Optional Park Assist 2 and New York 18-inch Alloy Wheels shown

Introduction

Smart, versatile, efficient... compelling

It's easy to throw your busy lifestyle at the new Volkswagen Tiguan. Inside, you'll find a unique combination of space, luxury, quality and comfort.

Offering a unique combination of contemporary urban refinement and rugged durability, you'll find that no matter where you take it, the new Tiguan is right at home.

A single glance is all it takes to notice the new Tiguan's clearly European sophistication. Deeper down, you'll find some of Volkswagen's most advanced automotive technologies. This means you'll be rewarded with more than just envious glances in traffic. The new Volkswagen Tiguan delivers exceptional fuel efficiency and the safety and protection features you've come to expect. It provides advanced in-car systems that make driving even more enjoyable and engaging, and it seamlessly integrates modern life's electronic essentials into the driving experience. With four models in the range there's a new Tiguan to suit just about everyone.

Advanced BlueMotion Technology, available on 118TSI and 103TDI Pacific models, delivers outstanding fuel economy. BlueMotion Technology will even shut down the engine and automatically re-start it in traffic, as well as recover energy from the braking system – which helps save money on fuel. And with options like Park Assist it can even help make your driving just that little bit easier and safer.

The Tiguan is just as compatible with work and domestic duties as it is with recreation and escaping from it all. It will effortlessly accommodate your friends and loved ones – as well as every kind of load, from luggage to shopping.

Drive it and you'll see how effortlessly the new Volkswagen Tiguan does it all.

Range Overview

118TSI – Advanced enjoyment

With its highly advanced twincharged 1.4-litre petrol engine and revolutionary BlueMotion Technology, the front-wheel drive Tiguan 118TSI offers you the perfect balance of poise, performance and cutting-edge fuel efficiency. High standard equipment levels, outstanding safety features and rock-solid build quality make the Tiguan 118TSI a smart choice for anyone seeking to add a touch of excitement and sophistication to their daily grind.

132TSI Pacific – Powerhouse all-rounder

The Tiguan 132TSI Pacific offers the potent performance of the 2.0 litre 132kW direct-injection, turbocharged petrol engine, backed by a seven-speed DSG transmission and 4MOTION® all-wheel drive. Clever technology including the Park Assist 2 automated parking system, combined with a wealth of comfort and convenience features, ensures you'll travel in style no matter where the road ahead takes you.

103TDI Pacific – Efficient refinement

A mountain of torque from the Tiguan 103TDI Pacific's common-rail, turbocharged diesel engine, and our 4MOTION® all-wheel drive, means you'll devour long distances effortlessly. Even in the city you'll manage amazing distances between refueling stops. The diesel's intrinsic efficiency is bolstered even further by Volkswagen's BlueMotion Technology, and the result is effortless performance with plenty of sophistication – and supreme fuel economy.

155TSI – Spirited & sporty

Tremendously satisfying dynamic performance at any revs is assured from the 155TSI. This advanced direct-injection 2.0-litre turbocharged engine rewards in all driving situations, while the ultimate sophistication of Volkswagen's seven-speed DSG transmission and 4MOTION® all-wheel drive system ensures you enjoy poise and precision together with outstanding performance, no matter where your drive takes you.

118TSI

Designed with one person in mind: you.

All compact SUVs are not created equal. The Volkswagen Tiguan 118TSI is an exceptionally robust and well-equipped model at an affordable price point. Brilliant design, exceptional versatility and high quality combine to ensure the new Tiguan can take everything your busy lifestyle can throw at it right now, and for years to come.

The 118TSI's twincharged 1.4-litre engine boasts not just a turbocharger, but a supercharger as well for maximum fuel efficiency and performance at all operating speeds. Hi-tech direct injection means performance is not sacrificed while achieving outstanding economy.

The 118TSI also features BlueMotion Technology which includes a Start/Stop system and Brake Energy Recuperation.

Outstanding attention to design and detail means you benefit from not just sophistication, but exceptional levels of safety and equipment as well. Protection for you and your loved ones is very high on the Tiguan's agenda thanks to features like its advanced structural design and the inclusion of six airbags, the Electronic Stabilisation Program (ESP), the Anti-lock Braking System (ABS) with Brake Assist, an Electronic Differential Lock (EDL), high-visibility daytime driving lights and safety-optimised front head restraints.

The Tiguan 118TSI provides a highly satisfying ownership experience. Inside the supremely comfortable interior it's easy to seamlessly integrate your mobile telephone and your music into the new Tiguan. Bluetooth® for telephone and audio streaming is standard, together with a central Multi-Function Display (MFD Plus), an eight-speaker audio system including an MP3-compatible CD player with auxiliary input and a clever Media Device Interface (MDI) with USB connectivity that allows you to plug your music directly into the vehicle from a range of portable storage devices.

The new Tiguan 118TSI is several vehicles combined in the one clever package. It's an elegant family car, an exciting escape machine, a sophisticated urban transport; as ideal for work as it is for play. It can be all of those vehicles and more; the choice is up to you.

132TSI Pacific

Escape artiste

The Tiguan 132TSI Pacific has it all. Superlative performance from its 132kW 2.0-litre turbocharged direct-injection petrol engine and a range of luxury features. Between the hi-tech engine and the equally advanced 4MOTION® all-wheel drive system or seven-speed DSG transmission.

Whether you're on the way to work or in the midst of a great escape, the Tiguan 132TSI Pacific will be right at home. Added to the already exceptional standard equipment levels across the entire Tiguan range the Tiguan 132TSI Pacific boasts some unique quality inclusions. Park Assist 2, the second generation of Volkswagen's automatic parking system offers 'bay' parking (i.e. at 90 degrees to the kerb) as well as conventional parallel parking as a standard inclusion. Park Assist 2 will detect viable parking spaces and requires only 40cm clearance front and rear. Incredibly, it can measure and alert you to those spots, and once identified it will handle all required steering inputs to get you in, safely and securely. All you need to do is manage brake, transmission and accelerator.

