## Volkswagen Jetta

## The Volkswagen Philosophy.

Innovation. Responsibility. Value. At Volkswagen we pride ourselves on this set of beliefs. So when you make the Volkswagen choice you can be assured that you have chosen a car with this creed at the very core of its inception, its development, and its realisation.

At Volkswagen we have combined the power of innovation with exceptional design to deliver a superior driving experience. Superb technologies such as our new low emission petrol and diesel engines not only offer an enhanced driving experience, but significantly reduce both carbon emissions and fuel consumption.

Responsible, efficient environmental considerations such as this not only save you money, but ultimately the planet's precious resources, and is just one example of the many commitments that Volkswagen has made to reduce its carbon footprint.

We are proud of the reputation we have earned for value. A Volkswagen vehicle offers safety, reliability and comfort, making it outstanding value for money. With trusted and timeless German engineering our models are the perfect vehicles for you and your family.

## Jetta.

The Jetta embodies an unrivalled synthesis of design, functionality and efficiency. With its range of engines and stylish comfort, the Jetta not only delivers an incredible drive and practicality, but it also impresses with its stunning profile, immaculate design and inner beauty.

## Design.

Contoured, subtle and coherent, the Jetta is distinctive and accessible. Combining the functionality of a four-door sedan with a sleek and sporty silhouette, the Jetta is superbly elegant: smooth characteristic lines, superior dynamics and agile roadholding.

The Jetta represents an ideal marriage of form and function. One of its most striking design elements is the aggressive slope of the bonnet, which carries surging curvatures that are defined in the chrome grille. Its aerodynamic form flows and rakes rearward, delineated by the sweeping roof line.

Volkswagen's constant pursuit of perfection means that affordable innovative technology is at your fingertips in any model within our product range. With technical expertise and the power of innovation, Volkswagen brings moving ideas to the road.

**TSI Technology. A miracle of performance.**

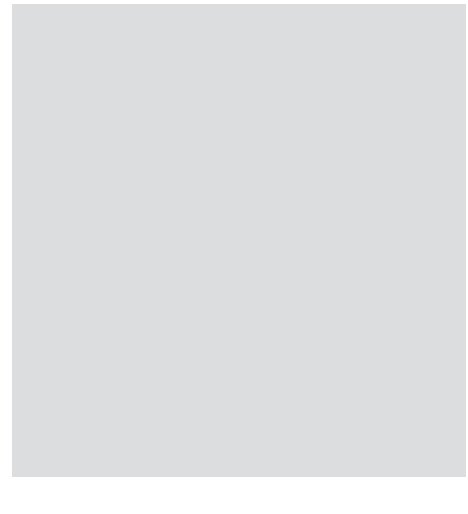

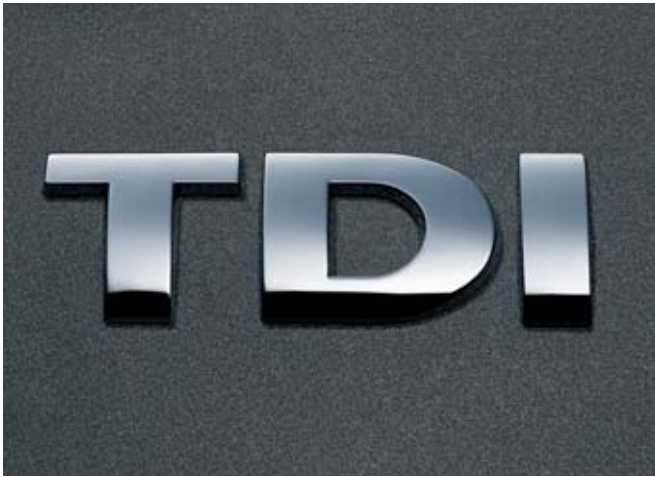

TSI describes Volkswagen's twin or single-charged petrol engines with direct injection. This innovative engineering has created high tech engines boasting excellent torque and power output at low revolutions, combined with lower fuel consumption and emissions.

The TSI engine in the 118TSI is twin charged. The two components of the twincharger are a supercharger and a turbocharger. The twincharger gives the TSI engine a flat torque curve almost from idling speed and across a broad speed range, as well as outstanding power combined with very low fuel consumption.

The TSI engine in the 147TSI Highline is turbocharged. A turbocharger compresses the air required for combustion. Compared with a naturally aspirated engine with the same displacement, a turbocharged engine can produce higher power and torque, as well as being highly efficient.

