

Das Auto.

Volkswagen Golf

The Volkswagen Philosophy.

Innovation. Responsibility. Value. At Volkswagen we pride ourselves on this set of beliefs. So when you make the Volkswagen choice you can be assured that you have chosen a car with this creed at the very core of its inception, its development, and its realisation.

At Volkswagen we have combined the power of innovation with exceptional design to deliver a superior driving experience. Superb technologies such as our new low emission TSI petrol and TDI diesel engines not only offer an enhanced driving experience, but significantly reduce both carbon emissions and fuel consumption.

Responsible, efficient environmental considerations such as this not only save you money, but ultimately the planet's precious resources, and is just one example of the many commitments that Volkswagen has made to reduce its carbon footprint.

We are proud of the reputation we have earned for value. A Volkswagen vehicle offers safety, reliability and comfort, making it outstanding value for money. With trusted and timeless German engineering our models are the perfect vehicles for you and your family.

Golf.

Never has the Volkswagen approach of 'thinking differently' been more evident than it is in the Golf. Innovative safety features, subtle yet luxurious refinement and genuine value are brilliantly combined. The Golf's TSI petrol and TDI diesel engines benefit from significantly reduced fuel consumption thanks to German engineering. They meet strict Euro 5 emissions standards and boast improved CO₂ footprints.

The Golf was honoured as the 2009 World Car of the Year as chosen by international automotive journalists from 25 countries.

WORLD CAR OF THE YEAR
WORLD CAR AWARDS

Design.

Golf's uncomplicated yet engaging contours convey clear architecture, precise lines and meticulously crafted surfaces. Due attention has been paid to the vehicle's stellar heritage, with the latest generation Golf incorporating the aesthetic cornerstones that have been winning the hearts and minds of drivers for more than three decades. The signature long roof and steep rear end are evident and the wide rear tail-lights also convey the familiar, compact character that distinguishes this vehicle as a Golf.

Side on, a distinctive contoured character line emerges from the front wheel arch, sharpening toward the rear to form a muscular back end. Front on, the slim-line radiator grille, broad, sleek lower air intake and upward angled headlights convey a clearly defined, sophisticated design.

Volkswagen's constant aspiration for excellence means that affordable innovative technology is at your fingertips in any model within our product range. With technical expertise and the power of innovation, Volkswagen brings moving ideas to the road.

TSI Technology. A miracle of performance.

TSI describes Volkswagen's twin or single-charged petrol engines with direct injection. TSI combines direct injection petrol technology with turbocharging. This innovative engineering has created high tech engines boasting excellent torque and power output at low revolutions, combined with lower fuel consumption and emissions.

The Golf TSI engines are innovative 1.2, 1.4 and 2.0 litre units that save petrol while delivering impressive power and performance thanks to the turbocharger and direct petrol injection. From the driver's seat, all you feel is one continuous, exhilarating surge as it produces high torque at low revs and an abundance of power. It's as economical as many engines with half as much power.

TDI Technology

Volkswagen's cutting-edge TDI engines with Diesel Particulate Filters feature Common Rail technology – injecting precise amounts of fuel at exceedingly high pressure. The result is a cleaner burning engine with exceptional fuel economy, impressive torque and compelling performance.

New Technology.

Adaptive Chassis Control

Adaptive Chassis Control electronically adjusts the damper characteristics for each wheel, ensuring optimum driving comfort for any road surface or driving situation. It achieves the optimum balance between driving comfort and driving dynamics. Adaptive Chassis Control uses sensors to determine wheel positions, speeds and chassis motion, then adjusts the damping for individual wheels.

Direct Shift Gearbox (DSG)

DSG is a new and advanced 6 or 7-speed transmission in which the clutch and gearshift are controlled electronically. What makes DSG unique is that the next gear is already pre-selected and awaiting power to be transferred, resulting in a gear change that takes only 3-4 hundredths of a second. The benefits are virtually no interruption to power, traction or acceleration, and additional flexibility. Furthermore, because it ensures optimum transmission of the engine power, DSG provides excellent fuel consumption and driving satisfaction.

Rear View Camera (RVC)

This brilliant piece of technology is tucked cleverly inside the rear Volkswagen logo – which also ingeniously opens the boot. The Rear View Camera (RVC) provides another dimension of rear ground visibility and safety. Even the trickiest parking spot becomes a breeze. When reverse gear is engaged, the Volkswagen logo tilts to reveal the camera, providing the driver with a clear view of what's behind the vehicle. On-screen guidance lines assist entry into difficult parking spaces.

Park Assist

Park Assist is able to manoeuvre the vehicle into parking spaces for you. If there's enough room to park, Park Assist automatically takes charge of the steering when you select reverse gear. The accelerator, clutch and brake are all you need to control as the Golf is expertly parked for you. Ultrasonic sensors compare the available space with the length of the vehicle, when driving past a parking space at up to 30 km/h.

 Optional extras. Please refer to the specifications section for details on availability of optional equipment by model variant.

RNS510 Satellite Navigation System □

The RNS510 system has a user-friendly touch sensitive screen with a high resolution display that shows maps and video. This unique system calculates your travel route with incredible speed. It also features sophisticated voice recognition technology for increased convenience. With a generous 30GB hard drive and built-in DVD drive, your music library and navigation data is always at your fingertips. Your favourite music can also be accessed via an AUX-IN multimedia socket or an MP3 compatible SD memory card slot.

