

Das Auto.

Volkswagen Golf Wagon

The Volkswagen Philosophy.

Innovation. Responsibility. Value. At Volkswagen we pride ourselves on this set of beliefs. So when you make the Volkswagen choice you can be assured that you have chosen a car with this creed at the very core of its inception, its development, and its realisation.

At Volkswagen we have combined the power of innovation with exceptional design to deliver a superior driving experience. Superb technologies such as our new low emission TSI petrol and TDI diesel engines not only offer an enhanced driving experience, but significantly reduce both carbon emissions and fuel consumption.

Responsible, efficient environmental considerations such as this not only save you money, but ultimately the planet's precious resources, and is just one example of the many commitments that Volkswagen has made to reduce its carbon footprint.

We are proud of the reputation we have earned for value. A Volkswagen vehicle offers safety, reliability and comfort, making it outstanding value for money. With trusted and timeless German engineering our models are the perfect vehicles for you and your family.

Golf Wagon.

The Golf Wagon expands the Golf family, offering all the quality, reliability, safety and style of a Golf - with the added space and versatility of a wagon. It is the perfect companion for those who just need more Golf. It's also flexible enough to fulfill your practical needs whilst delivering German engineering with stylish design. The Golf Wagon is a flexible companion for holidays, business trips or everyday use.

Design.

The Golf Wagon's exceptional design is conveyed through powerful lines that accentuate its athletic character. Exuding quality and charisma, the front end design is unmistakably Golf. The broad, sleek lower air intake and upward angled headlights that flow seamlessly into the slim-line radiator grille convey a clearly defined, sophisticated design. The rear design is both sporty and elegant, with the rear light clusters and fully body-coloured bumper blending into the body, giving the Golf Wagon its distinctive appearance, while the integrated rear tailgate spoiler optimises aerodynamics.

Volkswagen's constant aspiration for excellence means that affordable innovative technology is at your fingertips in any model within our product range. With technical expertise and the power of innovation, Volkswagen brings moving ideas to the road.

TSI Technology. A miracle of performance.

TSI describes Volkswagen's twin or single-charged petrol engines with direct injection. This innovative engineering has created high tech engines boasting excellent torque and power output at low revolutions, combined with lower fuel consumption and emissions.

The Golf Wagon TSI engine is an innovative 1.4 litre unit that saves petrol while delivering impressive power and performance thanks to the turbocharger and direct petrol injection. A turbocharger compresses the air required for combustion. Compared with a naturally aspirated engine with the same displacement, a turbocharged engine can produce higher power and torque, as well as being highly efficient.

TDI Technology.

Volkswagen's cutting-edge TDI engines with Diesel Particulate Filters feature Common Rail technology – injecting precise amounts of fuel at exceedingly high pressure. The result is a cleaner burning engine with exceptional fuel economy, impressive torque and compelling performance.

New Technology.

Park Assist with front and rear parking sensors

Park Assist is able to manoeuvre the vehicle into parking spaces for you. If there's enough room to park, Park Assist automatically takes charge of the steering when you select reverse gear. The accelerator, clutch and brake are all you need to control as the Golf Wagon is expertly parked for you. Ultrasonic sensors compare the available space with the length of the vehicle, when driving past a parking space at up to 30 km/h.

Rear View Camera (RVC)

The Rear View Camera (RVC) provides another dimension of rear ground visibility and safety. Even the trickiest parking spot becomes a breeze. When reverse gear is engaged, the driver is provided with a clear view of what's behind the vehicle. On-screen guidance lines assist entry into difficult parking spaces.

Direct Shift Gearbox (DSG)

DSG is a new and advanced 6 or 7-speed transmission in which the clutch and gearshift are controlled electronically. What makes DSG unique is that the next gear is already pre-selected and awaiting power to be transferred, resulting in a gear change that takes only 3-4 hundredths of a second. The benefits are virtually no interruption to power, traction or acceleration, and additional flexibility. Furthermore, because it ensures optimum transmission of the engine power, DSG provides excellent fuel consumption and driving satisfaction.

Optical Parking System (OPS)

The Optical Parking System takes the parking aid/parking sensor concept to a new level. A silhouette of the Golf Wagon is displayed on the radio or navigation system screen during parking, showing the Golf Wagon's position and distance from obstacles. Any obstacle within range of the ultrasonic sensors is shown on screen and heard via an audible warning.

Optional extras.

