

**PEUGEOT 5008**

**PEUGEOT**

A close-up portrait of a man with dark hair and a light beard, wearing a white button-down shirt. He is looking out of a car window towards the right. The background is a blurred city street scene featuring a white bridge over a body of water, with modern buildings in the distance under a clear sky.

## “MY 5008, A PLEASURE TO DRIVE”

With the 5008, there are no compromises. This compact vehicle is modular to an exemplary degree, and with its smooth flowing lines, it harmoniously combines versatility and style. As it's fitted with the latest safety technology, you'll take to the road confidently and enjoy real driving pleasure through its dynamic characteristics worthy of a sedan car, and its driving position designed specifically for driver comfort.

# “EVERY EYE IS DRAWN TO IT”

The 5008 stands out through its balanced lines and aerodynamic design. The front end, with its profiled headlamps and plunging bonnet continuing the line of the generous windscreen, give it its distinctive, streamlined profile. This fluidity is emphasised by the chrome-plated inserts that decorate the grille, conferring both status and elegance. At the rear, the lights provide a visual signature for the vehicle that gives an impression of purity and sturdiness.

## “MY 5008 MAKES LIFE EASIER”

With its intelligent and ergonomic design, the driving position brings you the latest technological innovations providing comfort, safety and ease of driving.

### **Driving position**

The layout of the driving position is wholly focused on driver comfort. The high position and wide windscreen give the driver a dominant view of the road, and therefore provide a feeling of safety.

The steering column angle provides a comfortable and car like driving position.

The careful ergonomic design of the driving position gives the driver easy access to all the controls and ease in reading

the dials. What's more, the slightly inclined dashboard, keeps harmoniously with the dynamic lines of the exterior.

**Electronic parking brake and hill start assist**

Fitted as standard on the 5008, the electric parking brake is applied automatically when the engine stops, and released on acceleration. Plus the hill start assist function holds the

vehicle stationary on a slope for two seconds to enable you to switch from the footbrake to the accelerator.

## “IN MY 5008 I HAVE ALL THE ROOM I NEED TO BRING ALONG FRIENDS”

Adopting the 5008 to meet the needs of the family really is child's play. The flexible 7 seat layout means you're free to reorganise the configuration and the luggage space, with the greatest of ease for all your activities.

### **Space and flexibility**

For greater freedom, all the seats fold up individually to allow you to adapt your 5008 easily to the number of passengers and their luggage. The seats in the 2nd and 3rd rows fold up to leave a clear flat floor allowing an even

more spacious boot. The front passenger seat folds up into a small table to provide space for loading objects up to 2.76m in length, and to make everything as modular as possible without having to remove a single seat.

### Optimal comfort

The 5008 takes care of passenger comfort with clever details. The folding tables in the backs of the front seats open by hinging downwards to avoid interfering with passengers' legs.

The seats in the 2nd row are adjustable for leg room and rake. The 5008 also has side curtains on the 2nd and 3rd rows to give protection against the sun.

# “MY 5008 LETS IN BOTH LIGHT AND SPACE”

Spacious and at the same time compact, the 5008 draws on its specific layout to provide its occupants with generous amounts of light thanks to its glass panoramic roof. Passengers have the benefit of vast amounts of well-planned space, with a panoramic view of the outside, and a multitude of storage compartments to take everything the family might need on the trip.

## The sky's the limit

Between the glass panoramic roof and the immense windscreen, the glazed surface of the 5008 adds up to 5.77m<sup>2</sup>, thus giving every passenger a unique sensation of light and space for greater comfort on the move.

### **An ideal boot volume**

In addition to its remarkable accessibility, the 5008 has an available boot volume that really is impressive for a 7 seat wagon. Besides the optional 3rd row, the boot provides additional storage compartments.

### **A place for everything**

The passenger compartment of the 5008 conceals a multitude of crafty storage compartments, for the whole family. In fact there's a place for everything, including a chilled central console for cold drinks.

## “THERE’S ALWAYS SOMETHING TO KEEP ME ENTERTAINED IN MY 5008”

### **Video pack**

Whether you're doing the daily school run, or heading off on a roadtrip, the 5008 makes your journey more pleasurable. No matter what your destination, the journey is part of the pleasure. The video pack lets passengers connect an external portable system (portable video player, games console or DVD player), so they'll never get bored. And the two Bluetooth wireless headsets means the driver can concentrate on the road. The two 7" screens

(fitted with protective covers to match the upholstery) are housed in the backs of the front seat headrests. You can even connect two different video sources through the RCA sockets, so there'll be no arguments about what to watch.