Once you're in your designated spot, Park Assist 2 will even steer you safely out. It's ideal for getting you into – and out of – the tightest spots imaginable.

The Tiguan 132TSI Pacific is equipped with the same cutting-edge safety systems you'll find elsewhere in the range, plus Bluetooth® wireless connectivity for both music and mobile telephone calls, and the practicality of a versatile loadspace and seating arrangements. Fog lights are also standard on the vehicle.

But the Tiguan 132TSI Pacific offers even more – the Comfort Package is standard on the Tiguan 132TSI Pacific. Among the additional features are dual zone automatic climate control air conditioning for 'all-seasons' comfort, illuminated vanity mirrors for both front seat occupants, automatic headlamps with coming/leaving home function, rain-sensing wipers and auto dimming central rear view mirror.

It's a complete package, whichever way you look at it.

103TDI Pacific

Technically Advanced. Potent. Frugal.

The Tiguan 103TDI Pacific is technically advanced and incomparably refined. It's a willing performer, with a generous 320Nm of torque on tap. It's quite simply a great performer, whether you're looking at performance, economy or refinement.

The advantages of the modern, common-rail diesel engine really stack up. On the open road, the engine's torque output really comes into its own. You'll find the Tiguan 103TDI Pacific devours hills with ease, and copes effortlessly with heavy payloads. You'll go tremendous distances between refuelling stops, too – and that's a real plus no matter where your drive takes you.

Advanced design and clever engine management means this diesel is just as refined as the rest of the Tiguan range. The diesel engine is available with seven-speed DSG transmission, giving owners excellent fuel consumption and driving satisfaction. BlueMotion Technology such as the Start/Stop system and the new Coasting Function are also standard on the vehicle.

The Tiguan 103TDI Pacific comes with a range of bonus equipment as standard. Park Assist 2, front fog lights and the comfort package which consists of dual zone automatic climate control air conditioning, illuminated vanity mirrors, automatic headlamps with coming/leaving home function, rain sensing wipers and auto dimming central rear view mirror all as standard.

Like the rest of the range, the Tiguan 103TDI Pacific's rugged durability is something you can depend on, but you'll also enjoy its comfort, safety and refinement while you're doing so. Everything from Bluetooth® music streaming to handsfree calling is just the press of a button away, and at all times you'll be protected by an hi-tech array of advanced safety systems.

Because the details matter, the Tiguan 103TDI Pacific boasts a long list of features designed to make driving more convenient and enjoyable. Seating and cargo versatility is enhanced by a centre rear armrest that includes a 'load through' provision for long loads ranging from hardware store items to snow skis. (A 60:40 split-fold and sliding rear seat arrangement adds even more seating/loadspace versatility).

155TSI

Leading light

Excellence knows no bounds. The Tiguan 155TSI is for the driver who needs the practicality of a prestige SUV, and who also demands uncompromising dynamic performance.

The 155TSI's outstanding direct-injection 2.0-litre 155kW turbocharged petrol engine delivers its high-performance output directly to Volkswagen's slick-shifting DSG (Direct Shift Gearbox) transmission. The result is seamless performance – to all four wheels, thanks to the advanced 4MOTION® all-wheel drive system.

Because superlative dynamic performance requires more than just a well-sorted engine and driveline, the Tiguan rides on low-profile tyres and larger, 17-inch alloy wheels as standard. Dynamic precision is assured, and safety levels are enhanced by a full complement of driver-assistance technologies including the Electronic Stabilisation Program (ESP), Brake Assist, and Electronic Differential Lock (EDL).

The 155TSI includes equipment upgrades like front fog lights with steering-sensing integrated static cornering lights for added nighttime cornering precision. Volkswagen's Driver Fatigue Detection System, which warns you if you get drowsy, together with low tyre pressure warning, and auto rain-sensing wipers are also standard.

Performance and luxury go hand-in-hand. The 155TSI's status in the vanguard of the Tiguan range is reflected in the myriad detail upgrades – for example the chrome highlights on the protective side mouldings, window frames and chrome roof rails, and the 65 per cent light absorbing dark tint on the rear side windows and rear window.

The driver is cocooned in comfort and support thanks to front sports seats with both height and lumbar adjustment. (These also incorporate clever storage beneath and both storage pockets and passengers' folding tables behind.) The touchscreen audio system includes an MP3-compatible six-CD changer with SD memory card slot as well as the USB Media Device Interface (MDI) for ultimate connectivity.

Wherever your journey takes you, the Tiguan 155TSI ensures getting there will be significantly more than half the fun.

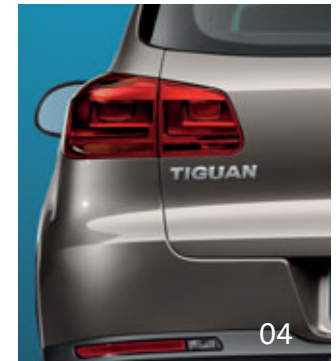

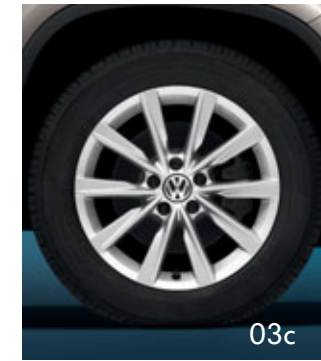

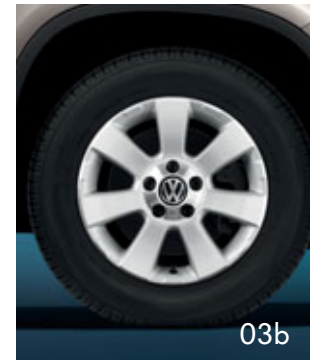

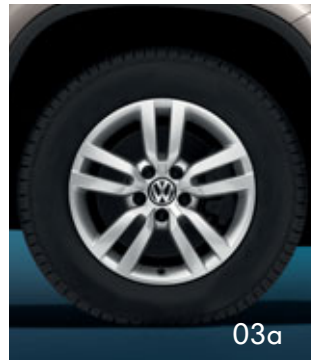

Exterior

Bold. Strong. Stylish.

