2001 TOWN CAR

02 American Luxury.  
06 Of Impeccable Taste.  
08 The Beauty.  
12 Arrive in Style.  
14 Your Favorite Room.  
18 Complete Peace of Mind.  
22 The Features.  
26 The Facts.  
30 The Palette.

At first glance, Lincoln Town Car's sophistication

seems classic. On the second, incredibly

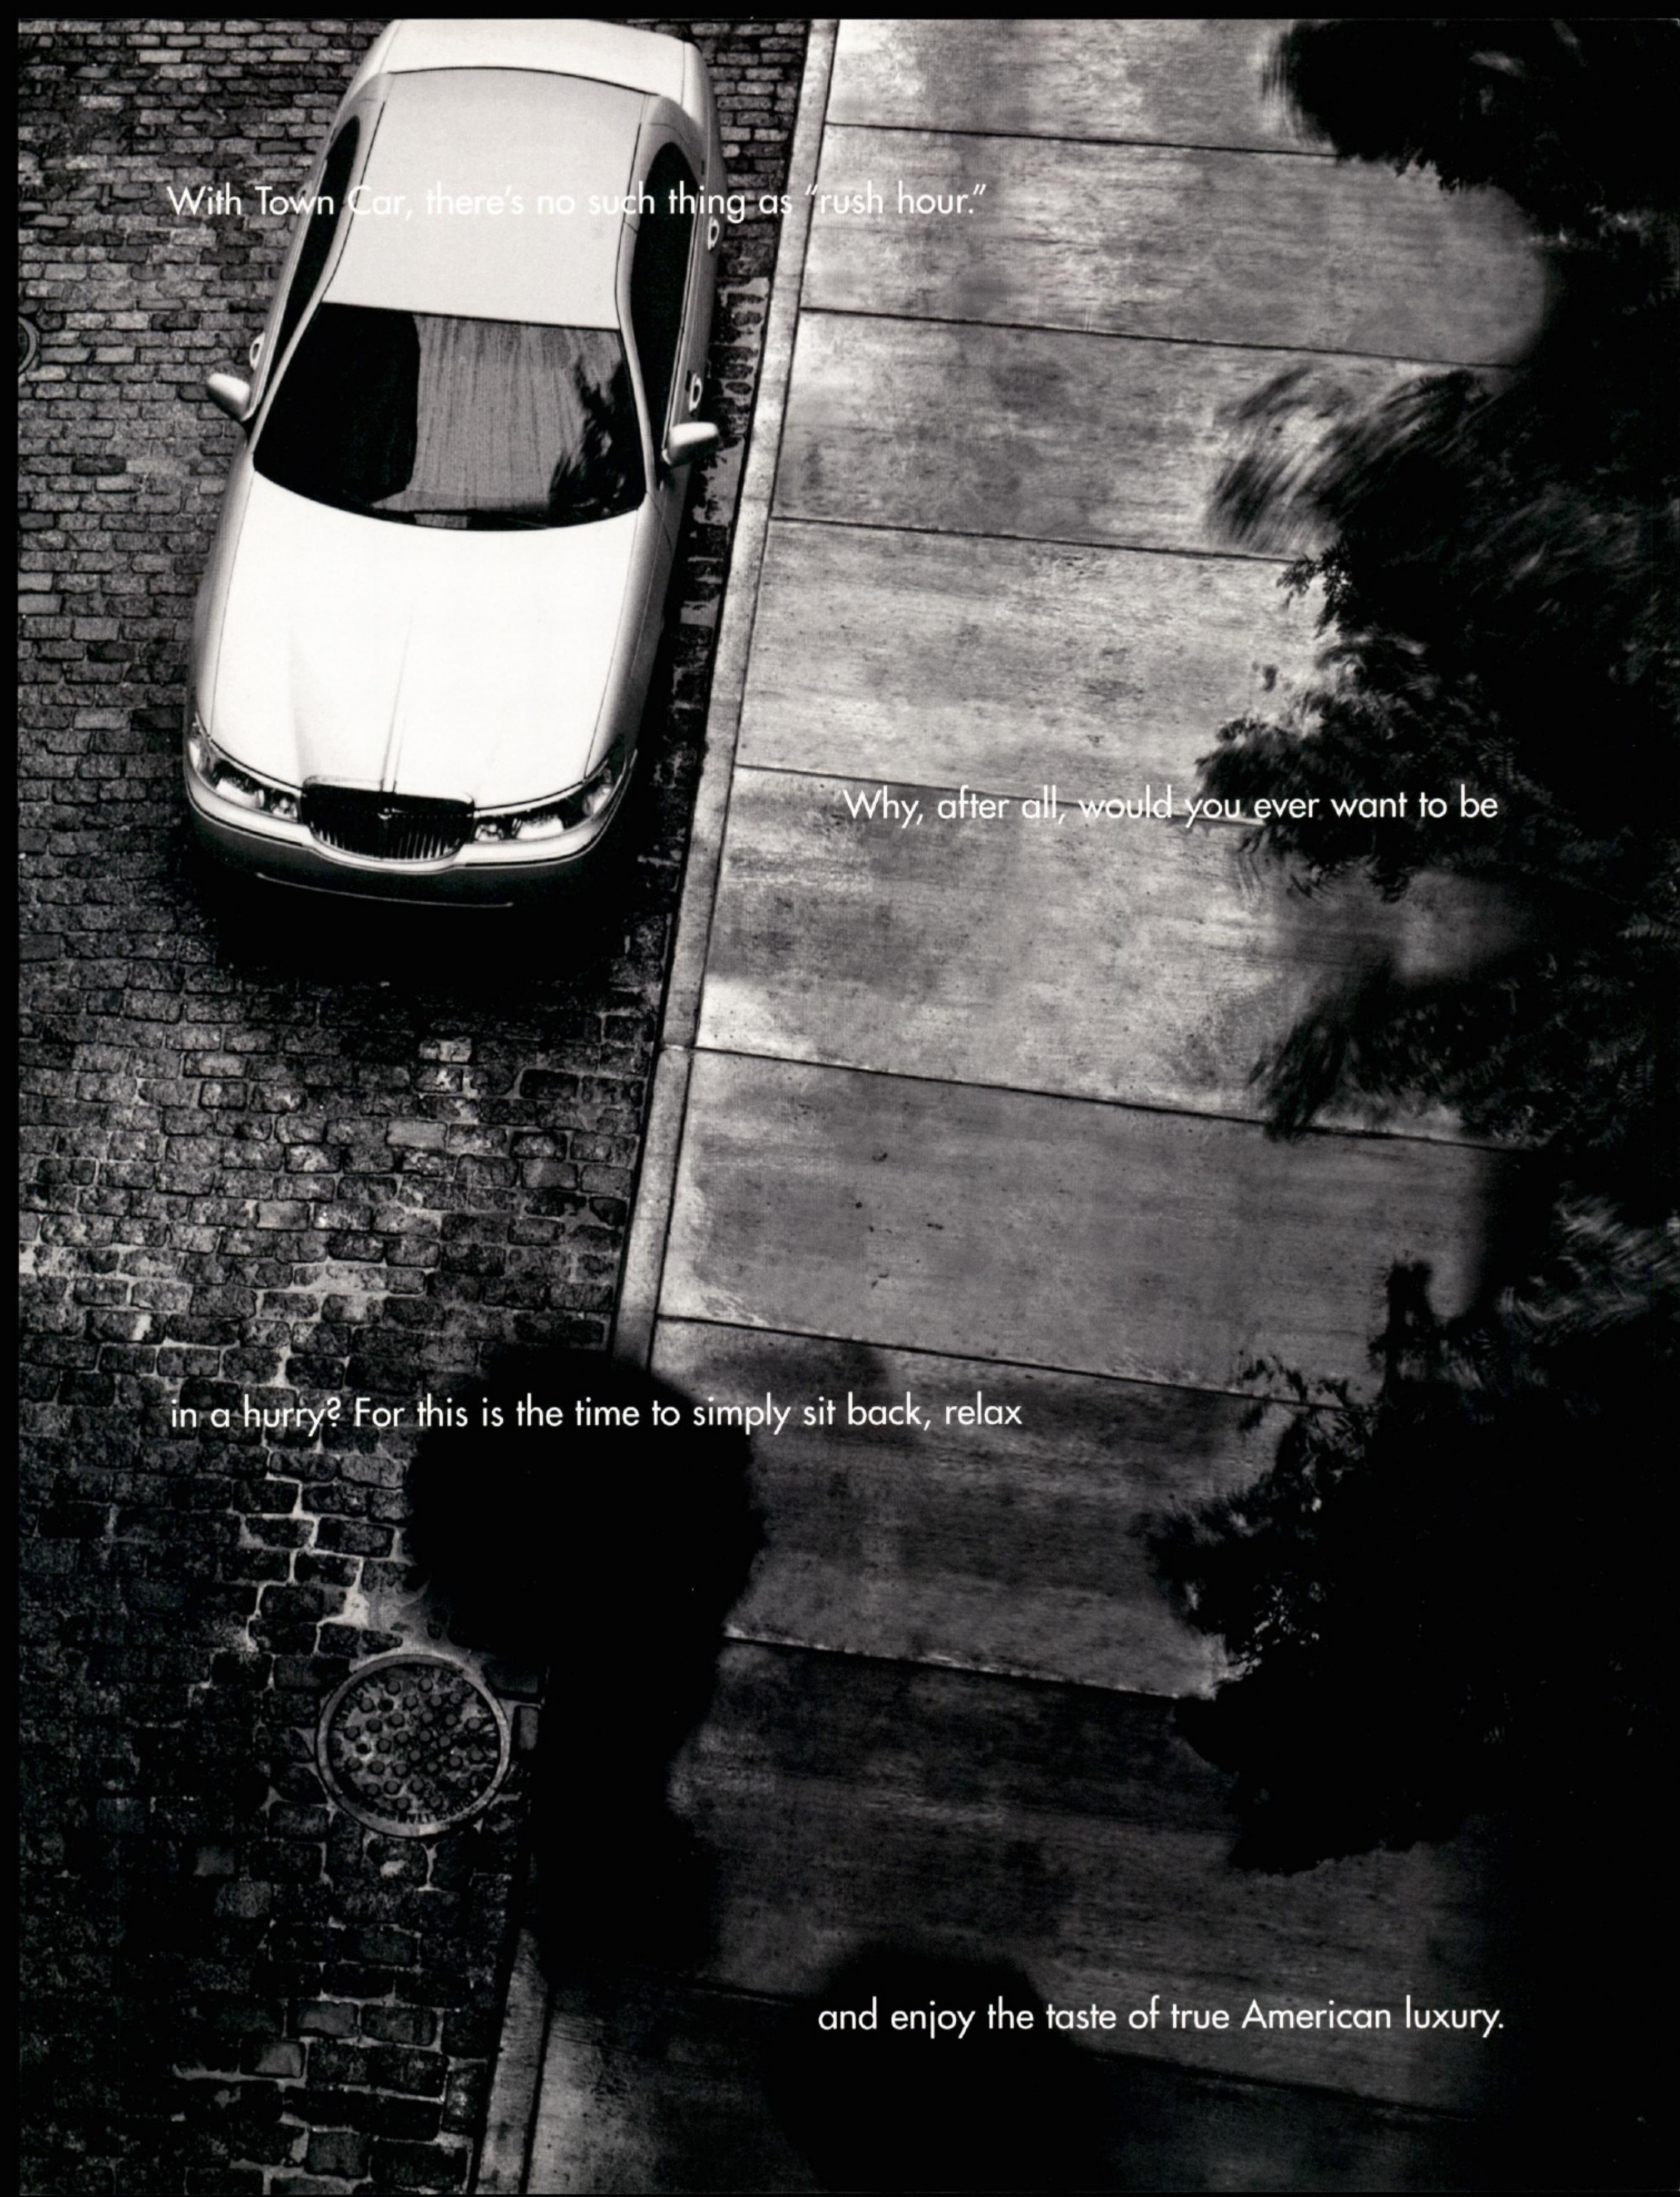

modern. Each is correct. Of course, timeless design

has that effect. Now presented for 2001.

Q4

With Town Car, there's no such thing as "rush hour."

Why, after all, would you ever want to be

in a hurry? For this is the time to simply sit back, relax

and enjoy the taste of true American luxury.

A desire for the finest quality is what led you here in the first place. And like so

many other things in your life, the Lincoln Town Car truly captures every ounce

of your more passionate side. Almost as if it was designed with your own

specific needs in mind. Clearly, Town Car is where you've belonged all along.

Tuesday or

Saturday, with

clients or with

family, Town Car

says you've

arrived in style.