RNS510 Satellite Navigation System ☐

The RNS510 system has a user-friendly touch sensitive screen with a high resolution display that shows maps and video. This unique system calculates your travel route with incredible speed. It also features sophisticated voice recognition technology for increased convenience. With a generous 30GB hard drive and built-in DVD drive, your music library and navigation data is always at your fingertips. Your favourite music can also be accessed via an AUX-IN multimedia socket or an MP3 compatible SD memory card slot.

Daytime Driving Lights

Halogen headlights with daytime driving lights that have clear polycarbonate lenses and integrated turn signals provide clear illumination and improved driving safety.

Electro-mechanical Power Steering

Electro-mechanical power steering is a speed-sensitive electrical power assisted steering system which is only activated when needed and does without any hydraulic components. Compared to hydraulic power steering, vehicles fitted with electro-mechanical power steering benefit from lower fuel consumption and new convenience and safety functions.

Hill Start Assist (HSA)

Hill Start Assist holds the vehicle stationary for 1.5 seconds on hills with an incline greater than 5 percent, when the foot brake is released, by temporarily locking the brake pressure. This intelligent feature provides a comfortable hill start, which importantly avoids any rolling back.

Bluetooth™ Phone Connectivity ☐

Volkswagen's Bluetooth™ Phone Connectivity allows you to make hands free phone calls to stay connected with your friends while your hands stay connected to the wheel. Bluetooth™ Audio Streaming enables you to play music directly from your phone without cables. The system can be operated via the Multi-function Display (MFD Plus) and when equipped, RCD510 or RNS510 touch screens. The system also displays your personalised phone book.

Media Device Interface (MDI) ☐

This sophisticated interface facilitates connection to USB audio devices, data storage devices and Apple iPod®*. The MDI allows audio files to be operated via the in-dash audio system without the need to input controls via the media device itself. The MDI system also provides a charging function.

* iPod® is a registered trademark of Apple Inc.

Safety.

Safety is of the highest priority to Volkswagen and is therefore an overriding theme in the design and engineering of the Golf Wagon. With a full suite of active and passive safety systems, you can rest assured that your safety has been thoroughly considered.

The Golf Wagon's safety credentials include its rigid body structure which creates a solid passenger cell. Its body panels are designed to crumple in the event of an accident, absorbing the energy of the impact. The Golf Wagon's lightweight construction is reinforced with hardened, high strength steel to give occupants maximum protection in an accident.

In an accident, depending on the severity of the impact, the Golf Wagon's safety features work together to protect occupants by deploying the belt tensioners and airbags. The system also activates the hazard warning lights, the doors are unlocked, interior lights are switched on and the fuel pump is deactivated. Pedestrian safety has also been considered with a deformable bonnet to minimize injuries.

Active Safety - Everything designed to help prevent accidents from happening.

Anti Slip Regulation (ASR)

ASR is a switchable traction control system that prevents the wheels from spinning under acceleration by intervening in the engine management system and reducing engine torque when necessary.

Anti-lock Braking System (ABS)

When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the ABS system reduces brake pressure to that wheel. This prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable.

Brake Assist

During emergency braking, Brake Assist aids the driver by increasing the brake pressure automatically to a level exceeding the locking limit. The ABS is thus quickly brought into the operating range, which enables maximum vehicle deceleration to be achieved.

Electronic Brake-pressure Distribution (EBD)

Every vehicle's centre of gravity shifts forwards when the brakes are applied. This presents a risk of the rear wheels tending to lock up due to the reduction in traction. Electronic Brake-pressure Distribution uses the solenoid valves in the ABS unit to regulate the braking power at the rear wheels, thereby ensuring maximum braking performance at both the front and rear wheels and preventing the rear end from swerving out due to over-braking in the rear wheels.

Electronic Differential Lock (EDL)

EDL improves driving and steering characteristics when accelerating on road surfaces where each wheel has a different degree of traction. The system operates automatically and is combined with the ABS system. Using the ABS wheel sensors, EDL monitors the speed of the individual driving wheels. When one wheel starts to spin due to differences in road surfaces, the system brakes the spinning wheel, transferring engine power to the wheel with the best traction.