Statement value. The new Tiguan has it. From every angle it's unmistakably a Volkswagen. You can see this is a classy, sophisticated, capable vehicle – it's robust and durable without appearing clunky and oversized. The Tiguan's wide, purposeful stance reflects its underlying dynamic prowess; it's sheer capability across a wide range of operating environments.

Clean and uncluttered, the exterior is also aerodynamically efficient and allows easy access to the passenger compartment and rear loadspace. It's just the right size to be city-friendly, while at the same time compatible with a range of active lifestyle pursuits, and spot on for relaxed, safe highway driving.

01. Horizontal grille design

The Tiguan's grille frames the iconic Volkswagen badge with four striking horizontal chrome bars. The elegant front accentuates the Tiguan's strong lateral stance and provides a perfect pointer to the (optional) Bi-Xenon headlamps with integral LED daytime running lights.

02. Front bumper

Prominent front bumper elements accentuate the new Tiguan's stability, framing the fog lamps (not standard on all models) and central lower air intake.

03. Alloy wheels

Alloy wheels are standard equipment across the range. Strong, light and sophisticated, alloy wheels manage to look good and improve dynamic performance. Standard on the 118TSI are 16-inch Portland alloys with 215/65 tyres (picture 03a). The 132TSI Pacific and 103TDI Pacific comes standard with 16-inch San Diego alloys with 215/65 tyres (picture 03b), while the 155TSI performance flagship model benefits from an upgrade to 17-inch 10-spoke Philadelphia alloys with 235/55 tyres (picture 03c). New York 18-inch, 10-spoke alloys with 235/50 tyres are optional.

04. Purposeful design

Bold, minimalistic lines accentuate the Tiguan's powerful, dynamic character. The distinct line at hip level continues cleverly through the rear wheel arches and wraps around the rear bumper and tailgate while the line above the door handles manages to start at the front guards and continue to wrap around, passing through both rear lights and further emphasising the Tiguan's purposeful shape.

Interior

Luxury all year round

The new Tiguan will keep you comfortable no matter where it takes you. This vehicle can take the rough with the smooth, but its interior is all class. Comfort levels are exceptional, and they're backed by cleverly thought-out design that means everything you want falls neatly to hand.

If you're the driver your task is made simpler and more engaging thanks to sophisticated systems that are easy to adjust and control, backed by brilliant ergonomics – you get to concentrate on enjoying driving, while your passengers can relax and enjoy the scenery as you pass through it.

01. Multi-Function leather steering wheel

Comfortable, convenient and ergonomic, the new Tiguan's leather-wrapped steering wheel is supremely comfortable, with cleverly integrated controls for things like audio system and hands-free telephone operation built in. Result? You can multi-task – without taking your hands off the wheel or your eyes off the road.

02. Multi-Function Display (MFD Plus)

Information at your fingertips. The MFD Plus (Multi-Function Display) system is located between the speedometer and the tachometer, and presents the driver with a wealth of information including basic trip computer functions (driving time, trip meter, average speed, average and instant fuel consumption, etc.) as well as offering an interface for programming various driver-selectable vehicle systems.

03. Sliding, split-fold rear seats

Sliding rear seats with a 60/40 split-fold offers ultimate versatility for passengers and payload. The new Tiguan's rear seats fold individually to accommodate many and varied combinations of people and equipment. For ultimate carrying capacity, of course, all rear seats fold flat to reveal a cargo space that's just right for secure storage of whatever load you're carrying.

