VNR STRAIGHT SERIES

DUMP TRUCK

THE ANSWER TO OVERSPEC'ING

For every vocational job that involves extreme loads and rough terrain, there are a dozen that just require you to move material down the road. Volvo believes you shouldn't have to order vocational specs for working on the tundra, when you are simply traveling the turnpike.

Introducing the VNR Straight Series, trucks designed for vocational applications where fuel economy is just as important as indestructability.

The VNR Dump Truck is perfect for hauling smaller aggregate like dirt and gravel. It features a chassis ideal

for aluminum or lightweight dump bodies. Designed to run in applications that work 90% on the road, it easily transfers from hard packed loading areas back on to the highway.

This VNR can be selected with a D11 or D13 Volvo Power engine and up to 500 hp. Paired with our innovative I-Shift, you'll enjoy tremendous load capacity and the benefits of fuel-efficient offerings like Volvo's Eco-Torque Performance package.

CAB MODEL – VNR 300