Electronic Stabilisation Program (ESP)

ESP helps ensure that the vehicle goes where you steer it, even in extreme driving conditions. The ESP system constantly compares the actual movement of the vehicle with carefully pre-determined values. Should a situation arise in which the vehicle starts to skid, ESP will apply the brakes to individual wheels and automatically adjust the engine's power output to correct the problem. It also minimises the likelihood of spinning off on a curve due to understeering or oversteering.

Passive Safety - Design measures taken to protect the occupants of vehicles from injury, or to reduce the risk of injury.

Crumple Zones

Front and rear crumple zones absorb the energy of an impact and divert the resulting forces away from the secure passenger safety cell.

Airbags

Six airbags (twin front, side and curtain) are standard features. Airbags combine with the seat belts to help reduce the risk of severe head and chest injuries in collisions. When inflated, airbags cushion the head and upper body and distribute the resulting loads over as large an area as possible.

Safety Optimised Head Restraints

Safety optimised head restraints on the front seats are optimally positioned and specially contoured to help reduce whiplash injuries. In the event of an accident, excellent protection is achieved via the seatback controlling upper body movements, and this is balanced with head movements being controlled via the head restraints.

Seatbelts

Front seat passenger seatbelts are equipped with belt pre-tensioners and belt force limiters. Belt tensioners tighten the seatbelt on impact, pulling it closer to the occupant's body, ideally positioning them for airbag inflation. Belt force limiters reduce seat belt forces on front seat occupants and, in conjunction with belt tensioners and airbags, lessen the risk of upper body injuries. Three-point seatbelts are fitted to all seats, and three child seat anchor points are fitted in the rear.

Leather appointed seating shown is an optional extra.

Interior.

The Golf Wagon's impressive interior consists of high quality materials and German engineering for superior ergonomics and aesthetics. The sculptural 3-spoke steering wheel gives your hands an intimate connection to the impeccable electro-mechanical power steering. Discover an array of creature comforts that make every drive pleasurable. The sophisticated interior is impressive for its particularly well thought out design. In the choice of material quality and surface design, great attention was paid to the tactile quality – after all, good design should also feel good.

The Golf Wagon's large tailgate ensures the luggage compartment is easily accessible and, thanks to the 60/40 split folding rear seat, can be converted to a flexible storage area. A low loading sill enables you to manoeuvre bulky items with ease. Not only do you experience a generous sense of spaciousness with the Golf Wagon, you also benefit from a host of flexible storage solutions, such as hidden storage compartments that are flush to the floor of the boot.

The superbly quiet cabin can be a tranquil place or the perfect venue for turning up the RCD310 audio system – creating a high quality audio experience in every seat. An auxiliary audio input socket for MP3 player adaptability can be found in the centre console.

The innovative luggage net comes standard with every Golf Wagon and provides the benefits of functionality as well as added safety by keeping luggage in place and away from passengers.

Leather appointed seating shown is an optional extra.

Comfortline interior shown.

The Golf Wagon Range.

The Golf Wagon range offers two diesel and two petrol models offering astonishingly low fuel consumption, performance and luxury, depending on your requirements. A superb range of optional extras means you can tailor your new Golf Wagon to your own driving needs. Add an extra dimension of space and light with the optional panoramic glass roof with electrically operated slide and tilt adjustment. Slip into tighter city spaces using optional Park Assist with front and rear sensors, or the optional Rear View Camera.

Volkswagen's TSI direct injection petrol engines or TDI Common Rail turbo diesel engines deliver impressive performance and fuel efficiency, available with innovative DSG transmissions. The Golf Wagon represents style that combines dynamic design with a high degree of practical benefits. Each model in the Golf Wagon range benefits from active safety systems such as Electronic Stabilisation Program (ESP) and Anti-lock Braking System (ABS) with Brake Assist. Passive safety is also covered with six airbags and front safety optimised head restraints as standard. Innovative technology is always at your fingertips via cruise control, Hill Start Assist (HSA), RCD310 entertainment system, the illuminated, chillable and lockable glove box plus a Multi-Function Display (MFD Plus). 16" Sedona alloy wheels, multi-function leather steering wheel, daytime driving lights, and remote central locking are amongst other innovative standard features.

90TSI Trendline. Distinctive quality and innovative technology.