**TDI Technology**

Volkswagen's cutting-edge TDI engines with Diesel Particulate Filters feature Common Rail technology – injecting precise amounts of fuel at exceedingly high pressure. The result is a cleaner burning engine with exceptional fuel economy, impressive torque and compelling performance.

**New Technology.**

**Direct Shift Gearbox (DSG)**

DSG is a new and advanced 6 or 7-speed transmission in which the clutch and gearshift are controlled electronically. What makes DSG unique is that the next gear is already pre-selected and awaiting power to be transferred, resulting in a gear change that takes only 3-4 hundredths of a second. The benefits are virtually no interruption to power, traction or acceleration, and additional flexibility. Furthermore, because it ensures optimum transmission of the engine power, DSG provides excellent fuel consumption and driving satisfaction.

**Hill-Start Assist - Available with a Direct Shift Gearbox (DSG)**

Hill-Start Assist holds the vehicle stationary for 1.5 seconds on hills with an incline greater than 5 percent, when the foot brake is released, by temporarily locking the brake pressure. This intelligent feature provides a comfortable hill start, which importantly avoids any rolling back.

 Optional extras on all models

### RNS510 Satellite Navigation System ☐

The RNS510 system has a user-friendly touch sensitive screen with a high resolution display that shows maps and video. This unique system calculates your travel route with incredible speed. With a generous 30GB hard drive and built-in DVD drive, your music library and navigation data is always at your fingertips. Your favourite music can also be accessed via an MP3 compatible AUX-IN multimedia socket or SD memory card slot.

### Media Device Interface (MDI) ☐

This sophisticated new interface facilitates connection to USB audio devices, data storage devices and Apple iPod®\*. The MDI allows audio files to be operated via the in-dash audio system without the need to input controls via the media device itself. The MDI system also provides a charging function.

\* iPod® is a registered trademark of Apple Inc.

### Optical Parking System (OPS)

The Optical Parking System takes the parking aid/parking sensor concept to a new level. A silhouette of the Jetta is displayed on the radio or navigation system screen during parking, showing the Jetta's position and distance from obstacles. Any obstacle within range of the ultrasonic sensors is shown on screen and heard via an audible warning.

## Safety.

Safety is of the highest priority to Volkswagen and is therefore an overriding theme in the design and engineering of the Jetta. With a full suite of active and passive safety systems, you can rest assured that your safety has been thoroughly considered.

The Jetta's safety credentials include its rigid body structure which creates a solid passenger cell. Its body panels are designed to crumple in the event of an accident, absorbing the energy of the impact. The Jetta's lightweight construction is reinforced with hardened, high strength steel to give occupants maximum protection in an accident.

In an accident, depending on the severity of the impact, the Jetta's safety features work together to protect occupants by deploying the belt tensioners and airbags. The system also activates the hazard warning lights, the doors are unlocked, interior lights are switched on and the fuel pump is deactivated. Pedestrian safety has been considered with a deformable bonnet to minimize injuries.

## Active Safety – Everything designed to help prevent accidents from happening.

### Anti-lock Braking System (ABS)

When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the ABS system reduces brake pressure to that wheel. This prevents the wheels from locking during heavy or emergency braking, helping enable the vehicle to remain steerable.

### Brake Assist

During emergency braking, Brake Assist aids the driver by increasing the brake pressure automatically to a level exceeding the locking limit. The ABS is thus quickly brought into the operating range, which enables maximum vehicle deceleration to be achieved.

### Electronic Brake-pressure Distribution (EBD)

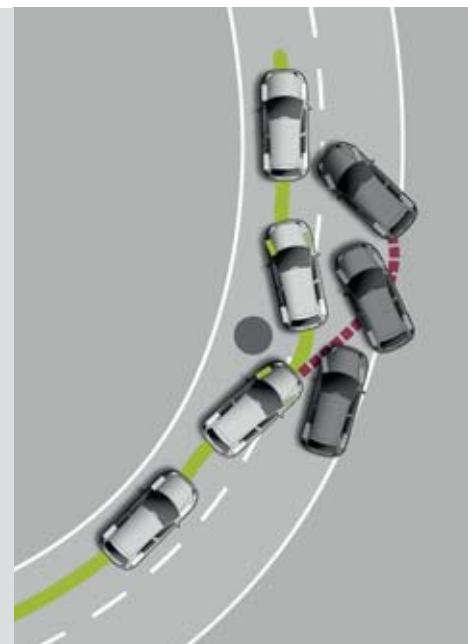

Every vehicle's centre of gravity shifts forwards when the brakes are applied. This presents a risk of the rear wheels tending to lock up due to the reduction in traction. Electronic Brake-pressure Distribution uses the solenoid valves in the ABS unit to regulate the braking power at the rear wheels, thereby ensuring maximum braking performance at both the front and rear wheels and preventing the rear end from swerving out due to over-braking in the rear wheels.