Optical Parking System (OPS) □

(Included with optional Park Assist with parking sensors)

The Optical Parking System takes the parking aid/parking sensor concept to a new level. A silhouette of the Golf is displayed on the radio or navigation system screen during parking, showing the Golf's position and distance from obstacles. The location of any obstacle within range of the ultrasonic sensors is highlighted on screen.

Electro-Mechanical Power Steering

The Electro-Mechanical Power Steering is a speed-sensitive electrical power-assisted steering system which is only activated when needed and does without any hydraulic components. Compared to hydraulic power steering, vehicles fitted with Electro-Mechanical Power Steering benefit from lower fuel consumption and new convenience and safety functions.

Daytime Driving Lights

Halogen headlights with daytime driving lights with clear polycarbonate lenses and integrated turn signals provide clear illumination and improved driving safety.

Hill Start Assist (HSA)

Hill Start Assist holds the vehicle stationary for 1.5 seconds on hills with an incline greater than 5 percent, when the foot brake is released, by temporarily locking the brake pressure. This intelligent feature provides a comfortable hill start, which importantly avoids any rolling back.

Bluetooth® Phone Connectivity

Volkswagen's Bluetooth® Phone Connectivity allows you to make hands free phone calls to stay connected with your friends while your hands stay connected to the wheel. Bluetooth® Audio Streaming enables you to play music directly from your phone without cables. The system can be operated via the Multi-function Display (MFD Plus) and when equipped, RCD510 or RNS510 touch screens. The system also displays your personalised phone book. It is standard on all models (except for 77TSI and BlueMotion on which it is not available). There is a variety of Volkswagen Genuine Accessory Bluetooth® solutions available for the 77TSI and BlueMotion models.

Media Device Interface (MDI)

This sophisticated new interface facilitates connection to USB audio devices, data storage devices and Apple iPod®. The MDI allows audio files to be operated via the in-dash audio system without the need to input controls via the media device itself. The MDI system also provides a charging function. It is standard from Comfortline models, while the glovebox mounted Media-In can be purchased as an accessory for 77TSI and 90TSI Trendline models.

* iPod® is a registered trademark of Apple Inc.

□ Optional extras. Please refer to the specifications section for details on availability of optional equipment by model variant.

Safety.

Safety is of the highest priority to Volkswagen and is therefore an overriding theme in the design and engineering of the Golf. With a full suite of active and passive safety systems, you can rest assured that your safety has been thoroughly considered. The proof is in the results of independent international testing. In rigorous Australian New Car Assessment Program (ANCAP) crash rating tests, the Golf achieved a maximum 5 star safety rating.

This vehicle has been awarded a maximum 5 Star Rating by ANCAP.

Active Safety – Everything designed to help prevent accidents from happening.

Anti-lock Braking System (ABS)

When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the ABS system reduces brake pressure to that wheel. This prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable.

Brake Assist

During emergency braking, Brake Assist aids the driver by increasing the brake pressure automatically to a level exceeding the locking limit. The ABS is thus quickly brought into the operating range, which enables maximum vehicle deceleration to be achieved.

Electronic Brake-pressure Distribution (EBD)

Every vehicle's centre of gravity shifts forwards when the brakes are applied. This presents a risk of the rear wheels tending to lock up due to the reduction in traction. Electronic Brake-pressure Distribution uses the solenoid valves in the ABS unit to regulate the braking power at the rear wheels, thereby ensuring maximum braking performance at both the front and rear wheels and preventing the rear end from swerving out due to over-braking in the rear wheels.

Anti Slip Regulation (ASR)

ASR is a switchable traction control system that prevents the wheels from spinning under acceleration by intervening in the engine management system and reducing engine torque when necessary.

Electronic Stabilisation Program (ESP)

ESP helps ensure that the vehicle goes where you steer it, even in extreme driving conditions. The ESP system constantly compares the actual movement of the vehicle with carefully pre-determined values. Should a situation arise in which the vehicle starts to skid, ESP will apply the brakes to individual wheels and automatically adjust the engine's power output to correct the problem. It also minimises the likelihood of spinning off on a curve due to understeering or oversteering.

Passive Safety – Design measures taken to protect the occupants of vehicles from injury, or to reduce the risk of injury.

Airbags

All Golf models feature seven airbags – front, front side and front and rear curtain airbags. An airbag is dedicated to protect the driver's knees so that in the event of a crash, the resulting forces are distributed more evenly and less stress is transferred to the body.

Crumple Zones

Front and rear crumple zones absorb the energy of an impact and divert the resulting forces away from the secure passenger safety cell.

Crash Impact Sound Sensor

The new generation Golf is equipped with the CISS (Crash Impact Sound Sensor) for the first time. This remarkable innovation detects the sound frequencies of noises typically heard during a crash, cross-checks them against deceleration sensors, and activates the airbags and seatbelt pre-tensioners in above average time. The hundredths of seconds it saves can be crucial in a crash situation. CISS is also perceptive in recognising minor accidents, so that airbags won't unnecessarily deploy.

