## 8-SPEED AUTOMATIC TRANSMISSION

The launch ratios for all eight gears have been optimized, tuning this 8-speed transmission to the exact structure, size and weight of your Jeep® Gladiator. Advanced software adjusts performance on the fly, based on variables such as temperature, cornering, hill grades, 4x4 gears and towing. Smooth and virtually seamless shifts, both up and down, deliver a consistently smooth ride. Available.

## 6-SPEED MANUAL TRANSMISSION

You'll really get into gear with this manual transmission. It hands you low 1st and Reverse gears, which are great for off-roading. It comes standard, matched to either a Command-Trac® 4x4 system on Sport S and Mojave or paired with the Rock-Trac® 4x4 system on the Rubicon® model.

# GET A GRIP

WITH STAND-ALONE CAPABILITY

JEEP® GLADIATOR SOLDIERS ON WITH AUTHENTIC FOUR-WHEEL-DRIVE (4WD) SYSTEMS THAT WORK INDEPENDENTLY TO GET THE JOB DONE.

## COMMAND-TRAC® 4x4 SYSTEM

This part-time, shift-on-the-fly system divides torque 50/50 between front and rear axles, shifts smoothly at speeds up to 72 km/h (45 mph) and has a 2.72:1 low-range gear ratio. Standard on Sport S and Mojave.

## ROCK-TRAC® 4x4 SYSTEM

Rubicon® rides with this extreme 4x4 system. Its 4:1 low-gear ratio allows Jeep® Gladiator Rubicon to crawl at a low speed for greater control and increases the amount of torque available at the wheels. Standard on Rubicon.

## SELEC-TRAC® FULL-TIME 4x4 SYSTEM

An active 4x4 transfer case does all the thinking, providing optimum traction for all types of conditions. The Smart Lock feature keeps the system engaged during off-roading or slippery road conditions. Available on Mojave.

## ROCK-TRAC FULL-TIME 4x4 SYSTEM

This system offers the capability of Rock-Trac® with the added convenience of a full-time, active transfer case that can provide optimal traction over changing road conditions. Available on Rubicon.

**FORWARD-FACING OFF-ROAD**

**TRAILCAM<sup>3</sup> CAMERA** Provides a view of the trail directly in front of your vehicle, helping you pick your path. Available on Mojave and Rubicon.<sup>®</sup>

Both Rubicon and Mojave add heavy-gauge, steel rock rails for rocker panel protection, while Rubicon also includes rock rails mounted behind the rear wheels to help protect the bed. Standard.

**SELEC-SPEED<sup>®</sup> CONTROL** Manages vehicle speeds of 0.9 km/h (0.6 mph) to 8 km/h (5 mph) in 4-LO while traversing off-road terrain without requiring the driver to control the throttle or the brake. This helps the driver focus on steering the vehicle, letting Jeep Gladiator put the right amount of power or braking onto the ground. Standard with 8-speed automatic transmission.

**HILL START ASSIST (HSA)**

Works to prevent Gladiator from rolling when starting on an uphill gradient. Standard.

**OFF-ROAD PAGES** Track pitch and roll, steering angle and 4x4 Mode with brilliant graphics displayed on your touchscreen, instrument cluster display or through the Jeep App<sup>6</sup> on your smartphone. Standard on all models.

# » LOCKED IN

## TRU-LOK® DIFFERENTIALS

Front and rear electronic-locking differentials deliver maximum torque to both wheels, maintaining forward momentum for the ultimate in 4x4 traction. An instrument-panel-mounted rocker switch can lock either the rear (on Mojave and Willys models) or both (on Rubicon® models) axles. Paired with the Rock-Trac® 4x4 system on Rubicon models. The rear axle can also be locked in 4-HI.

## OFF-ROAD+

When engaged, it automatically deciphers the type of terrain Jeep® Gladiator is operating on and makes adjustments to key systems, including throttle, Selec-Speed® Control, traction control and transmission shift mode, for optimal performance. If enabled in 4-HI, it tailors operation for higher-speed sand performance. If enabled in 4-LO, it adjusts operation for low-speed rock-crawling manoeuvres. Standard on Willys, Mojave and Rubicon.

## FRONT SWAY BAR DISCONNECT SYSTEM

Flip a switch and the sway bar can be disconnected in 4-LO and 4-HI, allowing the front suspension to travel up to an additional 30 percent. It reconnects automatically at speeds above 28 km/h (18 mph). Standard only on Rubicon.
