

CHRYSLER
SEBRING
CABRIO

It is a place where engineering and beauty come together. It embodies a convergence of craftsmanship with technology and functionality with design. Built to entice with every drive in the most natural of manners, it represents a passion for ingenious engineering and stunning style. Engineered beautifully, this is a vehicle unlike any other.

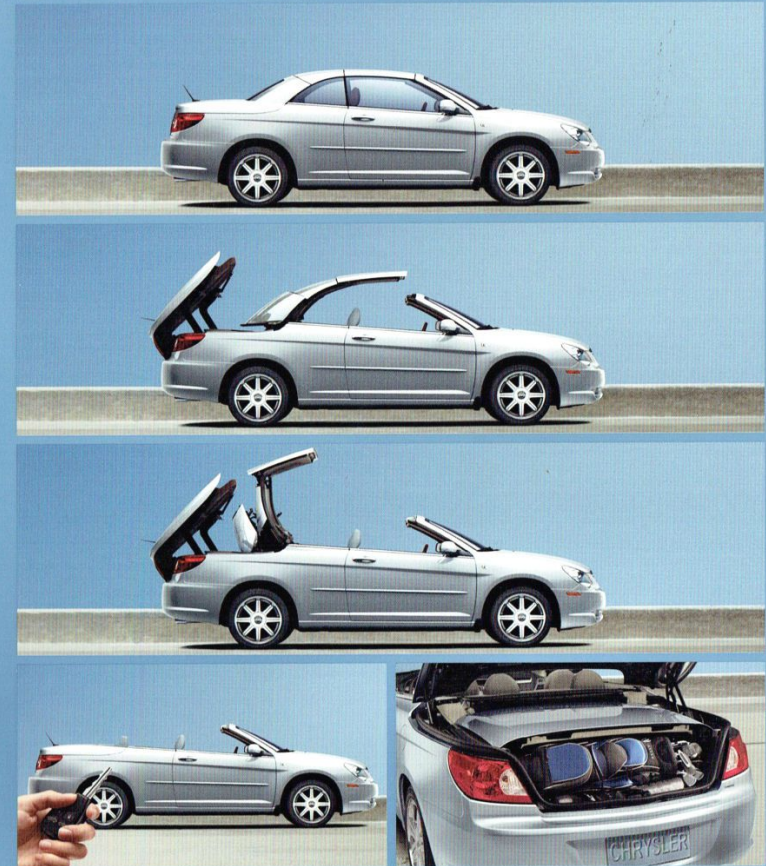

THIS IS THE ALL-NEW CHRYSLER SEBRING CABRIO.

LIMITED

The design started with a single goal: deliver a convertible that combined style, technology and practicality unlike any other. In the end, the all-new Chrysler Sebring Cabrio Limited had arrived. The retractable hardtop features electronic latching and, with the simple push of a button on one's key fob or instrument panel, demonstrates a mechanical choreography that cannot be matched. The transition from top-up to top-down with hardshell tonneau cover in place is executed in seconds. Sebring Cabrio's prowess continues into its power plant. The state-of-the-art 2.7L V6 engine mated with an all-new six-speed AutoStick® transmission drives Limited's standard 18-inch wheels. Sebring's fully independent suspension, with Electronic Stability Program (ESP), confidently absorbs the road as the convertible top celebrates the sky. Standard folding, heated, body-color mirrors make it easier to navigate around the tightest of spots.

The sky is yours with the simple push of a button. A top retracts and folds, a boot opens and closes, a tonneau cover emerges and engages with nothing more than a finger's command. Not only does Sebring Cabrio provide a one-touch power roof system that is a marvel of engineering, it is also one of the first four-passenger convertibles to offer either a retractable soft top or a retractable hardtop. A cloth top is standard on every Sebring Touring. The hardtop on Sebring Limited provides unparalleled four-season comfort. Whether outfitted with its soft top or hardtop, Sebring Cabrio is able to accommodate two golf bags in its trunk (a perfect excuse to indulge in a spontaneous round). Every Sebring Cabrio features a luggage protector that protects the retracted top from the cargo and vice versa.

Sebring Cabrio Limited in Slate Grey/Light Slate Grey Leather with optional Technology Group which includes MyGIG™ Multimedia Infotainment System and UConnect® hands-free communication

Manual transmission shown above. Not available in Australia

Sebring Cabrio Limited entices four passengers into its two-tone setting with standard premium leather-trimmed seats and an interior that is distinguished by tortoiseshell and chrome accents. Sculpted with smartly integrated seat belt shoulder harnesses, the Sebring Limited's leather-trimmed front seats even feature heating elements to counter the chills of a fall night. A six-way power driver seat is standard. At every stitch, Sebring's interior delivers the most approachable quality.

