VNR STRAIGHT SERIES

PRODUCT GUIDE

Everything you need, nothing you don't

For every job that involves extreme loads and rough terrain, there are a dozen that just require you to move material down the road. Volvo believes you shouldn't have to order vocational specs for working on the tundra, when you are simply traveling the turnpike.

Introducing the VNR Straight Series, solutions for the most common vocational applications: Dump Truck, Roll-off, Flatbed, and Box Truck. The Straight Series is designed for vocational applications that spend 90% of their time on-highway, where productivity and fuel efficiency are just as important as indestructability.

With the option of Volvo Power D11 or D13 engines and the innovative I-Shift, these trucks easily handle off-road jobsites with hard-packed surfaces. You'll enjoy productivity without sacrificing power or torque. It's heavy-duty dependability that still lightens the load of fuel costs.

Dump Truck

The VNR Dump Truck is perfect for hauling smaller aggregate like dirt and gravel for construction and land development. It features a rugged chassis and frame rails designed for aluminum or lightweight dump bodies.

Roll-Off

The VNR roll-off is ideal for local urban and suburban pick-up where maneuverability is crucial. Constructed to handle the rigors of canister pickup, this VNR also provides the PTO options necessary for refuse and debris hauling.

Flatbed

Made for congested pick-up and delivery areas where full-size flatbed trailers simply can't go. This VNR handles urban traffic with ease, thanks to industry-leading visibility and wheel cuts. Just as comfortable on jobsites as on city streets.

Box Truck

Delivery vans are notorious for being underpowered, but the VNR Box Truck can offer up to 455 hp and 1,850 lb-ft. of torque, without sacrificing precious payload. So, wear and tear won't rob you of engine life. Available in Class 6 and 7 configurations.