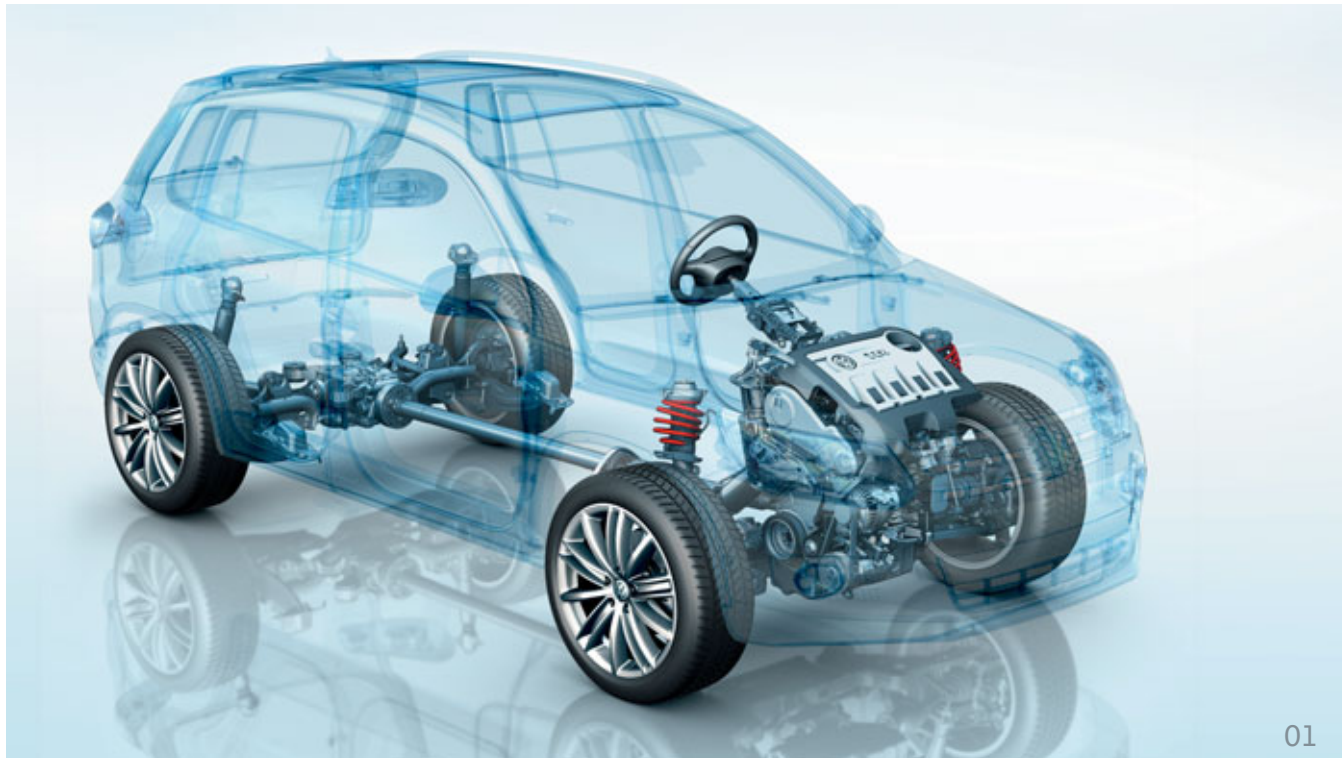

04. Clever centre armrest

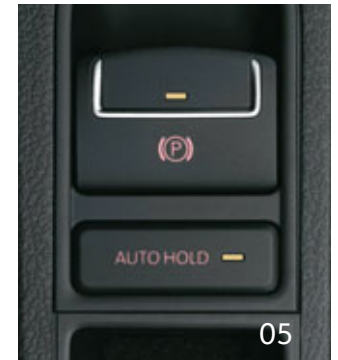

Here's a smart idea: The new Tiguan even features a 'load through' provision for the rear central armrest, folded flat. This means you can accommodate longer items like snow skis safely, at cargo floor-level, while still maintaining the two rear outer seating positions. When it's not needed in this way, the armrest features two integrated cupholders.

Technology

Advanced & intuitive

Volkswagen's engineering research and development has made advances that are reflected today in the incredible power delivery and fuel efficiency improvements. This means the new Tiguan benefits from the latest technology available.

01. TDI engine

Volkswagen's TDI engines with Diesel Particulate Filters feature common rail fuel injection technology. This results in a cleaner burning engine, exceptional fuel economy, impressive torque delivery and compelling performance.

01. 4MOTION®

The 4MOTION® all wheel drive system provides the ultimate in enhanced road safety and superior handling and features. This innovative Volkswagen technology provides the best possible traction at all road speeds and conditions, regardless of the weather.

02. TSI engine

Volkswagen's TSI engine technology includes turbocharged and supercharged petrol engines with direct injection. This delivers excellent torque and power at low revolutions, as well as reducing fuel consumption and emissions.

03. Direct Shift Gearbox (DSG)

DSG is an advanced, electronically-controlled dual clutch seven-speed transmission, providing excellent fuel consumption and driving satisfaction.

04. BlueMotion Technologies

BlueMotion Technologies is our range of innovations that make our vehicles more fuel efficient and environmentally friendly (available on the 118TSI and 103TDI Pacific models).

Start/Stop system

As you come to a halt, the engine automatically shuts down, only to re-start the moment you release the brake.[^] Start Stop only available on 118TSI & 103TDI.

Brake Energy Recuperation

This system charges the battery when the engine is under minimal or no load. So when coasting or braking, the battery is supplied with plenty of power.

Coasting Function[†]

While driving, as the driver's foot is taken off the accelerator pedal the engine is declutched, allowing the vehicle to coast and roll over a longer distance. The momentum of the vehicle is used to save fuel with a foresighted driving style. When the brake, accelerator pedal or the gear selector lever is operated, the clutch is re-engaged and engine braking / drive takes effect. Coasting Function can be selected or deselected via the multifunction display settings. The gear selector lever is required to be in the D position to be functional.

05. Auto Hold function

When you take your foot off the brake pedal while stationary, the brakes remain applied. This function is released automatically when you drive off.

06. Driver Fatigue Detection System*

This intuitive system works by automatically analysing individual driving characteristics, including the driver's steering movements. When fatigue is detected alerts are sounded, recommending a break.

* Available on 155TSI only. [^] Deactivation will not occur in certain conditions. [†] Available on 103TDI Pacific only.

Safety

Positively protective

There is nothing more important than the safety of you and your passengers. And you'll find when you drive a Tiguan, safety has been considered from every angle. Systems like Brake Assist ensure emergency stops bring optimal brake pressure as quickly as possible, while ABS maintains steering control even under intense braking, and ESP takes advanced remedial action in milliseconds to help prevent loss of control – even in the most demanding of conditions.

If a collision does occur, advanced structural design absorbs collision energy while maintaining a rigid passenger safety zone, inside which other safety systems (like airbags and load-limiting belt pre-tensioners) intervene to limit the loads on occupants. The new Tiguan is cleverly designed to protect you.

01. Airbags

Six airbags (dual front, front side and full-length curtain) are standard in every Tiguan. Airbags combine with the seat belts to help reduce the risk of severe head and chest injuries in collisions. When inflated, airbags cushion the head and upper body and distribute the resulting loads over as large an area as possible.

02. Traction Control

Traction control helps ensure optimal control of your vehicle even in difficult driving situations. Built around three distinctive functions, Electronic Stabilisation Program (ESP), Electronic Differential Lock (EDL) and Anti-Slip Regulation (ASR), Traction Control improves grip, helps prevent wheel spin and adjusts engine power automatically depending on the conditions.