### **Audio and telecommunications equipment**

On the 5008, you have a choice of cutting-edge audio and telecommunications equipment: WIP Sound, Radio, CD, MP3

player, WIP Navigation and Bluetooth. These latest-generation onboard systems are of exceptional quality and benefit from elegant, contemporary design. They will simultaneously enable you to listen to the music you want to hear, make phone calls while still concentrating on your driving and receive route guidance throughout your journey.

### **More connected**

An auxiliary socket lets you connect a portable music or DVD player, and a USB port allows you to connect or charge devices. Both are located within the centre console to keep them out of sight.

# “OUR 5008 LOOKS AFTER OUR SAFETY”

When the whole family is on board, safety is the prime consideration. The 5008 uses the latest technology, in terms of both active and passive safety, to look after you and your passengers. This way, you can travel worry-free.

## **Cruise Control and Speed Limiter**

The 5008 is fitted as standard with Cruise Control and a Speed Limiter on both engine options. The Cruise Control allows you to maintain a constant speed (except on steep gradients) and the Speed Limiter enables you to programme a speed that you don't wish to exceed.

## **Airbags on every row**

Airbags protect passengers in the 5008 on every row, including the 3rd row. Altogether that's a total of 6 airbags: 2 front airbags, 2 front side airbags and 2 curtain airbags covering both rows and extending to the 3rd row.

## **Intelligent Traction Control**

This intelligent anti-skid system constantly monitors road-holding to detect tricky situations that might make

moving off and normal progress difficult for the vehicle on icy or snow covered roads. In these situations, the Intelligent Traction Control system takes over from the anti-slip regulation (ASR) system by reducing front wheel spin to ensure good traction and steering.

## **Seat belts**

The front seat belts have pyrotechnic pretensioners and force limiters. At the rear, there are 3-point seat belts with force limiters. All the seats are linked to a “seat belt not fastened” warning system.

In addition you can fit a child seat perfectly safely on the 2nd row seats. The top tether, is found on the back of each second row rear seat.