Safety Optimised Head Restraints

Safety Optimised Head Restraints on the front seats are optimally positioned and specially contoured to help reduce whiplash injuries. In the event of an accident, excellent protection is achieved via the seatback controlling upper body movements, and this is balanced with head movements being controlled via the head restraints.

Seatbelts

Front seat passenger seatbelts are equipped with belt pre-tensioners and belt force limiters. Belt tensioners tighten the seatbelt on impact, pulling it closer to the occupant's body, ideally positioning them for airbag inflation. Belt force limiters reduce seat belt forces on front seat occupants and, in conjunction with belt tensioners and airbags, lessen the risk of upper body injuries. Three-point seatbelts are fitted to all seats, and three child seat anchor points are fitted in the rear.

Interior.

The Golf's impressive interior consists of high quality materials and finishes that convey an ambience of prestige. Slip behind the sculptural steering wheel and into the height adjustable, premium quality driver's seat and you'll discover an array of creature comforts that make every drive pleasurable.

The sophisticated interior is impressive for its particularly well thought out design. The flowing lines connecting the dashboard and centre console are a striking feature. In the choice of material quality and surface design, great attention was paid to the tactile quality - after all, good design should also feel good.

White illumination emanates from behind the 3-spoke steering wheel, and is aesthetically pleasing and easy to read in a variety of lighting conditions. The Multi-Function Display informs the driver of essential information during your journey.

The superbly quiet cabin can be a tranquil place or the perfect venue for turning up the RCD310 audio system – creating a high quality audio experience in every seat. An auxiliary audio input socket for MP3 player adaptability can be found in the centre console.

Comfortline interior shown.

The Golf Range.

The Golf range offers three diesel and five petrol models offering astonishingly low fuel consumption, performance and luxury, depending on your requirements. A superb range of optional extras means you can tailor your new Golf to your own driving needs. Slip into tighter city spaces using optional Park Assist with front and rear sensors, or the Rear View Camera.

Each model in the Golf hatch range benefits from a 5 star safety rating from ANCAP plus active safety systems such as Electronic Stabilisation Program (ESP) and Anti-lock Braking System (ABS) with Brake Assist. Passive safety is also covered with seven airbags and safety optimised front head restraints as standard. Innovative technology is always at your fingertips via the RCD310 entertainment system, the illuminated, chillable and lockable glove box plus a Multi-Function Display. Other impressive standard features include daytime driving lights, remote central locking and an auxiliary input socket for external audio devices such as an MP3 player.

Volkswagen's TSI direct injection petrol engines or TDI common rail turbo diesel engines deliver impressive performance, coupled with manual or DSG transmissions. Volkswagen engineers have made significant fuel consumption reductions in both petrol and diesel engines. As a result, all of the Golf's petrol and diesel engine variants meet tough new Euro 5 emissions standards, with reduced fuel consumption and improved CO₂ footprints.

77TSI. Comprehensive safety with comfort and convenience.

The splendid interior of the 77TSI boasts air conditioning, RCD310 entertainment system with MP3 compatibility, Multi-Function Display (MFD) as well as an auxiliary input socket for external audio devices such as an MP3 player. Hill Start Assist (HSA) is also standard.

The 77TSI features a 1.2 litre TSI petrol engine delivering 77kW of power and 175Nm of torque yet boasting a combined fuel consumption of just 6.1L/100km,* emitting just 144g/km* of CO₂. It comes with your choice of a 6-speed manual or optional 7-speed DSG transmission and an impressive list of standard safety features, including no less than seven airbags, Electronic Stabilisation Program (ESP), ABS brakes with Brake Assist, Electronic Differential Lock (EDL) and Anti-Slip Regulation (ASR) traction control.

This model has been awarded a maximum 5 star rating by the Green Vehicle Guide (7-speed DSG transmission).

*6-speed manual, as per Australian Design Rule (ADR) 81/02.

90TSI Trendline. Innovative technology and quality with substance.

The splendid interior of the 90TSI Trendline boasts a Multi-Function Display (MFD Plus), RCD310 entertainment system with MP3 compatibility, Bluetooth® connectivity as well as cruise control. Hill Start Assist (HSA) and 15" Wellington alloy wheels also come standard. The 90TSI Trendline has a single-charged 1.4 litre TSI petrol engine, with four valves per cylinder for greater fuel efficiency and contra-rotating balancing shafts for even quieter operation. With 90kW of power and 200Nm of torque, the 90TSI Trendline comes with the choice of a 6-speed manual or optional 7-speed DSG transmission. The 90TSI Trendline engine boasts a combined fuel consumption of just 6.2L/100km,* emitting just 143g/km* of CO₂. Safety features include ABS with Brake Assist, Electronic Stabilisation Program (ESP), Anti-Slip Regulation (ASR) traction control and seven airbags.

This model has been awarded a maximum 5 star rating by the Green Vehicle Guide (7-speed DSG transmission).

*7-speed DSG, as per Australian Design Rule (ADR) 81/02.

Stylish 15" Wellington alloy wheels are standard on the Golf 90TSI Trendline.

Park Assist shown is an optional extra.

118TSI Comfortline. Powerful yet economical performance with finesse.