The 90TSI Trendline makes a favourable impression with standard features including cruise control, RCD310 entertainment system with MP3 compatibility, a Multi-Function Display (MFD Plus) as well as air conditioning. Hill Start Assist (HSA), a multi-function leather steering wheel and 16" Sedona alloy wheels also come standard. The 90TSI features a turbocharged 1.4 litre TSI petrol engine, with four valves per cylinder for greater fuel efficiency. With 90kW of power and 200Nm of torque, the 90TSI engine boasts fuel consumption of just 6.2L/100km,* emitting just 144g/km* of CO₂. From an environmental perspective, the 1.4L TSI meets the stringent Euro 5 emission standards. It comes with the choice of a 6-speed manual or optional 7-speed DSG transmission. Safety features include ABS with Brake Assist, Electronic Stabilisation Program (ESP), Anti-Slip Regulation (ASR) traction control and six airbags.

*7-speed DSG, combined city/highway driving as per Australian Standard ADR 81/02.

Stylish 16" Sedona alloy wheels are standard for all Golf Wagon models.

77TDI Trendline. Astounding fuel economy with resolute value.

The 77TDI Trendline benefits from sophisticated creature comforts such as a Multi-Function Display (MFD Plus), cruise control, a multi-function leather steering wheel, or the illuminated, chillable and lockable glove box. Hill Start Assist (HSA), air conditioning, 16" Sedona alloy wheels, and a leather gearshift knob and handbrake lever also come standard for Trendline models. The 77TDI has a common rail TDI engine with Diesel Particulate Filter to deliver a smoother, quieter and more efficient engine. The 77TDI delivers impressive power from its 1.6 litre Common Rail turbo diesel engine. With 77kW of power and an impressive 250Nm of torque, the 1.6L TDI engine boasts fuel consumption of just 5.2L/100km*, emitting just 135g/km* of CO₂. From an environmental perspective, the clean burning 1.6L TDI meets the stringent Euro 5 emission standards. The 77TDI comes with a 7-speed DSG transmission. Safety features include ABS with Brake Assist, Electronic Stabilisation Program (ESP), Anti-Slip Regulation (ASR) traction control and six airbags.

*7-speed DSG, combined city/highway driving as per Australian Standard ADR 81/02.

118TSI Comfortline. Compelling sophistication and efficient performance.

The 118TSI builds on features offered in Trendline models and makes life comfortable through dual zone climate control air conditioning, height and lumbar adjustable comfort front seats, rain sensing windscreen wipers, automatic headlights and Multi-Function Display (MFD Plus). 16" Sedona alloy wheels and a 12V socket in the luggage compartment are standard. The powerful 118TSI delivers an exceptional drive from its 1.4 litre supercharged and turbocharged direct injection petrol engine. Producing 118kW of power and 240Nm of torque, the ingenious TSI engine boasts fuel consumption of just 6.3L/100km,* emitting just 148g/km* of CO₂. From an environmental perspective, the 1.4L TSI meets the stringent Euro 5 emission standards. It saves petrol while delivering power and performance. It features a 7-speed DSG transmission as standard. Safety features include ABS with Brake Assist, Electronic Stabilisation Program (ESP), Anti-Slip Regulation (ASR) traction control and six airbags.

*7-speed DSG, combined city/highway driving as per Australian Standard ADR 81/02.

The Volkswagen 1.4-litre TSI Twincharger engine has been awarded International Engine of the Year 2010 and also came first in the 1.0 litre to 1.4 litre category.

International Engine Of The Year
Volkswagen 1.4-litre TSI Twincharger

Stylish 16" Sedona alloy wheels are standard for all Golf Wagon models.

103TDI Comfortline. Arresting performance and comfort with incredible efficiency.

The 103TDI makes an impact with standard features including dual zone automatic climate control air conditioning, a rear seat armrest with load-through provision and rain sensing windscreen wipers. 16" Sedona alloy wheels, automatic headlights and comfort front seats are standard. The 103TDI features an advanced turbo diesel engine with Common Rail technology and a Diesel Particulate Filter. The result is a powerful, efficient and clean burning 2.0 litre engine producing 103kW of power and an enormous 320Nm of torque, creating incredible flexibility that can compete with many V6 petrol engines. Smooth and silent, the 2.0 TDI boasts fuel consumption of just 5.7L/100km*, emitting just 149g/km* of CO₂. From an environmental perspective, the clean burning 2.0 TDI meets the stringent Euro 5 emission standards. It features a 6-speed Direct Shift Gearbox (DSG) as standard. Safety features include ABS with Brake Assist, Electronic Stabilisation Program (ESP), Anti-Slip Regulation (ASR) traction control and six airbags.

