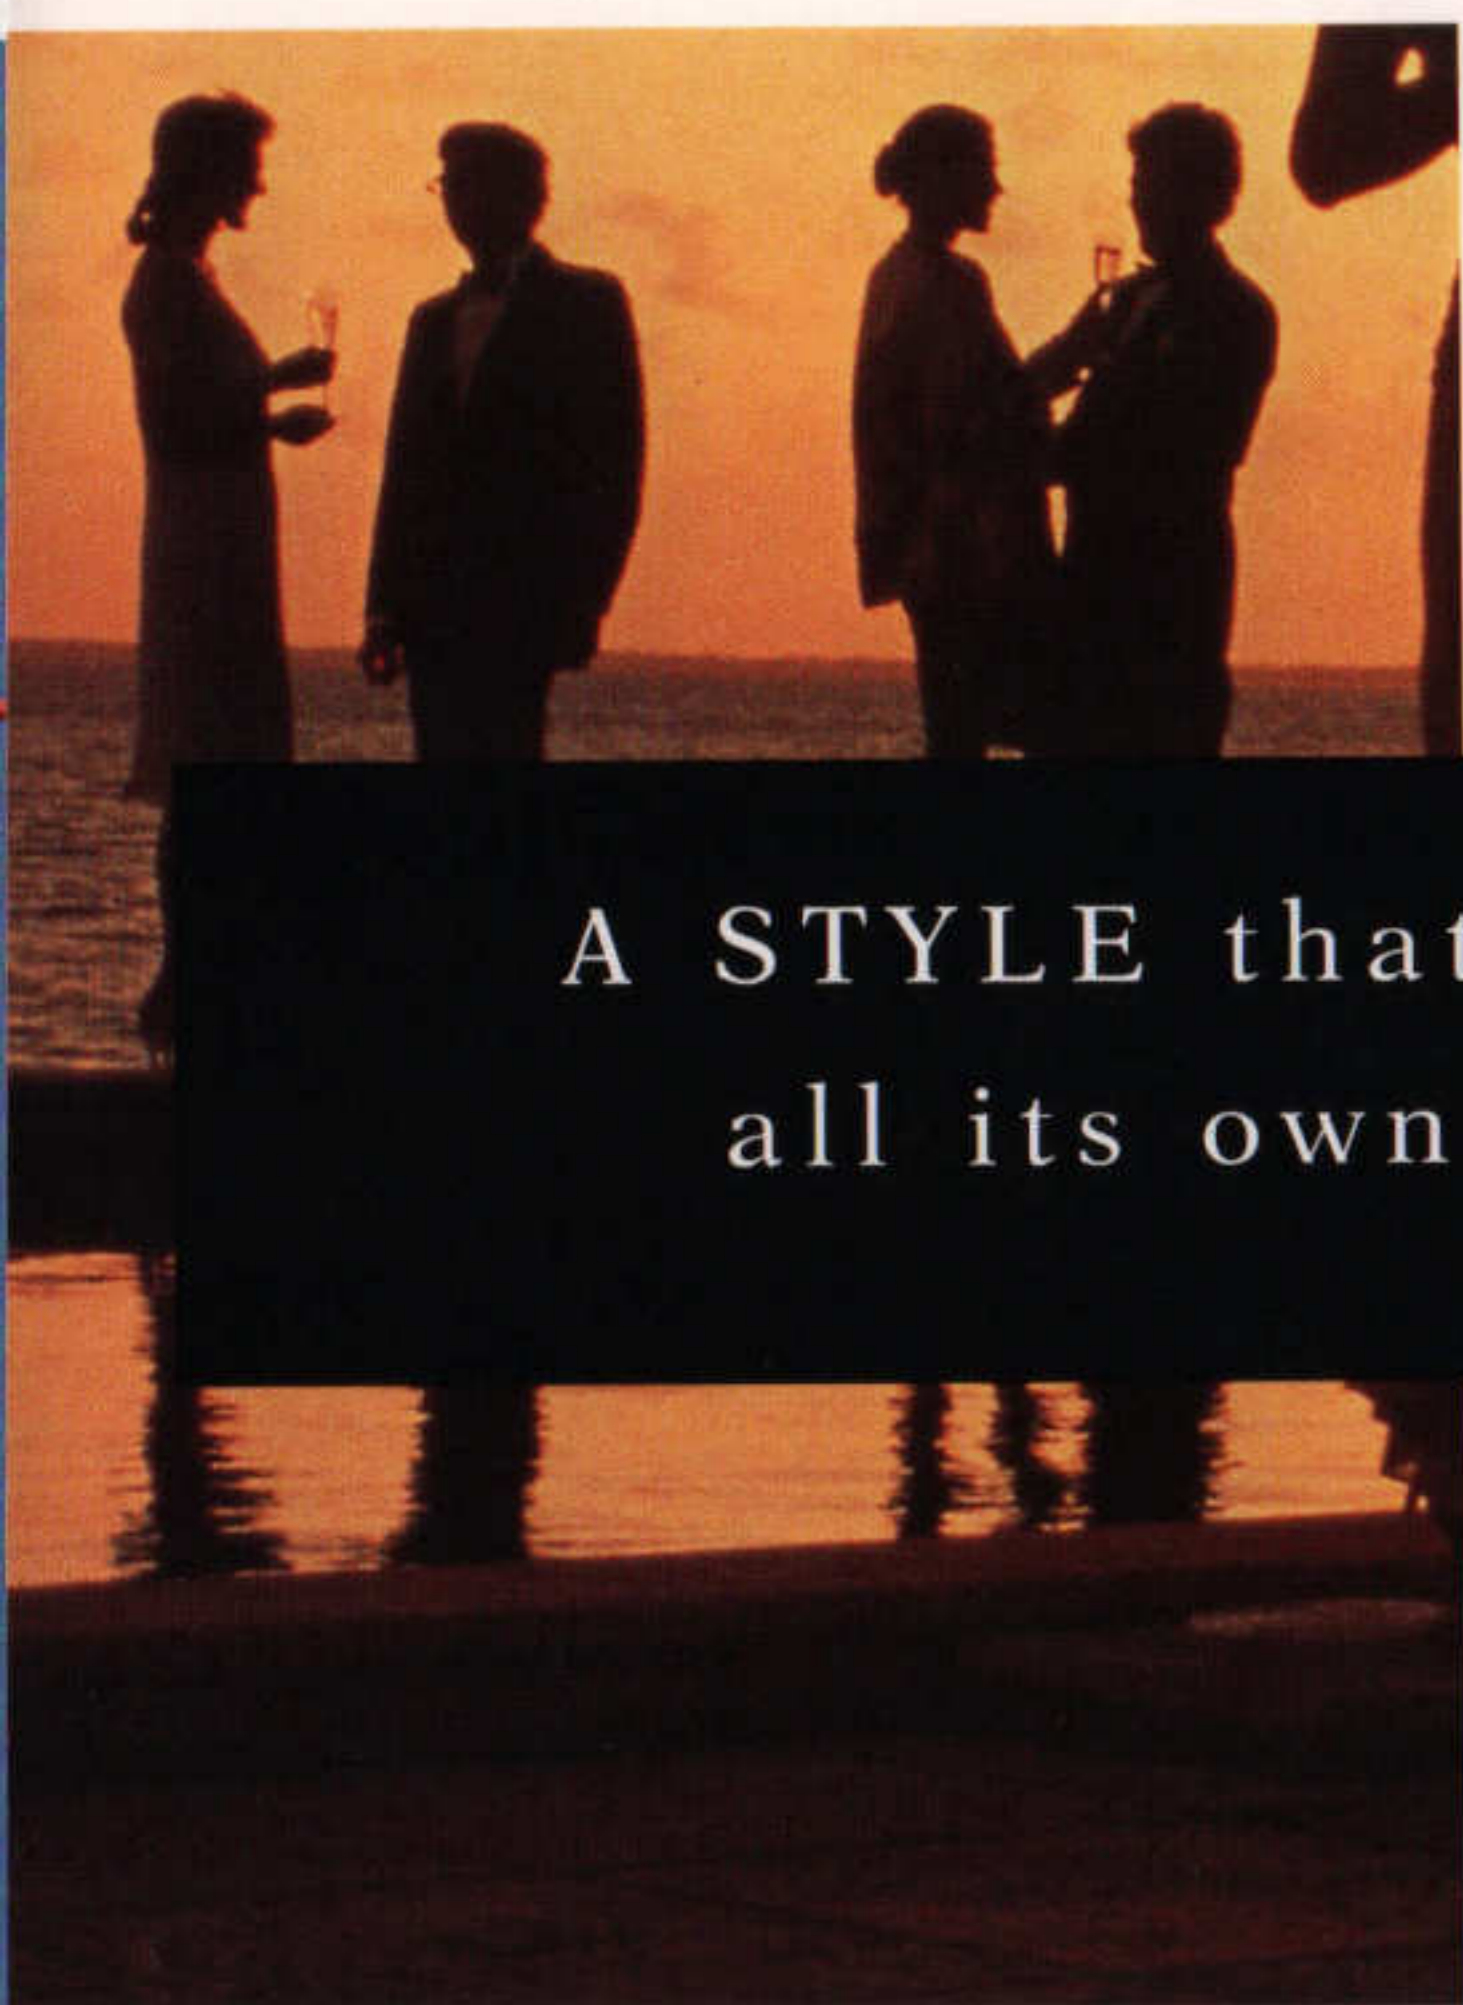

mobile phone installed in your new Calais, a built-in power socket is provided.