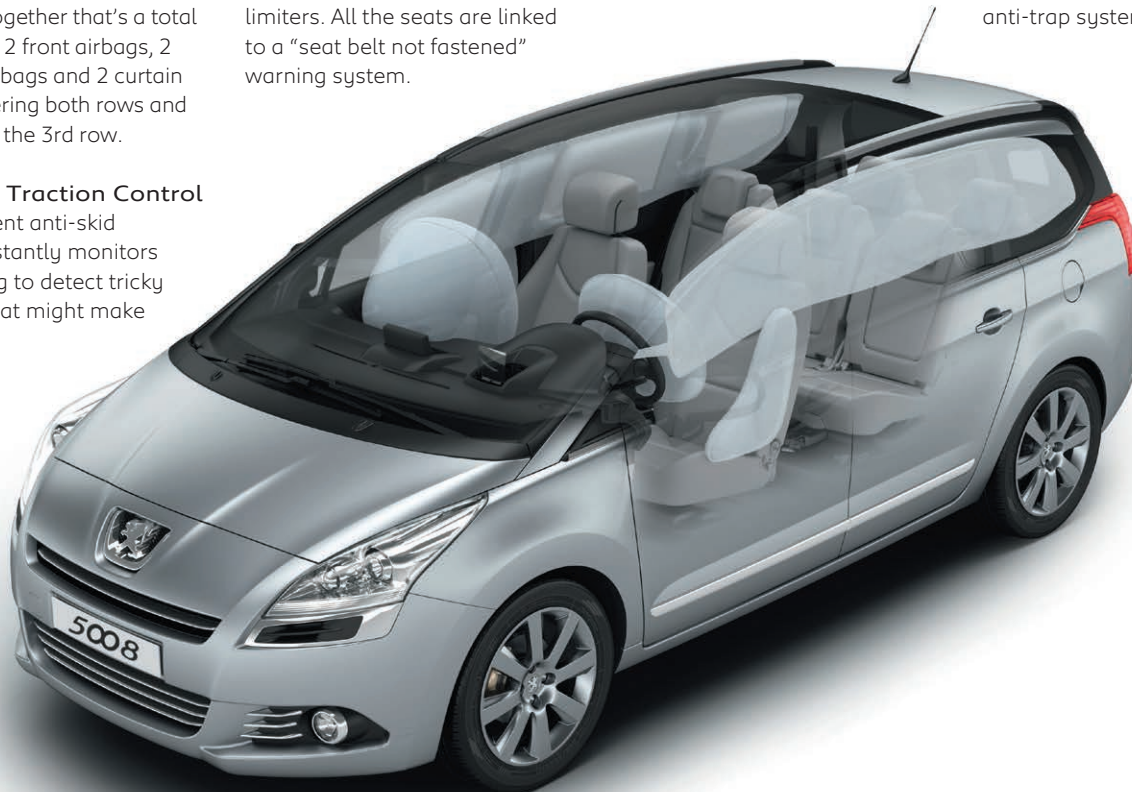

## **Active Safety and ESP**

In addition to the first-rate handling, all versions of the 5008 have as standard the ESP skid prevention system. This combines the functions

of anti-lock braking system (ABS), anti-slip regulation (ASR), electronic brake force distribution (EBD), emergency brake assist (EBA), engine stall prevention (MSR) and dynamic stability control (DSC).

## **Child Safety**

As a family vehicle, the 5008 also bears the safety of your children in mind, the sequential electric rear windows as standard can be electrically isolated and are fitted with anti-trap system.

# PEUGEOT AND THE ENVIRONMENT

Peugeot offers an extensive range of low emission vehicles – more than half of its worldwide sales are of vehicles producing less than 140g of CO<sub>2</sub> per km. Peugeot is the leader in a range of proven technologies designed to improve environmental performance. For example, the diesel engine combined with Particle Emission Filter, results in a 99.99% reduction of particle emissions. Launched in 2000, this technology is now fitted in more than 2.1 million vehicles, along with the Stop & Start system and a new generation of HDi engines.

## CLEANER EMISSIONS

All engines in the 508 range – petrol and HDi – feature advanced technology which allows them to meet and exceed the stringent Euro 5 emissions standard. Euro 5 is the toughest standard in force in Europe today, and easily exceeds the Euro 4 level which has been required by Australian law since July 2010.

# “MY 5008 THINKS OF THE FUTURE”

## Aerodynamics and fuel economy

The aerodynamics of the 5008's lines and its understructure have been specially designed to optimise

its fuel consumption. This gives it one of the best drag coefficients in its category 0.29.

## HDi FAP

Combined with HDi technology,

the Particulate Filter (FAP) is a highly effective pollution control system. This equipment processes the gases generated by the combustion of the Diesel particles, reducing

their level to the limit of measurability (0.004 g/km). This technology makes the Diesel engine much more environmentally friendly.

## CONSUMPTION AND EMISSIONS FIGURES

### Euro 5 Petrol

Official fuel consumption, measured by the UTAC	1.6 L THP 115kw 6-speed automatic
Tyre size	17"
Urban cycle (litres/100km)	11
Extra-urban cycle (litres/100km)	5.8
Combined (litres/100km)	7.7
CO <sub>2</sub> emissions, combined (g/km)	179

### Euro 5 Diesel

Official fuel consumption, measured by the UTAC	2.0 L HDi 120kw 6-speed automatic
Tyre size	17"
Urban cycle (litres/100km)	9
Extra-urban cycle (litres/100km)	5.6
Combined (litres/100km)	6.8
CO <sub>2</sub> emissions, combined (g/km)	178

# “MY 5008 IS DIFFERENT”

The 5008 is available in 9 bodywork shades with the option of Tramontane Black Leather.

Tramontane Black Strada Fabric

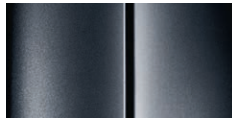

Tramontane Black Leather (optional)

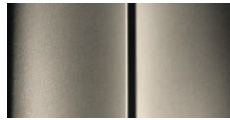

## METALLIC FINISHES (optional)

Aluminium Grey

Shark Grey

Vapour Grey

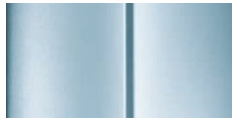

Perla Black

Babylon Red

Egyptian Blue

Alpine Blue

## OPAQUE COLOUR

Bianca White

## PEARL FINISH (optional)

Pearl White