The 118TSI's Comfortline interior exudes finesse, with height and lumbar adjustable comfort front seats, Media Device Interface (MDI), 'Black Pyramid' decorative inlays, Bluetooth® connectivity, Multi-Function Display (MFD Plus) and a multi-function steering wheel. Hill Start Assist (HSA) and 16" Cleveland alloy wheels are standard. The 118TSI Comfortline has a supercharged and turbocharged 1.4 litre TSI engine for powerful yet economical performance. With 118kW of power and 240Nm of torque, the 118TSI Comfortline engine boasts a combined fuel consumption of just 6.2L/100km,* emitting just 144g/km* of CO₂. It comes with the choice of a 6-speed manual or optional 7-speed DSG transmission. Safety features include ABS with Brake Assist, Electronic Stabilisation Program (ESP), Anti-Slip Regulation (ASR) traction control and seven airbags.

*7-speed DSG, as per Australian Design Rule (ADR) 81/02.

The Volkswagen 1.4-litre TSI Twincharger engine has been awarded International Engine of the Year 2010 and also came first in the 1.0 litre to 1.4 litre category.

International Engine Of The Year
Volkswagen 1.4-litre TSI Twincharger

103TDI Comfortline. Sophisticated comfort that delivers impressive performance with outstanding efficiency.

The luxurious interior appointments of the 103TDI Comfortline feature dual zone automatic climate control air conditioning and rain sensing windscreen wipers. 16" Cleveland alloy wheels are standard. The 103TDI Comfortline has a common rail 2.0 litre TDI engine with Diesel Particulate Filter to deliver a smoother, quieter and more efficient engine. With 103kW of power and an enormous 320Nm of torque that can compete with many V6 petrol engines, the 2.0 litre TDI engine delivers an exhilarating drive. The 103TDI Comfortline comes with a 6-speed DSG transmission. Safety features include ABS with Brake Assist, Electronic Stabilisation Program (ESP), Anti-Slip Regulation (ASR) traction control and seven airbags.

Smooth and silent, the 2.0 TDI boasts a combined fuel consumption of just 5.6L/100km*, emitting just 147g/km* of CO₂, making trips of 1,000km possible on a single tank. From an environmental perspective, the clean burning 2.0 TDI meets the stringent Euro 5 emissions standards.

*6-speed DSG, as per Australian Design Rule (ADR) 81/02.

Park Assist and sunroof shown are optional extras.

Bi-xenon headlights shown are optional extras.

Golf GTD

The Golf GTD extends the Golf performance range with a more sporty style. Its optional 6-speed DSG transmission features a sports mode and Tiptronic function for an even more exciting drive. You can enjoy all the benefits of a diesel engine that you usually wouldn't find in a performance car, including high fuel efficiency and reduced CO₂ emissions. The Golf GTD delivers all the performance of a 2.0 litre turbo charged TDI engine, with the fuel economy of a diesel. Thanks to its 350Nm of torque and 125kW of power, it accelerates from 0-100km/h in a surprising 8.1 seconds. It also features Volkswagen's Common Rail technology with diesel particulate filter, offering a low combined fuel consumption of just 5.5.L per 100km*.

As you sit in the Jacky upholstered GTD sports seats (with height and lumbar adjustment), run your hands over the chrome-plated gearshift knob and multi-function leather steering wheel, with optional DSG gearshift paddles. Innovative technology is always at your fingertips with the RCD510 entertainment system with 6 disc CD player and touch screen, MP3 compatibility, SD card slot, auxiliary input and 8 speakers. Hill Start Assist (HSA) also comes standard. An impressive list of standard safety features includes no less than seven airbags, Electronic Stabilisation Program (ESP), ABS brakes with Brake Assist, Electronic Differential Lock (EDL) and Anti-Slip Regulation (ASR) traction control.

*6-speed manual, as per Australian Design Rule (ADR) 81/02.

Golf GTI

The Golf GTI's svelte lines, aerodynamic contours and sports inspired styling convey an inspirational character. From the front, the Golf GTI is supremely stylish, featuring its renowned black honeycomb grille, traditional red trim strips and gleaming chrome GTI badge. Standard 17" Denver or optional 18" Detroit alloy wheels dominate the Golf GTI's powerful side profile. At the rear, neatly integrated into either side of the black rear diffuser, the chrome exhaust tailpipes hint at the power beneath the bonnet, with its wide stance delivering sports prowess.

When you slide into the front sports seats and grasp the leather rimmed Multi-Function sports steering wheel, you'll sense the adrenalin beginning to intensify. Red decorative stitching in the steering wheel and gearshift lever convey unmistakable styling. Vehicles with a DSG transmission are also equipped with gear shift paddles.

Powered by a 4 cylinder inline turbocharged direct injection petrol engine, the Golf GTI's heart beats with 155kW of power, 280Nm of torque and it accelerates from 0 to 100km/h in 6.9 seconds. The TSI engine boasts a combined fuel consumption of just 7.6L/100km* and emits just 178g/km* of CO₂. It also meets stringent Euro 5 emissions standards. It comes with your choice of a 6-speed manual or optional 6-speed DSG transmission. Hill Start Assist (HSA) also comes standard. An impressive list of standard safety features includes no less than seven airbags, Electronic Stabilisation Program (ESP), ABS brakes with Brake Assist, Electronic Differential Lock (EDL) and Anti-Slip Regulation (ASR) traction control.