The body computer provides intelligent help. Sensing road speed, it will decide, for example, how fast to set the intermittent operation of windscreen wipers, while the nine function trip computer will provide information including average speed, fuel economy,

time to arrival and the distance before you will need to refuel. And Calais' cruise control, operated by the fingertip stalk control, allows you to relax more on long drives and safely maintain your speed within legal limits.

It all adds up to a driving experience that will be appreciated by people who like to remain in total control.

A STYLE that is
all its own.

In the deep lustre of the paintwork you'll see an example of how Calais reflects both the strength of its Australian heritage.

And the elegance of Holden Calais' European-inspired style.

The deep high gloss enamel two tone finish is the equal of many of the world's finest luxury cars.

Yet it has been developed by Holden to weather Australia's harshest conditions.

The polyester basecoat and acrylic clearcoat make the Calais glisten in a range of superb metallic colours, complemented by the luxurious texture of the velour and leather trim.

But the beautiful finish and the sleek lines of the Calais gracefully conceal the practical advantages it offers as a luxury sedan.

Ideal for a big, diverse country.

The luggage carrying space is a massive 443 litres of carpet-lined boot space.

So large, especially tall items are accommodated easily.

This space is complemented by the fold down centre hatch in the rear seatback which allows you

to carry longer objects, such as skis, within the security of the interior.

The central location of the hatch allows two rear passengers to each retain a window-seat.

Another example is the comfort and safety of the seat belt system.

