**1** Never program while driving. GPS mapping and 3D navigation may not be detailed, available in all areas or reflect current road regulations. **2** Class based on JD Power mid-size pickup segmentation. Based on the latest available competitor information. **3** This is a driver convenience system, not a substitute for active driver involvement. The driver must remain aware of their surroundings and be prepared to take corrective action to avoid collisions. **4** No system can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the warning lamp flashes, the driver needs to use less throttle and adapt speed and driving behaviour to prevailing road conditions. **5** Be sure to follow all instructions in Owner's Manual for removal of top and doors, and lowering of windshield.