And when the

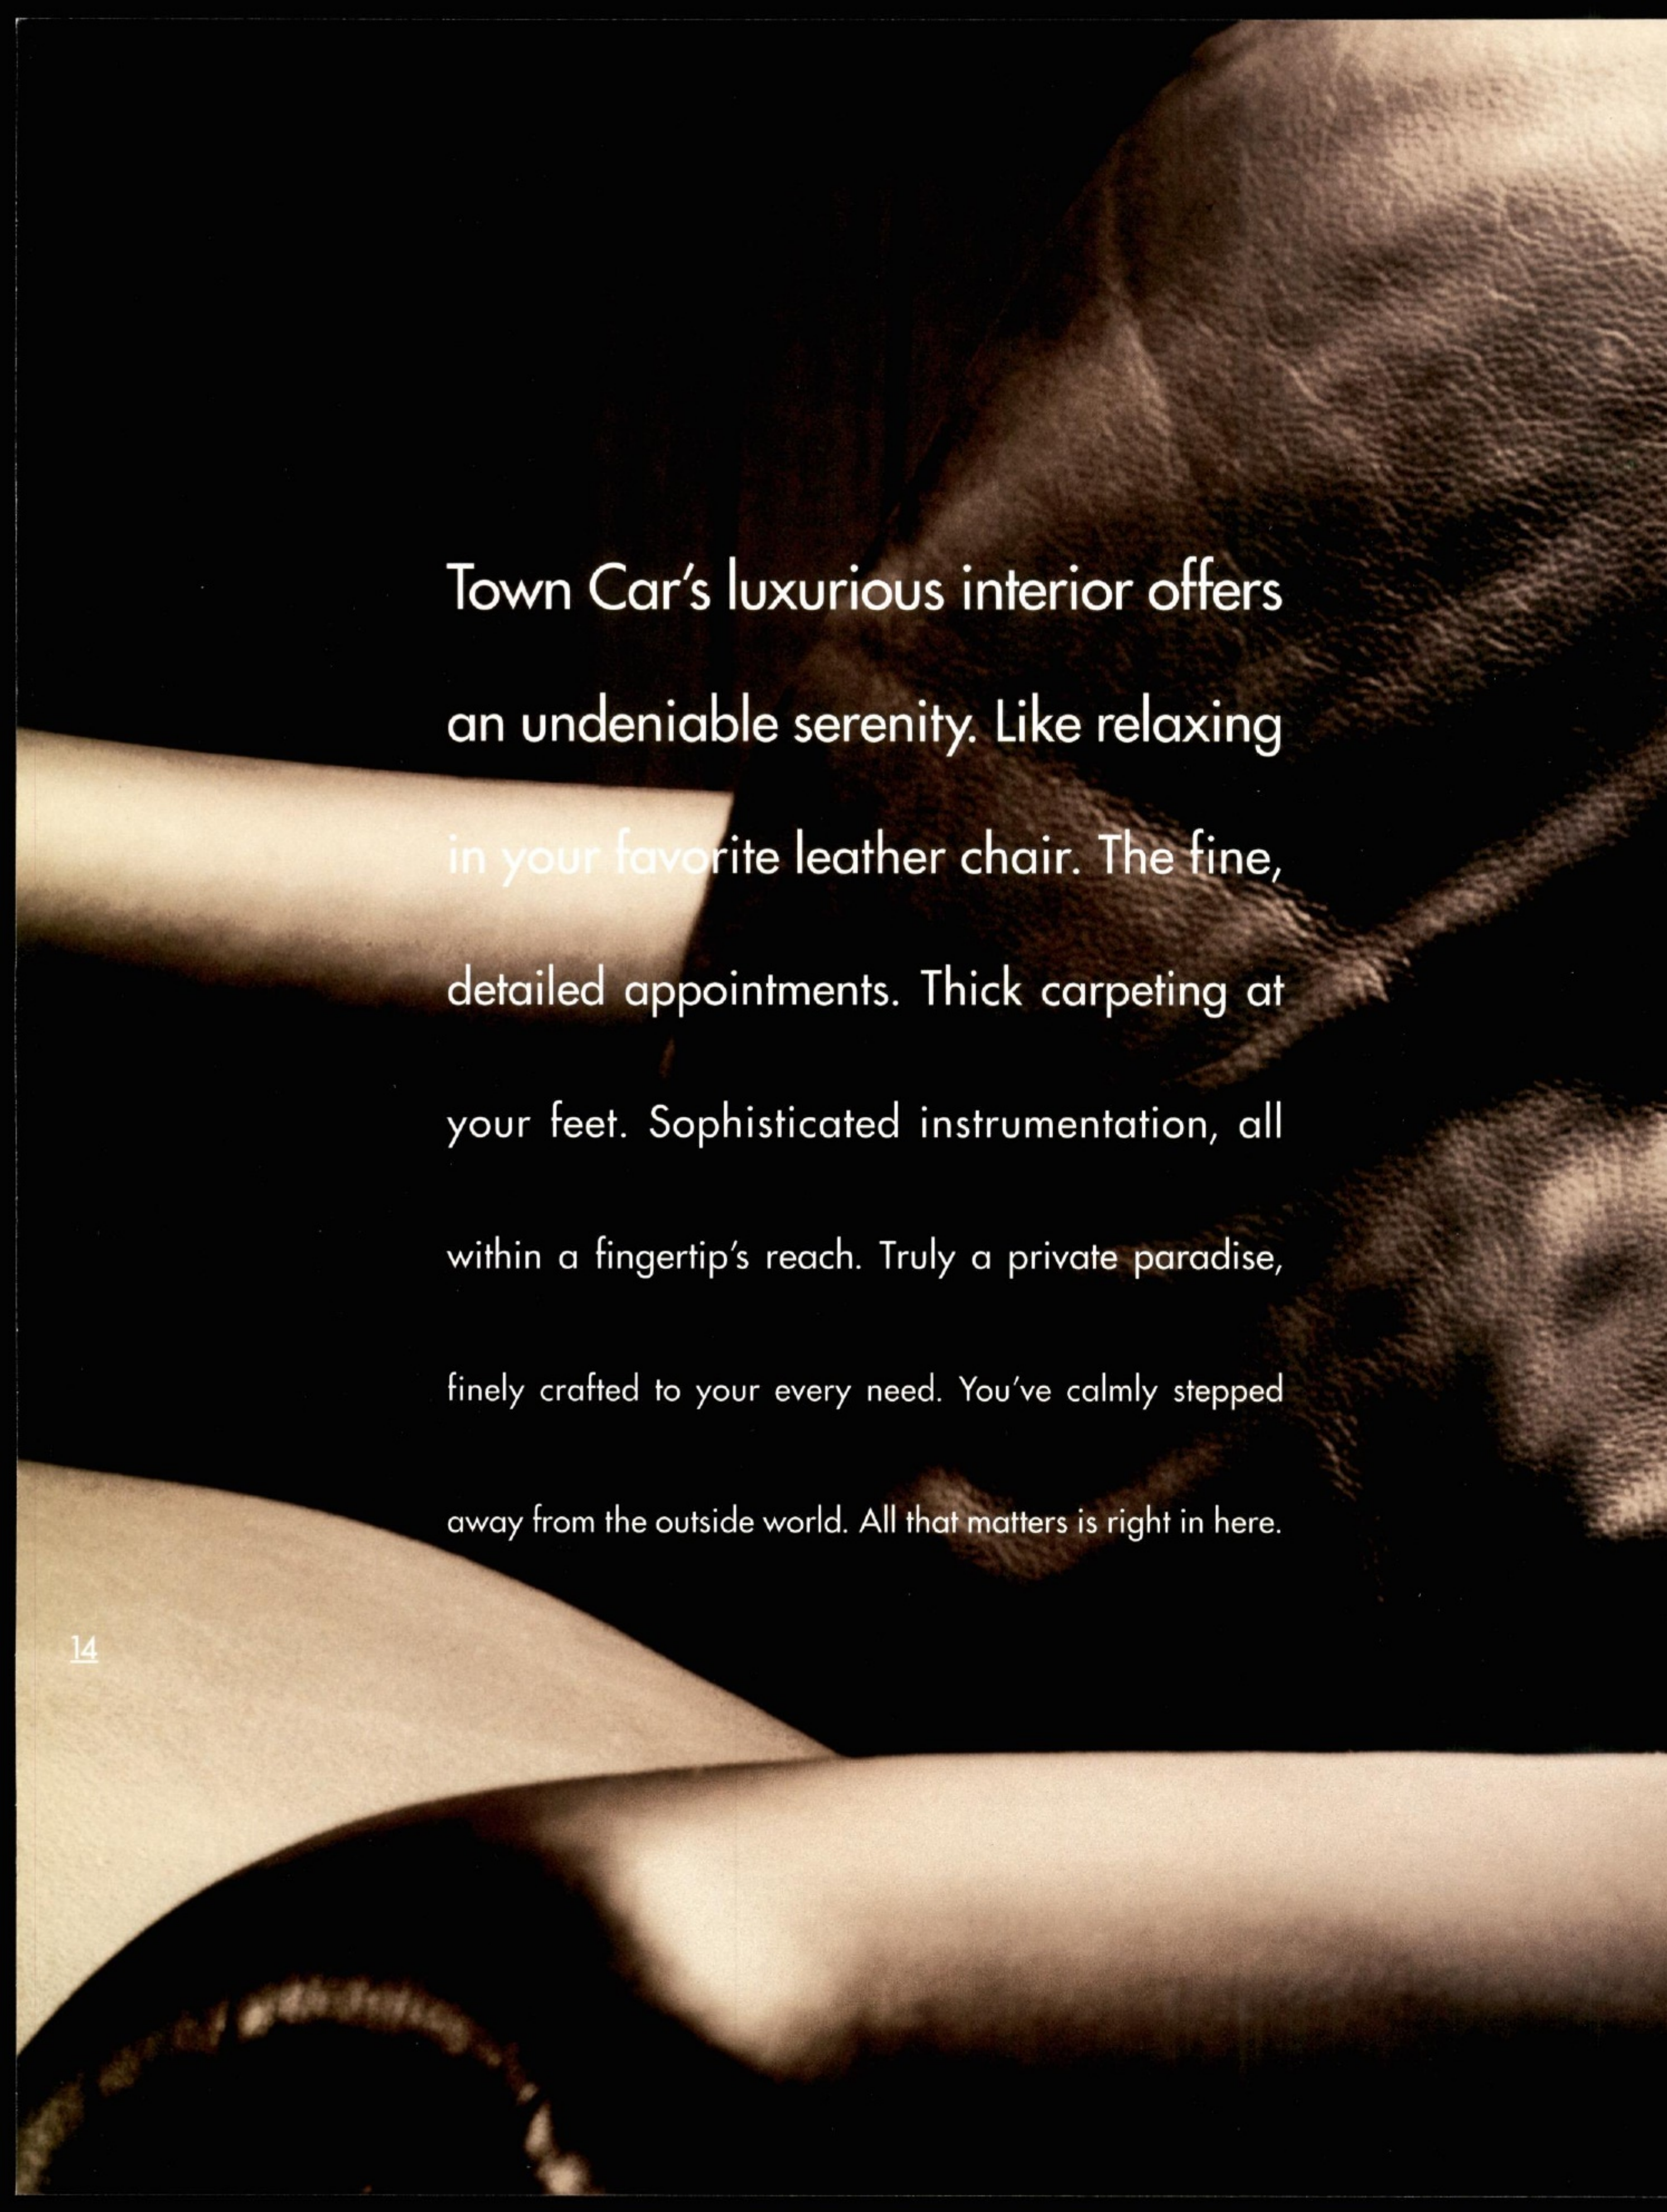

afternoon's

activities come

to a close, you

leave in exactly

the same way.

Town Car's luxurious interior offers an undeniable serenity. Like relaxing in your favorite leather chair. The fine, detailed appointments. Thick carpeting at your feet. Sophisticated instrumentation, all within a fingertip's reach. Truly a private paradise, finely crafted to your every need. You've calmly stepped away from the outside world. All that matters is right in here.

Lincoln Town Car Signature Series with Medium Parchment interior. Shown with available equipment.

A whole new world is awaiting you. Having eluded

you far too long already, its countless

amenities are now very much ready to pamper your

every desire. All you have to do is say the word.

Town Car is quite sophisticated, thanks to the **programmable keypad** located on the driver's side door. Keyless entry is possible with your personalized identification number or with your key fob.

The Cartier L comes equipped with **rear passenger vanity mirrors** — proving Town Car's luxury isn't just for the driver.

Elegant sixteen-inch **wheels** set off its good looks. Each series offers a spoke design to match the car's personality. Clockwise from top left: Snowflake aluminum (Signature); Gear Tooth aluminum (Executive); eight-spoke aluminum (Signature Touring Sedan) and Cartier Chrome aluminum (Cartier).

The **electronic automatic temperature control** and message center provide comfort and conveniently allow the driver to monitor data such as outside temperature, average fuel economy, miles-to-empty and average trip speed.