Front seats have the comfort and protection of height adjustable

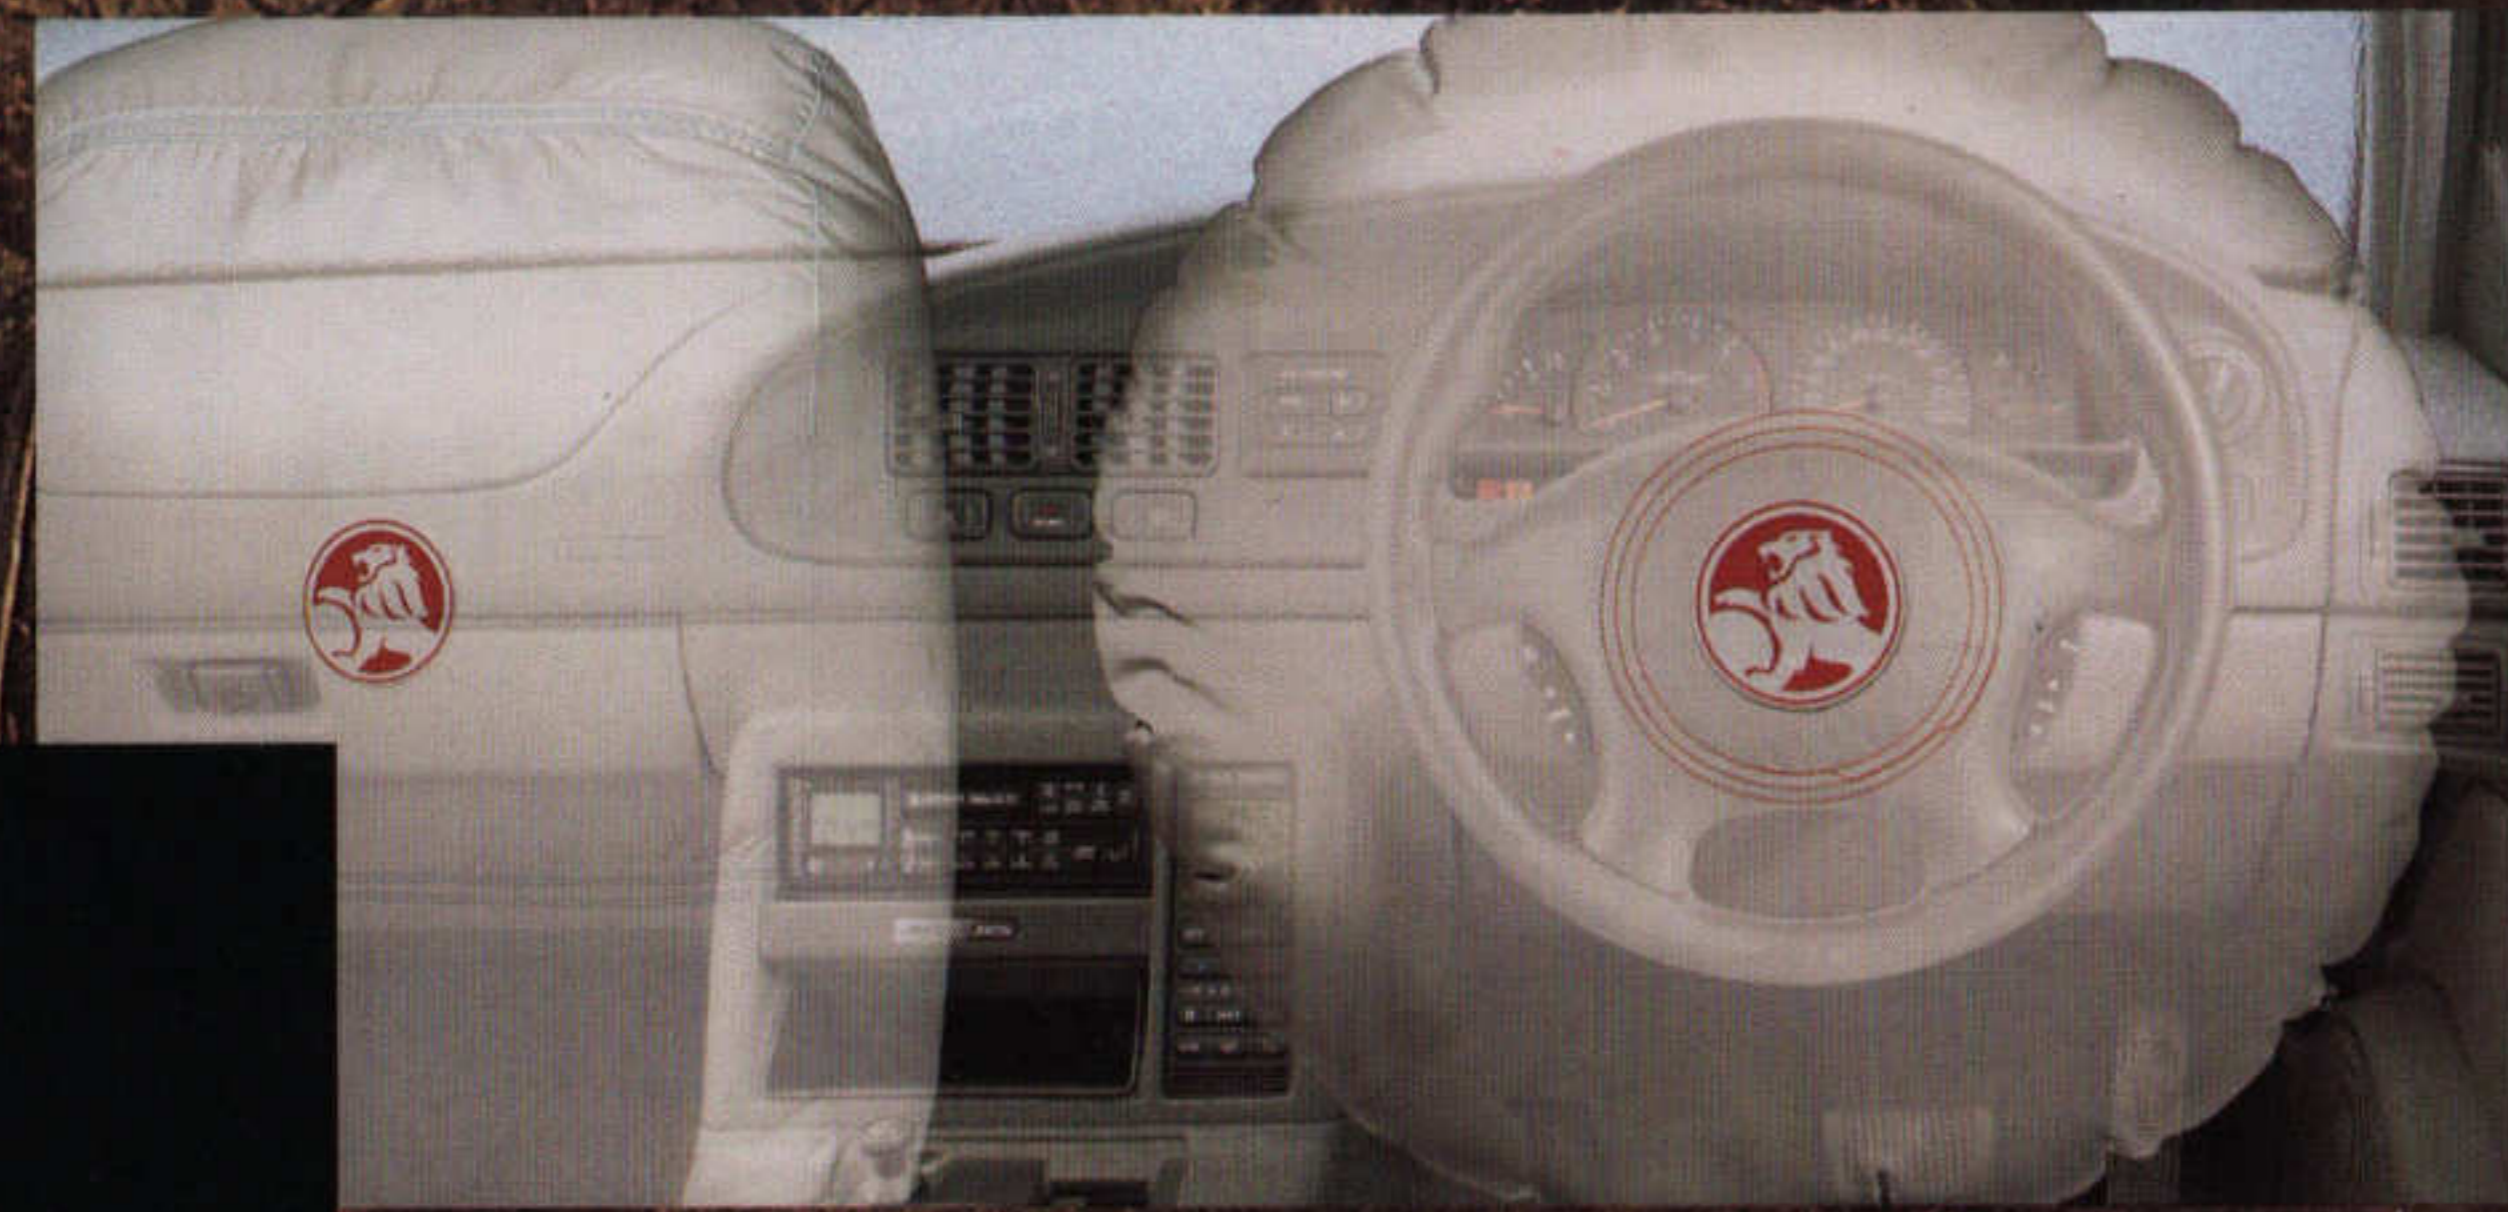

lap/sash seat belts, while the centre rear seat passenger has a retractable lap/sash seat belt.

Additionally, the front seats have seat belt webbing clamps to assist in holding you more securely in the event of an accident.

Everywhere you look, Holden Calais exemplifies the rule that style and function are inseparable.

A Total SAFETY System.

Calais, with Holden's Total Safety Systems (TSS) technology, is remarkable both for its ability to avoid accidents (primary safety) and for its accident protection features (secondary safety).

Superb road-speed sensitive Variatronic power steering and the wide track front suspension give reassuring stability, especially over uneven surfaces.

Independent Rear Suspension, a standard feature of successful imported luxury cars for many years, has been developed for Australian conditions to provide greater driver control and comfort.

Calais has the latest Bosch 5.0 Anti-lock Braking System which automatically prevents the wheels from skidding, assisting the driver to maintain steering and braking control, even under full braking.

