Captivating

Not all of a Mercedes-Benz's qualities are apparent at first glance. Technical perfection and durability, for example, are characteristics which only become obvious over the course of time. But few cars on the road today reveal as much on first glance as a CLS: effortlessly superior elegance and powerful dynamism have rarely been combined to more impressive effect.

The **incenio** designer wheels and other stylish products shown over the following pages offer the ideal way to add an individual touch to the CLS's stunning looks. For an attraction that will last well beyond the first glance.

You drive one of the most sensational cars on the road today. Why not enhance the experience by adding a sensational soundtrack?

It's never been easier to take your personal choice of music with you in your Mercedes-Benz: whether you have an iPod or another MP3 player, the Media Interface allows you to plug your music collection into your car's audio system.

For convenience and enhanced safety, you can select tracks and adjust the playback via the audio system and the buttons on your multifunction steering wheel.

It takes a matter of seconds and is as straightforward a process as inserting the mobile into the holder itself. Changing your mobile and even alternating between different models of mobile no longer presents a problem. There are no compromises when it comes to convenience-enhancing technology either: the telephone can be operated via the multifunction steering wheel, and the telephone status and call information are displayed in the central multifunction display - as you would expect.

To use a mobile-phone holder, your car must be factory-fitted with the following optional extra:
