TOYOTA
We're proud to be here.

A new prestige car for America  **TOYOTA CROWN**

*Handsome sculptured body lines ...
Artistically detailed interior ...
Distinguished quiet performance ...*

*All mark
Toyota Crown
as a quality automobile.*

Toyota Crown is a triumph of traditional Japanese craftsmanship and precision. The new, wide double-drive car is here. Toyota Crown is now available for the discriminating American car buyer. As the top car in the Toyota line, Crown offers you every driving convenience you could ask for and at a price no other car in its class can touch.

The interior you step into the elegant automobile, one you know that you feel right at home. All the conveniences, comforts and luxuries you want are there. Although an import, Toyota Crown is designed for American drivers. The complete interior — deep cushion, shock strap around, working bucket seats, built-in, deep-pile carpeting floor and trunk, padded dash and console, door and headliner — all are color coordinated, built to approximate and style to match.

The engine?
Crown, you want it? It's there. Touch the accelerator. Expect to go!
Not only is Crown's improved 2000cc, overhead-cam, four-cylinder

head, four-cylinder engine provides smooth and quiet. It's dependable for mile after economical mile from the first time the hood is raised through start.

And to match your drive, you can choose either a sporty 4-over-the-hill transmission or equally sporty-looking Toyota's automatic over the floor console. Toyota's 4-speed locking transmission construction. And Crown is Toyota's leading automobile in quality, style and craftsmanship. It shows you its capability, its extra equipment, its performance and its maintenance-free dependability.

*A just-the-right-size station wagon...
Toyota Crown Custom.*

Some station wagons are just big sedans... others are almost too small for the job. But Toyota Crown Custom is just the right size to accomplish a wagon's chores and just the right size for your family. Like the Crown sedan, the Crown Custom offers a host of luxury accessories at no extra cost. It's big for third row... you can carry more people comfortably. And for entertaining or sleeping, the rear seats fold down to make room for a bed, or you can use the rear window shade that folds over the rear seats with the easy loading. Equipped with all Crown Custom's luxury features, the Crown Custom is a proven rear seat loader that can be operated from the dash or the rear gate.

The Crown Custom wagon offers the same dependable and economical 2100 cc engine that powers the Crown sedan. Take off the road freely, too. In Toyota Crown Custom's Custom Package, you can choose to have the front or rear seats upholstered in leather. Either way you choose, you'll want to get the Supreme painting and window glass you want.

That's your privacy window and shade from the dash or from the back of the rear seat.