*6-speed DSG, combined city/highway driving as per Australian Standard ADR 81/02.

Optional Equipment.

Vienna Leather Appointed Sports Seating (Comfortline only)

The Golf Wagon offers an optional leather appointed sports seating package with heated front sports seats and the additional option of electric lumbar adjustment for the driver.

Bluetooth™ Phone Connectivity

Volkswagen's Bluetooth™ Phone Connectivity allows you to make hands free phone calls to stay connected with your friends while your hands stay connected to the wheel. Bluetooth™ Audio Streaming enables you to play music directly from your phone without cables. The system can be operated via the Multi-function Display (MFD Plus) and when equipped, RCD510 or RNS510 touch screens. The system also displays your personalised phone book.

Media Device Interface (MDI)

The MDI allows audio files to be operated via the in-dash audio system without the need to input controls via the media device itself.

RNS510 Satellite Navigation System

The RNS510 Satellite Navigation System has a user-friendly touch sensitive screen and high resolution display that shows 3D maps, pictures and video. It also features sophisticated voice recognition technology for increased convenience. With a generous 30GB hard drive and built-in DVD drive, your music library and navigation data is always at your fingertips. Your favourite music can also be accessed via an MP3 compatible AUX-IN multimedia socket or SD memory card slot.

Rear View Camera (RVC)

Even the trickiest parking spot becomes a breeze with the Rear View Camera, giving the driver clear sight of what's behind the vehicle. On-screen guidance lines assist entry into difficult parking spaces.

Optical Parking System (OPS)

The Optical Parking System (included with optional Park Assist with parking sensors) takes the parking aid/parking sensor concept to a new level. A silhouette of the Golf Wagon is displayed on the radio or navigation system screen during parking, showing the Golf Wagon's position and distance from obstacles. Any obstacle within range of the ultrasonic sensors is shown on screen.

Park Assist with front and rear parking sensors

Park Assist is able to manoeuvre the vehicle into spaces with as little as 1.1 metres in addition to the length of the vehicle, with several moves if necessary. If there's enough room to park, Park Assist automatically takes charge of the steering when you select reverse gear. The accelerator, clutch and brake are all you need to control as the Golf is expertly parked for you.

Volkswagen Sound Premium Audio System with RCD510

The optional Volkswagen Sound premium audio system delivers superb sound quality with 300W and 10 speakers. Volkswagen Sound is available in combination with either the RCD510 in-car entertainment system or the RNS510 satellite navigation system.

Optional Sport Package available for Comfortline.

Dark Tinted Rear Side and Rear Windows

Dark tinted rear side and rear windows provide increased privacy and comfort.

A low tyre pressure indicator and lowered sports suspension are also included in the Sport Package.

Optional extras.

Front Fog Lights

Front fog lights with static cornering function add a sporty element and an additional safety feature.

17" Porto Alloy Wheels

Stylish 17" Porto alloy wheels add charisma to the Comfortline.

Volkswagen Genuine Accessories.

Movement fascinates. In fact, there are few subjects that excite people more, that's because movement is synonymous with freedom. Our comprehensive range of genuine accessories give you the freedom to customise the look and feel of your vehicle to reflect your own personality and individual sense of style.

The product philosophy is simple – to deliver innovative technologies and premium design – right down to the finest detail. Each and every genuine accessory has been designed specifically with the Golf Wagon in mind and has been engineered and rigorously tested to ensure that it meets the same high standards of quality as the vehicle itself.

No matter what you choose you can have peace of mind knowing that any genuine accessory fitted by your local Volkswagen Dealer, at the time of your vehicle purchase will be covered by the same warranty as the vehicle itself.

For more information or to experience the full range of Genuine Accessories designed to suit the Golf Wagon, visit your local Volkswagen Dealer.

Owning a Volkswagen.

Volkswagen New Vehicle Warranty

Every new Volkswagen Golf Wagon referred to in this brochure is covered by a 3 year (unlimited kilometre) manufacturer's warranty, which includes Volkswagen Assist (24hr roadside assistance). Every new Volkswagen passenger vehicle is also covered by a 3 year paintwork and 12 year anti-corrosion perforation warranty.

Volkswagen Assist – 24 hour roadside assistance

As a valued customer, you can be assured that wherever you travel within Australia, you will have access to roadside assistance, 24 hours a day, 365 days a year.