*6-speed DSG, as per Australian Design Rule (ADR) 81/02.

18" Detroit alloy wheels and electric glass sunroof shown are optional extras.

19" Talladega alloy wheels shown are optional extras.

Golf R

The Golf R is the most powerful Golf released in Australia. It continues the dynamic tradition of the R family, with uncompromised performance. Its bold styling boasts gloss black highlights such as the R-specific radiator grille with R badge, exterior mirrors and brake callipers. With the class-leading build and quality of German engineering, the Golf R is everything you'd want in a performance car.

The Golf R's 2.0 litre TSI petrol engine is turbocharged and features direct injection technology, harnessing 188kW of power and a remarkable 330Nm of torque. With a 6-speed manual or optional 6-speed Direct Shift Gearbox (DSG) transmission, the Golf R accelerates from 0-100km/h in 5.9 seconds (manual) or 5.7 seconds (DSG). All while fulfilling the Euro 5 emissions standards. For more dynamic performance, the Golf R's power is transferred to the road via our 4MOTION all-wheel drive system. It provides the Golf R with the best possible traction at all road speeds, on any road condition and in all weather.

Slip behind the wheel of the Golf R, featuring gloss black inserts and optional DSG gearshift paddles. Recline in the R top sports seats, with height and lumbar adjustment, tailored in a combination of Kyalami black cloth and San Remo microfibre. Glimpse over the blue needled instrument dials and Silver Lane decorative interior trim. Set your ideal driving temperature with dual zone automatic climate control air conditioning, and enjoy some tunes through the RCD510 6-disc CD sound system with 8 speakers. Hill Start Assist (HSA) also comes standard.

An impressive list of standard safety features includes no less than seven airbags, Electronic Stabilisation Program (ESP), ABS brakes with Brake Assist, Electronic Differential Lock (EDL) and Anti-Slip Regulation (ASR) traction control.

Image is for illustration purposes only.

Optional Equipment.

Adaptive Chassis Control

Adaptive Chassis Control electronically adjusts the damper characteristics for each wheel, ensuring optimum driving comfort for any road surface or driving situation. It achieves the optimum balance between driving comfort and driving dynamics, based on a newly developed control algorithm.

Sunroof

The optional electric glass sunroof is slide and tilt adjustable with sunblind.

RNS510 Satellite Navigation System ☐

The RNS510 system has a user-friendly touch sensitive screen with a high resolution display that shows maps and video. This unique system calculates your travel route with incredible speed. It also features sophisticated voice recognition technology for increased convenience. With a generous 30GB hard drive and built-in DVD drive, your music library and navigation data is always at your fingertips. Your favourite music can also be accessed via an MP3 compatible AUX-IN multimedia socket or SD memory card slot.

Rear View Camera (RVC) ☐

Even the trickiest parking spot becomes a breeze with the Rear View Camera, giving the driver clear sight of what's behind the vehicle. On-screen guidance lines assist entry into difficult parking spaces.

Optical Parking System (OPS) ☐

The Optical Parking System (included with optional Park Assist with parking sensors) takes the parking aid/parking sensor concept to a new level. A silhouette of the Golf is displayed on the radio or navigation system screen during parking, showing the Golf's position and distance from obstacles. Any obstacle within range of the ultrasonic sensors is shown on screen.

Optional RNS510 system shown.

Park Assist With Front And Rear Parking Sensors ☐

Park Assist is able to manoeuvre the vehicle into spaces with as little as 1.1 metres in addition to the length of the vehicle, with several moves if necessary. If there's enough room to park, Park Assist automatically takes charge of the steering when you select reverse gear. The accelerator, clutch and brake are all you need to control as the Golf is expertly parked for you.

DYNAUDIO Excite 300W Premium Audio System ☐

The optional DYNAUDIO Excite Premium Audio System delivers superb sound quality with 300W and 8 speakers. DYNAUDIO Excite is available in combination with either the RCD510 in-car entertainment system or the RNS510 Satellite Navigation System.

☐ Optional extras. Please refer to the specifications section for details on availability of optional equipment by model variant.

Optional Sport Package available for Comfortline.

Dark tinted rear side and rear windows

Dark tinted rear side and rear windows provide increased privacy and comfort.

A low tyre pressure indicator and sports suspension are also included in the Sport Package.

Sports Seats

Sports seats upholstered in sports cloth add an extra touch of finesse.

Front Fog Lights

Front fog lights with static cornering function add a sporty element and an additional safety feature.

17" Seattle Alloy Wheels
Stylish 17" Seattle alloy wheels
add charisma to the Comfortline.

Optional extras.

Volkswagen Genuine Accessories.

Movement fascinates. In fact, there are few subjects that excite people more, that's because movement is synonymous with freedom. Our comprehensive range of genuine accessories give you the freedom to customise the look and feel of your vehicle to reflect your own personality and individual sense of style.

The product philosophy is simple – to deliver innovative technologies and premium design – right down to the finest detail. Each and every genuine accessory has been designed specifically with the Golf in mind and has been engineered and rigorously tested to ensure that it meets the same high standards of quality as the vehicle itself.