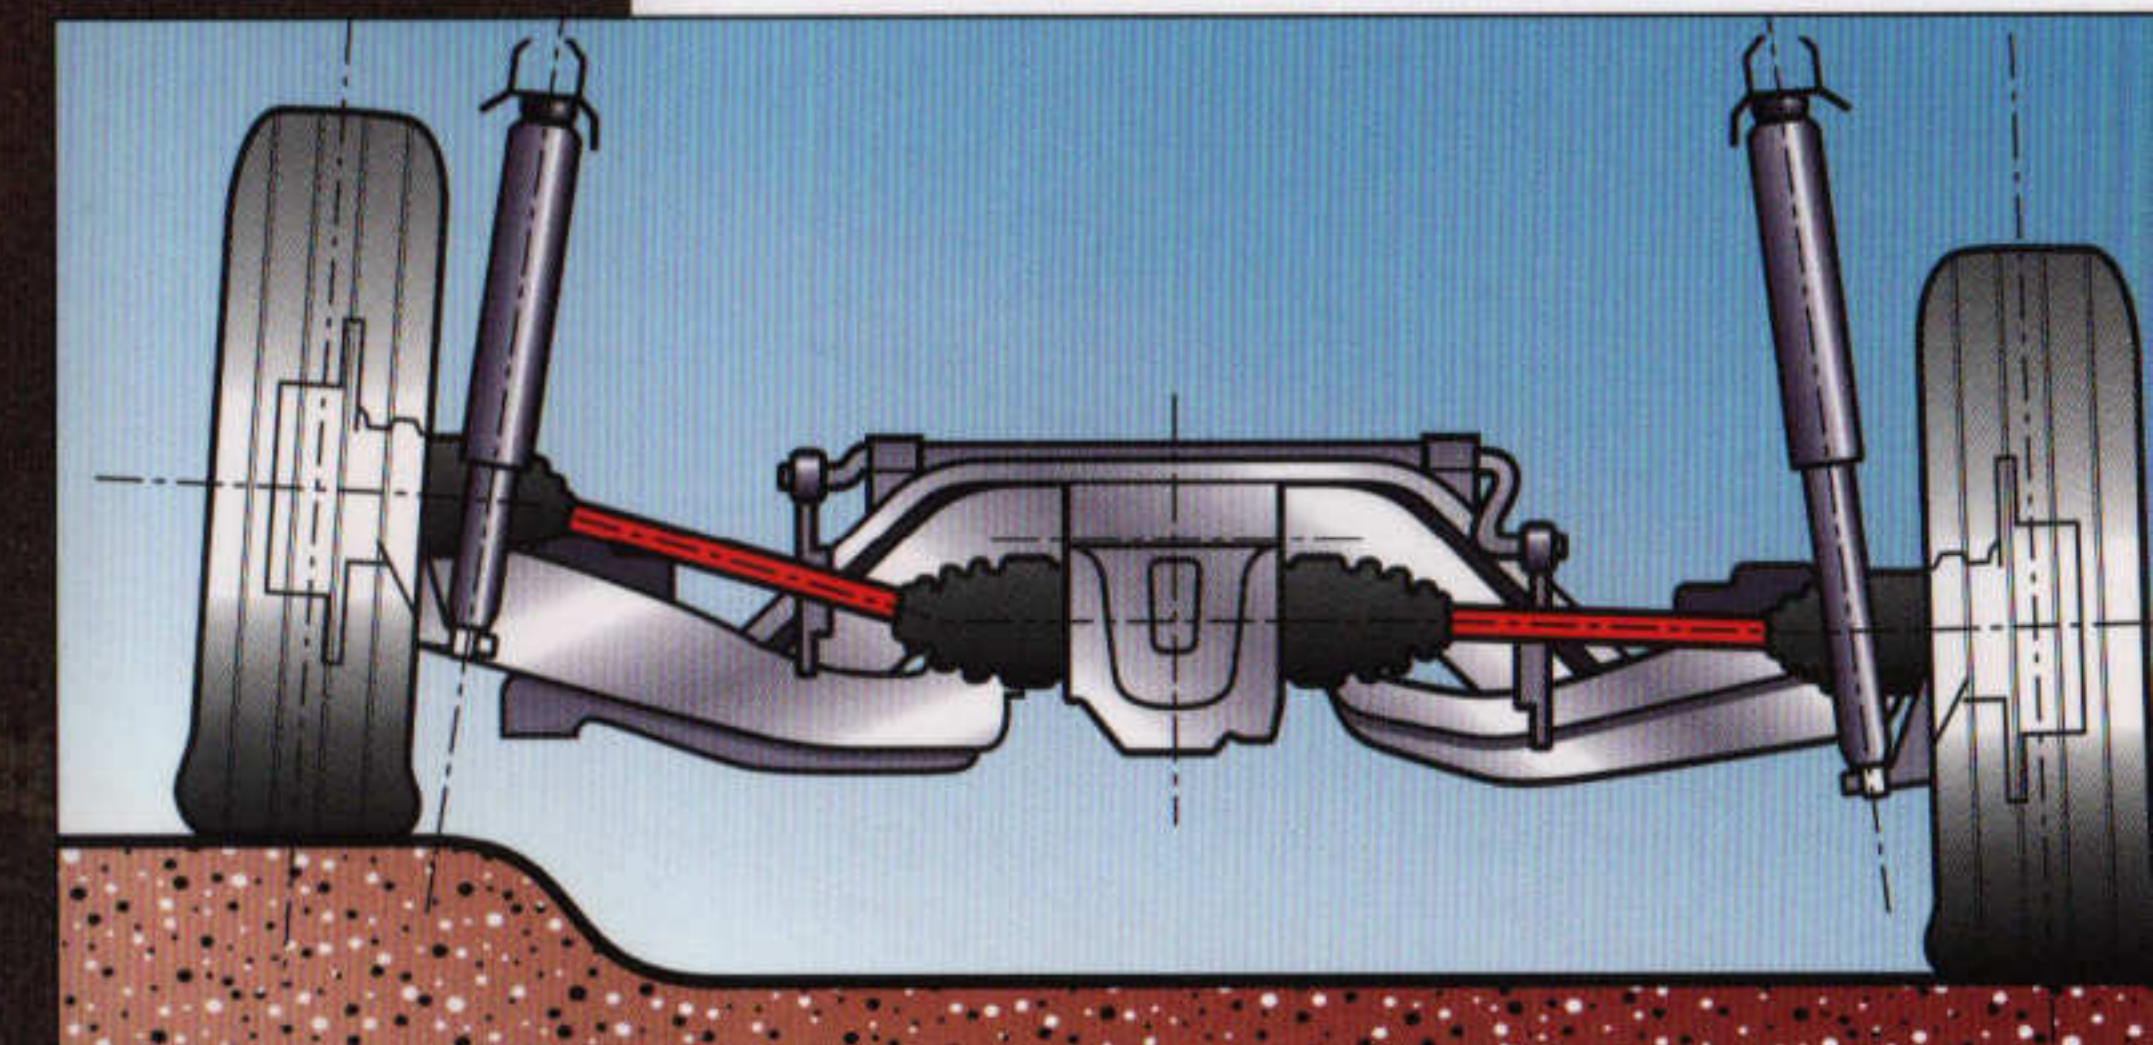

Now Calais has added a passenger airbag to its Supplemental Restraint System (SRS) to help protect both driver and passenger in the event of a frontal collision. The Calais includes collision sensing technology in its control module - technology shared only with Mercedes Benz - to ensure that the protection of the airbags is there if you need it.

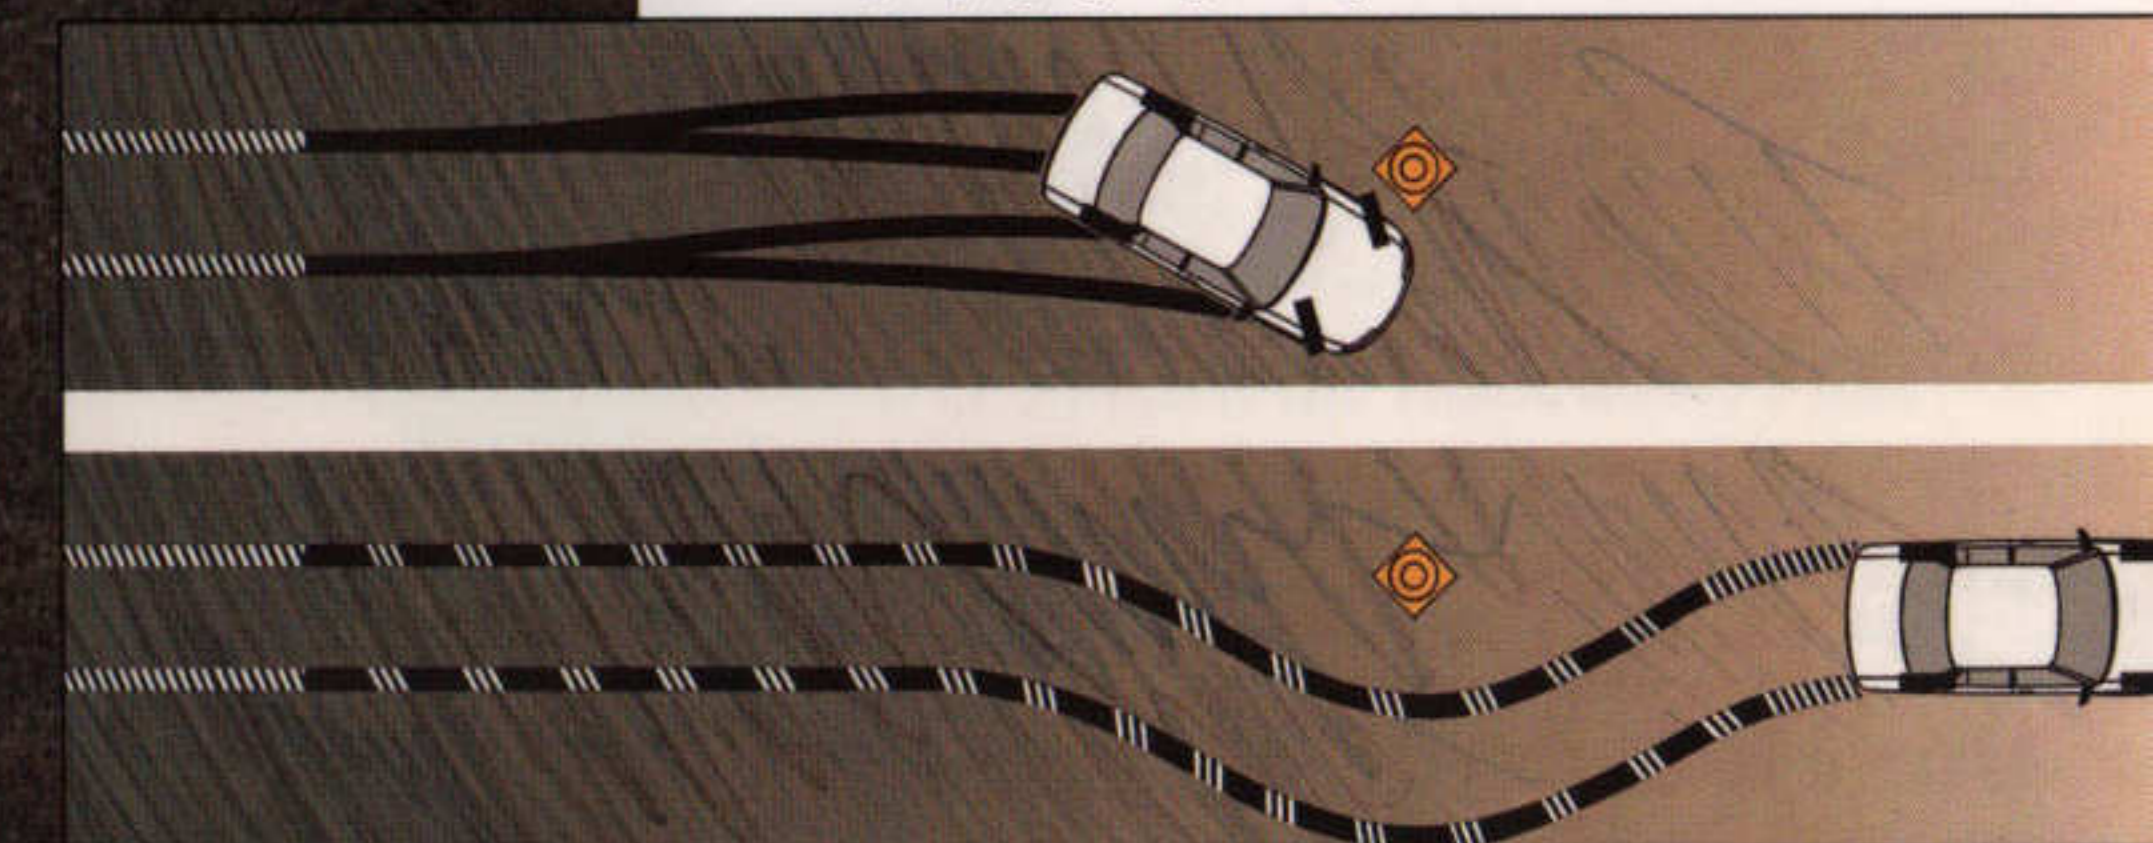

A unique Holden developed fold pattern and tether design expands the airbag with a flatter surface, creating a safer cushion. Calais is the only Australian luxury car in the category to offer this feature.