### Electro-Mechanical Power Steering

The Electro-Mechanical Power Steering is a speed-sensitive electrical power-assisted steering system which is only activated when needed and does without any hydraulic components. Compared to hydraulic power steering, vehicles fitted with Electro-Mechanical Power Steering benefit from lower fuel consumption and new convenience and safety functions.

### Electronic Stabilisation Program (ESP)

ESP helps ensure that the vehicle goes where you steer it, even in extreme driving conditions. The ESP system constantly compares the actual movement of the vehicle with carefully pre-determined values. Should a situation arise in which the vehicle starts to skid, ESP will apply the brakes to individual wheels and automatically adjust the engine's power output to help correct the problem. It also minimises the likelihood of spinning off on a curve due to understeering or oversteering.

## **Passive Safety – Design measures taken to protect the occupants of vehicles from injury, or to reduce the risk of injury.**

### **Airbags**

Six airbags (twin front, side and curtain) are standard features. Airbags combine with the seat belts to help reduce the risk of severe head and chest injuries in collisions. When inflated, airbags cushion the head and upper body and distribute the resulting loads over as large an area as possible.

### **Safety Optimised Head Restraints**

Safety Optimised Head Restraints on the front seats are optimally positioned and specially contoured to help reduce whiplash injuries. In the event of an accident, excellent protection is achieved via the seatback controlling upper body movements, and this is balanced with head movements being controlled via the head restraints.

### **Seatbelts**

Front seat passenger seatbelts are equipped with belt pre-tensioners and belt force limiters. Belt tensioners tighten the seatbelt on impact, pulling it closer to the occupant's body, ideally positioning them for airbag inflation. Belt force limiters reduce seat belt forces on front seat occupants and, in conjunction with belt tensioners and airbags, lessen the risk of upper body injuries. Three-point seatbelts are fitted to all seats, and three child seat anchor points are fitted in the rear.

## Interior.

The Jetta interior utilises ergonomic design and the highest quality materials and finishes. Boasting a sculptural 3-spoke leather covered steering wheel, stylish decorative inserts in the dashboard and doors and a chillable, illuminated glove box, the Jetta's interior ambience reaches a new level of refinement. Cast your eyes over the soft, supple surfaces, chrome trim instrument surrounds, and comfort or sports front seats.

Intuitive technology is at hand through user friendly audio functions mounted on the steering wheel or an auxiliary input socket for external audio devices such as an MP3 player. New white illumination in the redesigned instrument cluster is aesthetically pleasing and easy to read in a variety of lighting conditions. Driver and passenger front seats with height and lumbar adjustment ensure the most comfortable seating position on every journey.

The interior cabin space is outstanding with abundant legroom and headroom. A cavernous boot volume of 527 litres offers the flexibility of a 60/40 split-fold rear seat and rear centre armrest with load-through feature.

Dual zone automatic climate control air conditioning (optional for 77TDI) enables the driver and front passenger to select their individually preferred temperatures. The RCD310 radio system (standard for 77TDI, 118TSI and 103TDI) features a single disc CD player with MP3 compatibility and an AUX-IN interface for connecting a mobile audio player, such as an Apple iPod®\*.

\* iPod® is a registered trademark of Apple Inc.

## The Jetta Range.

Volkswagen's TSI direct injection petrol engines or TDI Common Rail turbo diesel engines deliver impressive performance and fuel efficiency, coupled with either manual or DSG transmissions. The Jetta represents everyday practicality, intelligent features and effortless performance along with impressive fuel efficiency. Each model in the Jetta range benefits from active safety systems such as Electronic Stabilisation Program (ESP) and Anti-lock Braking System (ABS) with Brake Assist. Passive safety is also covered with six airbags and front Safety Optimised Head Restraints as standard. Innovative technology is at your fingertips via the front and rear parking distance sensors with Optical Parking System (OPS) in the radio display, Hill Start Assist (available with DSG), remote boot opening, or a Multi-function Display Plus. Each Jetta model comes standard with alloy wheels.