This is complimentary for the duration of the vehicle's original Volkswagen warranty period. You will receive help in the event of a breakdown or accident and if required, your vehicle will be mobilised or transported to an Authorised Volkswagen Repair Centre.

As a Volkswagen owner you will also have access to the additional benefits of accommodation and car rental if your vehicle cannot be mobilised within 24 hours, when you are over 100kms away from home. Volkswagen Roadside Assist can also be renewed at the expiry of the original warranty, ensuring ongoing coverage for your vehicle.

Volkswagen Extended Warranty

To give you added peace of mind and security, you can choose to extend your warranty to suit your vehicle and ownership cycle. If your Volkswagen is still covered by the existing Volkswagen Manufacturer's Warranty, you can purchase Volkswagen New Vehicle Extended Warranty, providing you coverage on all original Manufacturer's components with no payment claim limits.

If you are purchasing a used Volkswagen and the original Volkswagen Warranty has expired, you can purchase Volkswagen Used Vehicle Warranty Insurance, providing selected component protection. Have the assurance that your Volkswagen remains a Volkswagen.

Eligibility Criteria apply for both the Volkswagen New Vehicle Extended Warranty and the Volkswagen Used Vehicle Warranty Insurance. For more latest information regarding Volkswagen New Vehicle or Used Vehicle Extended Warranties and how to enact coverage, always refer to www.volkswagen.com.au, consult your local Volkswagen dealer, and refer to the relevant Product Disclosure Statement.

Volkswagen Service

Your Authorised Volkswagen Service Centre is part of Volkswagen's global Quality Management System, ensuring all dealers are certified to ISO 9001:2000 – an internationally recognised Quality Standard. Authorised Volkswagen Service Centres have factory trained Technicians equipped with the very latest diagnostic equipment, specialist tooling and Volkswagen Genuine Parts. An Authorised Volkswagen Service Centre undertakes work in accordance to factory specified guidelines and maintenance schedules.

Volkswagen Genuine Parts®

Volkswagen Genuine Parts® are designed for your vehicle and approved by Volkswagen, with particular regard to safety. The workmanship, dimensional accuracy and materials used in these parts comply with factory specifications. To ensure safety and reliability, Volkswagen recommends the use of Volkswagen Genuine Parts®. Volkswagen Authorised Dealers offer a 3-years/unlimited kilometres warranty on Genuine Parts if fitted prior to vehicle purchase, or a 2-years/unlimited kilometres warranty if fitted after purchase.

Volkswagen Finance

Whether buying or leasing, Volkswagen Finance will certainly make you think differently about financing and insuring your new Volkswagen. Committed to meeting the needs of Volkswagen drivers, we offer a vast range of products, each with distinct advantages depending on your specific circumstances. We can easily and quickly design a solution to meet your budgeting needs, with no account keeping fees and no surprises along the way. Speak to your authorised Volkswagen Finance dealer today to see how Volkswagen Finance can help you achieve your motoring dream.

Owning A Volkswagen

Any information or advice contained here does not take into consideration your objectives, financial situation or needs, which you should consider before acting on our recommendations. You should read and consider the Product Disclosure Statement before deciding whether to acquire any product mentioned here. A Product Disclosure Statement (PDS) can be requested from your local Volkswagen Dealer or viewed online at volkswagen.com.au

Glossary.

Anti-lock Braking System (ABS)

When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the ABS system reduces brake pressure to that wheel. This prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable.

Anti-Slip Regulation (ASR)

ASR is a switchable traction control system that prevents the wheels from spinning under acceleration by reducing engine torque.

Brake Assist

During emergency braking, Brake Assist aids the driver by increasing the brake pressure automatically to a level exceeding the locking limit. The ABS is thus quickly brought into the operating range, which enables maximum vehicle deceleration to be achieved.

Direct Shift Gearbox (DSG)

DSG is a manual gearbox in which the gearshifts are controlled electronically. What makes the DSG unique is that it has 2 separate gear sets operated by 2 multi-plate clutches. The benefit of 2 gear sets and 2 multi-plate clutches is that one gear set and clutch is engaged driving the vehicle with the second clutch having already pre-selected the next gear awaiting for power to be transferred. As the next gear has already been pre-selected prior to power being applied, the gear change only takes 3-4 100ths of a second. There is virtually no interruption to power, traction or acceleration. The DSG also offers Tiptronic gear selection and sports mode.