Calais' rigid body was tuned by computer analysis, with reinforcements added to create the passenger safety cell and strong intrusion beams in each door for side impact protection.

Every aspect of Calais, from the powertrain to the suspension, has been designed and built for strength. Then proven at Holden's Lang Lang test facility, one of the world's most comprehensive test facilities, which includes Australia's best equipped safety test laboratory.

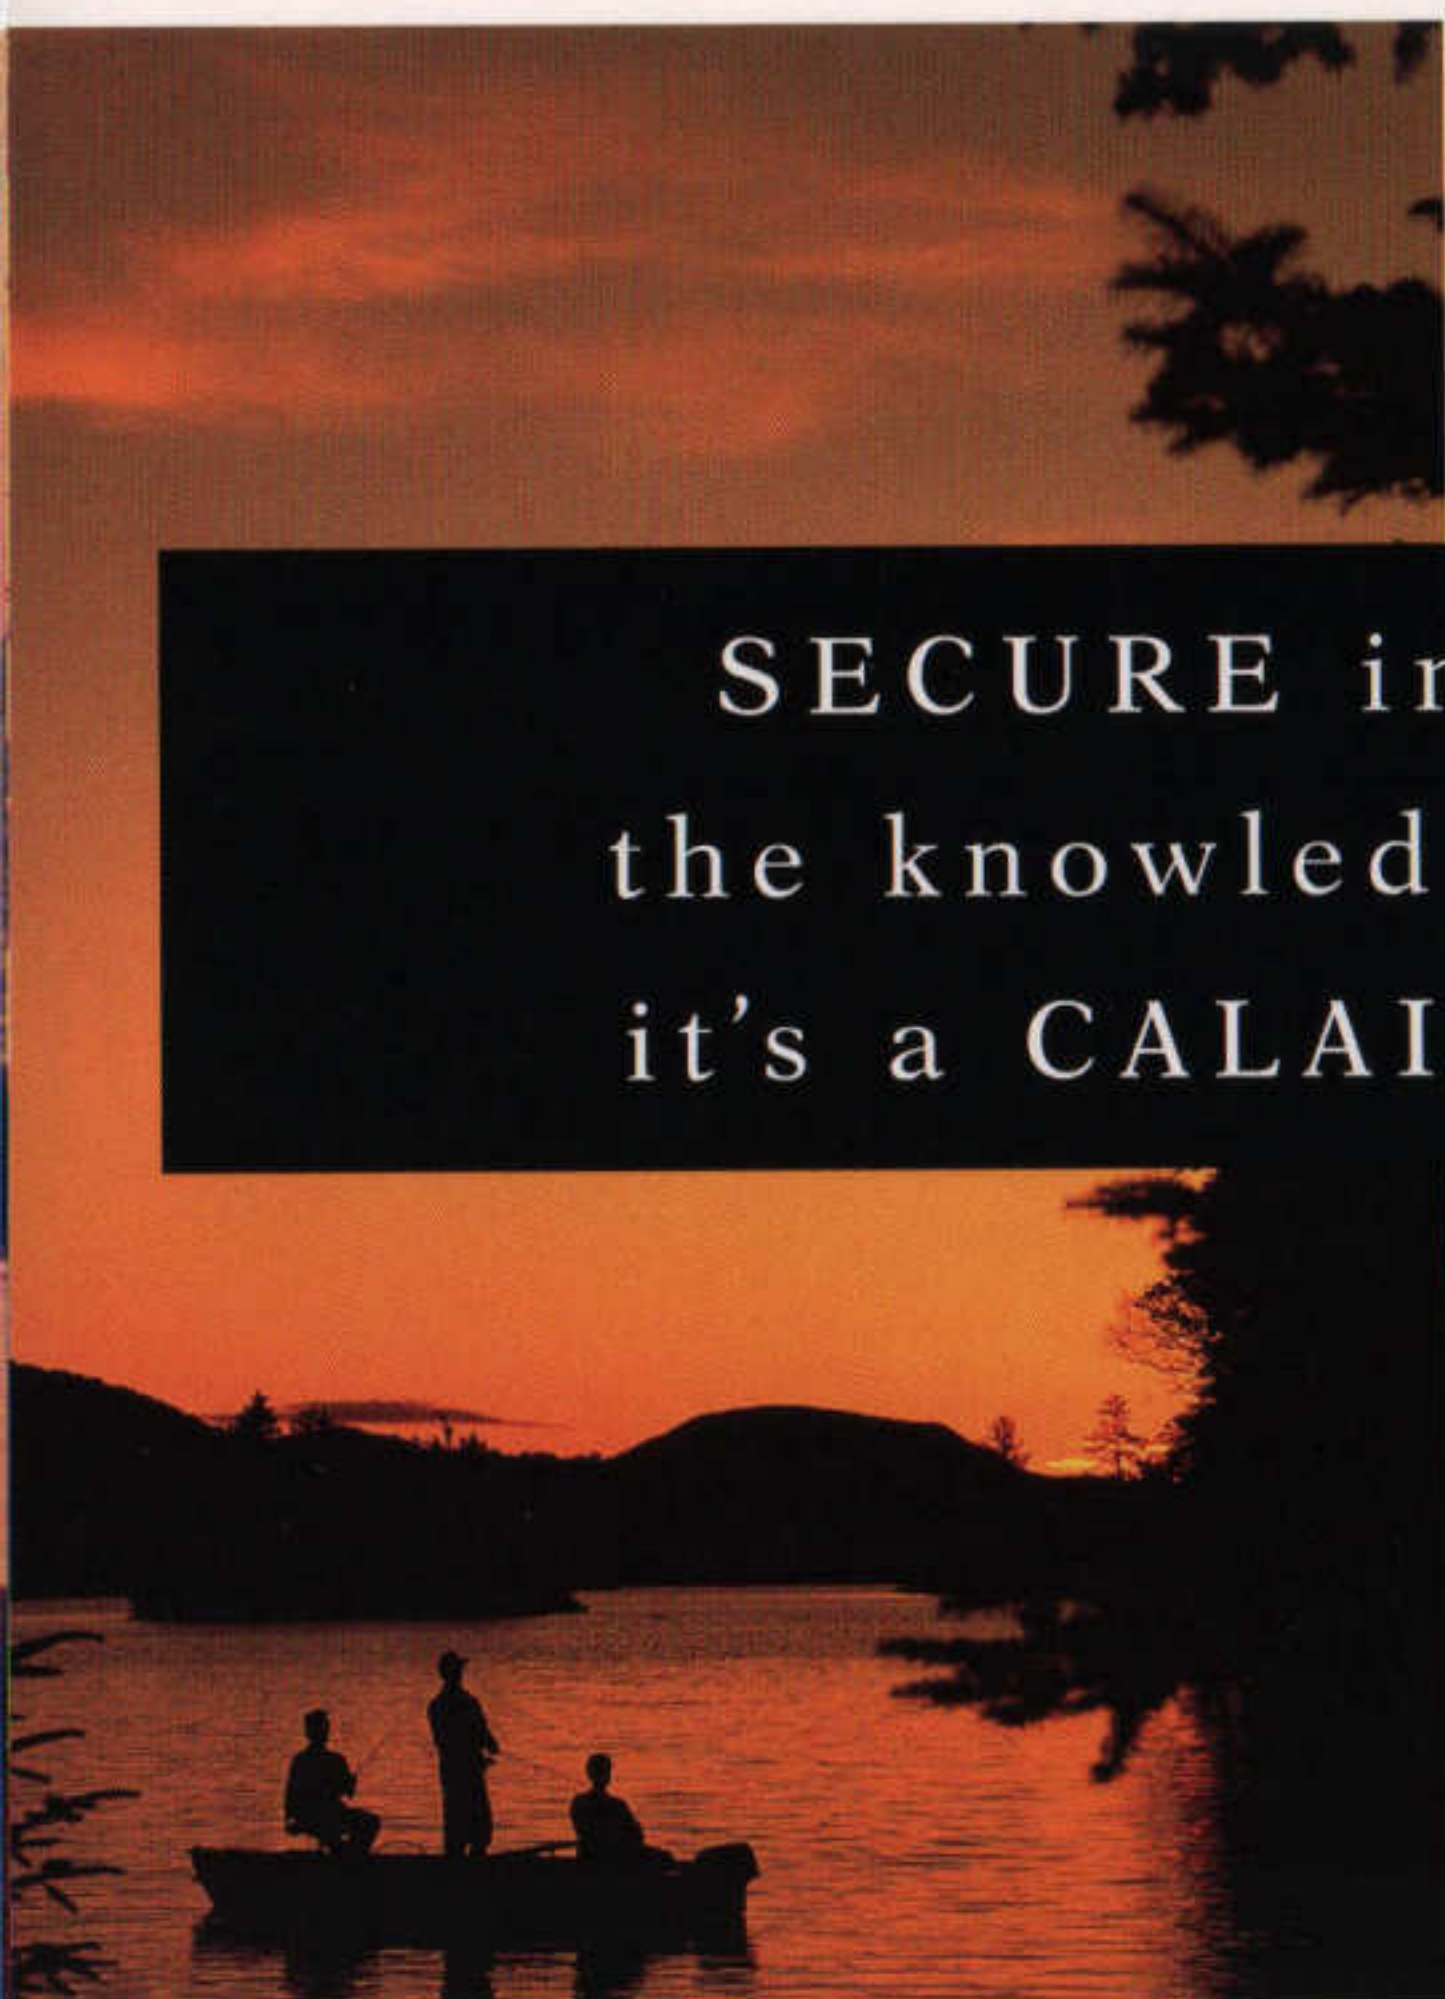

Holden has dedicated much engineering expertise to installing Independent Rear Suspension as an integral feature of their secondary safety platform. A system which offers another realm of safety by improving control and traction.

Anti-lock Braking (ABS) assists the driver (bottom track) in an emergency situation by maintaining steering control, even under full braking.

SECURE in
the knowledge
it's a CALAIS.

Both your personal security and your Calais' security are protected by a host of remarkable features.

Calais' slim, new, encoded Power Key provides convenient entry and controls the engine disabler of one of Australia's safest security systems.

Your Calais' body computer constantly changes the electronic lock codes.

Even if a thief does break in, the vehicle is rendered undrivable if an attempt is made to force the steering lock.

All doors can be securely deadlocked, while Calais has the additional protection of an alarm system.

Separate buttons on the Power Key control lock and unlock

functions for added confidence and reassurance.

So if you are leaving your vehicle in a hurry and quickly press the 'lock' button, there's no doubt that the command was to lock the car. And the indicators will blink acknowledgement of this command only if all doors are securely closed.

