

Industry Range Genuine Accessories.

TOYOTA

toyota.com.au

Oh what a feeling!

Built ready for work.

There's no tougher work vehicle than a Toyota ute.

Every HiLux and LandCruiser 70 cab chassis begins with over 40 years of continuous testing and development by Toyota in some of the harshest Australian conditions and

All accessories sold separately.

terrain. Built from the ground up with a Toyota Genuine Industry Heavy Duty Steel Tray, unmatched torsional rigidity and a strong steel high-tensile frame, Toyota utes are built capable for any worksite.

This page: HiLux 4x4 SR Double-Cab Turbo Diesel shown accessorised with Commercial Steel Bull Bar, Tow Bar, Tow Ball, Trailer Wiring Harness, Snorkel, Wheel Nut Indicators, Reflective Tape, Industry Heavy Duty Steel Tray with Optional Industry Range and Tray accessories. All accessories sold separately.

Tested to meet the toughest Australian Standard.

Only Toyota Genuine has a detailed understanding of the vehicle structure and performance. With development beginning up to 5 years

before vehicle launch, all Toyota Genuine accessories are made to work in harmony with the vehicle so it operates as one integrated system.

LC70 Single-Cab Chassis Workmate shown accessorised with Steel bull Bar, Tow Bar, Tow Ball, Trailer Wiring Harness, Headlamp Covers, Wheel Nut Indicators, Reflective Tape, Industry Heavy Duty Steel Tray with Optional Industry Range and Tray accessories. All accessories sold separately.

Industry Heavy Duty Steel Tray Features:

*Optional Industry Range and Tray Accessories sold separately.

Grab Handles*

Reflective Tape*

Retractable Step*

Tail Lamp Protectors

Internal Tie Down Points*

Wheel Chock Box

Rear Window Protector
Spare Tyre Hanger
(Only standard on HiLux. Spare
Wheel and Tyre not included)

LED Worklamps*

Light Bar*

Illuminated Flag*

Mounting Brackets for
Illuminated Flag and Light Bar Kit
(Illuminated Flag & Light Bar Kit sold separately)

Large or Small Fire
Extinguisher Mount*
(fire extinguisher not included)

All of these accessories sold separately.

Industry Heavy Duty Steel Tray with Optional
Industry Range and Tray accessories.

The Tray that's as tough as your Toyota.

Like all Toyota Genuine Trays, the Industry Heavy Duty Steel Tray is designed to withstand the most extreme operating conditions and will survive just about anything you throw at it, or in it.

This tray is designed with practical features that meet your work needs no matter the industry, from the harsh

conditions of the mining and exploration industries to the safety requirements on a civil construction site.

Guaranteed to comply to Australian Standards and Design Rules and not damage the vehicle chassis when used as recommended, it all adds up to a lifetime of durability you'd expect from Toyota.

LC70 Single-Cab Cab-Chassis Workmate shown accessorised with Steel bull Bar, Tow Bar, Tow Ball, Trailer Wiring Harness, Headlamp Covers, Wheel Nut Indicators, Reflective Tape, Industry Heavy Duty Steel Tray with Optional Industry Range and Tray accessories. All accessories sold separately.

Toyota Genuine Tray features:

DROPSIDES

Dropsides are manufactured using galvanised sheet steel or high-strength alloy, and are subjected to a lifetime of use simulation which is equal to lowering and raising the sides of the tray, approx. 14 times a day over 10 years. Dropside supports can also be added to maintain rigidity when the Tailgate is removed or in the lowered position.

Welded tray showing cracking

Toyota Genuine bolted tray

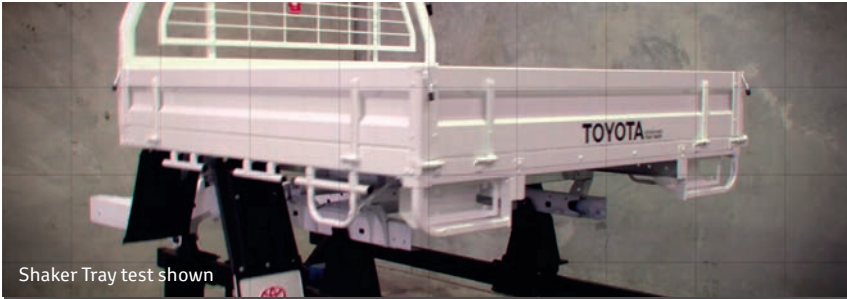

WELDED VS BOLTED DESIGN

The Toyota Genuine Tray Body is designed for durability as its secure bolted joint design is critical to vehicle safety. It allows for a prescribed flex which minimises its impact of stresses to the vehicle chassis. Testing has proven the rigidity of a welded tray places higher stress on the chassis which could result in cracking of the Tray or even worse, the vehicle chassis.