Sebring Cabrio Limited in Slate Grey/Light Grey Leather

Manual transmission shown above. Not available in Australia.

It is an instrument panel striking in its simple elegance and technological sophistication. Anchored in the fuselage of Limited's wing-shaped dashboard is a multimedia marvel: the available MyGIGSM Infotainment System with UConnect hands-free communication.

Standard automatic temperature controls are as adaptable as they are convenient. Ingenuity extends to Sebring Cabrio's key fob, which provides a one-touch button for the power-retractable top. Celebrate the spirit of invention inside Chrysler Sebring.

TOURING

Leave it to Chrysler Sebring Cabrio to provide a package that so encourages motoring that it is worthy of the Touring name. With the standard power-retractable soft cloth top, Sebring Cabrio Touring's standard 137kW 2.7L V6 engine has the power to match one's open-air exuberant stride for spirited stride. And in the spirit of efficiency and innovation, Chrysler engineers massaged this exciting V6 with a clever new manifold tuning valve that further improves the sensation of power in everyday driving while still providing exceptional efficiency. Combined with standard 18-inch aluminium wheels and standard safety features, such as four-wheel disc antilock brake system (ABS) and Electronic Stability Program (ESP) with Brake Assist, Sebring Cabrio is equipped with features that set a new standard for both open and closed touring for four adults.

Sebring Cabrio provides the kind of instrumentation by which all other instrument clusters could be gauged. Touring's standard Electronic Vehicle Information Centre (EVIC) delivers an interactive three-line digital display to monitor everything from temperature and compass direction to individual tyre pressure, trip and audio data. Sebring Cabrio's extensive standard feature list also includes YES Essentials® stain resistant, odour resistant, antistatic seat fabric.*

*Not compatible with aftermarket fabric-protecting coatings. Heated/cooled cup holder standard on Limited only.

Sebring Cabrio Touring in Modern Blue Pearl

The quad headlamps assume an assertive expression. The integrated fog lamps add further function to a subtly sculpted fascia. From any angle, Sebring's stance radiates a poise that invites glances as effortlessly as it invites the sun to shine. A dedication to pure function is

brilliantly matched by the design itself. Always accessible, Sebring Cabrio is as comfortable being loaded with ingenuity as it is being loaded with four adults. For those drawn to the allure of open-air driving, Sebring Cabrio was designed to fully appeal to both heart and mind.

Every aspect of Sebring Cabrio Touring's interior* has been distilled to the purest form. The audio faceplate is designed for straightforward and simple control of Sebring Cabrio's various sonic enhancements, including quick MP3 access via an integrated audio input jack. It is easy to find yourself keeping time with your own music and on time for appointments with a classic, analog-style clock centered in the instrument panel. The elegance of atmospheric lighting not only enhances the environment, but helps passengers keep an eye on their belongings. A number of Genuine Chrysler Accessories are available to reflect your own added design inspiration.

*Touring with leather trim shown not available in all markets.

TECHNOLOGY

It was designed to be a wish list delivered. Brilliant, technologically savvy comforts surround the cabin. And entry into this high-tech playground is simple thanks to the ingenuity of the Sebring key fob. Sebring Cabrio Limited's **heated/cooled cup holder** keeps cool beverages nicely chilled or offers a hot spot for a warm drink to counter the chill of a drive with the vehicle's top dropped. A switch on the console allows for the option of ambient temperature, heating up to 60°C or cooling to a near-freezing 1.6°C. Limited's available voice-activated, hands-free, in-vehicle communications system, **UConnect[®]**, seamlessly integrates with your **Bluetooth[®]** capable mobile phone. **YES Essentials[®]** stain resistant, odour resistant, antistatic seat fabric¹ is standard on Sebring Cabrio Touring. After all, if technology does not simplify your life, what place does it have in your driving experience?

RETRACTABLE TOP SYSTEM

Sebring Cabrio's retractable top system exemplifies the Chrysler mission of delivering automotive ingenuity with ease. It was designed to open and close the tonneau cover and unlock, retract and stow the entire top system with little more than a button push required on behalf of the driver. Its high-pressure hydraulic-powered flexibility allows it to disappear — whether in hardtop or soft-top form — into the boot while still providing enough room for two golf bags.

- Sebring Cabrio is one of the first four-passenger convertibles to offer either a **power soft top** model or an **retractable hardtop** variant.
- Chrysler Group firsts include **convertible-top-down** and **express-down-front-windows** button on the key fob, **three-piece power retractable hardtop**, **automatic latching** for soft top or retractable hardtop, and a **power hard tonneau**.
- A sensor in the boot detects if the **folding luggage protector** is in place, ensuring that the boot contents and top itself are protected prior to stowing the convertible top.
- With the simple gesture of a push of a button, the mechanical choreography of a **retractable top** is executed with the greatest of ease.