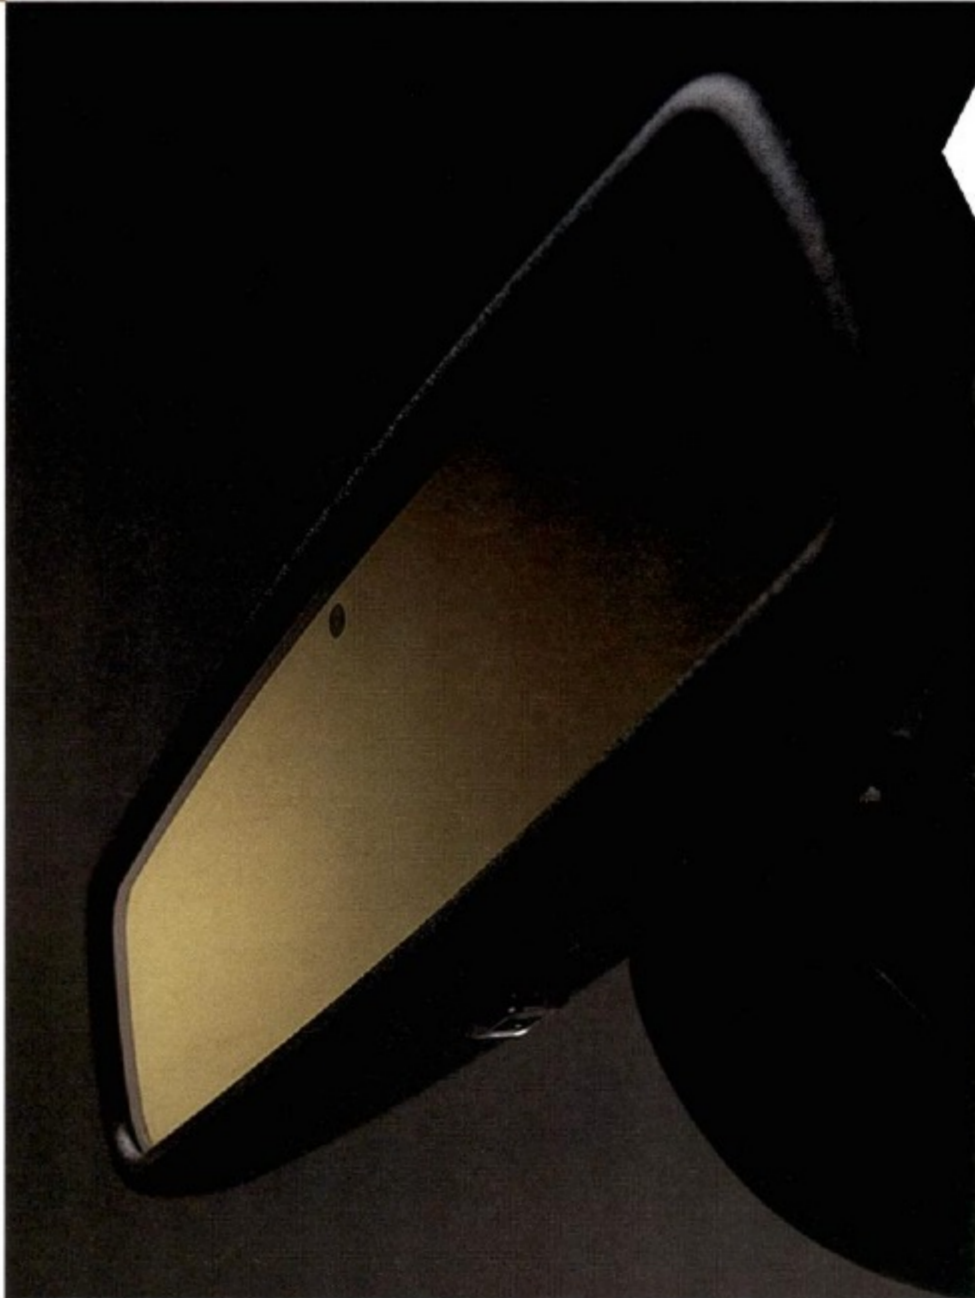

**Power-adjustable brake and accelerator pedals** allow drivers of varying heights and stature to assume the most comfortable driving positions. Pedals can travel over two inches, and the driver's preferred positions are retained in Town Car's available memory system.<sup>1</sup>

The electronic fingertip **speed control** on the Lincoln Town Car's wood- and leather-trimmed steering wheel<sup>1</sup> allows you to set your preferred speed without ever once taking your eyes off the road.

