oh what a *feeling!*

The game has changed.

For over 4 decades the rules of the big 6 game have been the same. But one player has changed the game. Forever. Toyota Aurion has changed the rules, combining power with efficiency and performance with control. Now reliability, safety and the environment all matter.

Which means brute force at the expense of everything else is no longer acceptable. Precisely why the Aurion was engineered to be both the most powerful non-turbo Big Aussie 6 and the most fuel efficient<sup>#</sup>, and why the Aurion AT-X has been awarded Best Large Car by both Australia's Best Cars and Drive for two years running.

<sup>#</sup>ADR81/01 combined cycle. Actual fuel consumption may vary depending on driving style and conditions.

The Aurion is confident, muscular and streamlined. It has the unmistakable homegrown feel, because it's the result of an Australian design team working in collaboration with international design talents. The local team was headed by Nick Hogios, a former Wheels Magazine, 'Young Designer of the Year'. What they have helped create is a car with a look of confidence that will get noticed.