03. Safety Optimised Head Restraints

By working in unison with your Tiguan's seatbelts, Safety Optimised Head Restraints are designed to reduce whiplash injury – ensuring optimal protection when you need it most

04. Crumple zones (not pictured)

The body of the Tiguan has also been designed with occupant safety in mind. Front and rear crumple zones absorb impact energy during collisions, working together with the safety cell and airbag deployment to reduce the loads on occupants and maximise survival.

05. Seatbelts (not pictured)

All seats feature three-point seatbelts, while the front seats also have load-limiting pre-tensioners (which tighten the belt on impact and limit belt-imposed loads on passengers). These help position the body to minimise injuries in the event of a collision.

 Image is shown for illustrative purposes only in order to illustrate some of the safety features found within the Tiguan.

 Image reflects leather trim which features longitudinal adjustable head restraints.

In Car Entertainment and Technology

Clearly connected

The new Volkswagen Tiguan makes it easy to seamlessly integrate your portable electronic devices into your new vehicle. Hands-free calling is automatic once your mobile phone has been 'paired' to the Tiguan via Bluetooth®, and you can stream your favourite tunes directly to the vehicle's audio system using the same technology.

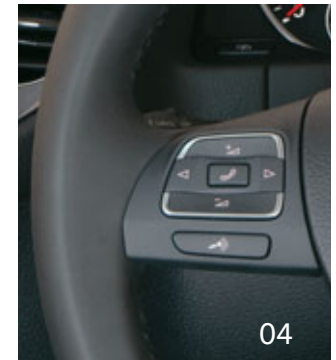

Of course, it is also possible to connect your music via auxiliary audio cable or USB – you can even play music directly from a USB memory stick, or from an MP3 or audio CD. Whichever way you'd prefer to listen, the new Tiguan will get you connected.

01

02

01. RCD310 Audio System

The advanced RCD310 audio system is standard on all models (except the 155TSI) and includes an easy to use MP3-compatible CD player with auxiliary audio input, connected to eight high-quality speakers strategically placed throughout the vehicle. The 155TSI's RCD510 audio system upgrades to touchscreen technology and adds an MP3-compatible six-disc changer plus an SD memory card slot.

02. RNS510 Satellite Navigation System □

This sophisticated touchscreen-based navigation system is based on a user-friendly interface and provides real-time position and navigational cues on a high-resolution 16:9 screen with 3D display and brilliant colours. A new high-speed processor does route calculations with incredible speed, and the system includes an inbuilt DVD drive and a massive 30 GB of hard drive storage capacity for mapping data and a range of multimedia files.

03. Media Device Interface (MDI)

'Plug and play' redefined: The Volkswagen Media Device Interface, located in the Tiguan's centre armrest, allows you to play music from any compatible USB device (MP3 players, iPods*^, USB memory sticks, etc.) using the device's inbuilt USB connection and cable. This makes it easy to play your favourite tunes (as well as speeches, podcasts and audiobooks) from the widest possible range of portable storage devices.

* iPod® is a registered trademark of Apple Inc.

^ Additional connection cables are sold separately.

04. Bluetooth® Connectivity

Bluetooth® is a wireless communications system that allows portable electronic devices to communicate with the Tiguan – without the need to worry about cables. Most mobile telephones have Bluetooth® – allowing the seamless integration of your mobile and the Tiguan's handsfree mobile telephone system. Once enabled, the connection is easily re-established every time you enter the vehicle. Music, from Bluetooth® equipped mobile telephones and music files, can also be 'streamed' wirelessly to the new Tiguan's advanced audio system.

05. Optical Parking System (not pictured)

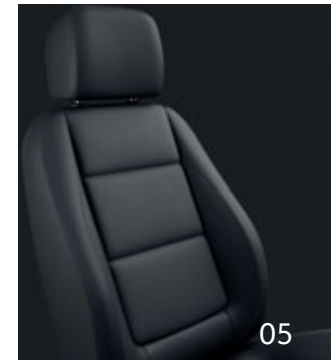

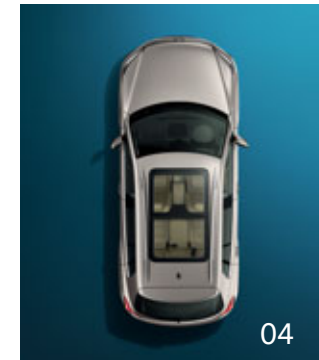

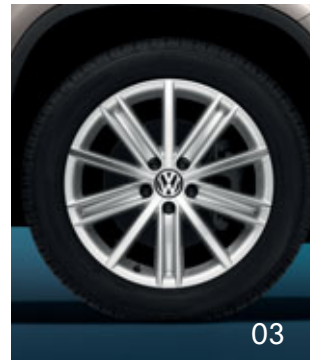

The Optical Parking System (standard on 132TSI Pacific, 103TDI Pacific and 155TSI models) takes the parking aid/parking sensor concept to a new level. A silhouette of the Tiguan is displayed on the radio or navigation system screen during parking, showing the Tiguan's position and distance from obstacles. The location of any obstacle within the range of the ultrasonic sensors is highlighted on screen.

Optional Equipment

Personalisation. Potential.

Customise your Tiguan with a range of options designed to tailor your new car to your individual needs. Volkswagen's optional equipment is carefully designed to add even more luxury and convenience to your driving experience.

01. Park Assist 2

Once activated, Park Assist (standard on both the 132TSI Pacific and 103TDI Pacific) is a system that uses sensors mounted on the front, rear and sides of the vehicle to automatically let you know if a parking space is the right fit. Ideal for both parallel parking and 90 degree parking (likes those in shopping centres). All you do is control the speed, and the car steers and manoeuvres for a perfect park every time.

02. Bi-Xenon headlights with LED daytime driving lights and dynamic cornering lights

Bi-Xenon technology bestows brilliant lighting on high or low beam using advanced ionization. LED daytime driving lights improve your visibility to other motorists in the daytime.

03. New York 18-inch Alloy Wheels

An innovative 10-spoke design incorporating five 'main' spokes alternated by five 'supplemental' spokes, the New York alloys are shod with ultra-low-profile tyres.

04. Panoramic glass sunroof

On a glorious day you can bring the outside in, and bridge the gap between a convertible and a hardtop, with the Tiguan's optional panoramic glass roof.

05. Vienna leather appointed upholstery with electric driver's seat

Beautifully supple Vienna leather appointed upholstery throughout the cabin bestows a prestige touch on the new Tiguan, and the electrically adjustable driver's seat makes getting into the right driving position effortless.

06. Adaptive Chassis Control (not pictured)

Stay in touch with the road by dialing in the precise chassis response demanded by the driving conditions at hand. Three settings are available – Normal, Comfort and Sport – to tailor your ride to the road and driving conditions.

06. Comfort Package (not pictured)

The Tiguan Comfort Package (standard on the 132TSI Pacific, 103TDI Pacific and 155TSI) provides a host of innovations including: auto dimming central rear view mirror; dual zone automatic climate control air conditioning; and illuminated vanity mirrors for both driver and passenger. Outside there are automatic headlight illumination and rain-sensing automatic windscreen wipers, and the headlights incorporate remote-activated illumination with time delay.

08. Front fog lights (not pictured)

Fitted as standard on the 132TSI Pacific, 103TDI Pacific and 155TSI, and optional on all other models, you can boost safety in inclement weather by adding all-important fog lights to your new car.

Volkswagen Genuine Accessories

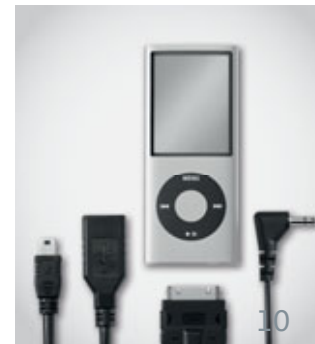

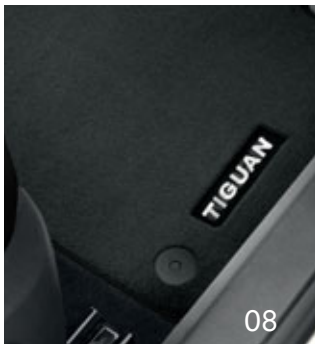

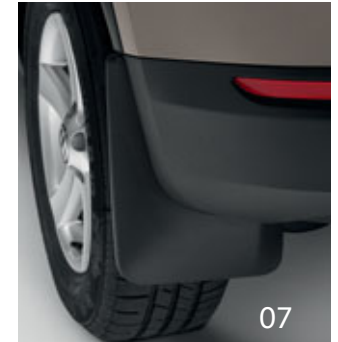

The finishing touches

Our comprehensive range of genuine accessories give you the freedom to customise the look and feel of your vehicle to reflect your own personality and individual sense of style. The product philosophy is simple – to deliver innovative technologies and premium design – right down to the finest detail. Each and every genuine accessory has been designed specifically with the Tiguan in mind and has been

engineered and rigorously tested to ensure that it meets the same high standards of quality as the vehicle itself.

For more information or to experience the full range of genuine accessories designed to suit the Tiguan, visit your local Volkswagen Dealer.

- 01. Door sill scuff plates
- 02. Bicycle holder
- 03. Support rods
- 04. Tow Bar
- 05. Slimline weathershields

- 06. Davenport 18" alloy wheel
- 07. Mudflaps
- 08. Carpet floor mats
- 09. Boot tray
- 10. Media Device Interface (MDI) connection cables

It is noted that the above accessories may have an effect on fuel efficiency. Items such as sports equipment and iPod® are for illustration purposes only and are not available for purchase from Volkswagen Group Australia or its dealers. [^] Emission level according to European Regulation (EC) No. 715/2007 and Regulation (EC) No. 692/2008.

* The Start/Stop system is designed to reduce fuel consumption and CO₂ emissions. It achieves this by automatically switching off the engine while the vehicle is stationary and then starting it again automatically when the driver wants to drive off. There are certain operating conditions where the Start/Stop system is deactivated (e.g. during engine warm-up), please refer to the owner's manual for full operating information.

[#] Please note figures are sourced from overseas data where equipment levels by model variant may vary.

^{**} Fuel consumption figures according to Australian Design Rule (ADR) 81/02.

The driving style, road and traffic conditions, environmental influences, fitment of accessories and vehicle condition can in practice lead to consumption figures which may differ from those calculated with these standards.

Fuel Saving Tips

We can all Think Blue.

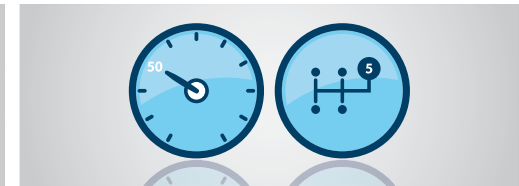

At Volkswagen, we aim to produce the most fuel efficient, environmentally sustainable vehicles possible. The good news is – we can all do our little bit to 'Think Blue'. Below, we have summarised the best tips for how you can drive more responsibly and reduce fuel consumption even further. It's not just your wallet that will benefit from these tips, but the environment too. Its practical benefits go far beyond just saving money and reducing emissions. Here are nine tips on how to drive more efficiently.

Be aware and save fuel. Think Blue.

01. Take it easy and save
Drive the modern way and think ahead.

Drive smoothly and anticipate hazards. Hard braking and acceleration, sudden lane changes and unpredictable behaviour is fuel-inefficient.

02. Change up early and fill up later
Drive in the highest gear possible.

Use a higher gear with a manual transmission. Low revs take far less energy. With an automatic, reduce acceleration and avoid a kick down.