On your return, you can now

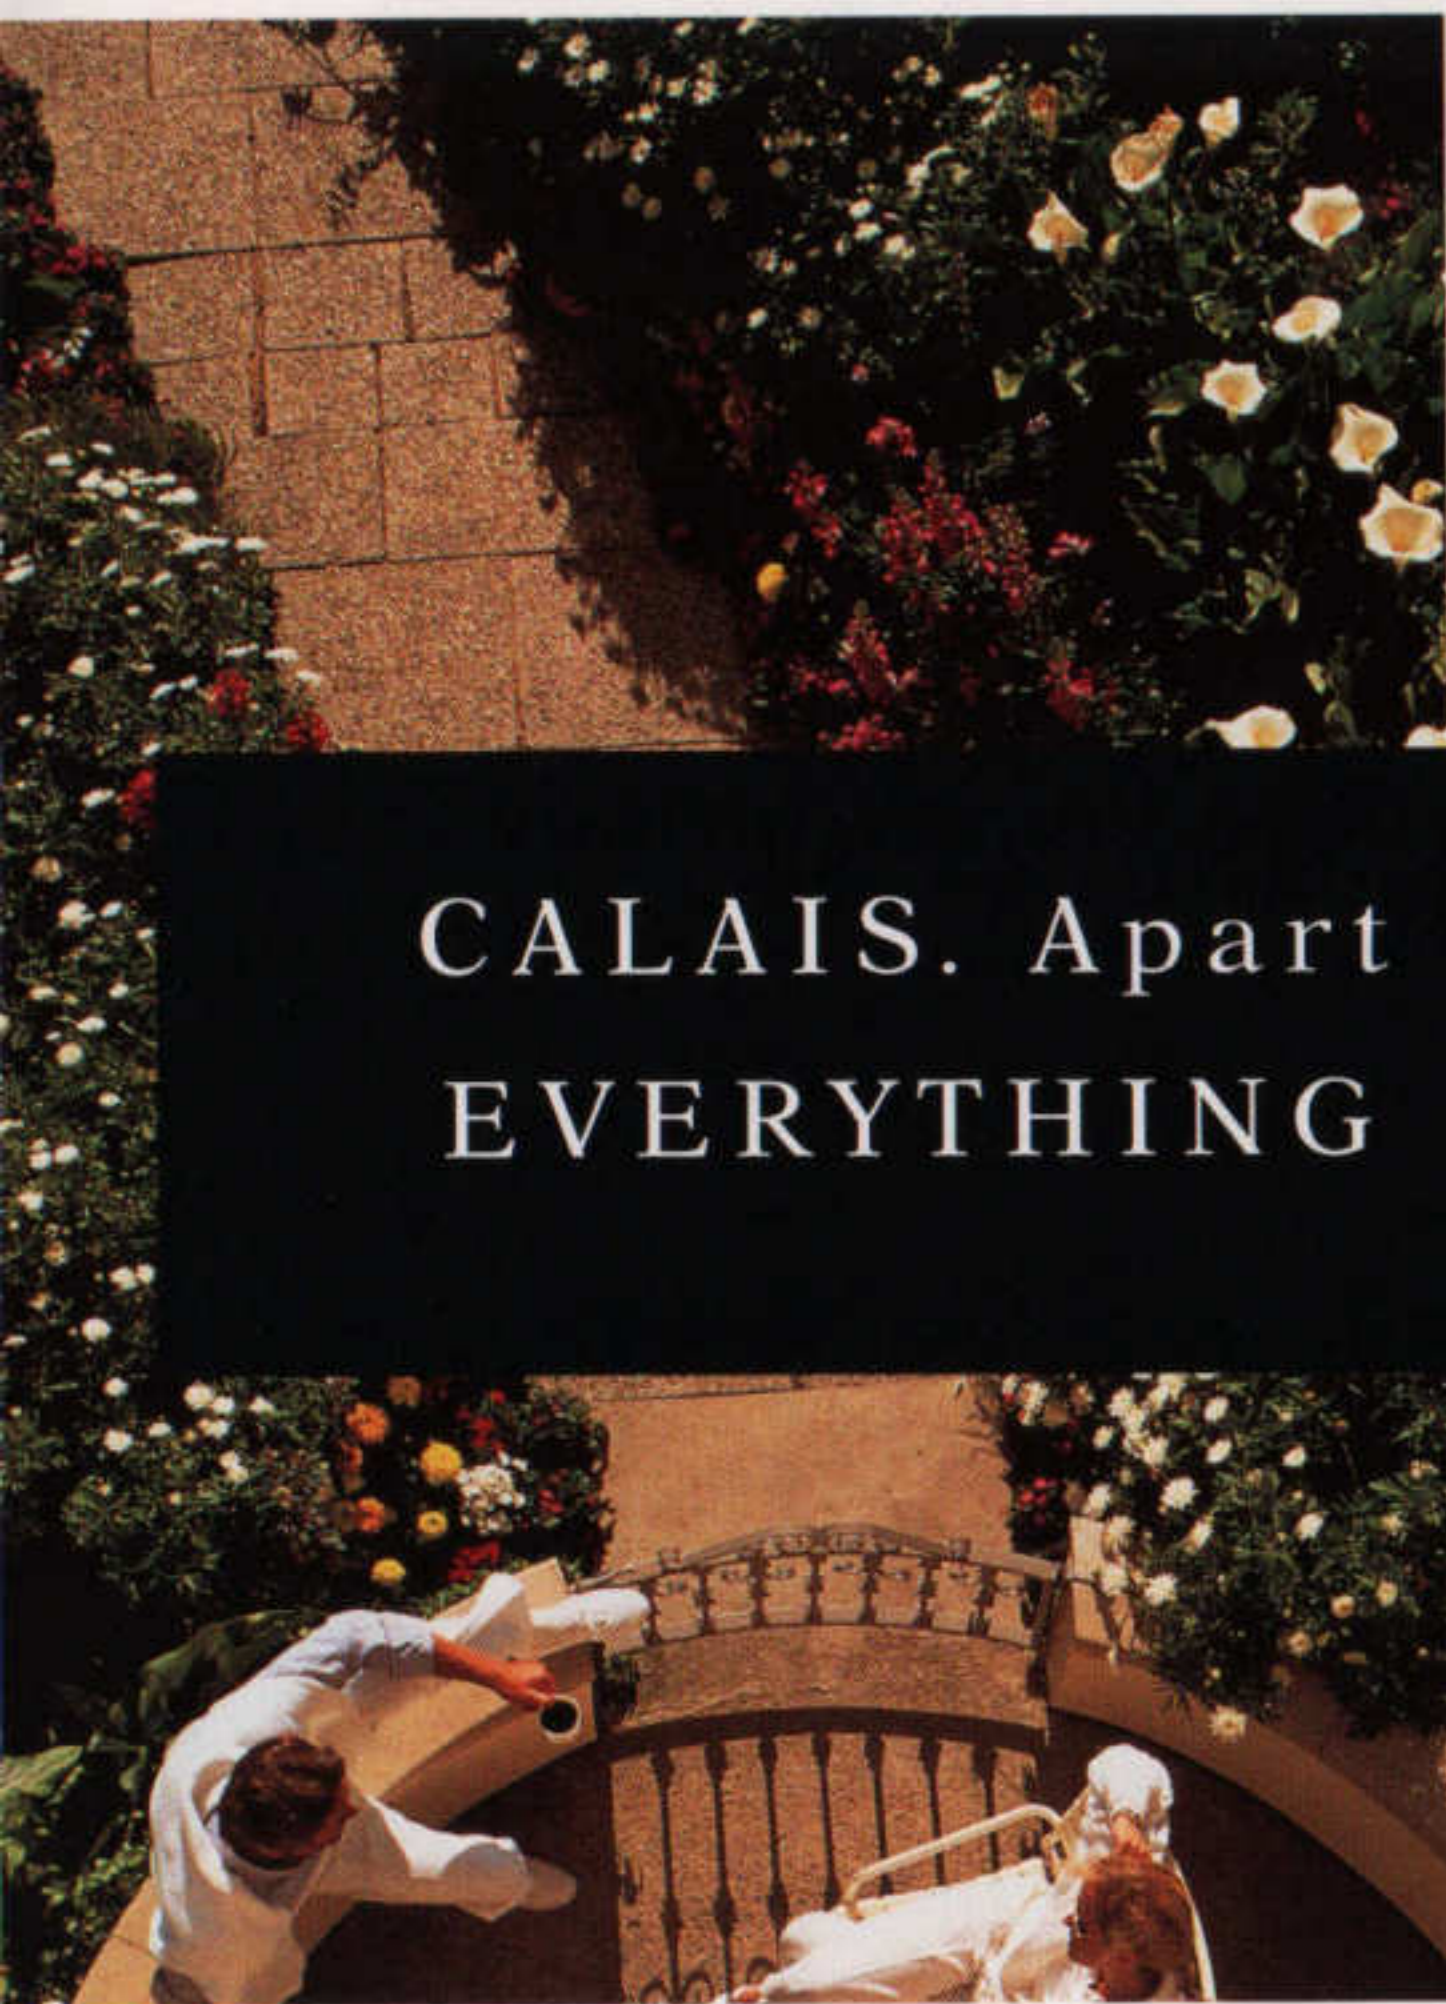

remotely unlock the driver's door only. So if you're parked in a public area you can get into your car without being exposed to the dangers of intruders getting in the other doors.

Even the boot can be opened separately, using the remote Power Key, as you approach with luggage.

There are other personal security features as well. You can

programme the headlights to stay on for a specific timed period after you lock up the vehicle, so if you park in your driveway at night, they'll stay on until you've opened the front door. Plus, with this system, you should never again accidentally leave your lights on and come back to a flat battery.

The new Holden Calais – security and safety that stand apart from the crowd.

CALAIS. Apart from EVERYTHING else.

Apart from the reasons we've begun to explain in this brochure, there's another logical argument for choosing the new Calais.

That is, apart from the new ECOTEC V6 engine, the new levels of safety and security, and the superior ride and handling characteristics.

Apart from head-turning style that ensures Calais commands attention wherever it travels.

And apart from luxurious appointments which make even a brief ride in Calais an absolute pleasure.

Because above all else, Calais is a Holden. And no manufacturer of imported cars can begin to understand what it takes to produce a true luxury car that will perform under Australian conditions.

Nor can any other manufacturer offer the unrivalled network of experienced Holden Dealers and Holdenwise Roadside Service Ultra, 24 hours a day, 365 days a year.

Now it's up to you to decide. Talk to your Holden Dealer about driving the new Holden Calais.

You'll be taking the first step towards a real difference in your motoring. A difference that will stand you apart.

- Nine function trip computer.*
- Climate Control heating & air conditioning system.*
- Cruise control.*
- Sound system controls on steering wheel.*
- 10 Stack CD player.*
- Four spoke leather wrap steering wheel.*
- Variatronic speed sensitive power steering.*
- Road speed sensitive intermittent windscreen wiper speed.*
- Automatic radio antenna with "preferred height" memory.*
- Airbags for both driver and passenger.*
- Eight speaker, 80 watt sound system.*

Holden Calais is equipped with standard features to rival expensive European imports.

- Distinctive appearance with unique grille, stylish alloy wheels and two tone paintwork. Calais stands apart.*
- Remote door and boot unlocking.*
- Four power windows with comprehensive warning system including parking brake on, speed warning, low fuel and rear lamp failure.*
- Headlamps auto off with programmable time delay.*

The distinctive styling of the Holden Calais stands apart from the run-of-the-mill Australian luxury car.

- Velour & leather trim.*
- Height adjustable front seatbelts.*
- Optional full leather trim.*
- Intelligent security system with alarm, deadlocking and various other features.*
- Retracting rear centre lap/sash seatbelt.*
- Childproof rear door locks and override facility on rear power windows.*
- Comprehensive lamps including front and rear reading lamps, footwell lighting and courtesy lamps on doors.*
