

# King Off The Road.

# Long Live The King.

A true Australian icon for over 50 years, the LandCruiser has proven itself to generations of drivers in some of the toughest, most challenging terrain known to man. It's no secret that it's known to some as 'the 4WD that helped build Australia', thanks to its role in transporting construction workers for the Snowy Mountain Hydro-Electric Scheme. Building upon a rich heritage of proven credentials, today's LandCruiser 200 uses the latest in cutting edge technology, employing meticulous attention to detail inside and out. And now, after years of research, development and innovation, we invite you to make your own piece of history with the LandCruiser 200.

Get ready to discover Earth's Greatest 4WD.

#### Designed to be best of breed.

Designed to standards rarely seen in such a vehicle, LandCruiser 200 sets high benchmarks in on and off-road driving. From powerful engines and cutting edge technology to flexible, easy-fold seating configurations and a cleverly designed cabin interior, we listened carefully to what drivers like you expect – and we know you won't be disappointed with the result.

#### A powerhouse of innovation.

With two engine variants, a 4.7L V8 VVT-i Petrol with 5-speed automatic transmission and a 4.5L V8 Twin Turbo Diesel with 6-speed automatic transmission, the LandCruiser 200 offers outstanding fuel efficiency, superb drivability, heart thumping power and pure, adrenalin-inducing grunt. But it's safer too. A high strength, high rigidity, rust-resistant framework and a class-leading airbag configuration of up to 10 airbags means world-class protection for you and all your passengers. And, on all grades of LandCruiser 200\*, a Rear View Camera<sup>^</sup> shows you what's going on behind you – making parking a breeze.

#### Smarter than your average 4WD.

Advanced technologies have allowed the LandCruiser 200 to become the smartest 4WD in its class. The CRAWL control system\* across the entire range, automatically maintains a low, uniform speed to enable stable driving in extreme environments or on slippery, uneven surfaces. We like to think of it as an off-road Cruise Control. Kinetic Dynamic Suspension System (KDSS)# is an advanced suspension control technology that minimises body roll to remarkable levels. Off-road, the wheel articulation is even more impressive, delivering gripping traction on all four wheels. Once you have experienced KDSS<sup>#</sup>, your view on suspension will change forever.

#### Gripped by exhilaration.

Hill-start Assist Control (HAC), standard on both engines, detects backward sliding of the vehicle when going uphill, allowing you to take off smoothly, even on steep terrain. A technological first for Toyota, the Multi-terrain Anti-skid Braking System (ABS) not only prevents the wheels from locking, it can actively sense off-road conditions such as ice, sand, mud, gravel and dirt, adapting to different terrain for optimum braking power.

\*Available from July 2009 production. \*The Rear View Camera does not provide a comprehensive view of the entire rear area of the vehicle and should only be used as an aid for viewing when reversing. #KDSS is an optional extra on GXL Turbo Diesel and standard on all other grades.

## Customise the King with Toyota Genuine Accessories.

Whether you're after an even more rugged look, extra storage options or greater convenience, your LandCruiser 200 deserves accessories with a proven pedigree. Combining innovative style with the strength and durability you expect from Toyota, these additions have been purpose-built for your LandCruiser - and your lifestyle. Integrating seamlessly with the original specifications, they not only look like they were meant to be there, they perform like it too. So whether you're working hard or playing harder, make sure you start on the right track with Toyota Genuine Accessories.

#### TOYOTA SERVICE ADVANTAGE CUTS NEW CAR RUNNING COSTS

Toyota Service Advantage makes owning your LandCruiser 200 even more economical because you are entitled to low cost scheduled servicing. That's up to 6 standard services during the first three years or 60,000km, whichever occurs first. Terms and conditions apply. See your Toyota dealer or advantage.toyota.com.au for eligibility, pricing and more information. Toyota Service Advantage pricing represents the maximum amount payable for standard scheduled servicing which is as per 'maintenance for normal operating conditions' outlined in the Warranty & Service Handbook's service schedule. Service Advantage eligibility excludes Government and Rental vehicles and certain other exclusions apply.

NOTE: Toyota Australia reserves the right to vary or discontinue from time to time the interior and exterior colours, trims and colour/trim/model combinations currently available. Colours and trims displayed here are a guide only and may vary from actual colours due to printing/display process. See your Toyota dealer to confirm colour/trim/model availability when ordering your vehicle. \*\*The Bluetooth word mark is owned by Bluetooth SIG Inc. Bluetooth\* will only operate with telephones enabled with compatible Bluetooth\* wireless technology (HFP (Hands Free Profile) v1.0 and OPP (Object Push Profile) v1.1 international standards). OPP functionality only works on satellite navigation equipment. GXL/VX – HFP, Sahara – HFP & OPP. †Current Navigation mapping database encompasses major capital and primary national road networks as well as offering some coverage in regional areas.

PLEASE NOTE: The loading configuration of your vehicle reduces the available payload for passengers, optional equipment, cargo and tow-ball download. When changing the mass configuration of your vehicle, it is necessary to consider total mass of the vehicle (including passengers, optional equipment, cargo, tow-ball download and trailer mass) and the distribution of the mass to ensure that Gross Vehicle Mass (GVM), Gross Combination Mass (GCM), maximum towing capacity, maximum tow-ball download and individual axle limits of your vehicle are not exceeded when the vehicle is in service. The configuration of different optional equipment, cargo tow vehicle are not exceeded when the vehicle is in service. The configuration of different optional extras on your vehicle will cause different loadings on the front and rear axle. It is important to realise that additional equipment, seat position, passenger position, and other load factors may cause a shift in the loadings of the front and rear axles. It is important that this configuration change be taken into account when you are loading your vehicle. Reference to Gross Combined Mass (GCM) refers to the total permissible combined weight of the vehicle and trailer/caravan being towed including occupants, fuel & cargo.