## 77TDI. Exceptional Fuel Economy and Quality Finishes.

The latest addition to the Jetta range is the 77TDI, which brings you the convenience of cruise control, a multi-function trip computer, and front and rear parking distance sensors. 16" Toronto alloy wheels are standard. The 77TDI delivers impressive power from its 1.6 litre Common Rail turbo diesel engine with Diesel Particulate Filter. With 77kW of power and 250Nm of torque, and 5-speed manual or 7-speed DSG transmissions, it combines exceptional fuel economy with quality finishes. Safety features include ABS with Brake Assist, Electronic Stabilisation Program (ESP), and front, side and curtain airbags.

Stylish 16" Toronto alloy wheels are standard on the 77TDI.

## 118TSI. Fuel Efficient Performance Combined with Extra Comfort.

The 118TSI makes life comfortable through dual zone automatic climate control air conditioning, rain sensing windscreen wipers and automatic headlights with coming/leaving home function. 16" Sedona alloy wheels are standard. The powerful 118TSI delivers an exceptional drive from its 1.4 litre direct injection, twin charged petrol engine. Producing 118kW of power and 240Nm of torque, the ingenious TSI engine saves petrol while delivering power and performance. 6-speed manual or 7-speed DSG transmissions are available. Safety features include ABS with Brake Assist, Electronic Stabilisation Program (ESP), and front, side and curtain airbags.

The Volkswagen 1.4-litre TSI Twincharger engine has been awarded International Engine of the Year 2009, the 1.0 litre to 1.4 litre category and Green Engine of the Year 2009.

**International Engine of the Year 2009**  
Volkswagen 1.4-litre TSI Twincharger

**Green Engine of the Year**  
Volkswagen 1.4-litre TSI Twincharger

## 103TDI. Effortless Performance with Outstanding Quality and Efficiency.

The 103TDI makes an impact with standard features including a multi-function steering wheel, the RCD310 CD sound system, and programmable central locking with remote opening of the boot. 16" Sedona alloy wheels are standard. The 103TDI features an advanced turbo diesel engine with Common Rail technology and a Diesel Particulate Filter. The result is a powerful, efficient and clean burning 2.0 litre engine that produces 103kW of power and a significant 320Nm of torque from only 1,750rpm, creating incredible flexibility. It features a 6-speed manual transmission as standard or the optional 6-speed Direct Shift Gearbox (DSG). Safety features include ABS with Brake Assist, Electronic Stabilisation Program (ESP), and front, side and curtain airbags.

Stylish 16" Sedona alloy wheels are standard on the 103TDI and 118TSI.

## **125TDI Highline. Strong Torque Performance with Finesse and Innovative Technology.**

The 125TDI Highline offers a six speed DSG transmission, front sports seats, lowered sports suspension and front fog lights as standard features. The RCD510 six disc CD sound system plus 17" Porto alloy wheels are also standard. The 125TDI Highline delivers superior power from its 2.0 litre Common Rail turbo diesel engine with Diesel Particulate Filter. With 125kW of power and 350Nm of torque, and a 6-speed DSG transmission as standard, it combines impressive fuel economy with engaging performance. Safety features include ABS with Brake Assist, Electronic Stabilisation Program (ESP), and front, side and curtain airbags.

## **147TSI Highline. Luxurious refinement, sports inspired responsiveness combined with agile strength.**

Sporty and elegant, the Jetta 147TSI Highline is equipped with a six speed DSG transmission, front sports seats, lowered sports suspension and RCD510 six disc CD sound system as standard features. Front fog lights, dual chrome exhausts, plus 17" Porto alloy wheels are also standard. The innovative 147TSI Highline delivers an engaging drive from its 2.0 litre direct injection, turbo charged petrol engine. Producing 147kW of power and 280Nm of torque, it delivers impressive power and performance while saving petrol. Safety features include ABS with Brake Assist, Electronic Stabilisation Program (ESP), and front, side and curtain airbags.

Stylish 17" Porto alloy wheels are standard on the 147TSI Highline and 125TDI Highline.

