Atego & Axor

Cabins

Design and construction. The intelligently designed structure of the New Atego and Axor cabins provides a solid base for a long and economical life whilst taking into account the safety aspects that protect the occupants.

The cabins are characterised by high structural strength and rigidity which is based on a self supporting-robotically welded steel structure in lightweight design (complying with the requirements of ECE- R29). Extensive corrosion protection is incorporated by various means including cathodic dip priming, hydro filler and body cavity protection to ensure excellent resistance.

Cabins tilt to 55° for the Atego and 67° for the Axor to enable optimal service access using the manual cab tilt pump.

Access. Getting in and out of the cabin is simple. Cascading anti-slip steps are illuminated and handrails are provided on both sides of the doors. The pull out door handles are easy to reach and doors open to a 95° angle.

Comfort. The New Atego and Axor cabins are designed with the driver in mind and offer the best possible conditions for a relaxed and safe driving environment. High quality materials, first class workmanship and a practically oriented design are combined to produce a workplace where the driver feels at home.

The driver's seat is air suspended with a head restraint and armrests. It is extensively adjustable and provides ideal support and positioning for strain relief.

The optional comfort passenger seat or centre seat with seatbelt provides the space for a driver and two passengers while still maintaining the comfort you would expect from a Mercedes-Benz.

An optional seat/bunk combination is available to provide for the various tasks associated with transport today. The upper/lower bunk combination in the cabin can be folded away to provide a bench seat for up to four extra passengers.

All of the materials used in the cabins have been specially selected to deliver an extremely high quality look and feel throughout the vehicles life.

Storage. Storage areas are both practical and accessible. For smaller items there are deep pockets in each door, recesses on the fascia and above the windscreen and dual drink holders for the driver and passenger.

Interior lighting. Interior lighting is supplied by fully dimming lamps positioned around the cabin. These can be controlled by the door opening and will automatically turn off once moving. The Atego also has reading lamps.

Instruments. The New Atego and Axor are equipped as standard with the multifunction steering wheel with integrated control functions for on board computer, radio and telephone. The anti glare instrument cluster with graphic display and eco-meter are the driver's information centre and provide a modern feel to the interior. Operating system and functional information are shown as symbols or in text form in the graphic display. The fuel gauge includes an integrated Adblue tank level indicator.

An automatic departure check is activated when the key is turned to the driving position.

The following functions are checked and shown in the display:

- Oil Level
- Coolant level
- Brake lining condition
- Washer fluid level
- Air filter condition
- Condensation water level
- Lamp status

Protection and finish. Cabins are painted in Arctic white as standard and can be ordered in a range of solid or metallic colours. Please see your local Mercedes-Benz dealer for full details.

Service access. Lifting the front grill gives access to top up the following fluids:

- Clutch
- Screen wash
- Coolant
- Engine oil

All fluids can be monitored through the Telligent® Maintenance System.

Other refinements

- Two electrically adjustable rear view mirrors with switched heating combined with long-range mirrors on both sides ensure all round visibility.
- Two full width sun visor's at the front on all cabins and a pull down window blind on the driver's side on long cabins are fitted as standard.
- Externally all round tinted glass and an impressive sun visor are also standard.
- Three point integrated seatbelt
- Dash mounted 12 volt socket
- Electric windows for driver and passenger-operated from door panel.

Atego

Cabins

Short cabin

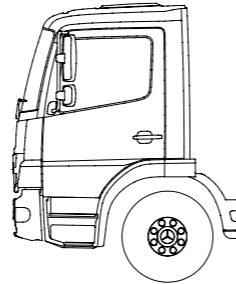

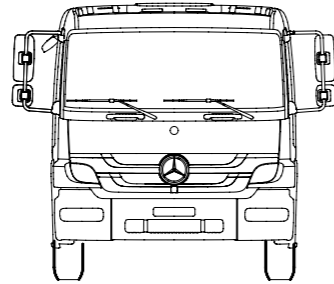

The short cabin is specially designed for minimised cabin space to allow for maximised payload space behind the cabin.

Cabin exterior

- Aerodynamic front bumper
- Cabin access via 2 stairs
- Windows in cabin rear wall
- External sunvisor
- Remote central locking
- Aerodynamic fairing optional

Cabin interior

- Stereo CD player with Bluetooth® connectivity
- Hard wearing fabric seat
- Drivers airbag and seatbelt pre-tensioner (not with off road vehicles)
- Oddments tray on engine tunnel
- Stowage compartments above windscreen
- Optional centre seat

Extended short cabin

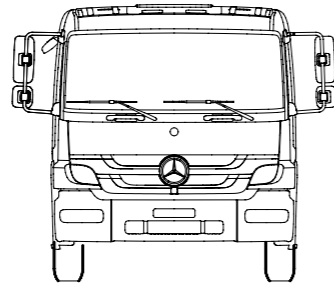

Available with all models, distribution style cabin with some storage space behind the seats.

Cabin exterior

- Aerodynamic front bumper (3 piece steel with off-road vehicles)
- Cabin access via 2 stairs (swinging steps with steel bumper)
- External sunvisor
- Remote central locking
- Aerodynamic fairing optional

Cabin interior

- Stereo CD player with Bluetooth® connectivity
- Hard wearing fabric seat
- Drivers airbag and seatbelt pre-tensioner (not with off road vehicles)
- Oddments tray on engine tunnel
- Stowage compartments above windscreen
- Optional centre seat

Long cabin

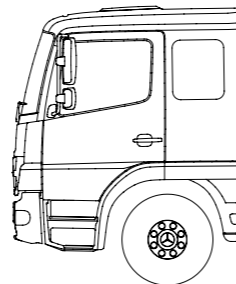

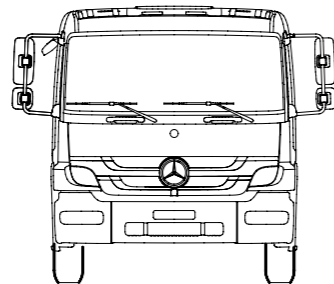

Available with all models, distribution style cabin with some storage space behind the seats.

Cabin exterior

- Aerodynamic front bumper
- Cabin access via 2 stairs
- External sun visor
- Remote central locking
- High roof option (as shown)
- Aerodynamic fairing optional

Cabin interior

- Stereo CD player with Bluetooth® connectivity
- Hard wearing fabric seat
- Driver's airbag and seatbelt pre-tensioner (not with off road vehicles)
- Oddments tray on engine tunnel
- Stowage compartments above windscreen
- Optional centre seat/bunk combination
- Single piece lower bed

Axor

Cabins