- Distinctive door trim with leather hide and woodgrain appearance feature.*

Driver and passengers soon appreciate the unprecedented levels of interior comfort in the new Holden Calais.

- Anti-lock Braking System (ABS).*
- Independent Rear Suspension (IRS).*
- Sequential fuel injection.*
- New ECOTEC V6 engine.*
- Electronic fault memory and service diagnosis.*
- Comprehensive warranty package including bycam/3 Year 100,000km Powertrain Warranty.*
- Comprehensive towing packages up to 2100kg (subject to State Laws.)*
- 24 hour Roadside Service Ultra.*

Holden's brilliant new ECOTEC V6 engine reverses the power/economy trade off, delivering more power and better fuel economy than ever before.

CALAIS. The privilege of OWNERSHIP.

SMART FINANCE. Among Calais' many luxuries is a very smart one.

The luxury of choice with finance as well.

Now you can choose smart, factory-backed finance that can be tailored exactly to your needs.

For example, Holden's SMARTDRIVE Lease Plan from General Motors Acceptance Corporation A.R.B.N. 007 480 382 offers approved buyers a smart way to save money.

With SMARTDRIVE you only pay for the years that you drive your new Calais, instead of being obliged to pay for the whole vehicle.

There's no deposit, payments are less during the term and a maintenance option is available.

Ownership remains with GMAC at all times. When you

return your Calais to your Holden Dealer at the end of the lease term you have no obligations, other than excess charges that may apply.

With SMARTBUY, approved buyers can enjoy flexible payment terms tailored to meet your needs. At the end of your SMARTBUY contract you have three choices.

You can pay out your final balloon payment, re-finance this amount (subject to credit approval at the time and the current terms and conditions) or simply return your Calais to GMAC, via your Holden Dealer, with a disposal fee of \$350, plus excess charges which may apply. Your Holden Dealer has all the details.

A word about accessories.

Few other Australian built cars say as much about you as the new Holden Calais.

It says you have style, a concern for safer motoring and a desire for real space and comfort.

But if you really want to stamp your personality on a new Calais, there's also a great range of Holden approved accessories, designed just for you. No matter what accessories you choose, they will reflect your individual flair, and driving needs.

Each accessory has been

designed to complement your new Calais and is engineered by Holden to meet the necessary Australian Design Rule standards.

And, of course, Holden approved accessories are covered by Holden's 2 Year 50,000km warranty when installed by your Holden Dealer.

So don't put your new Calais under stress or risk damage. Ensure your accessories have the Holden stamp of approval.

Ask your Holden Dealer for a full listing.

HOLDEN SMARTDRIVE
FINANCE BY GMAC

HOLDEN SMARTBUY
FINANCE BY GMAC

OWNERSHIP TAKES A NEW SHAPE.

From design and production to servicing, and on to the open road, our objective at Holden is to give you the finest possible ownership experience. From the first moment you step into your new Calais.

It all starts with our warranties.