HINGES

Glass Reinforced Nylon Hinges are used because of their superior performance to Welded Steel Hinges. Successfully tested to 700kgs load, the Nylon Hinges absorb force and return to its original shape whereas Steel Hinges are rigid and can deform permanently.

Shaker Tray test shown

TESTING

Toyota Genuine Trays are subject to a comprehensive testing program which includes:

- Shaker Tray Test
- UV Testing (Hinges)
- Cyclic Hinge Test
- Vehicle Crash Test
- On-Vehicle Durability Evaluation

Aftermarket cracked weld shown

WELD QUALITY

Sufficient weld penetration is critical to durability to ensure the stability of the tray. Toyota understands the importance of tray body durability, which is why a bolted joint design is utilised to secure your load to the chassis

FATIGUE RESISTANCE

Fatigue is the weakening of a material caused by repeatedly applied loads. Aftermarket welded tray body designs may face significantly reduced fatigue life due to poor welding and corrosion, especially due to prolonged driving on corrugated roads.

CORROSION RESISTANCE

Toyota Genuine Tray Bodies use Nylon Hinges which avoid the paint damage and corrosion that is evident in traditional steel latch designs. The tray body itself is also subjected to stringent Toyota-specific salt spray testing to simulate years of exposure to corrosive elements.

Prepare yourself for any job with Industry Accessories.¹

Developed to meet the rigorous requirements of mining, construction and industrial users, the Toyota Genuine Accessories Industry Range is tested to Toyota Standards ensuring that the versatile range is more than up to task on any worksite.

The accessories range is designed for optimal payload as well as safety, with features such as non-split conduits and waterproof connectors on electrical accessories as opposed to split conduits and non-waterproof connectors commonly seen with aftermarket competitors.

Kit up your vehicle to your worksite requirements from our Industry Range.

LC70 Single-Cab Cab-Chassis Workmate shown accessorised with Steel bull Bar, Tow Bar, Tow Ball, Trailer Wiring Harness, Headlamp Covers, Wheel Nut Indicators, Reflective Tape, Industry Heavy Duty Steel Tray with Optional Industry Range and Tray accessories. All accessories sold separately.

LED Work Lamps shown sold separately.

LIGHT BAR KIT

The Light Bar Kit provides improved visibility, which is especially important on any work site. The kit includes Light Control Switches, a Reverse Buzzer² (to notify of reversing vehicle) and a Flashing Beacon.

Light Bar Kit shown sold separately.

LED WORK LAMPS³

Tested to Toyota quality and durability standards, the LED Work Lamps are built to provide a generous beam of light for a variety of situations featuring a low current draw and multi-directional adjustment.

Shown on HiLux.

HANDBRAKE ALERT^{3,4}

Pivotal in preventing dangerous situations when drivers neglect to apply the handbrake when parking. It works by sounding an alert when the driver's door is opened and the handbrake is not engaged.

IN-VEHICLE MONITORING SYSTEM PRE-WIRE KIT^{3,4}

This kit provides a convenient single point of access for vehicle information making installation of vehicle monitoring systems simple and safe.

BATTERY ISOLATOR SWITCH

The highly visible switch allows easy disconnection of the battery during servicing for added safety.

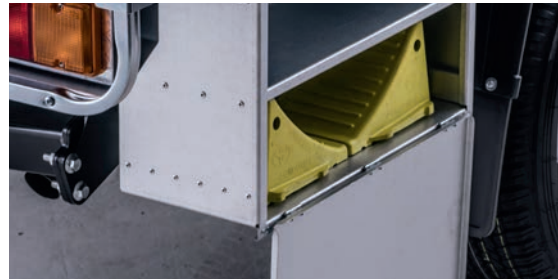

ILLUMINATED FLAG³

Combining an illuminated LED tip, the reflective flag further improves visibility of your vehicle. It is attached to the Industry Heavy Duty tray via a durable quick release mount and waterproof connector.

AUXILIARY BATTERY KIT⁵

Coming equipped with a 3-stage intelligent charger, the kit allows fast charging of the auxiliary battery whilst providing vehicle battery protection. Battery not included.

WHEEL CHOCKS

Made from durable rubber blend, the Wheel Chocks are performance tested to help prevent vehicle movement when unattended or during servicing. The wheel chocks are water proof and solvent-and weather-resistant and are available as a set of two.

REFLECTIVE TAPES

Toyota Genuine Reflective Tapes help improve safety by providing increased visibility to other vehicles.

WHEEL NUT INDICATORS

Providing wheel security at a glance, Wheel Nut Indicators are made using tough plastic in a fluoro yellow. Available in a set of 24 for HiLux and a set of 20 for LandCruiser 70.