INFOTAINMENT

An automobile is a statement of personality, a member of the family and, increasingly, a home away from home. Your comfort must be paramount. Your senses stimulated. The most comprehensive and advanced system ever deployed in Chrysler vehicles does just that. The available **MyGIG[™]**

Multimedia Infotainment System on Limited uses its **20GB hard disc drive** to store music files, playlists, maps, points of interest, JPEG images, and more, while delivering the AM/FM/CD/MP3 playback you expect from even the most simple of systems.

- The **JPEG photo viewer** allows you to personalise the menu background as you would on your personal computer. Images are easily imported onto the MyGIG hard drive via the face-mounted USB port.
- It can store over **1,000 digital music files**, easily imported from your personal CDs or via the USB port.
- The same 6.5" screen that broadcasts its **GPS navigation** mapping also supports DVD video playback when vehicle is parked.

QUIETNESS

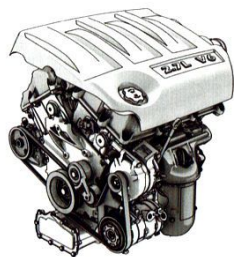

An exceptionally stiff body was designed with **computer-aided engineering** that orchestrated the various frequencies of individual components and systems to achieve maximum noise reduction. Sebring Cabrio achieves its success thanks to the sum of its parts. From the **aerodynamic headlamp modules** to the **windscreen** that reduces turbulence and helps diminish wind noise, every component of the Sebring Cabrio was sculpted with silence in mind. As is the case with Sebring's **low-profile windshield wipers**, its exterior mirrors not only help counter wind noise, they divert water from the side windows. **Acoustic engine covers** help keep the workings of a powerful engine confined to the compartment itself.

POWERTRAIN

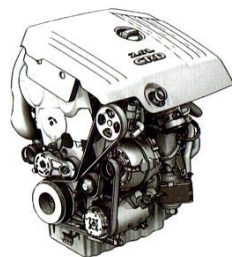

Sebring offers two modern engine options to suit your performance needs. Each engine represents an advancement in engine technology and efficiency. Both engines utilise Electronic Throttle Control to improve throttle feel.

- The standard **2.7L V6** produces 137kW @ 5500 rpm and 256 Nm of torque @ 4000 rpm. It uses an all-new **intake manifold** tuned specifically for low-end torque over top-end power. The result is an ample dose of immediate power around town and under throttle.
- Only available in some markets, the **2.0L DOHC 16-valve I-4 Turbo Diesel engine** combines performance and efficiency. Its healthy turbocharged output — 103kW @ 4000 rpm and 310 Nm of torque @ 1750–2500 rpm — also delivers fuel savings. Its **six-speed manual transmission** employs close gear ratios which contribute to the diesel engine's economy and the smoothness of Sebring's ride.

Not available in Australia.

Vehicle shown with optional windstop.

HANDLING

Each element of Sebring's drivetrain was designed to enhance ultimate satisfaction with every driving experience. Sebring's nimble, comfortable handling is a direct result of advanced suspension geometry and power components.

- **A European-tuned independent suspension** keeps each tyre affixed to the road for superior control.
- **Front-wheel drive** contributes to stability and traction on inhospitable roads. The system's equal-length half shafts smoothly transmit power to both wheels, preventing "torque steer."
- **Speed-proportional steering** gives light parking effort without affecting performance feel and speed.

SAFETY AND SECURITY

As a cabrio which leaves absolutely nothing to compromise, it was imperative for Chrysler designers to give Sebring every possible advantage when it comes to safety and security features. From the extra protection of Limited's **hardtop** to the extra grip of **speed-rated radial tyres**, they have succeeded. Passive safety features include **Next Generation driver and front-passenger air bags***, seat-mounted inflatable driver and front-passenger **supplemental side-impact air bags***, and front seat belts with **pretensioners and load limiters** are just the beginning. There is also an **energy-absorbing steering column and steering wheel**, a body constructed with **side-impact beams in every door**, a **front crumple zone** and an altogether **enhanced rear structure**. Technological ingenuity abounds as far as active safety features are concerned, with a standard **four-wheel disc antilock brake system (ABS)** and **Electronic Stability Program[†] (ESP)** with **Brake Assist**. The standard **Electronic Vehicle Information Centre (EVIC)** constantly monitors individual tyre pressures. At every corner, when it comes to safety features, Sebring Cabrio was born to provide.

*Always sit properly in the seat with the seat belt fastened. Children 12 and under should always be in a backseat correctly using an infant or child restraint system or the seat belt positioned correctly for the child's age and weight. No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESP warning lamp in the speedometer flashes, the driver needs to use less throttle and adapt speed and driving behavior to prevailing road conditions. [†]Always drive carefully, consistent with conditions. Always wear your seat belt.
