

EXPERT

PEUGEOT

FROM PROFESSIONALS

FROM THE MOMENT YOU DISCOVER THE NEW PEUGEOT EXPERT RANGE, YOU WILL UNDERSTAND THAT THESE ARE NO ORDINARY LIGHT VANS BUT COMMERCIAL VEHICLES DESIGNED FOR YOUR BUSINESS AND ALSO FOR THE PEOPLE WHO WILL DRIVE THEM. VEHICLES BUILT BY PROFESSIONALS, FOR PROFESSIONALS.

TO PROFESSIONALS

Because no two businesses are the same, our new Expert range offers a wide choice of configurations: 2 effective volumes, 2 HDi diesel engines, 2 wheelbases and a large payload. So you can be sure of finding the Expert that meets your expectations to a T. And whichever model you choose, you can be certain it embodies the qualities shared by all Peugeot vehicles: style, practicality, dynamism and innovation.

Your needs guided its design. The result: functional and practical equipment such as a low loadsill accessing a large interior volume that can be used to the full, large rear hinged doors which open to 180° to facilitate loading... all with an innovative design which adds zest to your company image each time you take to the road.

It also means vehicles that inspire confidence. Like all Peugeot commercial vehicles, the Expert is manufactured to the strictest standards to meet your needs in terms of robustness and safety.

Expert also means passion. The passion we put into designing light commercial vehicles and passenger cars, to ensure that both are equally pleasant to drive, making long journeys more comfortable and less stressful regardless of the load you are carrying.

It goes without saying that intelligence is also to the fore, in the form of practical functions that make your life easier and your work simpler and more efficient.

These values are in our genes. You will find them in all of our vehicles and in those which, tomorrow, will display the Peugeot badge.

That's why you can be sure your Expert will be just right for your business. One of the most convincing offers on the market, whatever your requirements.

EXPERT. IT SAYS AS MUCH ABOUT YOU AS YOUR BUSINESS CARD!

YOUR PROFESSIONAL VEHICLE IS A LITTLE LIKE YOURSELF: IT INTRODUCES YOU, MARKS YOUR PRESENCE, REPRESENTS YOU. TO MAKE THE EXPERT AS RIGHT FOR YOU AS POSSIBLE, PEUGEOT DESIGNED IT WITH VERSATILITY IN MIND. CHOOSE THE MODEL FROM THE EXPERT RANGE THAT BEST EXPRESSES YOUR PROFESSIONALISM.

EXPERT (L2)

EXPERT (L1)

The Expert range offers a choice of configurations. Among them you'll find the one that's right for you, that matches your personality and fits perfectly with your activity. Whatever your choice, the Expert will satisfy your need for comfort, load capacity, durability and safety.

Your Expert fits the bill perfectly. Available in two lengths (4.80m and 5.13m) with an effective volume of 5 or 6m³ and a height of 1.94m. Or with pneumatic suspension as standard on the Expert Professional, the height is reduced to 1.90m.

Thanks to this pneumatic suspension, it offers one of the lowest load sills on the market. The loadspace is optimised and the wide rear doors open to 180° to facilitate access.

With its exceptional handling characteristics, your Expert gives full expression to your professionalism.

Better than a business card, your vehicle reflects your professional image. Bearing the hallmarks of Peugeot elegance, it perfectly expresses your dynamism and reliability.

ITS DESIGN REFLECTS YOUR PROFESSIONALISM

The contours of the Expert have been designed to express its true nature: that of an efficient working tool that's right for the job.

The front aspect, broad and generous in the Peugeot style, expresses the Expert's modernity and dynamism with its plunging front windscreen and very stylish lights. Bumpers forming an integral part of the body and side protections evoke robustness and safety.

At the rear, the Expert's square profile is immediately recognisable by the professional as a sign of easy loading and optimised volume. The sides can accommodate advertising and your company name.

Capacity //

AT WORK, IT MAKES YOUR LIFE EASIER

Front doors

The front doors accommodate dual glass door mirrors for better vision, and the electric windows operate with one touch.

Sliding side doors

Guided by two support rails and a rail in the upper section, the sliding side door is panelled. Particular attention has been paid to the design of the handles to facilitate operation of the door. A second sliding side door (as standard) on the driver's side allows easier access to goods.

Load sill

To facilitate the handling of goods or materials the Expert's load sill is one of the lowest on the market.

VOLUMES

2 different volumes available.