## Optional Equipment.

### RNS510 Satellite Navigation System

The RNS510 Satellite Navigation System has a user-friendly touch sensitive screen with a high resolution display that shows maps and video. With a generous 30GB hard drive and built-in DVD drive, your music library and navigation data is always at your fingertips. Your favourite music can also be accessed via an MP3 player compatible AUX-IN multimedia socket or SD memory card slot.

### Sunroof

The optional sunroof with sunblind offers both slide and tilt opening functions.

### Leather Appointed Seating

The Jetta offers an optional leather appointed seating package with heated front sports seats and the additional option of electric adjustment for the driver.

### Bi-Xenon Headlights

Bi-xenon headlights that incorporate automatic self levelling and a headlight cleaning system are optional for the Jetta range.

**Media Device Interface (MDI)**  The MDI allows audio files to be operated via the in-dash audio system without the need to input controls via the media device itself.

 Optional extras on all models

## Optional Comfort Package Available for 77TDI.

An automatically dimming rear view mirror adds convenience and comfort to an already impressive package.

Enjoy the convenience of innovative rain sensing windshield wipers that automatically activate when needed.

Dual zone climate control air conditioning provides luxurious comfort in every season.

Automatic headlights include a coming/leaving home function that illuminates the ground around the Jetta at night.

## Optional Sport Package Available for 77TDI, 118TSI and 103TDI.

Front fog lights add a sporty element and an additional safety feature.

Volkswagen Individual offers attractively styled 17" Avignon alloy wheels to an individual touch to your vehicle.

Sports suspension with 15mm lowered ride height adds an exciting element of performance to your vehicle.

Dark tinted rear side and rear windows provide increased privacy and comfort.

### **Optional Sport Package Available for 147TSI Highline and 125TDI Highline.**

Dark tinted rear side and rear windows provide increased privacy and comfort.

Volkswagen Individual offers attractively styled 18" Charleston alloy wheels with a 15mm lowered sports suspension package and anti-theft wheel bolts.

## Volkswagen Genuine Accessories.

Movement fascinates. In fact, there are few subjects that excite people more, that's because movement is synonymous with freedom. Our comprehensive range of genuine accessories give you the freedom to customise the look and feel of your vehicle to reflect your own personality and individual sense of style.

The product philosophy is simple – to deliver innovative technologies and premium design – right down to the finest detail. Each and every genuine accessory has been designed specifically with the Jetta in mind and has been engineered and rigorously tested to ensure that it meets the same high standards of quality as the vehicle itself.

No matter what you choose you can have peace of mind knowing that any genuine accessory fitted by your local Volkswagen Dealer, at the time of your vehicle purchase will be covered by the same warranty as the vehicle itself.

For more information or to experience the full range of genuine accessories designed to suit the Jetta, visit your local Volkswagen Dealer.

## Specifications.

	77TDI	118TSI	103TDI	147TSI Highline	125TDI Highline
<b>Optional Equipment</b>					
<b>Anti-theft alarm system with interior monitoring and tilt sensor</b>	○	○	○	○	○
<b>Automatic Transmission</b>					
6-speed Direct Shift Gearbox (DSG)	-	-	S	S	S
7-speed Direct Shift Gearbox (DSG)	○	○	-	-	-
<b>Bi-xenon headlights with automatic self levelling and headlight cleaning system</b>	○	○	○	○	○
<b>Comfort Package</b>					
Dual zone automatic (2 modes) climate control with indirect ventilation mode and air quality sensor with automatic air recirculation					
Automatic dimming interior rear-view mirror					
Low light sensor with automatic headlight function	○	S	S	S	S
Coming / leaving home function					
Foot well illumination, driver and front passenger					
Rain sensing windscreen wipers					
<b>Electric glass sunroof, slide and tilt adjustable with sunblind</b>	○	○	○	○	○
<b>Front fog lights, mounted in lower bumper</b>	○	○	○	S	S
<b>In car entertainment and technology</b>					
Media Device Interface (MDI) – compatible with iPod®, USB and mini USB					
Fitted in the centre console storage compartment and supplied with USB connection cable.					
Volkswagen Genuine Accessory iPod® and mini USB connection cables sold separately	○	○	○	○	○
<b>Metallic / Pearl Effect paint</b>	○	○	○	○	○
<b>Upholstery</b>					
Vienna leather appointed seat upholstery with individually heated front sports seats and electric lumbar adjustment	○	○	○	○	○
Vienna leather upholstery with individually heated front sports seats and electric adjustment for driver's seat	○	○	○	○	○
Some parts of the leather appointed seat upholstery will contain man made material.					
Electric seat adjustment replaces storage drawer under driver's seat					
<b>Satellite navigation system (RNS510)</b>					
High-resolution touch screen display in 16:9 format, 3D map views, integrated 30 GB hard drive and SD card slot, DVD drive for the playback of audio CD/MP3 and video DVD and 10 speakers	○	○	○	○	○
<b>Sport packages</b>					
Avignon 17 x 7" alloy wheels from Volkswagen Individual with 225/45 R17 tyres (4)					
Dark tinted rear side windows and rear window, 65% light absorbing					
Front fog lights, mounted in lower bumper	○	○	○	-	-
Sports suspension with 15mm lowered ride height					
Please note: The spare wheel is speed restricted in combination with this option					
Charleston 18 x 7½" alloy wheels from Volkswagen Individual with 225/40 R18 tyres (4)					
Dark tinted rear side windows and rear window, 65% light absorbing	-	-	-	○	○
Please note: The spare wheel is speed restricted in combination with this option