Electronic Brake-pressure Distribution (EBD)

Electronic, more sophisticated means of regulating the ratio of front/rear brake pressure. Settings are varied according to driving and load conditions to ensure each wheel is braked to the optimum extent.

Electronic Differential Lock (EDL)

EDL improves driving and steering characteristics when accelerating on road surfaces where each wheel has a different degree of traction. The system operates automatically and is combined with the ABS system. Using the ABS wheel sensors, EDL monitors the speed of the individual driving wheels. When a difference in driving wheel speed is detected (i.e. when one wheel starts to spin due to differences in road surfaces, e.g. due to water or dirt) the system brakes the spinning wheel, transferring engine power to the wheel with the best traction.

Electronic Stabilisation Program (ESP)

ABS and ASR traction control systems are integrated into the Electronic Stabilisation Program (ESP). In short, ESP helps ensure that the vehicle goes where you steer it even in extreme driving conditions. The ESP system constantly compares the actual movement of the vehicle with pre-determined values and should a situation arise where the vehicle starts to skid, ESP will apply the brakes to individual wheels and automatically adjust the engine's power output to correct the problem. ESP prevents the vehicle from losing control when trying to avoid an accident, for example. It also prevents spinning off on a curve due to either understeer or oversteer.

Hill Start Assist (HSA)

Hill Start Assist (HSA) holds the vehicle when the foot brake is released by temporarily locking the brake pressure (for a maximum of 1.5 seconds) to provide comfortable starting-off without rolling back. Hill Start Assist (HSA) operates on inclines greater than 5% and is fitted in combination with both the manual transmission and the Direct Shift Gearbox (DSG).

Park Assist*

Park Assist actively helps the driver when reversing into parallel parking spaces. The system works by using sensors mounted either side of the front bumper together with parking distance sensors front and rear. To parallel park the driver needs to press the Park Assist button and use the appropriate indicator before the car passes the potential parking space. Sensors in the front bumper then scan the size of the parking space as the car is driven slowly past and the driver is alerted if the parking space is big enough. If there is sufficient space, the driver stops the car, selects reverse and let's go of the steering wheel.

Park Assist will alert the driver of the intended reverse path in the Multi-Function Display, within the driver's field of vision. Park Assist then actively supports the driver by taking over the steering control and parks the vehicle in the available space using the ideal course, if necessary with several moves. The driver can however take over the control of the steering at any time and end the automatic parking procedure. The system can reverse into parking spaces on both the left hand and right hand side of the road, for example on one way streets.

Park Assist cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle. If the driver notices a risk that pedestrians, other vehicles or objects could be damaged or if they are uncertain of the risk, they will need to react accordingly and stop the vehicle, ending the function.

*Optional equipment

Volkswagen's Australian Environmental Strategy.

Steps Towards Sustainability

To Volkswagen Group Australia, sustainability means taking responsibility for the environment, as well as actively participating in the development of society. We believe sustainability offers opportunities for long-term innovations, new approaches, efficient technologies and ground-breaking products. Our organisation has established an Environment Committee to manage our business activities and reduce our environmental impact.

Carbon Management Strategy

We have developed a Carbon Management Strategy to identify and manage carbon emissions from our business activities. Our fuel usage from company cars and energy usage were calculated to measure our Carbon Footprint, and comprehensive carbon reduction targets have been set. Volkswagen Group Australia aims to downsize its environmental footprint in the future.

Carbon Management Program

Our range of vehicles has earned a reputation for fuel efficiency. We're working to extend that efficiency throughout our entire operational structure. We've initiated a Carbon Management Program, to recommend changes to achieve emissions reductions. We're making real changes in reducing our carbon footprint.

Environmentally Friendly Engines

Our TSI twin or single-charged petrol engines achieve impressive fuel efficiency with reduced CO₂ emissions. Our TDI diesel engines use less fuel and have lower emissions, with the benefits of high torque and performance. Our diesel particulate filter extracts soot from vehicle exhaust emissions. Numerous engines already fulfill the stringent forthcoming Euro 5 emissions standard.

Environmentally Friendly Transmission

Our dual-clutch Direct Shift Gearbox (DSG) provides the comfort of a conventional automatic transmission and the dynamic drive of a manual transmission. DSG boasts significantly reduced fuel consumption compared to a conventional automatic transmission. The new 7-speed DSG transmission is the first dual-clutch gearbox with a 'dry' double clutch.