No matter what you choose you can have peace of mind knowing that any genuine accessory fitted by your local Volkswagen Dealer, at the time of your vehicle purchase will be covered by the same warranty as the vehicle itself.

For more information or to experience the full range of Genuine Accessories designed to suit the Golf, visit your local Volkswagen Dealer.

Fuel Saving Tips.

We can all Think Blue.

At Volkswagen, we believe we have a responsibility to produce the most fuel efficient, environmentally sustainable vehicles possible. But the good news is that all of us can Think Blue. By driving more responsibly, there are benefits that are real and noticeable right here, right now.

Below, we have summarised the best tips for how you can drive more responsibly and reduce fuel consumption. It's not just your wallet that will benefit from these tips, but the environment too. Its practical benefits go far beyond just saving money and reducing emissions. Reducing your consumption will put money back in your pocket as you enjoy low-emission motoring – and it couldn't be simpler.

Here are nine tips on how to drive more efficiently.

Be aware and save fuel. Think Blue.

01. Take it easy and save. Drive the modern way and think ahead.

Aggressive driving – hard braking and acceleration, sudden lane changes and unpredictable behaviour – is also fuel-inefficient driving. Instead, take a modern approach: predictive driving. Drive smoothly, watching as far ahead as you can to anticipate hazards and other events; cruise with the traffic and use your momentum to help you arrive safe and relaxed.

02. Change up early and fill up later. Drive in the highest gear possible.

If you have a manual transmission, work your way up through the gears as quickly as you can. Change into second gear once you've moved forward a car length, and cruise in the highest gear that's practical. It's like riding a bike – cruising at low revs uses far less energy than pedaling hard all the time. With an automatic, reduce excessive acceleration and avoid a kick down.

03. Just let it roll. Use overrun fuel cutoff.

With the right driving techniques you can really start saving. The overrun fuel cutoff feature interrupts fuel supply to the engine so that not a single drop of fuel is used. Simply take your foot off of the accelerator, keeping your car in gear when coasting down hills or towards traffic lights. This will reduce your fuel usage.

04. Comfort high, fuel consumption low. Use auxiliary equipment in moderation.

We all love our sound systems, air conditioning and other creature comforts, but they all use energy, which ultimately means that they all consume fuel. Turn off seat heaters and de-misters once they've done their job. Open your windows for a moment or two as you drive off in summer to let the hot air circulate out before reaching for the air conditioning. Check your route before you get going and the equipment you're using – if you don't need it, consider turning it off.

05. Savings are in the air. Check your tyre pressures.

Checking your tyre pressures before driving off can pay big dividends when it comes to cutting fuel consumption. Under-inflated tyres massively increase rolling resistance, forcing your car to work harder (and burn more fuel) just to move down the road. If you're buying new tyres, look out for those with lower rolling resistance. Keeping your tyres in good order can help you save fuel before you've even driven off!

06. A warm engine – a cool way to save. Avoid short trips.

Many short trips means higher fuel consumption. Why? Because cold engines run less efficiently, and lots of short trips means your engine will spend much more time running cold. Plan your errands to minimise the number of trips you need to make and you'll save yourself time and stress as well as fuel and emissions. (It's unnecessary to run the engine just to warm it up – as it doesn't reduce fuel consumption and is environmentally unfriendly.)

07. Well-oiled for impressive savings. Use Volkswagen approved engine oils.

A well-lubricated engine produces less emissions than a poorly lubricated engine, especially when the weather is cold or the trip is short. Volkswagen Approved engine oils circulate easily, helping reduce fuel consumption and emissions. So make sure you use Volkswagen Approved engine oils and make sure you stick to your car's recommended oil change intervals.

08. Keep it sleek. Cut aerodynamic drag.

Aerodynamics can have a significant impact on fuel consumption, especially on longer trips. So make sure you take your roof racks, bike racks, roof boxes and other attachments off your car when they're not in use. And keep windows up (and sunroofs closed) when cruising, as the air turbulence they create increases drag and hence, fuel consumption. You'll feel the difference as you drive and you'll see the difference at the fuel bowser.

09. Lightly does it. Avoid unnecessary weight.

Every kilogram you load into your car takes energy to move – energy that will be supplied by burning fuel. You don't want to be caught short of items you need, but there's no point in lugging around your golf clubs, tent, portable barbecue and full tool box 'just in case'. Pare your regular load down to the minimum and enjoy the space as well as the fuel savings.

Owning a Volkswagen.

Volkswagen New Vehicle Warranty

Every new Volkswagen Golf referred to in this brochure is covered by a 3 year (unlimited kilometre) manufacturer's warranty, which includes Volkswagen Assist (24hr roadside assistance). Every new Volkswagen passenger vehicle is also covered by a 3 year paintwork and 12 year anti-corrosion perforation warranty.

Volkswagen Assist – 24 Hour Roadside Assistance

As a valued customer, you can be assured that wherever you travel within Australia, you will have access to roadside assistance, 24 hours a day, 365 days a year. This is complimentary for the duration of the vehicle's original Volkswagen warranty period. You will receive help in the event of a breakdown or accident and if required, your vehicle will be mobilised or transported to an Authorised Volkswagen Repair Centre.