○ Optional with all models

## Owning a Volkswagen.

### Volkswagen New Vehicle Warranty

Every new Volkswagen passenger vehicle is covered by a 3-year/100,000km (whichever occurs first) manufacturer's warranty, which includes Volkswagen Assist (24hr roadside assistance). Every new Volkswagen passenger vehicle is also covered by a 3-year paintwork and 12-year anti-corrosion perforation warranty.

### Volkswagen Assist – 24 Hour Roadside Assistance

As a valued customer, you can be assured that wherever you travel within Australia, you will have access to roadside assistance, 24 hours a day, 365 days a year.

This is complimentary for the duration of the vehicle's original Volkswagen warranty period. You will receive help in the event of a breakdown or accident and if required, your vehicle will be mobilised or transported to an Authorised Volkswagen Repair Centre.

As a Volkswagen owner you will also have access to the additional benefits of accommodation and car rental if your vehicle cannot be mobilised within 24 hours, when you are over 100kms away from home. Volkswagen Roadside Assist can also be renewed at the expiry of the original warranty, ensuring ongoing coverage for your vehicle.

### Volkswagen Extended Warranty

To give you added peace of mind and the assurance of added security, you have the option to extend the factory warranty to suit your ownership cycle. If your Volkswagen was purchased new by you, we can offer you a 36 month/60,000km extension on your already existing Volkswagen manufacturers Warranty. Alternatively if your vehicle is already outside the Volkswagen manufacturers warranty period we can also offer you an extension of your factory warranty. Have the assurance that your Volkswagen remains a Volkswagen. For further information regarding warranty and extending your vehicles factory warranty, please consult your local Volkswagen dealer, refer to your owner's handbook or visit [www.volkswagen.com.au](http://www.volkswagen.com.au).

### Volkswagen Service

Your Authorised Volkswagen Service Centre is part of Volkswagen's global Quality Management System, ensuring all dealers are certified to ISO 9001:2000 – an internationally recognised Quality Standard. Authorised Volkswagen Service Centres have factory trained Technicians equipped with the very latest diagnostic equipment, specialist tooling and Volkswagen Genuine Parts. An Authorised Volkswagen Service Centre undertakes work in accordance to factory specified guidelines and maintenance schedules.

### Volkswagen Genuine Parts®

Volkswagen Genuine Parts® are designed for your vehicle and approved by Volkswagen, with particular regard to safety. The workmanship, dimensional accuracy and materials used in these parts comply with factory specifications. To ensure safety and reliability, Volkswagen recommends the use of Volkswagen Genuine Parts®. Volkswagen Authorised Dealers offer a 2-year warranty on Genuine Parts from the date of purchase.

### Volkswagen Finance

Buying, Borrowing or Leasing, Volkswagen Finance will certainly make you think differently about financing and insuring your new Volkswagen. Committed to meeting the needs of Volkswagen drivers, across Australia, we offer a range of leasing, financing and insurance products, each with distinct advantages depending on your specific circumstances. Our packages are personalised to suit your individual requirements. You design your plan so that it meets your budgeting needs and can rest assured that there will be no surprises along the way. Speak to your local participating Volkswagen Dealer today to put together a financial solution that best suits your lifestyle.

## Glossary.

### **Anti-lock Braking System (ABS)**

When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the ABS system reduces brake pressure to that wheel. This prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable.