03. Just let it roll
Use overrun fuel cutoff.

With the right driving techniques, you can really save. Whilst in gear, coast down hills or towards traffic lights to reduce feeding fuel to your engine.

04. Comfort high, fuel consumption low
Use auxiliary equipment in moderation.

Check the equipment you're using – if you don't need it, consider turning it off. De-misters, sound systems and air conditioning all use energy.

05. Savings are in the air
Check your tyre pressures.

Check your tyre pressures to cut fuel consumption. Under-inflated tyres force your car to burn more fuel. Tyres in good order will help you save fuel.

06. A warm engine – a cool way to save
Avoid short trips.

Plan to minimise the number of trips you need to make. Frequent short trips mean higher fuel consumption as cold engines run less efficiently.

07. Well-oiled for impressive savings
Use Volkswagen approved engine oils.

A well-lubricated engine produces less emissions especially when the weather is cold or the trip is short. Change your oil at regular intervals.

08. Keep it sleek
Cut aerodynamic drag.

Remember to remove roof racks, bike racks or roof boxes off your car when they're not in use. Keep windows up and sunroofs closed to reduce drag.

09. Lightly does it
Avoid unnecessary weight.

Every kilogram you load into your car takes energy to move – energy that will be supplied by burning fuel. The lighter you drive, the more you save.

Tiguan Capped Price Servicing*

The Tiguan comes with peace of mind included, with Capped Price Servicing* now available at participating Volkswagen dealers.

Authorised Volkswagen Service Centres have factory trained technicians equipped with the very latest diagnostic equipment, specialist tooling and Volkswagen Genuine Parts.

They also undertake work in accordance to factory specified guidelines and maintenance schedules, so you can be confident that your Tiguan will be well taken care of.

* Capped price servicing is available at participating Volkswagen dealers on Tiguan manual, automatic and DSG models first sold by an authorised Volkswagen dealer on or after 1 January 2013. Capped price servicing applies to the first 6 standard scheduled services of your vehicle which are scheduled to occur at every 15,000 km/12 month interval (whichever occurs first). Exclusions and conditions apply. For details on pricing, items not included in the capped price and for full terms and conditions please see volkswagen.com.au. Volkswagen Group Australia reserves the right to at any time modify or discontinue the Capped Price Servicing program.

Glossary

4MOTION® ^

An all-wheel drive system that provides the best possible traction at all road speeds, in all weather and road conditions. An electronic Haldex clutch responds to traction losses at the front and rear axles and directs torque to the axle with the best traction.

Adaptive Chassis Control

The electrically controlled dampers of adaptive chassis control constantly adjust to the road conditions, the driving situation and driver's requirements. Using a button located on the centre console, the driver selects between three damper settings – NORMAL, COMFORT and SPORT.

Starting from the normal setting, the customer can change the basic character of the car towards sporty or more comfort-oriented driving. In SPORT and COMFORT settings, the corresponding name is illuminated in the button. In NORMAL setting, only the shock absorber symbol is illuminated. In all settings, the adaptive chassis control adjusts the damping to the particular driving situation (up till one thousand times per second) which means it offers an optimum level of driving comfort and enjoyment at all times. In addition, in the SPORT setting the steering feel is also adapted. Particularly on windy roads and poor surfaces, using adaptive chassis control offers sporty and yet comfortable driving.

Anti-lock Braking System (ABS)

When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the ABS system reduces brake pressure to that wheel. This prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable.

Anti-Slip Regulation (ASR)

ASR is a switchable traction control system that prevents the wheels from spinning under acceleration by reducing engine torque.

Brake Assist

During emergency braking, Brake Assist aids the driver by increasing the brake pressure automatically to a level exceeding the locking limit. The ABS is thus quickly brought into the operating range, which enables maximum vehicle deceleration to be achieved.

Coasting Function ^

While driving, as the driver's foot is taken off the accelerator pedal the engine is declutched, allowing the vehicle to coast and roll over a longer distance. The momentum of the vehicle is used to save fuel with a foresighted driving style. When the brake, accelerator pedal or the gear selector lever is operated, the clutch is re-engaged and engine braking / drive takes effect. Coasting Function can be selected or deselected via the multifunction display settings. The gear selector lever is required to be in the D position to be functional.

Direct Shift Gearbox (DSG) ^

DSG is a manual gearbox in which the gearshifts are controlled electronically. What makes the DSG unique is that it has 2 separate gear sets operated by 2 clutches. The benefit of 2 gear sets and 2 clutches is that one gear set and clutch is engaged driving the vehicle with the second disengaged clutch having already pre-selected the next gear awaiting for power to be transferred. As the next gear has already been pre-selected prior to power being applied, the gear change only takes 3-4 100ths of a second. There is virtually no interruption to power, traction or acceleration. The DSG also offers Tiptronic gear selection and sports mode.

Driver Fatigue Detection System ^

The driver Fatigue Detection system automatically analyses the driving characteristics and if they indicate possible fatigue, recommends that the driver takes a break. The system continually evaluates steering wheel movements along with other signals in the vehicle on motorways and others roads at speeds in excess of 65 km/h, and calculates a fatigue estimate.

If fatigue is detected, the driver is warned by information in the Multi-function Display (MFD Plus) and an acoustic signal. The warning is repeated after 15 minutes if the driver has not taken a break.

Fatigue Detection cannot replace the driver's assertiveness. The driver is still legally responsible for the vehicle and therefore determining whether or not they are fit to drive. A driving time of 15 minutes is required in order to assess the driver correctly. The functionality of the system is restricted given a sporty driving style, winding roads and poor road surfaces.

Glossary

Electronic Brake-pressure Distribution (EBD)

Electronic, more sophisticated means of regulating the ratio of front/rear brake pressure. Settings are varied according to driving and load conditions to ensure each wheel is braked to the optimum extent.