Tough anyway you want it.

HiLux 4x4 SR Double-Cab Turbo Diesel shown accessorised with Commercial Steel Bull Bar, Tow Bar, Tow Ball, Trailer Wiring Harness, Snorkel, Wheel Nut Indicators, Reflective Tape, Industry Heavy Duty Steel Tray with Optional Industry Range and Tray accessories. All accessories sold separately.

STEEL BULL BAR

Toyota Genuine Steel Bull Bars are made of high-tensile steel and are both light and strong. An intensive 5-year development program before vehicle launch ensures that Toyota Genuine Bull Bars are fully integrated with the vehicle's SRS airbags and crash energy absorption system.

Through detailed safety engineering, the Bull Bar is designed to be strong enough to withstand an animal strike, but not too rigid that it causes the airbags to deploy unnecessarily. Simulated and physical crash tests are undertaken to confirm the correct deployment of airbags and operation of vehicle safety systems.

The Bull Bar is bolted directly to the chassis and is powder-coated black for corrosion protection. It includes mounts for CB antennae, Driving Lights and the Toyota-enhanced Warn Winch (each sold separately).

HiLux offers both a Premium Steel Bull Bar and a Commercial Steel Bull Bar as a more cost-effective option.

* LC70 Single-Cab Cab Chassis variants only.

SNORKEL (HILUX ONLY)

Tested to exhibit less pressure drop than aftermarket snorkels, the Toyota Genuine Snorkel provides cleaner air to your HiLux's engine in dusty environments while maintaining optimal air flow and engine temperature.

Advanced technology was used during development to calculate and measure airflow rates leading to the creation of a smoother air path. Thorough testing for strength, durability and environmental factors ensure that the Toyota Genuine Snorkel measures up to the vehicle's rugged ambition.

Lightweight Synthetic Rope Winch shown.

WINCH

The Toyota-enhanced Warn Winch has faced significant development to meet Toyota's requirements, with components strengthened to safely carry significant electrical loads. All exposed electrical connections have Toyota approved water-proof connectors and components such as the Overload Interrupt (OLI) are designed to not only to protect the Winch, but also protect the vehicle electrical systems.

Available in heavy duty steel or lightweight synthetic rope* variants, the Winch has 9,000lbs (4082kg) pulling power with high line speed for safe and effective vehicle recovery.

*Synthetic rope recommended to be replaced every 12 months.

SIDE RAILS

Toyota Genuine Side Rails provide added body protection for driving in off-road and harsh conditions. The Side Rails have been subject to Toyota's stringent strength, durability and environmental testing for long-term performance and are rigorously tested to ensure correct deployment of airbags. Steel Bull Bar is required to fit Side Rails on LandCruiser 70 and HiLux.

Heavy Duty Side Steps are also required to fit the Side Rails on HiLux.

Accessories each sold separately.

TRAY MATS

The Rubber Tray Mat is designed to protect your cargo and your tray. With its rubbery surface, it improves to prevent cargo from sliding around when driving as well as protecting the base of the tray.

Disclaimers and Notice.

- 1 Industry Accessories only applicable to HiLux Double-Cab, Cab-Chassis, SR 4x4 Wide-Body Turbo-Diesel and LC70 Single-Cab, Cab-Chassis Variants only. Industry Heavy Duty Steel Tray (sold separately) also required.
- 2 Reverse Buzzer is a driver assist feature only and should not be used as a substitute for safe driving practices. Driver remains responsible at all times for safe driving.

IMPORTANT NOTICE – PLEASE READ:

Toyota Australia uses its best endeavours to ensure brochure information is correct when published. Toyota Genuine Accessories are not applicable to all models/grades. When ordering accessories, check with your authorised Toyota dealer to ensure the accessory's design, features and colours are available and fit your vehicle. Consider the mass of your load to ensure you will not exceed the maximum allowable individual axle capacity, Gross Vehicle Mass and/or Gross Combined Mass of the vehicle. Refer to toyota.com.au/vehiclepayload for details. Accessory colours displayed are a guide only and may vary from actual colours due to printing / display process. Certain accessories when fitted will require the removal of standard equipment, which may be retained by Toyota Australia or your Toyota dealer. Toyota Australia reserves the right to change, without notice, at any time prices, colours, materials, equipment, specifications and discontinue colours/models. All Toyota Genuine Accessories purchased and fitted to a Toyota are

- 3 Light Bar Kit (sold separately) required to fit accessory.
- 4 For the LC70, a power harness is available (sold separately) in the case that a Light Bar Kit is not fitted.
- 5 The Auxiliary Battery Kit can be accessed from the Tray for the LC70 and under the bonnet for the HiLux.

warranted for the remainder of the New Vehicle Warranty or 12 months, whichever is greater.