As a Volkswagen owner you will also have access to the additional benefits of accommodation and car rental if your vehicle cannot be mobilised within 24 hours, when you are over 100kms away from home. Volkswagen Roadside Assist can also be renewed at the expiry of the original warranty, ensuring ongoing coverage for your vehicle.

Volkswagen New Vehicle Extended Warranty*

To give you added peace of mind and the assurance of added security, you have the option to extend the warranty period to suit your ownership cycle. If your Volkswagen is still covered by its New Vehicle Warranty, we can offer you a 36 month/60,000km extension on the original warranty period already existing with your Volkswagen manufacturers Warranty. You then have the assurance that your Volkswagen remains a Volkswagen. For further information regarding warranty and extending your vehicles warranty period, please consult your local Volkswagen dealer, refer to your owner's handbook or visit volkswagen.com.au.

* Volkswagen New Vehicle Extended Warranty product is provided by Allianz Australia Insurance Limited (Allianz) ABN 15 000 122 850, AFSL Licence No. 234708. In arranging this cover, Volkswagen Group Australia Pty Ltd, ABN 14 093 117 876 and the authorised dealers act as agents of Allianz and not as your agent. Limits apply to the benefits you can claim. For full terms and conditions of cover, please refer to the relevant Volkswagen New Vehicle Extended Warranty policy document, available to you from your Volkswagen authorised motor dealer.

Volkswagen Service

Your Authorised Volkswagen Service Centre is part of Volkswagen's global Quality Management System, ensuring all dealers are certified to ISO 9001:2000 – an internationally recognised Quality Standard. Authorised Volkswagen Service Centres have factory trained Technicians equipped with the very latest diagnostic equipment, specialist tooling and Volkswagen Genuine Parts. An Authorised Volkswagen Service Centre is able to undertake work in accordance to factory specified guidelines and maintenance schedules.

Volkswagen Genuine Parts®

Volkswagen Genuine Parts® are designed for your vehicle and approved by Volkswagen, with particular regard to safety. The workmanship, dimensional accuracy and materials used in these parts comply with factory specifications. To ensure safety and reliability, Volkswagen recommends the use of Volkswagen Genuine Parts®. Volkswagen Authorised Dealers offer a 3-years/unlimited kilometres warranty on Genuine Parts if fitted prior to vehicle purchase, or a 2-years/unlimited kilometres warranty if fitted after purchase.

Volkswagen Finance

Whether you are buying, borrowing or leasing, Volkswagen Finance will certainly make you think differently about financing and insuring your new Volkswagen. Committed to meeting the needs of Volkswagen drivers across Australia, we offer a range of leasing, financing and insurance products, each with distinct advantages depending on your specific circumstances. Our packages are designed to suit your individual requirements and budgeting needs with fast approval times.

Speak to your participating local Volkswagen Dealer today for the best financial solution and ultimate insurance protection for your vehicle or visit volkswagenfinance.com.au.

VOLKSWAGEN FINANCE

Glossary.

4MOTION

An all-wheel-drive system that provides the best possible traction at all road speeds, in all weather and road conditions. An electronic Haldex clutch responds to traction losses at the front and rear axles and directs torque to the axle with the best traction.

Adaptive Chassis Control*

The electrically controlled dampers of adaptive chassis control constantly adjust to the road conditions, the driving situation and driver's requirements. Using a button located on the centre console, the driver selects between three damper settings – NORMAL, COMFORT and SPORT.

Starting from the normal setting, the driver can change the basic character of the car towards sporty or more comfort-oriented driving. In SPORT and COMFORT settings, the corresponding name is illuminated in the button. In NORMAL setting, only the shock absorber symbol is illuminated. In all settings, the adaptive chassis control adjusts the damping to the particular driving situation (up till one thousand times per second) which means it offers an optimum level of driving comfort and enjoyment at all times. In addition, in the SPORT setting the steering feel is also adapted. Particularly on windy roads and poor surfaces, using adaptive chassis control offers sporty and yet comfortable driving.

Anti-lock Braking System (ABS)

When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the ABS system reduces brake pressure to that wheel. This prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable.

Anti-Slip Regulation (ASR)

ASR is a switchable traction control system that prevents the wheels from spinning under acceleration by reducing engine torque.

Brake Assist

During emergency braking, Brake Assist aids the driver by increasing the brake pressure automatically to a level exceeding the locking limit. The ABS is thus quickly brought into the operating range, which enables maximum vehicle deceleration to be achieved.

Direct Shift Gearbox (DSG)

DSG is a manual gearbox in which the gearshifts are controlled electronically. What makes the DSG unique is that it has 2 separate gear sets operated by 2 multi-plate clutches. The benefit of 2 gear sets and 2 multi-plate clutches is that one gear set and clutch is engaged driving the vehicle with the second clutch having already pre-selected the next gear awaiting for power to be transferred. As the next gear has already been pre-selected prior to power being applied, the gear change only takes 3-4 100ths of a second. There is virtually no interruption to power, traction or acceleration. The DSG also offers Tiptronic gear selection and sports mode.

Electronic Brake-pressure Distribution (EBD)

Electronic, more sophisticated means of regulating the ratio of front/rear brake pressure. Settings are varied according to driving and load conditions to ensure each wheel is braked to the optimum extent.