	L1	L2
Volume (m ³)	5.0	6.0

L1 Standard wheelbase van

L2 Long wheelbase van

PAYLOAD

Expert boasts the same large payload across the range as standard, giving you added flexibility.

Stowing rings*

To ensure maximum safety for driver and passenger, 8 stowing rings installed on either side of the rear load space secure the load to the floor of the vehicle.

*Straps not supplied.

Hinged rear doors

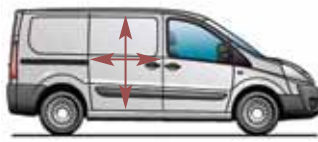

The two glazed hinged rear doors open to 180° to facilitate easy loading.

A modular range

So that it can adapt to as many different uses as possible, the range of Expert vans is available in two lengths, 4.80 and 5.13m. Load floor lengths are 2.26m and 2.58m according to versions.

Dynamism //

ENDLESS POSSIBILITIES

A BETTER WAY OF DOING BUSINESS.

Front / rear axles

When a vehicle is a working tool, you need to rely on it in all situations and be able to count on exemplary efficiency. Thanks to the quality of its wheels and suspension, the Expert's stability is a benchmark. Regardless of load conditions, the rigidity of the body and MacPherson type independent wheel front suspension optimise handling. The semi-deformable rear suspension provides an excellent level of active safety.

Suspension (standard / pneumatic)

The Expert offers a choice of two types of rear suspension: standard or pneumatic. The latter is an innovative solution which restricts the overall height to 1.90m and ensures a constant ride height under all load conditions. Pneumatic suspension is standard on the Expert Professional.

Stops / dampers

The Expert has long and dense wheel travel stops. Continuously adjusting their rigidity and load flexibility, these stops form the link between front and rear suspension, ensuring stable vehicle handling and an excellent level of comfort even when driving with no load. The dampers have been designed to ensure excellent body stability and enviable suspension comfort.

Steering

For enhanced driveability and additional fuel savings, the Expert is equipped with power steering. The electro-pump unit is then controlled according to vehicle speed and the speed of rotation of the steering wheel, independently of engine speed.

GOOD FOR YOUR BUDGET AND ENVIRONMENTALLY FRIENDLY

BOTH OF THE EXPERT'S ENGINES COMPLY WITH THE EURO 4 STANDARD AND ARE DESIGNED TO FACILITATE YOUR JOURNEYS AND IMPROVE YOUR EFFICIENCY. THEY WORK TOWARDS THE SAME OBJECTIVE: A CONCERN FOR ECONOMY AND THE ENVIRONMENT.

HDi technology

A source of performance and economy, the common rail injection system is featured on all Expert HDi turbo diesel engines. By injecting high-pressure fuel directly into the combustion chamber, this system significantly reduces fuel consumption and procures additional power whilst conforming to Euro 4 anti-pollution standards.

FAP Particle Filter

The technology of the Diesel Particulate Filter System (FAP), standard on the Expert Professional, reduces diesel emissions to barely measurable levels whilst preserving power and performance.

A choice of two engines

For your Expert, you can choose between 2 HDi diesel engines. One of them is sure to meet the

requirements of your business perfectly.

2.0 HDi

The 88kW diesel engine features a variable geometry turbo. Its characteristics make it the ideal engine for both small trips around town and longer journeys on the open road.

2.0 HDi 100kW FAP

Thanks to the common rail injection system, this engine develops exceptional torque of 320Nm for its category which makes it extremely efficient for long haul journeys. This engine is available on the Expert Professional.

Gearbox

The Expert offers an advanced 6-speed manual gearbox with smooth precise gear changes.

A photograph showing the interior of a Peugeot Expert van from the driver's perspective. The driver's hands are on the steering wheel, which features the Peugeot lion logo. The dashboard includes a digital display showing '110 km/h' and '23.000 km'. The center console has air vents, a radio, and climate controls. The background is blurred, suggesting motion.

Comfort //

WELLBEING ON A DAILY BASIS

A light commercial vehicle used on a daily basis must be ergonomic, practical and comfortable. To make working with the Expert as enjoyable for you as possible, Peugeot designed its interior to be functional and innovative, making sure that its comfortable seats offer excellent support.

The Expert offers in addition numerous fitments and storage spaces that make day-to-day tasks so much easier: overhead storage unit, key-lockable glove box, storage compartments and cup holders on the fascia panel.

Overhead storage unit

The overhead storage unit is situated under the roof above the front passengers and can accommodate documents or other indispensable small objects.

