

NEW 06 MERCURY MOUNTAINEER

MERCURY | NEW DOORS OPENED

## Stylish, refined, powerful.

Inside and out, a stylish evolution of Mercury's modern design theme graces the new 2006 Mountaineer with a **distinctive new level of sophistication**. Refined in many ways, Mountaineer features a stiffer frame and smoother, quieter ride, plus an all-new interior environment. And thanks to its new 292-hp 4.6L 3-valve V-8 engine and first-in-class 6-speed automatic transmission, standard on Premier, you'll also enjoy **more power than ever**. For added control and peace of mind when road conditions are everything from perfect to perfectly awful, the new Mountaineer also features **standard AdvanceTrac® with first-in-class\* Roll Stability Control\*\***.

Mountaineer's **all-new seating** is designed to give you the best of everything: sophisticated styling, remarkable comfort and easy-to-use versatility. A

perfect example: Mountaineer's available new 3rd-row 50/50 split seat with available **class-exclusive PowerFold™** operation. Just touch one or both of the PowerFold buttons to quickly fold the 3rd-row seat down, opening up 43.9 cu. ft. of cargo space.

Up front, Mountaineer's available new DVD-based Navigation System with intersection programming actually **calls out upcoming street names**. The system's colorful 6.5" LCD touch screen and large control buttons make it easy to access information. It only takes seconds to compute complex routes. And to help you reach all this splendor, available new power-deployable running boards **conveniently await your step**.

DISTINCTIVE NEW SOPHISTICATION

POWERFOLD 3RD ROW

STATE-OF-THE-ART NAVIGATION

POWER-DEPLOYABLE RUNNING BOARDS

The 2006 Mountaineer has the **most standard safety features in its class**. In fact, it's designed to meet all known U.S. Government frontal and side-impact crash requirements through the 2010 model year. Within milliseconds of an impact, Mountaineer's new, **class-exclusive Intelligent Safety System™** uses an advanced crash-sensing computer to interpret data and determine the proper response. In the event of a frontal collision, Mountaineer's new adaptive front airbags use first-in-class adaptive venting technology to help tailor airbag power to occupant size and needs. New front-seat side airbags are also standard. And our patented available Safety Canopy™ System features 2nd-generation side-curtain airbags that are larger than in the past and include new roll-fold technology.

\*Truck-based Midsize SUV class. \*\*Remember that even advanced technology cannot overcome the laws of physics. It's always possible to lose control of a vehicle due to inappropriate driver input for the conditions. For more information on AdvanceTrac with RSC<sup>2</sup> visit [mercuryvehicles.com](http://mercuryvehicles.com)

A dynamic, **all-new interior experience** awaits everyone inside the 2006 Mercury Mountaineer. The all-new instrument panel design includes a sleek gauge cluster with stylish satin-aluminum accents and a centrally located message center. New seating contours deliver a plush experience with just the right amount of firm support. Premier's standard leather-trimmed seating is available in your choice of Charcoal Black (shown) or Camel with Sand embossed Preferred Suede® inserts. And even the new high-release door handles have been thoughtfully redesigned, with curved contours that follow the shape of a hand at rest.