<sup>1</sup>Wood- and leather trim available with Cartier and Signature Series.

An available power **moonroof** lets in the sun, moon and stars. Or, if you prefer, just a pleasant touch of breeze.

Town Car features an **electrochromic mirror**, which has a rearward-facing sensor that detects glare from the vehicles traveling behind you. The mirror dims in proportion to the glare, and then clears when the glare is no longer detected.

<sup>1</sup>Available on Cartier and Signature Series.

Standard on the Executive and Signature Series is a **4.6L V8** with 220 horsepower. And for those enthusiasts who require a little more power under the hood, the Signature Touring Sedan Package and Cartier offer a potent 235 horsepower, dual exhaust engine.

**All-Speed Traction Control** helps improve the Lincoln Town Car's handling and traction on a variety of slippery surfaces by electronically and automatically distributing brake pressure between the rear wheels, modulating engine torque and adjusting the ignition.

**Cartier L**, a long wheelbase version with 7.7 more cubic feet of passenger volume, helps improve ride characteristics. In addition to its larger interior area, Cartier L includes rear illuminated vanity mirrors, heated rear seats, a folding rear armrest with storage bin, rear seat four-way head restraints, an electrochromic mirror with compass and other fine luxuries.

In the unlikely event of a complete coolant loss, the **fail-safe cooling system** will still allow Town Car to be driven for a short distance<sup>1</sup> by invoking a reduced cylinder firing sequence.

<sup>1</sup>Depending on load, ambient temperature and speed.

Even in bad weather, Town Car's **four-wheel disc Anti-lock Brake System** contributes to improved control during hard braking on a surprisingly wide variety of road surfaces.

Town Car is built on a **full-length ladder-type frame**. This type of construction, along with rear load-leveling air suspension, provides Town Car with additional rigidity and stability.

One of the more unexpected luxuries on the Lincoln Town Car are **heated exterior mirrors**, which quickly melt away bothersome ice and snow for better visibility and enhanced safety.

One of the amenities that make Cartier Town Cars so luxurious are standard **heated front seats**, which allow the driver and passenger to adjust their individual seat cushion temperature to any of five settings — an absolute must for those living in colder climates.

**HomeLink**<sup>®</sup> allows the Lincoln Town Car driver to quickly and easily program the universal remote (engineered right into Town Car's sun visor) to activate garage doors plus any two additional home-based devices, such as patio or driveway lights.<sup>1</sup>

<sup>1</sup>Available on Cartier and Signature Series.

The highly intelligent coil-on-plug integrated **ignition system** provides dependable spark sequences while also eliminating the need for spark plug wires. Combined with platinum-tipped spark plugs, this helps make Town Car's 100,000-mile tune-up<sup>1</sup> interval possible.

<sup>1</sup>Under normal driving conditions with routine fluid and filter changes.

To ensure we're offering our customers the best service possible, we proudly offer the **Lincoln Personal Consultant**. Just visit our Web site at [www.lincolnvehicles.com/pc](http://www.lincolnvehicles.com/pc) and one of our manufacturer's representatives will help with anything from price quotes to product features to arranging a test drive at your local dealer — at no cost or obligation.

A standard, **remote Keyless Entry system** provides both fingertip lock activation as well as a "panic" button, which sets off the horn and marker lights in case of an emergency. In addition, Town Car's autolamp feature keeps headlamps lit following ignition termination.

The **SecuriLock**<sup>™</sup> passive anti-theft system uses a specially encoded key to help protect the 2001 Lincoln Town Car against theft. If a nonencoded key or ignition bypass is detected, the ignition automatically disables itself — helping to further thwart any unsavory behavior.

Front and rear nitrogen-pressurized shock absorbers — precisely tuned to compliment the **Short- and Long-Arm front suspension** — deliver a quiet, comfortable ride, in spite of many road imperfections you might encounter while driving the 2001 Lincoln Town Car.

A wonderful match for Town Car's powerful engine, the **Watt's linkage rear suspension** improves straight line tracking and handling. This, along with the many other fine Lincoln luxuries, makes Town Car an absolute pleasure to drive — especially over long distances.

ENGINE		Drivetrain
LAYOUT		Front engine, rear-wheel drive
TYPE		SOHC V8 with electronic engine control
DISPLACEMENT		4.6 liter/281 cu in.