Glove box

Lockable and illuminated, the glove box is also air-conditioned.

Storage spaces

They can be found on top of the fascia panel, under the steering column, in the front doors and under the passenger seat.

Steering wheel adjustment

The steering column supports a height-adjustable (40mm) and depth-adjustable (40mm) steering wheel.

Seating adjustment

The driver's seat can be adjusted for height, reach and backrest angle, enabling you to find your optimum driving position.

Two person front passenger seat

The very comfortable front passenger bench seat, available as standard on the Expert, lets you carry 2 front passengers with ease.

INTELLIGENCE THAT PROTECTS

THE EXPERT IS A VAN FOR TODAY'S BUSINESS USER, OFFERING A COMPREHENSIVE RANGE OF MODERN EQUIPMENT DESIGNED TO IMPROVE THE SAFETY OF BOTH DRIVER AND PASSENGERS.

ANTICIPATION (ACTIVE SAFETY)

• Braking

With two ventilated discs at the front (304mm) and two non-ventilated discs at the rear (290mm), the Expert offers high performance braking under all road conditions.

• ABS

The anti-lock braking system (ABS) helps you to control the vehicle during emergency braking by preventing the wheels from locking.

• EBFD

Electronic Brake Force Distribution (EBFD) controls braking wheel by wheel to maximise stopping performance, particularly when cornering.

• EBA

Emergency Brake Assist (EBA) helps reduce stopping distances to a minimum by amplifying the pressure applied to the brakes.

• Automatic activation of the hazard warning lights

If you have to pull up sharply, the hazard warning lights will come on automatically to warn vehicles behind you.

• ESP

Available as an option, ESP (Electronic Stability Program) anticipates potential under- or over-steer and helps you to maintain control of the vehicle's steering.

• ASR

As part of the ESP option, traction control (ASR) prevents wheel slip in the event of loss of grip.

Door mirrors

Their dual glass facilitates parking manoeuvres and provides better coverage of the driver's side blind spot. The door mirrors can be adjusted electrically from the inside, and heated simultaneously with the rear windscreen demisting function. The door mirrors automatically fold when you lock the van for added protection.

RD4 CD radio

The Expert's centre console incorporates a single CD radio, with remote controls on the steering wheel. Sound is reproduced through 2 speakers and 2 tweeters.

Air-conditioning

The air-conditioning system keeps the air circulating throughout the passenger compartment and incorporates an active charcoal and pollen filter to ensure your environment is always comfortable, even when you're driving in heavily polluted areas.

PROTECTION (PASSIVE SAFETY)

- **Front impact**

The Expert has been designed to protect driver and passengers. In the event of a front impact, the integrity of the passenger compartment is assured by three impact absorption structures; lower, medium and high. These are designed gradually to absorb impact energy, channelling it from the front to the rear of the vehicle.

- **Side impact**

In the event of a side impact, energy is channelled and absorbed through the vehicle's subframe.

- **Rear impact**

The Expert is designed to deflect and absorb energy in the event of a rear impact thanks to crumple zones and subframe components which help to contain the impact to the rear of the vehicle.

- **Rollover**

The passenger safety cell is safeguarded in the event of a rollover thanks to the vehicle's exceptional body strength.

- **Protection of pedestrians**

Vans often spend a lot of time in towns and cities, so pedestrian safety is high on Peugeot's agenda. The structure of the Expert has been designed to reduce the effects of an impact with a pedestrian as far as possible.

- **Steering column**

The steering column retracts in the event of a collision to provide maximum safety for the driver.

- **Restraint systems**

All the seats in the Expert are equipped with three point seat belts. The outer belts are height-adjustable, with pretensioners and force limiters.

- **Fasten seat belt indicator**

An indicator and an audible alarm warn the driver if his/her seat belt is unfastened.

- **Head restraints**

The backrest of the seats and head restraints have been designed to follow the movements of the body in the event of impact, thereby reducing as far as possible the effects of collision.

- **Airbags**

The Expert is equipped with a driver's airbag, helping to protect in the event of a frontal collision. A passenger airbag is available as an option.

THEFT PROTECTION

PEOPLE WHO DRIVE VANS OFTEN KEEP VALUABLE TOOLS, EQUIPMENT OR GOODS IN THEM. THE EXPERT HAS ALSO BEEN DESIGNED TO OFFER PEACE OF MIND WITH HIGH LEVELS OF VEHICLE PROTECTION AND SECURITY.