2 Year or 50,000km Warranty.

Like all Holdens, your new Calais is built to exacting standards.

And with the significant advances we've consistently been making in quality and reliability, it's now confidently covered by warranty for two years or 50,000 km, whichever comes first.

3 Year or 100,000km

Powertrain Warranty.

For even greater protection and security, Calais is also covered by a Powertrain Warranty for three years or 100,000 km, whichever comes first.

This covers the engine, transmission, axles and safety restraints.

3 Year/24 Hour Holdenwise

Roadside Service Ultra.

In the unlikely event of a breakdown, it's reassuring to know assistance is just a phone call away.

The service operates 24 hours, 365 days a year.* It's provided

*Emergency Roadside Service may not always be available in remote areas.

throughout Australia, from around 890 centres, by Holden. And delivered by the collective resources of Australia's automotive service clubs and associations. Toll free number 1800 817 100.

You'll find all the details of both warranties and the Roadside Service in the Calais Owner's Handbook and Roadside Service kit.

HOLDEN SPECIAL VEHICLES

At HSV, through various aesthetic and engineering modifications, Calais' world class design is enhanced to build some rather special vehicles, as their name suggests. It's an organisation dedicated to producing, in very limited numbers, a range of Holdens with an indelible sporting character.

HOLDENWISE

The best service network to take shape in Australia.

With around 350 Holden Dealers across Australia, a Holdenwise Service Centre is never far away.

Participating dealers offer you the assurance of dealer fixed prices on scheduled services, to let you plan your maintenance costs.

If something unforeseen arises, they'll notify you before starting any extra work.

The workmanship of their extensively trained technicians is backed by a six month/10,000 km dealer warranty.

And the Holden Parts Warranty of two years/50,000 km covers any parts fitted by a dealer.

As most dealers are computer-linked to the factory, you should never have to suffer delays for Holden quality parts.

HNL

HNL is owned by Holden and Holden Dealers, and it offers comprehensive and competitive leasing and fleet-management packages to approved fleets and customers.

They would welcome the opportunity to submit a proposal for your consideration.

Why not deal direct with HNL and eliminate the middleman?

Consult your Holden Dealer, or call HNL toll free on 008 226 772.

GMAC

Factory-backed finance from General Motors Acceptance Corporation can be tailored to suit your individual needs.

Ask your Holden Dealer about it.

The PERFECT
finish for CALAIS.

Calais' bold, dynamic styling now reflects even greater quality with a special high gloss enamel finish, the equal of many of the world's luxury cars.

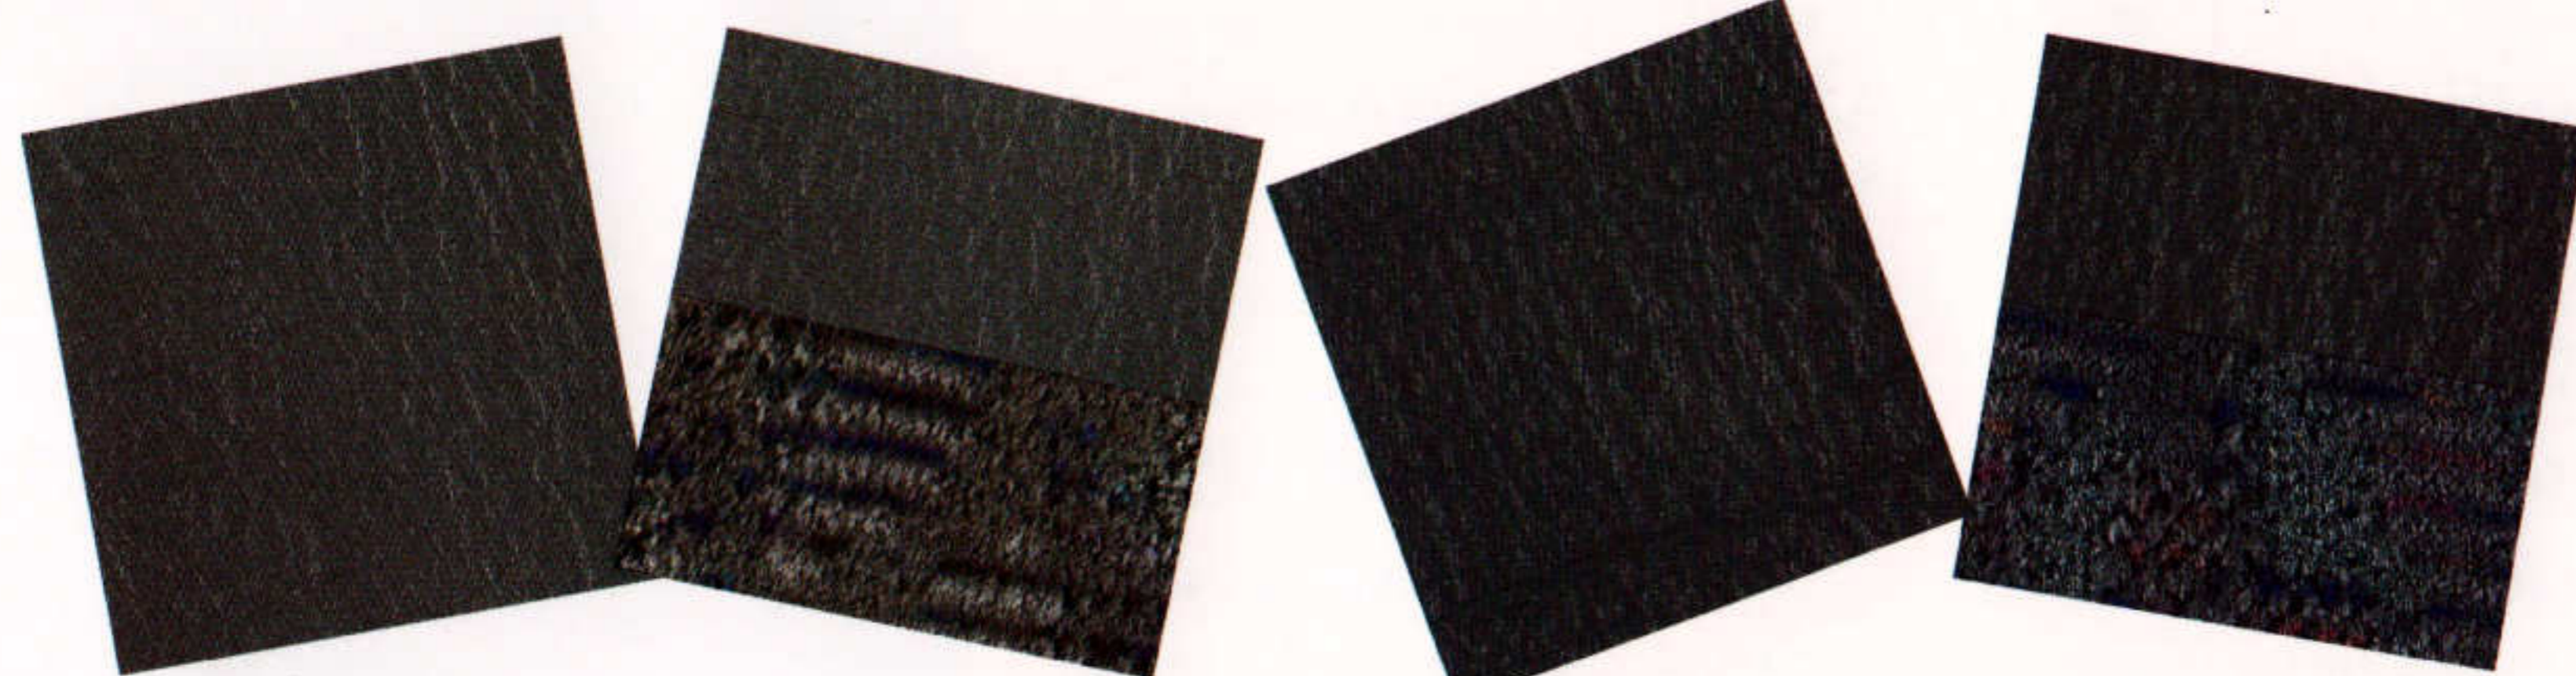

The technology of Holden's \$150 million paint system includes an automatic application to ensure consistent depth and finish.

A polyester basecoat and acrylic clearcoat make Calais glisten with an extraordinary lustre and sheer depth of colour.

The range of superb metallics is complemented inside by seat trims

in a combination of leather and new Derwent velour.

While you are enfolded in the traditional luxury of leather, you enjoy the comfort of velour centre panels. Full Howe Leather is also available. It is carefully sewn from first quality full-grain Howe Leather hides grown in Australia and New Zealand.