Electronic Differential Lock (EDL)

EDL improves driving and steering characteristics when accelerating on road surfaces where each wheel has a different degree of traction. The system operates automatically and is combined with the ABS system. Using the ABS wheel sensors, EDL monitors the speed of the individual driving wheels. When a difference in driving wheel speed is detected (i.e. when one wheel starts to spin due to differences in road surfaces, e.g. due to water or dirt) the system brakes the spinning wheel, transferring engine power to the wheel with the best traction.

Electronic Stabilisation Program (ESP)

ABS, EDL and ASR traction control systems are integrated into the Electronic Stabilisation Program (ESP). In short, ESP helps ensure that the vehicle goes where you steer it even in extreme driving conditions. The ESP system constantly compares the actual movement of the vehicle with pre-determined values and should a situation arise where the vehicle starts to skid, ESP will apply the brakes to individual wheels and automatically adjust the engine's power output to correct the problem. ESP prevents the vehicle from losing control when trying to avoid an accident, for example. It also prevents spinning off on a curve due to either understeer or oversteer.

Engine Braking Control (EBC)

Prevents the driven wheels from locking if the accelerator is lifted very suddenly or the vehicle is braked sharply because a low gear is engaged.

Park Assist 2*

Park Assist 2 actively helps the driver when reversing into 90° parking bays, as well as reversing into and driving out of parallel parking spaces. The system works by using sensors mounted either side of the front and rear bumpers together with parking distance sensors front and rear. To park, the driver simply presses the Park Assist button to select the type of parking manoeuvre and uses the appropriate indicator as the car slowly passes the potential parking space.

Sensors scan the size of the parking space as the car is driven past and the driver is alerted if the parking space is big enough. If there is sufficient space, the driver stops the car, selects reverse and lets go of the steering wheel.

Park Assist will alert the driver of the intended path and subsequently the appearance of obstacles in the Multi-Function Display, within the driver's field of vision. Park Assist then actively supports the driver by taking over the steering control and parks the vehicle in the available space using the ideal course, if necessary with several moves. The driver can however take over the control of the steering at any time and end the automatic parking procedure.

Park Assist cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle. If the driver notices a risk that pedestrians, other vehicles or objects could be damaged or if they are uncertain of the risk, they will need to react accordingly and stop the vehicle, ending the function.

Think Blue. Creating a sustainable future together

Volkswagen is committed to sustainability now and in the future, for us this means taking responsibility for the environment by getting involved in initiatives that contribute to a sustainable future through our products and behaviour.

We call this way of thinking, Think Blue. Volkswagen aims to become the leading automotive manufacturer for the environment and economy, making efficient and sustainable vehicles available to everyone. We want to inspire and motivate people to get involved in ecological sustainability, on the road and everywhere else.

Owning a Volkswagen

Volkswagen New Vehicle Warranty

Every new Volkswagen passenger vehicle is covered by a 3-year unlimited kilometres manufacturer's warranty, which includes Volkswagen Assist (24hr roadside assistance).

Every new Volkswagen passenger vehicle is also covered by a 3-year paintwork and 12-year anti-corrosion perforation warranty.

Volkswagen Assist – 24 Hour Roadside Assistance

As a valued customer, you can be assured that wherever you travel within Australia, you will have access to roadside assistance, 24 hours a day, 365 days a year. This is complimentary for the duration of the vehicle's original Volkswagen warranty period. You will receive help in the event of a breakdown or accident and if required, your vehicle will be mobilised or transported to an Authorised Volkswagen dealer.

As a Volkswagen owner you will also have access to the additional benefits of accommodation and car rental if your vehicle cannot be mobilised within 24 hours, when you are over 100kms away from home. Volkswagen Roadside Assist can also be renewed at the expiry of the original warranty, ensuring ongoing coverage for your vehicle.

Volkswagen New Vehicle Extended Warranty Insurance*

To give you added peace of mind and the assurance of added security, you have the option to extend the warranty period to suit your ownership cycle. If your Volkswagen is still covered by its New Vehicle Warranty, we can offer you a 12 months or 24 months/ unlimited kilometres extension on the original warranty period already existing with your Volkswagen manufacturers Warranty. You then have the assurance that your Volkswagen remains a Volkswagen. For further information regarding warranty and extending your vehicles warranty period, please consult your local Volkswagen dealer, refer to your owner's handbook or visit volkswagen.com.au.

* Volkswagen New Vehicle Extended Warranty Insurance product is provided by Allianz Australia Insurance Limited (Allianz) ABN 15 000 122 850, AFSL Licence No. 234708. In arranging this cover, Volkswagen Group Australia Pty Ltd, ABN 14 093 117 876 and the authorised dealers act as agents of Allianz and not as your agent. Limits apply to the benefits you can claim. For full terms and conditions of cover, please refer to the relevant Volkswagen New Vehicle Extended Warranty Insurance policy document, available to you from your Volkswagen authorised motor dealer.

Volkswagen Genuine Accessories®

Volkswagen Genuine Accessories® are designed for your vehicle and approved by Volkswagen, with particular regard to safety. The workmanship, dimensional accuracy and materials used in these parts comply with factory specifications. To ensure safety and reliability, Volkswagen recommends the use of Volkswagen Genuine Accessories®. Volkswagen Authorised Dealers offer a 3-years/ unlimited kilometres warranty on genuine accessories if fitted prior to vehicle purchase, or a 2-years/ unlimited kilometres warranty if fitted after purchase.

Volkswagen Finance

Whether you are buying, borrowing or leasing, Volkswagen Finance will certainly make you think differently about financing and insuring your new Volkswagen. Committed to meeting the needs of Volkswagen drivers across Australia, we offer a range of leasing, financing and insurance products, each with distinct advantages depending on your specific circumstances. Our packages are designed to suit your individual requirements and budgeting needs with fast approval times.

Speak to your participating local Volkswagen Dealer today for the best financial solution and ultimate insurance protection for your vehicle or visit volkswagenfinance.com.au.