- **Remote central locking**

The Expert is equipped with a three-button remote control, allowing you to lock or unlock the vehicle, or the load space only. And once the vehicle exceeds 10km/h all the door locks are activated automatically.

- **Selective locking**

If you wish to leave the cab unlocked while the cargo area remains securely locked, you

can do this by using the button located on the fascia panel. The status indicator on this button also tells you whether the load space is open or locked.

- **Deadlocking**

This renders all interior opening controls inoperative therefore making it pointless to break into the vehicle.

Choose //

ACCESSORIES

PEUGEOT ACCESSORIES ARE DESIGNED SPECIFICALLY FOR EACH MODEL, WHICH MEANS THERE ARE NO COMPROMISES ON FIT OR FUNCTION. IN ADDITION, THEY ARE TESTED TO OUR OWN HIGH STANDARDS GIVING YOU COMPLETE CONFIDENCE AND PEACE OF MIND. PEACE OF MIND

WHEN YOU CHOOSE PEUGEOT, YOU HAVE THE REASSURANCE OF KNOWING THAT YOUR VEHICLE HAS BEEN DESIGNED AND MANUFACTURED TO GIVE YOU YEARS OF WORRY-FREE MOTORING. OUR COMMITMENT TO YOU CONTINUES AFTER PURCHASE AND IS EMBODIED IN THE PEUGEOT AFTERCARE PROGRAM. YOU CAN REST ASSURED THAT EVERYTHING YOU'LL EVER NEED FOR YOUR VEHICLE IS COVERED, FROM ACCESSORIES AND SERVICING TO PARTS AND WARRANTY. THE PEUGEOT ASSISTANCE CARD YOU ARE PROVIDED WITH IS A KEY PART OF AFTERCARE, AS IS THE REASSURANCE OF HAVING A DEDICATED NETWORK OF DEALERS AUSTRALIA-WIDE WITH SPECIALIST FACTORY TRAINED TECHNICIANS TO LOOK AFTER YOU AND YOUR VEHICLE. AFTERCARE DEMONSTRATES THAT WE CARE FOR YOUR PEUGEOT AS MUCH AS YOU DO, AND ENSURES THE QUALITY OF YOUR OWNERSHIP EXPERIENCE LASTS LONG AFTER YOU'VE LEFT THE SHOWROOM.

Driving down the cost of servicing

Peugeot has passed on the benefits of technology in engine design and lubrication by extending major service intervals. Peugeot Light Commercial Vehicles require minor servicing at 15,000km intervals which consist of an oil and filter change followed by a major service every 45,000km. Peugeot's Light Commercial Vehicle service intervals are designed to save you time and money by reducing the time spent in the maintenance bay and requiring fewer service visits. While Peugeot can reasonably predict the maintenance needs of the engine and other major components, the wearing of certain components such as tyres and brake pads is less predictable and subject to driving conditions.

3 year / 100,000km warranty

Should any part of the vehicle require repair or replacement as a result of a manufacturing or material defect within the warranty period, the part will be repaired or replaced completely free of charge by your authorised Peugeot Dealer, regardless of any change of ownership during the period covered. The warranty does not cover items replaced during normal service and maintenance operations and which are subject to wear and tear. During the period you will also automatically receive Peugeot Assistance.

6 year anti-corrosion warranty

Peugeots are renowned for their durability and longevity. This is due in part to the sophisticated measures which are taken during the vehicle's production process to optimise long-term protection from the elements. Peugeot backs this advanced technology with a 6 year warranty against corrosion-perforation of your vehicle's bodywork.

Peugeot Assistance

Peugeot Assistance has been designed to give you total peace of mind. You can drive your Peugeot with the security of knowing that one phone call delivers help Australia-wide, at any time of the day or night. You and your Peugeot will be back on the road as quickly as possible, with minimum inconvenience. Every Peugeot is delivered with three years' complimentary roadside assistance – for the complete period of your new vehicle warranty.

Peugeot Genuine Parts

If your van is in for a service or repair, the parts required to keep it on the road are Peugeot Genuine Parts. Using specifically designed and manufactured parts ensures your Peugeot can operate at peak performance at all times. Only Peugeot Genuine Parts preserve the original integrity of the vehicle. They are guaranteed to be of the same quality as the original component and are backed by a 12 month unlimited kilometre warranty. It's not a Peugeot without Peugeot Genuine Parts.