### **Anti-Slip Regulation (ASR)**

ASR is a switchable traction control system that prevents the wheels from spinning under acceleration by reducing engine torque.

### **Brake Assist**

During emergency braking, Brake Assist aids the driver by increasing the brake pressure automatically to a level exceeding the locking limit. The ABS is thus quickly brought into the operating range, which enables maximum vehicle deceleration to be achieved.

### **Direct Shift Gearbox (DSG)**

DSG is a manual gearbox in which the gearshifts are controlled electronically. What makes the DSG unique is that it has 2 separate gear sets operated by 2 multi-plate clutches. The benefit of 2 gear sets and 2 multi-plate clutches is that one gear set and clutch is engaged driving the vehicle with the second clutch having already pre-selected the next gear awaiting for power to be transferred. As the next gear has already been pre-selected prior to power being applied, the gear change only takes 3-4 100ths of a second. There is virtually no interruption to power, traction or acceleration. The DSG also offers Tiptronic gear selection and sports mode.

### **Electronic Brake-pressure Distribution (EBD)**

Electronic, more sophisticated means of regulating the ratio of front/rear brake pressure. Settings are varied according to driving and load conditions to ensure each wheel is braked to the optimum extent.

### **Electronic Differential Lock (EDL)**

EDL improves driving and steering characteristics when accelerating on road surfaces where each wheel has a different degree of traction. The system operates automatically and is combined with the ABS system. Using the ABS wheel sensors, EDL monitors the speed of the individual driving wheels. When a difference in driving wheel speed is detected (i.e. when one wheel starts to spin due to differences in road surfaces, e.g. due to water or dirt) the system brakes the spinning wheel, transferring engine power to the wheel with the best traction.

### **Electronic Stabilisation Program (ESP)**

ABS and ASR traction control systems are integrated into the Electronic Stabilisation Program (ESP). In short, ESP helps ensure that the vehicle goes where you steer it even in extreme driving conditions. The ESP system constantly compares the actual movement of the vehicle with pre-determined values and should a situation arise where the vehicle starts to skid, ESP will apply the brakes to individual wheels and automatically adjust the engine's power output to correct the problem. ESP prevents the vehicle from losing control when trying to avoid an accident, for example. It also prevents spinning off on a curve due to either understeer or oversteer.

### **Hill Start Assist (HSA)**

Hill Start Assist (HSA) holds the vehicle when the foot brake is released by temporarily locking the brake pressure (for a maximum of 1.5 seconds) to provide comfortable starting-off without rolling back. Hill Start Assist (HSA) operates on inclines greater than 5% and is fitted in combination with the Direct Shift Gearbox (DSG).

## Australian Environmental Strategy.

### Steps Towards Sustainability

To Volkswagen Group Australia, sustainability means taking responsibility for the environment, as well as actively participating in the development of society. We believe sustainability offers opportunities for long-term innovations, new approaches, efficient technologies and ground-breaking products. Our organisation has established an Environment Committee to manage our business activities and reduce our environmental impact.

### Carbon Management Strategy

We have developed a Carbon Management Strategy to identify and manage carbon emissions from our business activities. Our fuel usage from company cars and energy usage were calculated to measure our Carbon Footprint, and comprehensive carbon reduction targets have been set. Volkswagen Group Australia aims to downsize its environmental footprint in the future.

### Carbon Management Program

Our range of vehicles has earned a reputation for fuel efficiency. We're working to extend that efficiency throughout our entire operational structure. We've initiated a Carbon Management Program, to recommend changes to achieve emissions reductions. We're making real changes in reducing our carbon footprint.

### Environmentally Friendly Engines

Our TSI twin or single-charged petrol engines achieve impressive fuel efficiency with reduced CO<sub>2</sub> emissions. Our TDI diesel engines use less fuel and have lower emissions, with the benefits of high torque and performance. Our diesel particulate filter extracts soot from vehicle exhaust emissions. Numerous engines already fulfill the stringent forthcoming Euro 5 emissions standard.

### Environmentally Friendly Transmission

Our dual-clutch Direct Shift Gearbox (DSG) provides the comfort of a conventional automatic transmission and the dynamic drive of a manual transmission. DSG boasts significantly reduced fuel consumption compared to a conventional automatic transmission. The new 7-speed DSG transmission is the first dual-clutch gearbox with a 'dry' double clutch.