Electronic Differential Lock (EDL)

EDL improves driving and steering characteristics when accelerating on road surfaces where each wheel has a different degree of traction. The system operates automatically and is combined with the ABS system. Using the ABS wheel sensors, EDL monitors the speed of the individual driving wheels. When a difference in driving wheel speed is detected (i.e. when one wheel starts to spin due to differences in road surfaces, e.g. due to water or dirt) the system brakes the spinning wheel, transferring engine power to the wheel with the best traction.

Electronic Stabilisation Program (ESP)

ABS and ASR traction control systems are integrated into the Electronic Stabilisation Program (ESP). In short, ESP helps ensure that the vehicle goes where you steer it even in extreme driving conditions. The ESP system constantly compares the actual movement of the vehicle with pre-determined values and should a situation arise where the vehicle starts to skid, ESP will apply the brakes to individual wheels and automatically adjust the engine's power output to correct the problem. ESP prevents the vehicle from losing control when trying to avoid an accident, for example. It also prevents spinning off on a curve due to either understeer or oversteer.

Extended Electronic Differential Lock (XDL)

XDL is an extension of the Electronic Differential Lock (EDL) function. When cornering, XDL responds to the load relief at the front wheel on the inside of a corner. The ESP hydraulics are used for the XDL to apply pressure to the wheel on the inside of the corner in order to prevent wheel spin. This improves traction and reduces the tendency to understeer. As a direct result of the one-sided and precise braking pressure, cornering is sportier and more accurate.

Hill Start Assist (HSA)

Hill Start Assist (HSA) holds the vehicle when the foot brake is released by temporarily locking the brake pressure (for a maximum of 1.5 seconds) to provide comfortable starting-off without rolling back. Hill Start Assist (HSA) operates on inclines greater than 5% and is fitted in combination with both the manual transmission and the Direct Shift Gearbox (DSG).

Park Assist*

Park Assist actively helps the driver when reversing into parallel parking spaces. The system works by using sensors mounted either side of the front bumper together with parking distance sensors front and rear. To parallel park the driver needs to press the Park Assist button and use the appropriate indicator before the car passes the potential parking space. Sensors in the front bumper then scan the size of the parking space as the car is driven slowly past and the driver is alerted if the parking space is big enough. If there is sufficient space, the driver stops the car, selects reverse and let's go of the steering wheel.

Park Assist will alert the driver of the intended reverse path in the Multi-Function Display, within the driver's field of vision. Park Assist then actively supports the driver by taking over the steering control and parks the vehicle in the available space using the ideal course, if necessary with several moves. The driver can however take over the control of the steering at any time and end the automatic parking procedure. The system can reverse into parking spaces on both the left hand and right hand side of the road, for example on one way streets.

Park Assist cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle. If the driver notices a risk that pedestrians, other vehicles or objects could be damaged or if they are uncertain of the risk, they will need to react accordingly and stop the vehicle, ending the function.

*Optional equipment for specific models

Think Blue. Creating a sustainable future together.

Volkswagen is committed to sustainability now and in the future, for us this means taking responsibility for the environment by getting involved in initiatives that contribute to a sustainable future through our products and behaviour.

We call this way of thinking, Think Blue.

Volkswagen aims to become the leading automotive manufacturer for the environment and economy, making efficient and sustainable vehicles available to everyone. We want to inspire and motivate people to get involved in ecological sustainability, on the road and everywhere else.

Das Auto.

Volkswagen Golf

Printed in Australia

August 2011

Publication: VGA3009N

Internet: www.volkswagen.com.au

For further information please call: 1800 060 936

Volkswagen is distributed by Volkswagen Group Australia Pty Ltd, The Lakes Business Park, 6 Lord Street, Botany, NSW 2019. ABN 14 093 117 876. Specifications are as planned at August 2011, for Model Year 2012 and are subject to change without notice or obligation. Cars and accessories shown may be overseas models. Fuel consumption figures according to Australian Design Rules (ADR) 81/02. All Volkswagen approved parts and accessories are warranted for 3 years/unlimited kilometres if fitted prior to vehicle purchase, or for 2 years/unlimited kilometres if fitted after purchase. All information in this brochure is correct at the time of publication, however variations may occur from time to time and Volkswagen, in so far as it is permitted by law to do so, shall not be liable in any way as a result of any reliance by any person on anything contained in this brochure. The colours shown in this brochure are indicative only and may vary from actual items owing to the printing process. Authorised Volkswagen dealers will provide up-to-date information on model application, design feature, prices and availability on request.

Volkswagen Insurance & Volkswagen Extended Warranty are provided by Allianz Australia Insurance Limited (Allianz), AFS Licence No. 234708, ABN 15 000 122 580. In arranging this insurance Volkswagen Financial Services Australia Pty Limited, ABN 20 097 071 460 & Volkswagen Group Australia Pty Ltd, ABN 14 093 117 896 and the authorised dealers act as agents of Allianz and not as your agent. Volkswagen Finance is a trading name of Volkswagen Financial Services Australia Pty Limited. Locked Bag 5009, Alexandria NSW 2015. Tel: 02 9695 6311.
